BAKER COLLEGE MISSION AND PURPOSES

The mission of Baker College is to provide quality higher education and training which enable graduates to be successful throughout challenging and rewarding careers.

To this end, the following purposes have been established:

- To prepare students for competency in business, health, human services, and technical careers in today's global economy.
- To provide general education which expands students' horizons, develops strong communication skills, and encourages critical thinking.
- To provide students with practical experience and training in a chosen field of study.
- To encourage social and classroom related activities which promote both personal and professional growth.
- To enhance students' success through continuous assessment and improvement of teaching, learning, and institutional effectiveness.
- To assist graduates throughout their careers in securing employment and improving career opportunities.
- To encourage graduates to continue their education and to lead effectively through service in a world without boundaries.
- To offer graduate programs which provide students with advanced study, research, scholarly activity, and the opportunities for professional development.

BAKER COLLEGE INSTITUTIONAL STUDENT LEARNING OUTCOMES

Students will demonstrate upon the completion of their programs:

- "Career-ready" knowledge and skills in the chosen career field.
- Behaviors and attitudes that promote success in the workplace as well as promote effective social interaction with diverse peoples across a range of situations.
- Information literacy which includes recognizing the need for information and identifying, locating, evaluating, and effectively using that information.
- Effective communication, including the use of technology, in various contexts and situations and with a variety of audiences.
- Critical thinking skills including analysis and synthesis both within the career field and in more general contexts.
- Effective problem-solving skills which are applicable to the field of study, the workplace, and other life situations.
- Broad-based knowledge, which includes an understanding of cultural, ethical, social, political, and global issues.

THE BAKER COLLEGE SYSTEM - A BRIEF HISTORY

Within a few years on either side of the turn of the twentieth century, two proprietary institutions of higher education were founded, sharing a common mission—to provide students with the skills needed for employment in the great industries of their times. In 1965, after half a century of separate but parallel existence, the two institutions came together under a single management group headed by Robert Jewell of Muskegon.

The organization has flourished and is now known as the Baker College System, it is the largest independent college in Michigan, with over 38,000 students in more than 150 programs at 17 on-ground locations and one virtual site. Throughout the years Baker College has maintained its original mission: to provide quality higher education and training which enable graduates to be successful throughout challenging and rewarding careers. Following are some highlights in the history of the Baker College System:

1888 Entrepreneur Woodbridge Ferris founded Muskegon College.

1911 In a similar venture, Eldon E. Baker founded Baker Business University.

1965 Robert Jewell purchased Flint's Baker Business University and brought both schools under a single management group.

 $1969 {\rm Muskegon \ College \ became \ a \ non-profit}$

1974 The two colleges received authorization to grant the Associate of Business degree. Baker Business University became Baker Junior College.

1977 Baker Junior College became a non-profit corporation.

1981 The colleges were approved to grant the Associate of Applied Science degree.

1983 An Owosso branch of Baker Junior College was established on the property of the former John Wesley College.

1985 After each receiving regional accreditation from Schools, the North Central Association of Colleges and Schools, the three campuses merged to form the Baker College System. Muskegon College began offering extension classes in Cadillac.

1986 The Baker College System was authorized to grant the Bachelor of Business Administration degree. Baker Junior College became Baker College of Flint.

1988 The renovated Mandeville School property becomes Baker College of Flint, its current site.

1990 Baker College acquired locations in Pontiac, Mount Clemens, and Port Huron, forming Baker College of Eastern Michigan. Muskegon College changed its name to Baker College of Muskegon. The Corporate Services division was formed in Flint to deliver courses and degree programs to off-campus locations.

1991 The Cadillac extension of Baker College of Muskegon opened a new, 40-acre campus site.

1992 The Pontiac campus relocated and became Baker College of Auburn Hills.

1994 The Center for Graduate Studies opened in Flint, launching the System's first graduate degree program, the Executive Master of Business Administration with a concentration in Leadership Studies. Jackson Business Institute was acquired to create Baker College of Jackson.

 $1995 {\rm \ Baker \ College \ of \ Flint \ added \ its \ Cass \ City} extension.$

1996 A "college without walls" was created when the development of Baker College Online enabled delivery of courses to students entirely via computer.

1997 Baker College of Muskegon moved to a new 40acre site to accommodate the Culinary Arts and Food and Beverage Management programs. Baker College of Flint opened its West Branch extension.

2000 Baker College of Mount Clemens became Baker College of Clinton Township and began offering an Associate of Nursing degree.

2001 Record-high enrollment with more than 21,000 students across the System. Baker College Online enrollment topped 4,000, reinforcing its position as a leader in distance education. The Center for Graduate Studies was granted full accreditation from the International Assembly for Collegiate Business Education.

2002 Baker College gained preliminary approval to offer the Elementary and Secondary Teacher Preparation programs. The Nursing program was expanded to Flint and Owosso. Baker College now boasted over 25,000 students and more than 2,000 employees, making it the largest private college in Michigan.

2003 Baker College of Allen Park became the newest addition to the Baker College System, offering a bachelor's degree program, as well as a variety of certificates and associate's degrees.

2005 Baker College of Jackson added the Coldwater extension. Baker College reaches record-high enrollment of nearly 34,000, with several new programs including Polysomnography, Digital Video Production and Computer Animation Programming being added.

2006 Baker College is accepted by the Higher highly innovative AQIP accreditation process. Baker College of Port Huron signed a memorandum of understanding with Lambton College of Sarnia, Ontario, after receiving written consent from the Ontario Minister of Training, Colleges, and Universities, to deliver the accelerated Bachelor of Business Administration degree onsite in Canada.

2007 The Baker College Center for Graduate Studies received approval from the Higher Learning Commission to offer the Doctor of Business Administration (DBA) degree, becoming the fourth graduate program at Baker College. The other three are the MBA, the Master of Occupational Therapy and the Master of Science in Information Systems. Baker College of Owosso opened the state-of-the-art Auto/Diesel Institute of Michigan.

2008 Baker College of Muskegon broke ground on the 40,000 square foot, state-of-the-art, Culinary Institute of Michigan (CIM). System enrollment grows to over 38,000. Baker College of Flint students dethrone Texas A&M to win first place in the National Cyber Defense competition. Baker College of Flint purchased a closed auto dealership to transform into the Center for Transportation Technologies.

Why?

- ♦ Our number one goal is for you to gain the knowledge, skills, and practical experience for a better employment future.
- ◆ Our Graduate Employment Rate is over 98%.
- You will be in a great learning environment at a small, friendly college.

When you come to Baker College, your studies and college life focus on classes that are geared toward helping you gain the skills you need to begin or enhance a rewarding career.

At Baker, we can help you do better because we know what you'll need to do well in today's world and job market—and by helping you gain the skills and education that will prepare you for a bright future.

This has been our mission since Baker College first opened its doors in 1911. Since that time, we have grown to serve over 38,000 students on 14 campuses and four branch locations. Our degree programs and course selections are designed to keep pace with advancing technology and a changing workplace.

You'll Do Better With Baker . . . Gaining the Skills You Need to Enter the Job Market

At Baker College, our Admissions Advisors work closely with you to identify the course of study—and career—that's right for you.

Our more than 100 doctoral, master's, bachelor's, and associate's degree programs and our certificate programs are designed by experienced educators and dedicated advisory board members from the working world to give you the specialized skills and training you need to enter your field of interest.

Business Administration, Computer Information Systems, Health Sciences, Human Service, Teaching, Engineering, and Technical studies are just some of the career areas we offer. Our programs are purposely limited to fields in which employment probability is high and opportunity for growth abounds.

Our Smart Degree Option gives you even more flexibility in planning for your future. Start out with a twoyear associate's degree, and then, with two more years of study, build to a bachelor's degree. This gives you the opportunity to take courses in your area of interest right from the beginning of your college career. Not to mention you'll start your career two years sooner. Master's degree programs provide avenues for enriching job skills and broadening career objectives.

You'll Do Better With Baker . . . Learning in a Small College Environment

At Baker College, we combine the best of college life with the education and training you need to be ready for the job market. Our 17 campuses are professional and comfortable, located in beautiful settings both in urban and suburban areas. Our faculty are experts in their fields, and are supported by modern classrooms and libraries and the most up-to-date equipment available.

We keep our classes small so you can build a close, working relationship with our faculty members. This helps you get the individualized attention you need to get the most out of your coursework.

You can build good relationships with your fellow students too. Whether full-time or part-time, our students are serious about their education and where it will lead them.

We understand the importance of time, so our classes are designed to be practical and no-nonsense. Class schedules are designed to accommodate busy student lifestyles. For those whose job responsibilities preclude attending weekday classes, online classes and weekend program options are available.

You'll Do Better With Baker . . . Finding a Job Once Your Training Is Complete

At Baker College, a very high percentage of our available graduates are employed in meaningful, satisfying jobs. That's a proven track record made possible by the application of customized employment seminars, personalized job search assistance, and continuous contact with hundreds of employers.

At anytime throughout your career, our Lifetime Career Service can help you find the job for which you've worked so hard to prepare. While you're attending Baker, we'll help you find part-time positions, including co-op or internship programs, which often can lead to permanent positions.

Our goal is to help our graduates successfully enter—and remain in—the job market. Your success is our success.

You'll Do Better With Baker . . . Come See for Yourself

Please read through this catalog to learn more about how Baker College can help you build a brighter future.

Better yet, take the time to visit us. We would welcome the opportunity to meet with you to hear your goals, tell you about our programs, and give you a tour of the campus. You may schedule an appointment with an Admissions Advisor by contacting our Admissions Department or by visiting our Web site at **www.baker.edu**, click on New Student Info and then on Schedule a Visit.

Please join our Baker family. We'll help you meet your aspirations to be a better employee, a better person, and to enjoy a better life. Yes, look to Baker College. *For a career. For a future. For a life.*

BAKER COLLEGE OF ALLEN PARK (Downriver Campus)

General Location/Description

Baker College of Allen Park is conveniently located with easy access to major interstates and freeways (I-94, I-75, and Southfield Freeway). Thriving businesses, industry, and commerce fuel the areas growth; and the campus is a short drive from the headquarters of major companies such as Ford, AAA, and Belle Tire. The most recognizable local landmark is the Uniroyal Tire (the world's largest tire) located just west of the campus on I-94.

Campus

Visible from I-94, the campus is situated on a 31acre site at Enterprise and Outer Drives. With the addition of our new 14,000 square foot Student Center and Bookstore building in January 2007 and a three story classroom building in September 2007, the campus boasts 65 classrooms (including 17 computer labs). The campus also offers free tutoring in its Learning Center and access to unlimited books in its Library.

