

**BAKER COLLEGE**  
**STUDENT LEARNING OUTCOMES**  
RDT 3320 Introduction to Clinical Practicum II  
3 Semester Hours

---

**Student Learning Outcomes and Enabling Objectives**

1. Demonstrate safe clinical practices.
  - a. Apply safe patient care practices.
  - b. Apply radiation safety procedures during clinical practice.
  - c. Identify quality assurance measures and issues relevant to the clinical site.
  - d. Explain procedures in response to emergencies, disasters and accidents.
2. Demonstrate intermediate patient set up skills.
  - a. Identify the treatment planning process and its purpose.
  - b. Position patient in accordance with institutional guidelines.
  - c. Prepare immobilization devices.
3. Use radiation therapy equipment.
  - a. Differentiate between the machines used in delivering radiation therapy treatments.
  - b. Apply theory to technique while operating equipment.
4. Display professionalism while interacting with patients, family members, treatment team members and the general population.
  - a. Demonstrate appropriate written and oral communication skills, including record keeping.
  - b. Apply concepts of teamwork.
  - c. Demonstrate legal and ethical practices.
  - d. Observe patient confidentiality, including HIPAA, and patient rights during clinical practice.
  - e. Operate within the radiation therapy scope of practice.
5. Investigate career information for the field of Radiation Therapy
  - a. Explore interview skills

**Big Ideas**

- Safety
- Professionalism
- Correlate theory and technique

**Essential Questions**

1. Why is it important to display professionalism in the work place?
  2. What is the importance of safety?
  3. What is the importance of applying theory to technique?
  4. How does communication impact the clinical environment?
-
