

BAKER COLLEGE
STUDENT LEARNING OUTCOMES
RAD2410B Patient Care & Assessment
4 Semester Hours

Student Learning Outcomes and Enabling Objectives

1. Explain proper patient assessment techniques in a radiography setting.
 - a. Identify potential physical needs of patients.
 - b. Examine the safety and transfer of patients.
 - c. Discuss interactions with diverse patients.
 - d. Explain contrast reactions and other medical emergencies.
 - e. Investigate the needs of trauma patients.
2. Explore proper radiographic clinical skills.
 - a. Compare roles and responsibilities of radiographers within the health care team.
 - b. Express characteristics of professionalism in practice.
 - c. Build communication skills.
 - d. Explain care of trauma patients.
 - e. Discuss the radiographer's role during a medical emergency.
 - f. Summarize management of contrast studies.
 - g. Discuss the impact of law and ethics in the clinical setting.
3. Explain proper safety procedures in the professional radiography setting.
 - a. Explain proper handling of tubes, catheters, lines, and other devices.
 - b. Discuss anticipated hazards in mobile and surgical radiography.
 - c. Explain contrast reactions and other medical emergencies.
 - d. Explore Infection control and aseptic techniques.

Big Ideas

- Clinical Care Skills
 - Patient Assessment
 - Safety Procedures (Surgical and Medical Asepsis)
 - Law and Ethics
-

These SLOs are not approved for experiential credit.

Effective: Fall 2019