Specialty Programs

The Allen Park campus offers a number of certificates as well as associate's and bachelor's degree programs. Specialty programs include Web Design, Interior Design, Kitchen and Bath Design, Accounting, Early Childhood Education, Management, Surgical Technology, Physical Therapist Assistant, Therapeutic Massage, Medical Assistant, Health Information Technology, and Paralegal. Bachelor's degree programs include Business Administration (Accelerated), Human Resource Management, Accounting, Management, Marketing, and Human Service.

UNDERGRADUATE/GRADUATE CATALOG

General Location/Description

Located in Oakland County, Baker College of Auburn Hills is in the epicenter of Automation Alley, one of the country's flourishing economic and business centers. Oakland County boasts the second highest per capita income in the nation and is home to some of the fastest growing companies in the world. Oakland County is home to one-third of Michigan's research and development firms, and one-third of all U.S. automobile production takes place within 70 miles. The area is surrounded by 88,000 acres of wooded parkland with over 450 lakes nearby.

Campus

Within a half mile of the I-75 and University Drive interchange, the campus occupies a 17-acre site in the fastest growing city in southeast Michigan. The latest addition to the campus was completed in 2006. There are 65 classrooms in all, including nine computer labs, and several special purpose rooms.

Specialty Programs

The Auburn Hills campus offers a full array of both associate's and bachelor's degree programs. Specialty programs include Automotive Service Technology, Computer Animation, Dental Assisting, Dental Hygiene, Echocardiographic Technology, Interior Design, Internet/LAN Security, Licensed Practical Nurse, Teacher Preparation, Respiratory Care, Wireless and VOIP as well as the Accelerated Bachelor of Business Administration degree.

BAKER COLLEGE 2009-2010

BAKER COLLEGE OF CADILLAC

General Location/Description

Located in scenic northwestern Michigan, with its abundant lakes, streams, and woods, the Cadillac area is a recreational "wonderland." Noted for its naturallyinviting beauty, students have ample opportunities to enjoy year-round, four-season activities, such as golfing, hiking, camping, boating, fishing, downhill and cross-country skiing, snowmobiling, small and large game hunting, and canoeing.

Campus

Baker College of Cadillac's campus has a "country" feel, with its hilly 66 acres just outside of the city. The Cadillac area has the distinct feel of a small-town community—secure, comfortable, safe, and very friendly. Across the street from the campus is an extensive trail system for hiking and cross-country skiing. The campus features an outside patio, where "tail gate" parties are provided by the College, an ample student center, several computer labs, a very nice learning center that offers free tutoring services, extensive parking, a fitness center, an operating room for our Surgical Technology Program, and many other amenities.

Specialty Programs

The Cadillac campus offers 60 certificates as well as associate's and bachelor's degree programs. Specialty programs offered on our campus include: Nursing, Surgical Technology, Web Design, Truck Driving, Veterinary Technician, Emergency Medical Technician-Paramedic, Early Childhood Education, Therapeutic Massage, Interior Design, and the Accelerated Bachelor of Business Leadership.

BAKER COLLEGE CENTER FOR GRADUATE STUDIES

The Center for Graduate Studies offers graduate programs providing advanced preparation in the fields of Business, Information Systems, and Occupational Therapy. These programs are designed to build upon a well-balanced undergraduate education. Students are expected to develop a thorough understanding of their chosen academic discipline. Graduate education provides students with the opportunity to increase knowledge, broaden understanding, and develop specialized skills beyond the baccalaureate degree.

The Center for Graduate Studies' administrative offices are located on the Flint campus. These administrative offices are the headquarters for the graduate programs offered at various Baker campus locations,

The Center for

corporate sites throughout Michigan, and online. Leadership and administration of graduate programs are provided by the President of the Center for Graduate Studies and the Graduate Faculty Council.

All graduate programs are accredited through The Higher Learning Commission of the North Central Association of Colleges and Schools. The MBA program has additional international accreditation through the International Assembly for Collegiate Business Education (IACBE). The Occupational Therapy program also has additional accreditation through The Accreditation Council for Occupational Therapy Education (ACOTE).

Graduate Studies' administrative offices are located on the Flint Campus. These administrative offices are the headquarters for the graduate programs offered at various Baker campus locations, corporate sites throughout Michigan, and Online.

BAKER COLLEGE 2009-2010

BAKER COLLEGE OF CLINTON TOWNSHIP

General Location/Description

Located in the cultural hub of Macomb County, the Clinton Township campus of Baker College features a modern three-story building and spacious atrium. Our students enjoy the convenience of a suburban location in the Gratiot and 15 Mile Road area, near I-94. You'll find the campus easily, and you'll find Baker College of Clinton Township the ideal starting point for your career.

Campus

A unique central courtyard planted with a variety of trees, shrubs, and flowers is one of the many focal points on campus. Attractively-landscaped grounds and parking areas surround the campus. The spacious library offers electronic access to all materials in the Baker College System Libraries. A newly constructed facility on the Gratiot site housing the Autobody Technician Program provides state-of-the-art training. An expansive learning support service center is

available to students requiring extra practice time or special project work. Since the summer of 1996, ongoing site development projects have resulted in an increase in classroom and parking spaces. However, the atmosphere of the Clinton Township campus remains personal. Classes are small, and staff and faculty are readily accessible.

Specialty Programs

The Clinton Township campus offers a full array of both associate's and bachelor's degree programs. Specialty offerings include programs in Autobody Technician, Automotive Service Technology, Emergency Medical Services, Microsoft Authorized Academic Training Program in Computer Networking Technology, Nursing, Radiologic Technology, Surgical Technology, Teacher Preparation, Therapeutic Massage, and Veterinary Technology.

BAKER COLLEGE CORPORATE Services

Baker College Corporate Services follows the Baker College mission by taking certificate, associate, bachelor, and master degree programs directly to adult, lifelong learners at their places of employment. The Corporate Services campus was established in 1989 and it remains focused on making attending college courses ultra-convenient for adult students who work full-time. Classes are held at the work site - in company conference rooms and classrooms, all the while maintaining rigorous college course content. Corporate Services' instructors are highly credentialed, "real world" experienced professionals who come to company-sponsored classrooms in a wide array of locations, including Detroit, Sterling Heights, Warren, Flat Rock, Monroe, Southfield, Allen Park, Dearborn, and Cleveland, Ohio. Day and evening classes accommodate every work schedule.

The Professional Development Division of Corporate Services offers high-end, non-credit programs. Corporate competitive advantage occurs when employees at every level of the organization have strategic skills necessary to attain personal and professional goals. Baker College Corporate Services faculty and instructional designers create classes and certifications that are tailored to meet a company's specific needs. Employees enrolled in Corporate Services on-site training programs create a culture in which employees are focused on improving the company's performance in the short term and its overall value in the long term. Classes and seminars are focused on real-world scenarios that participants face in their daily jobs. Our focus provides participants with powerful tools to meet personal and professional challenges in areas of leadership, quality tools and methods, team development, allied health, personal finance, and project management.

BAKER COLLEGE OF FLINT

General Location/Description

Strategically located in the southwest corner of Flint, just minutes from major highways, is Baker College of Flint. Ease of access enables students to enjoy the best of urban living as they take advantage of yearround opportunities at the Flint Cultural Center or enjoy swimming, boating, fishing, camping, skiing, and skating at area parks and lakes. Nearby public golf courses, restaurants, and shopping malls are also accessible.

Campus

Designed with students' interests and convenience in mind, the College's beautifully landscaped 40-acre campus features contemporary buildings, marked by a clean and inviting décor, creating an ambience as close as possible to today's business workplace. The Center for Undergraduate Studies building features modern offices, classrooms, industry-like laboratories, and houses the growing health sciences and business divisions' programs along with excellent student support services, including a health/fitness center/gymnasium, a comfortable auditorium, state-ofthe-art video classrooms, a large bookstore/gift shop, and a student center. "Bits and Bytes" and the outdoor courtyard provide popular places to snack or visit with friends. The well-equipped, spacious library is mere steps away and just beyond it is Baker Hall East, a modern, 35-apartment residence hall. The Campus Safety Offices, Career and Corporate Services, and Technology Center which house all computer, engineering, and technology programs are easily accessible in the middle of the campus. Baker Hall West, the newest and very accessible residence hall/apartments, surrounded by picnic areas and landscaping, is located on the west end of the campus. Parking is abundant and adjacent to each building. There are also a number of single family homes available for students.

The Baker College Center for Graduate Studies and the growing Baker College Online as well as the College's System Headquarters are also located on the Flint campus. One block from campus is the Living Center, another residence hall and My First School. The Baker College Early Learning Center, which is available for children of students attending classes, is also open to the public.

Specialty Programs

The Flint campus offers over 100 programs, a full array including certificates through bachelor degrees via on-ground, online, and video delivery. Specialty programs are numerous and varied. They include Polysomnography, Automotive Service Technology, Mechanical Engineering, several Computer Networking options, Nursing, Orthotics/Prosthetics, Physical Therapist Assistant, Surgical Technology, Veterinary Technician, P.T.D.I. certified Truck Driving, and Teacher Preparation to name just a few. The Center for Transportation Technology is a division of Baker College of Flint. Conveniently located approximately 6 miles from the main campus, in the city of Flint, at the junction of I-69 and Dort Highway. This division supports the Autobody Technician degrees, Automotive Services degrees, Truck Driving certificate and the associate's degree in Transportation Management. The facility has been recently renovated and features up-todate automotive labs, classrooms, a computer lab, multimedia rooms and a new truck terminal.

Places to Explore

Crossroads Village, Flint Cultural Center, Holloway Reservoir, Huckleberry Railroad, Mott Lake, Sloan Museum, Timber Wolf and Wolverine Campgrounds.

Events

Antique Car Show, Flint Art Show, Flint Symphony Orchestra Series, Frankenmuth Bavarian Festival, Michigan Renaissance Festival, Music in the Parks, Whiting Showcase Series and the world-renowned Crim Races.

CASS CITY BRANCH

About 75 miles northeast of Flint, in the center of Michigan's thumb area, the friendly, rural community of Cass City is home to one of two extension sites. The Cass City extension offers selected business programs, including the Accelerated Bachelor of Business degree.

Others include Computer, Health Sciences, Early Childhood, and Human Service programs. The modern, one-story building near the center of town features its own library, student center, and classrooms, including a video classroom, medical and computer labs, and state-of-the-art multimedia rooms.

WEST BRANCH EXTENSION SITE

About 90 miles north of Flint, minutes from I-75, is the West Branch extension, located at Ogemaw Heights High School. Centrally located, this site serves students from West Branch, Rose City, and surrounding areas. Classes are located in the newly constructed, affectionately named, "Baker-wing," with easy access to parking. Programs offered include associate's degrees in Business Management, Early Childhood Education, as well as the Accelerated Bachelor of Business degree.

UNDERGRADUATE/GRADUATE CATALOG

General Location/Description

Baker College of Jackson is located in the vigorous and vital community of Jackson, in south central Michigan. The campus is located north of the Jackson Airport, just north of I-94 at exit 137 and a few minutes west of the U.S. 127 Springport Road exit. This location provides a convenient commuter distance for Jackson County and surrounding communities.

Campus

Centered on 42 acres of near-rural property at the northwest corner of the city, this contemporary facility is spacious and provides a comfortable learning environment. In 2000, completion of a new wing housing the library, bookstore, admissions offices, and a multimedia room dramatically updated the campus. Computer facilities are continually updated to provide students with access to the latest equipment. A second building opened in the fall of 2004 providing a large Learning Support Center, a Surgical Technology Lab, Radiation Therapy Lab, and a Science Lab offering a real-world environment for students in health sciences and human service career programs.

Specialty Programs

Underlying all of this space and equipment is the Baker College tradition of teaching excellence and its reputation for quality education, both confirmed by consistently high employment rates for graduates. The Jackson campus offers a full array of both associate's and bachelor's degree programs. Specialty programs in Radiation Therapy, Medical Assisting, Health Information Technology, Surgical Technology, Teacher Preparation, Paralegal, and numerous computer-related programs are just a few of the programs which compliment higher education and training at Baker College of Jackson.

COLDWATER EXTENSION SITE

About 50 miles southwest of Jackson, in the friendly community of Coldwater, is the Jackson extension site. Programs offered include: Accounting, Medical Assistant, Medical Administrative Assistant, Medical Insurance Specialist, Medical Receptionist, and Phlebotomy.

BAKER COLLEGE 2009-2010

BAKER COLLEGE OF MUSKEGON

General Location/Description

Baker College of Muskegon is nestled in western Michigan along the beautiful shoreline of Lake Michigan and its scenic sandy beaches. Students can take advantage of Muskegon Lake, Bear Lake, and Mona Lake, as well as nearby parks and recreation areas for hiking, boating, skiing, snowmobiling, and camping.

Campus

The College campus sits on 50 wooded acres and offers five distinct residence hall choices. The Quarterline Grill, the West End Café, the Library-Learning Connection, a popular student center, and pine-scented courtyards provide inviting venues for eating, studying, or just relaxing. Students can participate in fitness and recreational activities in the gymnasium or at the BRIC (Baker Recreation and Information Center).

Specialty Programs

The Muskegon campus offers a full array of certificates as well as associate's and bachelor's degree programs. Specialty program offerings include Physical Therapist Assistant, Occupational Therapy Assistant, Aviation, Surgical Technology, Veterinary Technician, Culinary Arts, Computer Networking (Microsoft and Cisco), Digital Media Design, Human Resources Management, Radiologic Technology, Paralegal, Interpreter Training (American Sign Language), Interior Design, Teacher Preparation, Human Service, Early Childhood Education, and Nursing.

Culinary Institute of Michigan

The new three-story, state-of-the-art Culinary Institute of Michigan (CIM) is located just a few miles west of the main campus. In addition to the American Culinary

Federation accredited associate's degree in Culinary Arts, students can earn a certificate or associate's degree in Baking and Pastry, or an associate's or bachelor's degree in Food and Beverage Management. These programs combine personalized instruction with hands-on-experience. The public is invited to sample the students' creations in the student-run restaurant, *Courses*, and in the on-site pastry and coffee shop. The Sweet Spot.

Places to Explore

Michigan's Adventure Theme Park, Muskegon County Museum, Muskegon Art Museum, Muskegon State Park P.J. Hoffmaster State Park and Grand Haven State Park.

Events

Grand Haven Coast Guard Festival, Michigan Irish Music Festival, Miss Michigan Scholarship Pageant Muskegon Summer Celebration, Unity Festival and Winterfest.

FREMONT EXTENSION SITE

The Baker College of Muskegon Fremont Extension, located just 29 miles northeast of the main campus, provides residents of Newaygo County the opportunity to begin career training in select degrees, certificates, and courses.

UNDERGRADUATE/GRADUATE CATALOG

BAKER COLLEGE ONLINE

Baker College Online is the "virtual campus" of the Baker College System. Baker's online programs are accredited and are of the highest quality, with the convenience of classroom accessibility 24 hours a day, seven days a week, from virtually anywhere in the world. Students can complete assignments and communicate with instructors and classmates from any computer with Internet access. Baker Online is more than an exciting delivery method for higher education. It breaks down barriers that working people have struggled to overcome for years. It enables people to fit a college education in to their busy schedules, instead of modifying their schedules for classes. With faculty members and students based all over the world, Baker Online students benefit from a truly world-class perspective. Online courses are delivered in an asynchronous mode using a web-based learning management system specifically designed for course delivery. Students have personal e-mail addresses and are assigned to "virtual classrooms" facilitated by qualified online instructors. The virtual classroom is the common meeting area for faculty and students registered for a particular course. Students work on readings, submit assignments, ask questions, and participate in discussions in the virtual classroom just as they would in a traditional classroom setting. Faculty members facilitate the virtual classroom, provide feedback and comments, and keep students informed of their status weekly. Online courses, available year-round, are accelerated and six weeks long.

BAKER COLLEGE OF OWOSSO

General Location/Description

Although Baker College of Owosso is located just four blocks south of the busy downtown, when you step onto our campus you'll find a beautiful "home away from home" with rolling and wooded hills, and the classic European architectural style of Swiss chalets—an idyllic site for your college education and collegiate lifestyle.

Campus

Located in a historic and safe community, our classroom buildings, student center, snack shop, bookstore, gymnasium, and apartment-style residence halls sit amid a cluster of small stone and brick office buildings with a comfortable, quaint courtyard and the five-story Don R. Mitchell bell tower.

Specialty Programs

Over the past ten years, the College has focused on diversifying its programs and services to better meet the changing needs of both its student body and its community. In 1998, the College renovated a historic downtown home to create the new Baker College of Owosso Bentley campus. This site is the location of the Business and Corporate Services divisions, which provides non-traditional training for the community and assists with job training and employee recruitment services. In 2001, the College constructed a Technology Center, which allowed the curriculum offerings to expand into automotive services, HVAC, welding, and computer networking. The campus, over the past five years, has also added the Teacher Preparation and Nursing programs as a career option for its students. In 2007, the campus opened the state-of-the-art Auto/Diesel Institute Michigan of (ADI) (www.autodieselinstitute.com) to meet job market demands and further expand its curricular offerings.

BAKER COLLEGE OF PORT HURON

General Location/Description

Welcoming the rising sun over the beautiful Blue Water area by Lake Huron and the St. Clair River, Baker College of Port Huron anchors the Baker College System on Michigan's eastern shoreline. The wonderful quality of life that our students find from Port Huron north through the thumb of Michigan and east into Ontario, Canada includes various water activities, hunting, and golf.

Campus

Located in the safe, small, friendly town of Port Huron, the College is situated on 12 acres that border the 40th Street Pond, providing our staff and students with a relaxing environment in which to work and study. Located on the west side of town, convenient to I-69 and I-94, and only five minutes from the Blue Water Bridge which connects Port Huron with Sarnia, Ontario the campus sits at an international border crossing. Convenience, safety, and quality are among the reasons students from throughout the eastern shoreline of Michigan and the western shoreline of Ontario, Canada; choose to make a better life for themselves at the Port Huron campus.

Specialty Programs

The Port Huron campus offers a wide variety of associate's and bachelor's degree programs. Specialty programs include Dental Hygienist, Surgical Technology, Medical Assistant, Certified Microsoft Systems Engineer, Veterinary Technician, Web Design, and the Accelerated Bachelor of Business Administration. Baker College of Port Huron also offers Truck Driving, located at 69096 Powell Road, Armada, MI 48005.

BAKER COLLEGE 2009-2010

UNDERGRADUATE ACADEMIC INFORMATION

GENERAL EDUCATION PROGRAM REQUIREMENTS

The mission of Baker College is to provide quality higher education and training which enable graduates to be successful throughout challenging and rewarding careers. Required courses in the major field of study are complemented and enhanced by required general education courses. General education provides a common foundation of knowledge and skills that every educated person should possess. Its purpose is to stimulate curiosity and promote intellectual inquiry and lifelong learning.

General Education Mission Statement

General education exposes students to an array of critical skills and knowledge essential to the college-educated person in any career path and provides a foundation for more specialized learning.

General Education Goals

- 1. To provide students with opportunities to develop and refine essential skills in written and oral communication, mathematical reasoning, scientific inquiry, global and cultural awareness, personal and social relations, and information literacy
- 2. To teach a body of common knowledge necessary for students to be successful in professional, intellectual, and social contexts
- 3. To assist students in developing a breadth of knowledge, curiosity, and critical thinking skills
- 4. To promote informed citizenship in an increasingly diverse world
- 5. To advocate lifelong learning

All certificates of substantial length, as well as associate and bachelor degree programs, at Baker College include the following general education outcomes. See the General Education Course Requirements for certificates of substantial length and associate and bachelor degrees on the following pages.

GENERAL EDUCATION OUTCOMES

Certificates of Substantial Length (68 or more quarter hours)

Communication

- Communicate ideas in written form.
- Obtain, analyze, and synthesize information into written presentations.

Mathematical Reasoning

- Comprehend, communicate, and interpret numeric and graphical data.
- Synthesize and evaluate data using quantitative problem-solving processes.

Personal and Social Environments

- Explore, analyze, and explain major patterns of human behavior within personal and social environments.

Computer Literacy

- Apply computer skills to the management of information.

Associate Degrees

Communication

- Communicate ideas in both written and oral form.
- Obtain, analyze, and synthesize information into oral and written presentations.

Mathematical Reasoning

- Comprehend, communicate, and interpret numeric and graphical data.
- Synthesize and evaluate data using quantitative problem-solving processes.

Personal and Social Environments

- Explore, analyze, and explain major patterns of human behavior within personal and social environments.

Computer Literacy

- Apply computer skills to the management of information.

GENERAL EDUCATION PROGRAM REQUIREMENTS (Continued)

Bachelor Degrees (Along with the above associate degree general education outcomes, the following additional outcomes apply to bachelor degrees.)

Global and Cultural Perspectives

- Distinguish among various cultures and ethnic groups of the world and identify the common bonds all humans share.
- Analyze the impact that differing political systems, cultural backgrounds, ethnicities, and values have on an individual's personal, social, and work life.

Personal and Social Environments

- Critique ethical dilemmas and available solutions and explain their implications.

Scientific Inquiry

- Apply the principles of scientific investigation within the context of a physical or natural science.

General education is required for all certificates of substantial length, as well as associate and bachelor degrees. Some degree programs may have general education requirements specific to their programs that go beyond the basic requirements. In most degree programs, the general education requirements are met through general education curriculum. In some programs, however, a general education requirement is met through cognitive experiences.

GENERAL EDUCATION COURSE REQUIREMENTS

General Education Course Requirements (16 quarter hours) for Certificates of

Substantial Length (68 or more credit hours)

Communication: 4-quarter hours

ENG101 Composition I

Mathematical Reasoning: 4-quarter hours

MTH101 Mathematics for Business or MTH 111 Introductory Algebra or higher level math course

Personal and Social Environments: 4-quarter hours

PSY101 Human Relations or PSY111 General Psychology

Computer Literacy: 4-quarter hours

Two of the following courses: INF111 Information Systems Theory, INF112 Word Processing, INF113 Electronic Spreadsheets, INF114A Introduction to Database Applications, INF121 Introduction to Windows, INF131 Internet and the World Wide Web, or INF141A Microsoft PowerPoint. (In some programs, competency will be met by courses in the major.)

Please note that certificates of less than 68 credits may also contain general education requirements as determined by individual programs.

General Education Course Requirements (32 quarter hours) for Associate Degrees

Communication: 16-quarter hours

All of the following: ENG101 Composition I, ENG102 Composition II, and SPK201 Oral Communication

One of the following: WRI115 Workplace Communication, ENG221 Critical Writing and Literary Analysis, ENG231 Language and Culture, ENG311 Creative Writing, ENG411 Foundations of Mass Communications, LIT301 Contemporary Literature, LIT331 American Literature I, or LIT332 American Literature II

Mathematical Reasoning: 4-quarter hours

MTH101 Mathematics for Business or MTH111 Introductory Algebra or higher level math course

Personal and Social Environments: 4-quarter hours

PSY101 Human Relations or PSY111 General Psychology

Computer Literacy: 8-quarter hours

Four of the following courses: INF111 Information Systems Theory, INF112 Word Processing, INF113 Electronic Spreadsheets, INF114A Introduction to Database Applications, INF121 Introduction to Windows, INF131 Internet and the World Wide Web, or INF141A Microsoft PowerPoint. (In some programs, competency will be met by courses in the major.)

GENERAL EDUCATION PROGRAM REQUIREMENTS (CONTINUED)

General Education Course Requirements (72 quarter hours) for Bachelor Degrees

Communication: 24-quarter hours

All of the following: ENG101 Composition I, ENG102 Composition II, and SPK201 Oral Communication

Two of the following: WRI115 Workplace Communication, ENG221 Critical Writing and Literary Analysis, ENG231 Language and Culture, ENG311 Creative Writing, ENG411 Foundations of Mass Communications, LIT301 Contemporary Literature, LIT331 American Literature I, LIT332 American Literature II, or WRI301A Report Writing (prerequisite of WRI115)

One of the following: SPK211 Group Dynamics or SPK401 Presentational Speaking

For Accelerated Bachelor Degrees, the following course, along with either SPK211 or SPK401, meets the general education communication requirement: WRI312R Research Writing.

Global and Cultural Perspectives: 12-quarter hours

SOC321 Cultural Diversity

Two of the following: GEO101B World Geography I, GEO102B World Geography II, ECN301 International Economics, HIS301 Women's Studies, HIS321 Ancient World, HIS331A European History I, HIS332 European History II, HIS411 Emerging Nations, HIS421 World History Since 1945, ITP111 American Sign Language I, ITP112 American Sign Language II, POL401 International Relations, SOC341 Global Perspectives, SPN101 Spanish I, or SPN102 Spanish II

For Accelerated Bachelor Degrees, the following courses meet the general education global cultural requirement: SOC321R Cultural Diversity and ECN301R International Economics.

Mathematical Reasoning: 8-quarter hours

One of the following: MTH101 Mathematics for Business or MTH111 Introductory Algebra *One of the following:* MTH112 Intermediate Algebra or a higher level MTH course

For Accelerated Bachelor Degrees, the following course meets the general education mathematical reasoning requirement: MTH312R Research and Statistics.

Personal and Social Environments: 16-quarter hours

HUM401A Philosophy of Ethics (In some programs, competency will be met by courses in the major.) *One of the following:* PSY101 Human Relations or PSY111 General Psychology

Two of the following: POL201A American Political Systems, PSY211 Psychology of Death and Dying, PSY221 Developmental Psychology, PSY231 Organizational Psychology, PSY335 Human Sexuality, PSY351 Adolescent Psychology, PSY401 Social Psychology, SOC201 Sociology, or SOC301 Social Problems

For Accelerated Bachelor Degrees, the following course, along with HUM401A Philosophy of Ethics and a personal and social elective, meets the general education personal and social environments requirement: PSY231R Organizational Psychology.

Scientific Inquiry: 4-quarter hours

One of the following: SCI101C Human Anatomy and Physiology I, SCI111 Biology, SCI215 Integrated Physics, SCI220A Microbiology, SCI221 Basic Chemistry, SCI241 General Chemistry I, SCI251 General Physics I, SCI321 Principles of Astronomy, or SCI451 Environmental Science

For Accelerated Bachelor Degrees, a scientific inquiry elective meets the general education scientific inquiry requirement.

Computer Literacy: 8-quarter hours

Four of the following: INF111 Information Systems Theory, INF112 Word Processing, INF113 Electronic Spreadsheets, INF114A Introduction to Database Applications, INF121 Introduction to Windows, INF131 Internet and the World Wide Web, or INF141A Microsoft PowerPoint (In some programs, competency will be met by courses in the major.)

Developmental Education Mission Statement

The mission of developmental education is to provide a comprehensive preparatory program enabling students to acquire academic skills necessary to complete a college-level course of study.

Developmental Education Goals

- 1) To provide appropriate educational opportunities and services
- 2) To ensure proper placement of students
- 3) To maintain high academic standards that will support student success in college-level courses
- 4) To enhance the quality of student life and learning
- 5) To promote continued development and application of adult learning theory, adhering to best practices
- 6) To provide students with opportunities to build strong foundational skills
- 7) To be sensitive and responsive to individual differences and special needs among students

Developmental Education Objectives

- 1) Students will utilize the developmental education services provided by the College in their academic pursuit of higher education.
- 2) All entry-level students will complete appropriate placement testing.
- 3) Students will perform basic mathematical computations.
- 4) Students will organize and write a paper using the format suggested in English Review.
- 5) Students will demonstrate proficiency in college-level reading.

The following are	designed to meet the above objectives:
ENG098B	College Reading
ENG091	English Review
MTH091	Essential Math Concepts
MTH099E	Pre-Algebra

In addition to these foundational courses, there may be additional developmental courses specific to a program area. See individual program area requirements for details.

The Baker College Smart Degree Option, leading to any one of several bachelor's degree options, is an effective degree completion strategy. It is a significantly different and more beneficial approach than that taken by most colleges.

In this format, enthusiasm for degree completion is established early and maintained throughout the program. Students interested in Business Administration, for example, are motivated by experiencing computer, management, and marketing courses early in their program.

Baker College's emphasis on degree completion also helps avoid the "professional student" syndrome by encouraging progress toward graduation. During the junior and senior years, the student completes a major and a minor while finishing the general education requirements. Many students are also employed during this period. Work experiences give greater meaning to the general education coursework, since career-minded students can better understand the importance of achieving a well-balanced education.

Consider the Baker College Smart Degree Option for a bachelor's degree . . . a better way!

Associate's Degree Students

Entering freshmen pursuing an associate's degree will find a wide selection of business and technical programs designed for direct entry into jobs which do not require completion of a bachelor's degree.

The Smart Degree Option for Freshmen Students

Freshmen who desire a Baker College Smart Degree Option bachelor's degree begin by enrolling in an associate's degree program. Most associate's degree programs lead to related bachelor's degrees. Following completion of the associate's degree, two options are available to the student:

- 1. Enter a bachelor's degree program as a full-time student.
- 2. Begin full-time employment and continue toward a bachelor's degree as a part-time student.

The Smart Degree Option for Transfer Students

Baker College is eager to assist transfer students who choose to enter any Baker bachelor's degree program. Transfer students must first request official transcripts from their high school and from all colleges attended for evaluation by the registrar. Requests for financial aid transcripts will also be required for those students applying for financial assistance. Transfer students should become familiar with the Baker College policy regarding acceptance of transfer credit. Students will find that Baker College is committed to applying this policy for maximum transfer of credit. The number of credits accepted by Baker College will determine entry at the associate's or bachelor's degree level.

POSTBACCALAUREATE CERTIFICATE Project Management and Planning

General education requirements must be met for all certificates of substantial length (68 or more credit hours), as well as associate and bachelor degree programs. All graduates must meet the general education outcome requirements established by each academic program. The general education requirements are listed below each program's requirements. In addition, any student who places into a developmental education course(s) must meet those course requirements within the first academic year, prior to enrolling in the college level general education course(s).

College Success Strategies (COL 111A) is required for all first-time freshmen. College Success Online (COL 112) is required for all Baker College Online first-time freshmen and for all students enrolled in an online certificate or degree program. These courses will inform students of campus services, policies and procedures, and address learning styles and study strategies.

Many of the courses and programs at Baker College are offered in an online delivery format. See page 117 for Baker College Online programs. Contact your campus Academic/Administrative Office for details about online courses.

If electives are indicated in a program, please refer to the list of Elective Options on page 44.

If general education electives are indicated in a program, please refer to the General Education Course Requirements on page 21. (General education electives may consist of one or more of the following General Education Outcomes: communication, mathematical reasoning, personal and social environments, computer literacy, global and cultural perspectives, and scientific inquiry.)

A new student may choose an "Undeclared but Degree Seeking" program. A student also may add a limited number of "Student Elected Classes" to his/her program with the approval of an academic advisor. Information about both of these options, including course and credit hour limitations, can be obtained in the Academic Office.

Information regarding double majors and/or minors is located on page 250. Contact your campus academic staff to discuss requirements.

Baking and Pastry

Certificate

The one-year Baking and Pastry Certificate is designed to prepare graduates for employment in retail deli-bakeries, fine dining restaurants, pastry and bakery shops, commercial baking, and hotel and

THE **CULINARY** INSTITUTE **I** MICHIGAN

resort bake shops. This program provides a combination of extensive classroom hands-on training, work experience, and classroom study to prepare students in the baking and pastry field. Successful graduates will be prepared to enter the workforce and obtain positions such as assistant pastry chefs, assistant bakers, head bakers, lead bakers, wedding cake decorators, and executive pastry chefs. Students receive extensive training in the development and preparation of breads, pies, pastries, cookies, petit fours, specialty breads and pastries, fruit bars, tortes, centerpieces, wedding cakes, and international desserts.

Truck Driving

Certificate

This program is offered with multiple start dates throughout the year. It prepares graduates for entry-level positions as local or long-distance drivers of tractor-trailers, heavy trucks, dump trucks, and tankers. Courses are designed to enable students to sit for the State of Michigan Commercial Driver Licensing Class A exam. Job potential for this field is excellent. The Truck Driving Certificate meets all state and federal requirements for truck driver training.

Applicants for the Truck Driving Certificate must: 1) be at least 18 years of age, 2) have a valid operators license that is not currently (or within the immediate past 36 months) suspended or revoked, 3) meet all physical requirements specified in The Federal Motor Carrier Safety Regulations, and 4) provide/pass a current DOT physical and NIDA drug screen to Baker College.

Baking and Pastry

Associate of Applied Science Degree

This program trains and prepares graduates for pastry chef and other bakery supervisory positions. People with baking and pastry skills are THE CULINARY INSTITUTE & MICHIGAN employed in retail bakeries, fine dining restau-

rants, pastry and bakery shops, commercial baking operations, country clubs, and hotel and resort bake shops, where they utilize their experience to artfully prepare baked goods and specialty sugar and chocolate pieces. This program also prepares graduates to skillfully manage the respective operations as well as prepare them for leadership roles in the bakeshop and in the special knowledge and techniques used in professional baking and pastry outlets. Typical duties include production of pastries, baked goods and specialty items, staff selection and training, purchasing, inventory control, item costing and overall bakeshop management. Instruction is provided through a combination of classroom, hands-on laboratory, and internship education experience.

The nature of this work requires graduates to be able to spend long hours on their feet, work in a fast-paced, detail oriented production environment, have strong mathematical and critical thinking skills, and be able to control and manage a multitude of tasks while working within budgetary and time restrictions.

Management

Associate of Business Degree

At the associate's degree level, the Business Administration curricula are designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy.

Coursework includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of cases, communication, team building, and decision-making.

Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

This program is offered at the following Baker College campuses: Allen Park, Auburn Hills, Cadillac, Clinton Township, Flint, Jackson, Muskegon, Owosso, Port Huron.

Paralegal

Associate of Business Degree

This program is designed to offer education in paralegal studies. Core courses prepare students to assist attorneys by drafting legal documents, interacting with clients, and assisting in court. Students will conduct research and prepare memoranda to aid attorneys in resolving legal issues. Students will learn to assist attorneys with discovery, which includes responding to interrogatories, producing documents, and interviewing witnesses. Students may use their paralegal education in private law firms, corporations, nonprofit organizations, court systems, real estate title companies, banks, insurance companies, health care companies, local, state, and federal government agencies.

A paralegal is qualified by education, training, or work experience who is employed or retained by a lawyer, law office, corporation, governmental agency, or other entity and who performs specifically delegated substantive legal work for which a lawyer is responsible. Paralegals may not provide legal services directly to the public except as permitted by law.

This program has been approved by the American Bar Association at the Auburn Hills campus only.

Accounting

Bachelor of Business Administration

This program emphasizes practical application as well as the theoretical aspects of the discipline of accounting to prepare students for professional careers in public, managerial, and governmental accounting and/or advanced study within the discipline. Students will gain an understanding of the social, ethical, economic, legal, and regulatory environment in which businesses operate and develop the problem-solving, decision-making, communication, and leadership skills necessary to compete in a dynamic global marketplace. Students completing this degree are eligible to sit for the Uniform Certified Public Accountant Examination in Michigan (see note below).

Beginning July 1, 2003, students pursuing a CPA licensure in the State of Michigan will be required to have obtained 225 quarter hours of credit prior to applying for a CPA license. While the BBA Accounting Program satisfies the requirements to sit for the Uniform Certified Public Accountant Examination, additional credit is needed for licensure. Individuals are therefore advised to contact the Michigan State Board of Accountancy Licensing Bureau for further information.

Students wishing to become eligible to sit for the examination in other states are recommended to check with the National Association of State Boards of Accountancy (www.nasba.org), which services as a forum for the 54 U.S. boards of accountancy, for the state in which they intend to practice.

Management

Bachelor of Business Administration

The major objective of the management program is to train broadly competent administrators for service in a wide variety of organizations public or private, product or service oriented, profit or not for profit. To accomplish this basic objective, this program offers students the opportunity to acquire knowledge about the management of human and physical resources and to acquire skills useful in the management of any organization. This program emphasizes the importance of effective oral and written communication, teamwork, decision making, entrepreneurial management, and diversity in the business environment.

In addition, this program introduces students to the application and strategic use of the acquired knowledge and skills in areas such as personnel management, organizational behavior, production management, international business, and small business.

These minors are offered at the following Baker College campuses: Allen Park, Auburn Hills, Cadillac, Clinton Township, Flint, Jackson, Muskegon, Owosso, Port Huron.

PROJECT MANAGEMENT MINOR

This minor is offered at the following Baker College campus: Auburn Hills.

Marketing

Bachelor of Business Administration

Marketers provide the link between businesses that have goods and services to sell and customers who want to purchase them. The marketing process involves a variety of activities, including research, strategic planning, product development, sales management, and marketing communications. Students in this program will participate in active learning and demonstrate an understanding of basic business principles using case studies, business simulations; use computer technology and demonstrate communication skills in preparing spreadsheets, writing reports, analyzing business problems, and preparing professional presentations; develop and demonstrate ethical values, a global perspective, and human relations skills through individual and team activities in class and in business situations.

This degree offers a solid background in the concepts of marketing and business. A marketing degree can lead to a career in such areas as marketing management, marketing research, personal selling and sales management, retail merchandising and management, and promotional strategy and management.

Food and Beverage Management

Bachelor of Food and Beverage Management

This program prepares graduates for positions as general food service managers, restaurant and dining room managers, large-volume kitchen managers, banquet and catering directors, catering and event directors/coordinators, food service owners/operators, and potential culinary/food and beverage educators. Skilled graduates will be employed by commercial and private restaurants, hotels, hospitals, deli and catering operations, schools, and in corporate food settings. Food and beverage managers are responsible for the total management of a food service operation. Typical duties include staff selection and training, menu planning, purchasing and inventory control, coordination of marketing activities, dining room management, and the overall management of a food service operation. Instruction is provided through a combination of classroom, hands-on laboratory, and cooperative education experience.

Legal Studies

Bachelor of Science in Legal Studies

This program offers students the opportunity to obtain a Bachelor of Science in Legal Studies and receive a quality higher education and appropriate training to enable them to be successful in their careers as paralegals. This program provides students with practical paralegal skills in conjunction with a well-rounded education in anticipation of their service in a modern, multicultural society. Highly competent graduates will be able to assist attorneys in various areas of law and in diverse legal settings. These objectives are met through carefully designed, application-driven academic requirements; practical internship experience; and academic advising throughout the program.

A paralegal is qualified by education, training, or work experience who is employed or retained by a lawyer, law office, corporation, governmental agency, or other entity and who performs specifically delegated substantive legal work for which a lawyer is responsible. Paralegals may not provide legal services directly to the public except as permitted by law.

This program has been approved by the American Bar Association at the Auburn Hills campus only.

Project Management and Planning

Postbaccalaureate Certificate

This postbaccalaureate certificate prepares an individual for immediate application of the knowledge, skills, tools, and techniques that are utilized in the practice of project management. The philosophy as well as the set of methods learned in this program will enable graduates to lead projects completing them on time and within budget. This program will help prepare students for formal project management certification.

BACHELOR'S DEGREE OR APPROVED EQUIVALENT OF 180 QUAR-TER HOURS FROM AN ACCREDITED INSTITUTION IN ORDER TO ENROLL IN A POSTBACCALAUREATE CERTIFICATE PROGRAM.

General education requirements must be met for all certificates of substantial length (68 or more credit hours), as well as associate and bachelor degree programs. All graduates must meet the general education outcome requirements established by each academic program. The general education requirements are listed below each program's requirements. In addition, any student who places into a developmental education course(s) must meet those course requirements within the first academic year, prior to enrolling in the college level general education course(s).

College Success Strategies (COL 111A) is required for all first-time freshmen. College Success Online (COL 112) is required for all Baker College Online first-time freshmen and for all students enrolled in an online certificate or degree program. These courses will inform students of campus services, policies and procedures, and address learning styles and study strategies.

Many of the courses and programs at Baker College are offered in an online delivery format. See page 117 for Baker College Online programs. Contact your campus Academic/Administrative Office for details about online courses.

If electives are indicated in a program, please refer to the list of Elective Options on pages 57-58.

If general education electives are indicated in a program, please refer to the General Education Course Requirements on page 21. (General education electives may consist of one or more of the following General Education Outcomes: communication, mathematical reasoning, personal and social environments, computer literacy, global and cultural perspectives, and scientific inquiry.)

A new student may choose an "Undeclared but Degree Seeking" program. A student also may add a limited number of "Student Elected Classes" to his/her program with the approval of an academic advisor. Information about both of these options, including course and credit hour limitations, can be obtained in the Academic Office.

Information regarding double majors and/or minors is located on page 250. Contact your campus academic staff to discuss requirements.

Cisco Networking with Wireless and VoIP Certificate

Wireless connectivity and VoIP (Internet based telephone calling) are emerging leading edge technologies. This program will provide students with the framework and foundational skills necessary for employment in this expanding area. Many courses are hands on, based on the Cisco Academy curriculum. Students will learn skills which will assist them in testing for the Cisco CCNA

(Certified Network Associate), Wireless and VoIP certifications. Students also study materials preparing them to take the CompTIA A+, Network+, and Security+ certification.

Computer Animation

Associate of Applied Science Degree

Computer animation skills are in high demand in our media rich society. The explosion of the Internet, animated movies, and other interactive media such as cable and computer gaming have created enormous demand for computing specialists with animation skills. The associate's degree of Computer Animation prepares students foundationally for careers in interactive media, Web 3D, animation, video game development, and video effects. The program will provide students with practical job skills in graphics and web design and in state of the art computer animation and visual effects software.

Computer Networking Technology -**Cisco Option**

Associate of Applied Science Degree

The Associate of Computer Networking Technology (CISCO option) is a CISCO Networking Academy Partner program that prepares students for careers in designing, building, and maintaining computer networks. This degree provides a practical framework that

incorporates training in CISCO networking products specifically and in the area of networking hardware and software infrastructure. This program will provide students with practical job skills, richly expanding their employment opportunities in these critical job areas. Students who successfully complete this two year program will be prepared to sit for the CompTIA Network+ and CCNA (Cisco Certified Network Associate) certifications.

Computer Systems and Internetworking Technology -Cisco Option

Associate of Applied Science Degree

This program blends a subset of foundational electronics courses with routing courses offered in partnership with the CISCO Networking Academy. Upon completion of this two year program, students will have the fundamental skills needed to diagnose, troubleshoot, and implement

Quarter Hours

networks based on routing technologies. Graduates of this program will be prepared to sit for the CompTIA A + and Network +, as well as the CCNA (Cisco Certified Network Associate) certifications which may enhance career opportunities in networking and electronics. Students interested in developing or refining basic skills needed to design and support today's growing Internet based networks will find this degree most fitting.

Digital Media Design

Associate of Applied Science Degree

This program is designed for students who desire employment in the field of graphic communication. This program focuses on application of the latest concepts and technology relating to the presentation of information in a creative, organized, and effective manner. People with these skills have career choices in areas such as digital and/or graphic design and production, marketing, public relations, sales, and communications.

Digital Video Production

Associate of Applied Science Degree

Graduates of this program understand the fundamentals of digital video production from concept through completion. Students become versed in the use of computers as well as specific software for digital editing and graphic effects. Students will gain a historical perspective of the evolution of video to help build a foundation for creating creative productions. Students will produce a finished product for use in their portfolio while seeking employment and/or further training.

Information Technology Support Specialist

Associate of Applied Science Degree

This program focuses on a growing segment of the Information Technology market that focuses on providing service and support for software applications configuration, training of users, maintenance of information, and communication processes between a company's back end network administrators and middle to front line employees and customers. The graduate's employment opportunities include a wide range of occupations within an IS/IT department and/or within the layers between an IS/IT department and the users it serves. Graduates would not only be proficient in the content and use of common business software applications and information processes (word processing, spreadsheet, database operating systems, network connectivity), but also be able to install, configure, train users, troubleshoot, and support those applications.

Internet and LAN Security

Associate of Applied Science Degree

This is a computer networking program offered in conjunction with Check Point Software Technologies. Check Point Software is the world leader in securing the Internet. This associate's degree is an academic partnership program that prepares students for careers in designing, managing, and securing virtual private networks using firewall technologies. This program will provide

students with practical job skills in information security, security management, and the technical components of security, expanding their employment opportunities in this critical and timely job area. Students who successfully complete the two year program will be prepared to pass the CompTIA Network + and CCSA (Check Point Certified Security Administrator) certifications. Students will also have acquired skills for the more advanced CCSE exam (Check Point Certified Security Expert).

Computer Information Systems/Microcomputer Applications

Associate of Business Degree

This program is designed to provide the graduate with the skills to operate and troubleshoot the microcomputer or personal business computer. It also enables students to gain substantial knowledge of the most widely used software applications. Graduates will find positions in large and small businesses using microcomputers to do word processing, planning, accounting, reporting, and designing, just to name a few of the most common microcomputer uses.

Game Software Development

Bachelor of Computer Science

This program is designed to immerse students in the core knowledge of software engineering emphasizing animation and gaming development. This program will focus on leading programming technologies and will prepare students for entry level positions in the gaming industry. A comprehensive approach will carry students from modeling through animation and game programming, to the senior design project.

This program is offered at the following Baker College campus: Clinton Township.

Digital Media Design

Bachelor of Digital Media Technology

This program is designed for students who want to combine graphic communication proficiency in both print and digital formats, with marketing and web development skills. It emphasizes technical, business, and creative development skills necessary for the presentation of information and ideas. Furthermore, the curricula focuses on the application of graphic communication in a variety of business environments where graphic design, marketing, advertising, sales, public relations, training and education are essential to the success of the business.

Digital Video Production

Bachelor of Digital Media Technology

This program is designed for students who want to combine graphic communication proficiency with a special focus on digital video production. Technical courses emphasize the creative development of concepts and ideas using a variety of graphic art and web design media. Students also complete a sequence of digital video production courses that range from storyboarding through the final phases of filming, editing, and DVD development. Skills developed in related areas such as marketing, advertising, sales, and public relations are essential to success in today's fast paced and highly competitive graphic design and digital media businesses.

Cyber Defense

Bachelor of Information Technology and Security

This program prepares graduates for career opportunities in information technology and security with a concentration in cyber defense. Protection of multiple platform hardware, software, networking, and operating systems is considered an integral part of any business' information technology topology. Information technology specialists work in health care, business, information systems, technical, and engineering fields. Cyber defense technologists' possess the necessary skills to identify, correct, and defend against internal and external threats as well as other problematic issues relative to an organizations computing and networking infrastructure on a multiple platform topology.

BACHELOR'S DEGREES

Bachelor of Health Science Pre-Occupational Therapy Bachelor of Health Services Administration Bachelor of Radiation Therapy Bachelor of Rehabilitation Studies

Students may be required to pass a health screening and a criminal background check prior to particular courses, admittance into programs or for their clinical externship.

General education requirements must be met for all certificates of substantial length (68 or more credit hours), as well as associate and bachelor degree programs. All graduates must meet the general education outcome requirements established by each academic program. The general education requirements are listed below each program's requirements. In addition, any student who places into a developmental education course(s) must meet those course requirements within the first academic year, prior to enrolling in the college level general education course(s).

College Success Strategies (COL 111A) is required for all first-time freshmen. College Success Online (COL 112) is required for all Baker College Online first-time freshmen and for all students enrolled in an online certificate or degree program. These courses will inform students of campus services, policies and procedures, and address learning styles and study strategies.

Many of the courses and programs at Baker College are offered in an online delivery format. See page 117 for Baker College Online programs. Contact your campus Academic/Administrative Office for details about online courses.

If electives are indicated in a program, please refer to the list of Elective Options on page 78.

If general education electives are indicated in a program, please refer to the General Education Course Requirements on page 21. (General education electives may consist of one or more of the following General Education Outcomes: communication, mathematical reasoning, personal and social environments, computer literacy, global and cultural perspectives, and scientific inquiry.)

A new student may choose an "Undeclared but Degree Seeking" program. A student also may add a limited number of "Student Elected Classes" to his/her program with the approval of an academic advisor. Information about both of these options, including course and credit hour limitations, can be obtained in the Academic Office.

Information regarding double majors and/or minors is located on page 250. Contact your campus academic staff to discuss requirements.

Coding Specialist

Certificate

Coding is at the heart of both healthcare reimbursement and clinical analysis, which requires a highly trained professional. This certificate prepares the individual to assign codes to diagnoses, symptoms, and procedures using ICD-9-CM and CPT-4 classification systems. Graduates are eligible to take a coding certification exam.

Opticianry

Certificate

The optician or dispensing optician is a skilled professional responsible for fitting eyeglasses and contact lenses as prescribed by an opthalmologist or optometrist. He/she also obtains measurements and assists customers in choosing eyeglass frames, lenses, and coatings. Opticians must also maintain customer records, track inventory, and may have other administrative duties. Opticians are employed in a variety of settings including private opthalmology and optometry offices as well as larger retail stores. Courses in this program will prepare students for the American Board of Opticianry certification examination.

Pharmacy Technician

Certificate

Pharmacy technicians help licensed Pharmacists provide medication and other health care products to patients. Technicians usually perform routine tasks to help prepare prescribed medication, such as counting tablets and labeling bottles. They also perform administrative duties, such as answering phones, maintaining inventory, and operating cash registers. Technicians refer any questions regarding prescriptions, drug information, or health matters to a pharmacist. Graduates of this program will be prepared for entry level employment in a wide variety of pharmacies, including retail, hospital, mail order, nursing homes, and assisted living facilities. Current information on opportunities for pharmacy technicians can be found at the Bureau of Labor and Statistics website (www.bls.gov/oco).

In addition to employment, courses in the program have been developed to prepare individuals to successfully complete the national certification exam administered by the Pharmacy Technician Certification Board.

Practical Nurse

Certificate

The Practical Nursing Program at Baker College prepares students to attain the necessary knowledge, attitudes, and skills for a career as a practical nurse. Upon completion of the program, graduates will obtain a Certificate in Practical Nursing and be eligible to sit for the PN-NCLEX Exam. The curriculum is designed to assist students to become critical thinkers and problem solvers. Students are encouraged to develop an appreciation for the legal, moral, ethical, and cultural dimensions of issues they confront in an ever evolving health care system. The Michigan Board of Nursing may deny licensure to an applicant who has been convicted of a crime or is addicted to drugs or alcohol. All nursing programs must complete the approval process of the Michigan Board of Nursing. The nursing programs within the Baker College system have been approved. The Practical Nurse Program of Baker College of Auburn Hills has received full approval from the Michigan Board of Nursing.

This program is offered at the following Baker College campuses and extension: Allen Park, Auburn Hills, Cadillac, Cass City, Clinton Township, Flint, Jackson, Muskegon, Owosso, Port Huron.

Allied Health Technology

Associate of Applied Science Degree

This program is offered to those who are certified, licensed, and/or registered in an allied health profession. Up to 40 quarter hours of college credit may be awarded toward an associate's degree in allied health. Additional courses from the elective list will be required in cases where individuals do not receive the full 40 credits for their portfolio. A valid registration, license, or certificate number must be presented to the College along with any transcripts of post secondary education from any other institutions. Students must complete at least 48 quarter hours of credit through actual class time with Baker College to receive a degree.

APPROVED 40 QUARTER HOURS FROM AN ACCREDITED INSTITUTION. (MINIMUM GPA OF 2.0)

Dental Assisting

Associate of Applied Science Degree

Dental assistants are members of the dental health care team who provide dental care for patients under the direction of a licensed dentist. Dental assistants are employed in a variety of dental practice settings including solo and group practices, specialty practices, hospital dental clinics, dental schools, public health clinics and dental laboratories. This programs is designed to prepare individuals to sit for two board exams: (1) the Dental Assisting National Board Exam to earn the credential CDA, Certified Dental Assistant, and (2) the State of Michigan Board Exam, to earn the credential RDA, Registered Dental Assistant.

Dental Hygienist

Associate of Applied Science Degree

Dental hygienists are licensed oral health professionals who focus on preventing and treating oral diseases of the teeth and gums, and protection of patients' total health. As part of dental hygiene services, dental hygienists may: perform oral healthcare assessments that include reviewing patients' health histories, dental charting, oral cancer screening, and taking of blood pressure; expose, process and interpret dental radiographs; remove plaque and calculus from the teeth; apply cavity prevention agents; apply sealants; teach patients proper oral hygiene techniques; counsel patients on good nutrition; provide local anesthesia and nitrous oxide for pain and/or anxiety control. Dental hygienists can work as clinicians, educators, researchers, administrators, managers, consumer advocates, sales managers and consultants. They may work in a variety of healthcare settings such as private dental offices, schools, public health clinics, hospitals, correctional institutions, or nursing homes.

The program in dental hygiene is accredited by the Commission on Dental Accreditation of the American Dental Association. This is a specialized accrediting body recognized by the Commission on Recognition of Post secondary Accreditation and by the United States Department of Education. Please reference www.ada.org for further information.

Diagnostic Medical Sonography

Associate of Applied Science Degree

Through academic and clinical training, students are prepared for the field of sonography to provide patient care utilizing diagnostic ultrasound equipment. Students will use knowledge gained in this program, experience close patient contact, and utilize diagnostic ultrasound equipment to provide physicians with images necessary to diagnose conditions and diseases. Sonographers are able to: apply knowledge of anatomy and physiology, as well as pathophysiology to accurately demonstrate anatomical structures on a sonogram or digital medium; apply principles of sonographic physics to assess anatomical structures; recognize sonography's role in the healthcare environment; and provide patient care and comfort. Graduates are eligible to take the registry certification following program completion and acceptance of the graduate's application by the American Registry of Diagnostic Medical Sonography (ARDMS). Enrollment is limited for this program.

The mission of the Diagnostic Medical Sonogrpahy program is to provide didactic and clinical education that enables qualified students to achieve strong communication, critical thinking and technical skills required to obtain entry level employment and become a Registered Diagnostic Medical Sonographer.

Medical Laboratory Technician

Associate of Applied Science Degree

The Medical Laboratory Technician is a skilled professional who works in a clinical laboratory setting under the supervision of a qualified physician and/or medical technologist. The technician performs laboratory procedures involving body fluids in the areas of hematology, microbiology, immunohematology, immunology, clinical chemistry, and urinalysis. A laboratory technician operates automated analyzers and monitors quality control programs. Although technicians have limited patient contact, clinical laboratory testing plays a crucial role in the detection, diagnosis and treatment of disease. Upon completion of this program, students will be eligible to sit for national certification as a Medical Laboratory Technician. Enrollment is limited for this program.

Opticianry

Associate of Applied Science Degree

An optician is a professional who has the responsibility for the dispensing of eyewear, including spectacles, contact lenses, low vision aids, and accessories. The optician may fabricate, verify, and fit eyeglasses, contact lenses and other optical devices upon the written prescription of a medical doctor or doctor of optometry. Once presented with this prescription, an optician is responsible for analyzing and interpreting the prescription to determine the lenses that are best suited to the patient's lifestyle and visual needs. Frame selection, including size and material, is then chosen. The optician takes measurements to insure proper lens placement in the frame, and must verify the accuracy of the finished product. The glasses are adjusted to the patient by the optician at the time of delivery. Other duties include occasional adjustments to retain proper fit, replacements, and repairs of lenses and frames.

Graduates are eligible to sit for the National Opticianry Competency Exam administered by the American Board of Opticianry and the National Contact Lens Examination. Students may also sit for state licensure exams in states where applicable. At this time the state of Michigan does not require licensure or certification to practice this profession. Enrollment for this program is limited.

Orthotic/Prosthetic Technology

Associate of Applied Science Degree

This program is designed to provide students with a comprehensive education in both disciplines of Orthotic Technology (fabrication of orthopedic braces) and Prosthetic Technology (fabrication of artificial limbs). Students will learn to interpret orthometry forms, apply biomechanical principles and fabricate orthotic/prosthetic devices.

This program is accredited by the National Commission of Orthotics and Prosthetics Education (NCOPE), 330 John Carlyle Street, Suite 200, Alexandria, VA 22314, phone (703) 836-7114, fax (703) 836-0838, web http://www.ncope.org, email: info@ncope.org. Accreditation will give graduates eligibility to take the national registry examinations for technicians offered by the American Board for Certification. Upon completion of the program students are eligible to sit for the national exams to become a Registered Technician Orthotics (RTO), Registered Technician Prosthetics (RTP), or Registered Technician Prosthetics/Orthotics (RTPO). Enrollment is limited for this program.

Pharmacy Technician

Associate of Applied Science Degree

Pharmacy technicians help licensed Pharmacists provide medication and other health care products to patients. Technicians usually perform routine tasks to help prepare prescribed medication, such as counting tablets and labeling bottles. They also perform administrative duties, such as answering phones, maintaining inventory, and operating cash registers. Technicians refer any questions regarding prescriptions, drug information, or health matters to a pharmacist. Graduates of this program will be prepared for entry level employment in a wide variety of pharmacies, including retail, hospital, mail order, nursing homes, and assisted living facilities. Current information on opportunities for pharmacy technicians can be found at the Bureau of Labor and Statistics website (www.bls.gov/oco).

In addition to employment, courses in the program have been developed to prepare individuals to successfully complete the national certification exam administered by the Pharmacy Technician Certification Board.

Physical Therapist Assistant

Associate of Applied Science Degree

The physical therapist assistant (PTA) is a technical health care worker who performs patient care under the supervision of a licensed physical therapist. Typical settings include hospitals, rehabilitation clinics, private practice, geriatric care facilities, sport medicine centers, school systems, and industrial sites. Graduates will be eligible for licensure or certification examinations in any state, although licensure for PTAs is not currently required in Michigan. For information about the licensure examination see http://www.fsbpt.org.

Polysomnographic Technology

Associate of Applied Science Degree

Polysomnography is a new, rapidly growing, health related field dedicated to the study of sleep disorders. With millions of people being tested in sleep laboratories and few formal training programs nationwide, opportunities for qualified polysomnographers (sleep study technologists) are outstanding. These specialists work in state of the art laboratories where they assess patients and prepare them for sleep studies. They also operate, monitor, and troubleshoot highly sophisticated sleep computers to analyze sleep patterns. With the information they gather, sleep technologists help physicians diagnose and treat sleep disorders. Baker College's Associate of Applied Science Degree program in Polysomnographic Technology offers comprehensive preparation for entry into this important field. Specialized laboratories help students develop the expertise needed to become independent clinicians. Enrollment is limited for this program.

Radiologic Technology

Associate of Applied Science Degree

Radiographers are highly skilled professionals qualified to perform diagnostic imaging procedures and examinations under the direction of a licensed physician. Technologists apply knowledge of anatomy and physiology, positioning, and radiographic techniques to provide quality health care services.

The mission of the Baker College Radiologic Technology program is to enable qualified students to develop into competent and professional entry level radiographers who are prepared to successfully sit for the ARRT examination and acquire gainful employment. We believe that this is done through exercises in critical thinking, varied clinical experience, the encouragement of universally responsible behavior, and foundations in guiding radiologic principles.

Respiratory Care

Associate of Applied Science Degree

This program is designed to prepare graduates for a highly professional and dynamic career as competent Respiratory Care Practitioners. Respiratory Therapists, also known as Respiratory Care Practitioners, as members of a team of health care professionals work to evaluate, treat, and manage patients of all ages with respiratory illnesses and other cardiopulmonary disorders in a wide variety of clinical settings. Respiratory Care Practitioners must behave in a manner consistent with the standards and ethics of all health care professionals. In addition to performing respiratory care procedures, respiratory therapists are involved in clinical decision making (such as patient evaluation, treatment selection, and assessment of treatment efficacy) and patient education.

Respiratory Care Practitioners work in hospitals, home care companies, physicians' offices, extended care facilities, in outpatient centers, in respiratory care equipment sales, and as educators in hospitals, colleges, and universities. Therapists may choose to specialize in neonatology or pediatrics (caring for infants or children), sleep diagnostics, pulmonary function testing, rehabilitation, providing home care services, or they may choose critical and emergent care settings. Enrollment is limited. Baker College of Auburn Hills holds a Letter of Review from the Committee on Accreditation for Respiratory Care, 1248 Harwood Road Bedford, TX 76021; (817) 283-2835; Web address: www.coarc.com.

Surgical Technology

Associate of Applied Science Degree

A surgical technologist possesses expertise in the theory and application of sterile and aseptic technique and combines the knowledge of human anatomy, pathophysiology, surgical procedures, and implementation tools and technologies to facilitate a physician's performance of surgery. The surgical technologist works under the supervision of a surgeon to ensure that the operating room environment is safe, that equipment functions properly, and that the operative procedure is conducted under conditions that maximize patient safety.

Currently, the role of the surgical technologist is expanding to include other areas of surgery such as Labor and Delivery Units, Cardiac Catheterization Labs, Outpatient Surgery Facilities, and for physicians in private practice.

Veterinary Technician

Associate of Applied Science Degree

A veterinary technician can best be thought of as an animal nurse. By definition, a veterinary technician is a person who has completed a 2 year associate's degree in Veterinary Technology from an AVMA (American Veterinary Medical Association) accredited institution. The Veterinary Practice Act of Michigan allows veterinary technicians to do anything for the care of animals except diagnose disease, prescribe medication, and perform surgery. Besides providing nursing care, veterinary technicians also function as laboratory technicians, radiology technicians, In addition, veterinary technicians are often responsible for a majority of the client education that occurs in a veterinary practice, thus this is a profession that requires excellent communication skills. The veterinary technicians are extremely varied.

Career opportunities exist within, but are not limited to the following areas: small animal hospitals, large animal hospitals, research, education, pharmaceuticals, and the military. Accreditation is granted through the American Veterinary Medical Association, Committee on Veterinary Technician Education and Activities (AVMA, CVTEA). Cadillac, Clinton Township, Flint, Jackson, Muskegon, and Port Huron are currently accredited.

Once a student has successfully graduated from an AVMA accredited program, they are able to sit for their state and national licensing exams. If the graduate passes both exams, they earn the title of Licensed Veterinary Technician (LVT). Students who graduate will be eligible for licensure by the State of Michigan. A graduate must successfully pass a state and national board examination to become licensed in the State of Michigan. Enrollment is limited for this program.

Nursing

Associate Degree in Nursing

The vision that drives the Associate's Degree in Nursing program at Baker College is a future where patients/clients consistently experience caring nurses that promote their well being in mind, body, and spirit. This vision incorporates a patient/client nurse experience that positively affects both parties and results in a heightened public awareness of nursing as the caring, healing, health profession.

Through an approved program of study, the faculty seeks to prepare graduates with an associate's degree in nursing who upon graduation will be eligible to take the licensure examination to become registered nurses (RNs). Nursing students will be assisted to develop knowledge, attitudes, and skills essential to the practice of professional nursing through active, participatory and culturally diverse learning. The curriculum is designed to assist students to become critical thinkers and problem solvers with an appreciation for the moral, ethical, and cultural dimensions of the issues they confront in an ever evolving health care system.

The Michigan Board of Nursing may deny RN licensure to an applicant who has been convicted of a crime or is addicted to drugs or alcohol. Enrollment is limited for this program.

All nursing programs must complete the approval process of the Michigan Board of Nursing. The nursing programs within the Baker College system have been approved. Baker College of Cadillac and Muskegon have received initial approval from the Michigan Board of Nursing. Baker College of Clinton Township, Flint and Owosso have received full approval from the Michigan Board of Nursing.

Nursing - LPN to ADN Ladder

Associate Degree in Nursing

This specifically designed Associate Degree in Nursing at Baker College of Auburn Hills is a ladder program for Licensed Practical Nurses who are interested in becoming a Registered Nurse. This program builds on the patient/client nurse experience and incorporates the knowledge, critical thinking, analytical skills, and professionalism of the Registered Nurse. The student will actively participate in culturally-diverse learning, with an appreciation for the moral and ethical dimensions of the issues they confront in an ever evolving health care system. The faculty seeks to prepare graduates with an Associate Degree in Nursing who, upon graduation, will be eligible to take the licensure examination to become a Registered Nurse. The Michigan Board of Nursing may deny licensure to an applicant who has been convicted of a crime or is addicted to drugs or alcohol.

All nursing programs must complete the approval process of the Michigan Board of Nursing. The nursing programs within the Baker College system have been approved. Baker College of Auburn Hills PN to ADN ladder program has received initial approval from the Michigan Board of Nursing.

This program is offered at the following Baker College campus: Auburn Hills.

Pre-Occupational Therapy

Bachelor of Health Science

This program is concerned with providing a practical education which will enable graduates to apply their skills to a diverse population in a variety of settings. The curriculum will provide students with early exposure to the occupational therapy profession and to those conceptual models that are applied by occupational therapists on a daily basis. The combined Pre-Occupational Therapy program and the Master of Occupational Therapy program are currently recognized as fully accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, P.O. Box 31220, Bethesda, Maryland 20824-1220; phone number: (301) 652-AOTA.

Students must have successfully completed all Level I (bachelor) and Level II (master), clinical experiences, and have graduated from an accredited occupational therapy program to be eligible to sit for the national Occupational Therapist Registered Examination. States have licensure/registration laws that occupational therapists must comply with to practice in that state. The accreditation Council for Occupational Therapy Education (ACOTE) and the American Occupational Therapy Association have mandated that all entry level occupational therapists be prepared at the master degree level beginning January 2007. Therefore, all pre-occupational therapy students will be required to apply to the Baker Center for Graduate Studies upon completion of the Bachelor of Health Sciences degree. The graduate portion of the program, including the Level II clinical courses, will allow registration/licensure.

The Baker College Bachelor of Health Sciences and Master of Occupational Therapy programs are combined as a 4 + 1 degree program; students complete four years of undergraduate study and one year of graduate study. A criminal conviction may prevent eligibility to sit for the national certification examination, qualification for state registration/licensure, specific employment opportunities, and placement at Level I and Level II clinical sites. Students are encouraged to contact state licensure agencies and the National Board for Certification in Occupational Therapy (NBCOT) at (301) 990-7979 or www.nbcot.org prior to applying to the program. Enrollment is limited for this program.

Radiation Therapy

Bachelor of Radiation Therapy

This program is an allied health discipline, which utilizes radiation for the treatment of cancer and cancer related diseases. The radiation therapist plays an integral role in the management team of physicians, physicists, and other allied health personnel. The professional has the unique opportunity to blend knowledge and skills of mathematics, medical science, and psychology in his or her everyday work. The radiation therapist has the opportunity of knowing patients over a period of several months, and becoming an integral part of their health care.

Rehabilitation Studies

Bachelor of Rehabilitation Studies

This program addresses the unique needs of today's physical therapist assistant or occupational therapy assistant in a managed care environment. The interdisciplinary, "team" approach and a functional approach to rehabilitation is strongly emphasized in the program philosophy, without compromising the integrity of either field. This degree requires students to complete both the Occupational Therapy Assistant and Physical Therapist Assistant Associate degree programs, as well as extensive health science coursework pertinent to clinical practice at the assistant level. The Occupational Therapy Assistant and Physical Therapist Assistant Associate Degree programs must be pursued separately. They cannot be taken simultaneously. Students must meet all entrance requirements for each clinical program (PTA and OTA). Additional science course work incorporated throughout the program may allow students to prepare for graduate studies in a related field. Transfer students and practicing clinicians will be evaluated on an individual basis.

POSTBACCALAUREATE CERTIFICATE Continuous Quality Improvement

General education requirements must be met for all certificates of substantial length (68 or more credit hours), as well as associate and bachelor degree programs. All graduates must meet the general education outcome requirements established by each academic program. The general education requirements are listed below each program's requirements. In addition, any student who places into a developmental education course(s) must meet those course requirements within the first academic year, prior to enrolling in the college level general education course(s).

College Success Strategies (COL 111A) is required for all first-time freshmen. College Success Online (COL 112) is required for all Baker College Online first-time freshmen and for all students enrolled in an online certificate or degree program. These courses will inform students of campus services, policies and procedures, and address learning styles and study strategies.

Many of the courses and programs at Baker College are offered in an online delivery format. See page 117 for Baker College Online programs. Contact your campus Academic/Administrative Office for details about online courses.

If electives are indicated in a program, please refer to the list of Elective Options on page 90.

If general education electives are indicated in a program, please refer to the General Education Course Requirements on page 21. (General education electives may consist of one or more of the following General Education Outcomes: communication, mathematical reasoning, personal and social environments, computer literacy, global and cultural perspectives, and scientific inquiry.)

A new student may choose an "Undeclared but Degree Seeking" program. A student also may add a limited number of "Student Elected Classes" to his/her program with the approval of an academic advisor. Information about both of these options, including course and credit hour limitations, can be obtained in the Academic Office.

Information regarding double majors and/or minors is located on page 250. Contact your campus academic staff to discuss requirements.

This program is offered at the following Baker College campuses: Clinton Township, Flint.

Automotive Services Technology

Certificate

This program will prepare students to perform successfully on the Motor Vehicle Specialty Certification test for each con-

centration selected. Students will have some flexibility in selecting the concentration areas of their choice. The state certification is required for all persons who work in positions as specialty mechanics or

master mechanics in the State of Michigan. For a current list of NATEF certified programs, please visit http://natef. org/certified.cfm.

Computer Service Technician

Certificate

This program prepares students for entry level positions as computer service/repair technicians and helps those currently employed update their knowledge of computer systems; learn about computer equipment and the networking software used to connect them. Typically, service technicians work in repair facilities or maintain equipment in the field. Other computer technicians are employed in

manufacturing facilities. This program will help to prepare individuals to sit for qualifying examinations, which may lead to certification as a Microsoft Certified Technology Specialist (MCTS) or Microsoft Certified IT Professional (MCITP).

Kitchen and Bath Design

Certificate

This program prepares students for an entry level position in Kitchen and Bath Design. Under the direction of professional instructors, Accredited Program students combine basic design principles and

knowledge of technical and mechanical concepts to design environments that assure public health, safety, and welfare. The curricula provides students the opportunity to select and specify building materials, mechanical/electrical systems, building codes, appliances, and cabinetry. Skills are developed using manualand computer generated applications to develop contractual documents and graphic presentations. Certification and two years of work experience may qualify students to sit for the National Kitchen and Bath Association (NKBA) Certification exam. This program has been accredited by the National Kitchen and Bath Association. For a current list of NKBA accredited programs, please visit www.nkba.org/industry_educators_acc_supported.aspx.

Architectural/Construction Technology

Associate of Applied Science Degree

This program teaches computer aided drafting (CAD), architectural drafting, cost estimating, and building construction methods and materials. Included are residential and commercial building concepts with mechanical and electrical components. Externships provide students with practical experience in areas such as construction cost estimating, material sales, construction drawings, and construction projects.

Students will gain the hands-on ability to do architectural drawings and knowledge of the workings of the building construction industry. Graduates may find positions in architectural drawing, materials estimating and sales, building inspection, construction supervision, and other building industry fields.

This program is offered at the following Baker College campuses: Auburn Hills, Cadillac, Flint, Jackson, Muskegon, Owosso.

Computer Systems and Internetworking Technology

Associate of Applied Science Degree

The Internet is the most powerful information system the world has ever known, and it is based upon the everyday use of both personal computers and routing technology. This program provides detailed training in both of these areas. Classroom and hands-on training focus on the skills required for two of today's most sought after computer certifications: CompTIA's A+ and the CCNA (Cisco Certified Network Associate). Students learn how to install, diagnose, and repair PC systems in addition to installing, configuring, and

Electronic Systems Technology

Associate of Applied Science Degree

This program prepares graduates for a career as an Electronics Systems Technician. The career area encompasses the implementation and set up of various electronic systems integrated to a centralized computer control unit. Graduates will be able to apply their knowledge and skills necessary to configure and integrate fire alarm/intrusion systems, telecommunication systems, audio/video systems, fiber optics, wireless communications, access control systems, and digital home technology integration. Students also study material preparing them to take the CEA CompTIA DHTI+ certification.

Electronic Technology

Associate of Applied Science Degree

This program prepares graduates for a career as an electronic technician. Students will be required to apply specific electronic principles in the maintenance, repair, and manufacture of electronic devices, especially the fast growing digital/microprocessor area.

Program Educational Objectives: 1) Function as an electronic technician capable of working with the designing, installation, manufacturing, operation, and maintenance of electronics systems. 2) Demonstrate critical thinking skills by applying the basic principles of electronics technology to solve technical problems. 3) Demonstrate competence in written and oral communication. 4) Work effectively as an individual and as a member of a team. 5) Demonstrate the awareness of ethical, social, and professional responsibilities in the workplace. 6) Continue their professional training and adapt to changes in the workplace through additional formal and informal education.

Program Outcomes: Graduates will demonstrate: a) appropriate mastery of knowledge, techniques, skills and modern tools of the electronic technology field; b) an ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology; c) an ability to conduct, analyze, and interpret experiments and apply experimental results to improve processes; d) an ability to apply creativity in the design of systems, components, or processes appropriate to program objectives; e) an ability to function effectively in teams; f) an ability to identify, analyze, and solve technical problems; g) an ability to communicate technical information effectively to technical and non-technical individuals; h) recognition of the need for and an ability to engage in lifelong learning; i) knowledge of professional, ethical, and social responsibilities; j) a respect for diversity and knowledge of contemporary professional, societal, and global issues pertaining to the electronic technology field; k) a commitment to quality, timeliness, and continuous improvement; 1) the application of circuit analysis and design, computer programming, associated software, analog and digital electronics, and microcomputers to the building testing, operating, and maintenance of electrical/electronic(s) systems; m) the application of physics to electrical/electronic(s) circuits in a rigorous mathematical environment at or above the level of algebra and trigonometry.

Heating, Ventilation, Air Conditioning, & Refrigeration Technology

Associate of Applied Science Degree

This program will train heating, ventilation, air conditioning, and refrigeration technicians to cost estimate and design HVAC&R applications as well as install, maintain, and repair heating, cooling, and refrigeration systems. Technicians often specialize in one type of equipment, for example furnaces, central air conditioning, or commercial refrigeration.

Interior Design

Associate of Applied Science Degree

This program prepares students for entry level positions in interior design. Students apply elements and principles of design, space planning, textiles, and furnishings as they relate to the interior environment. Basic drawing and presentation skills will be emphasized throughout the program. Using current technology, students will develop and present projects focusing on public health, safety, and welfare. Students will gain a basic understanding of the interior design practice and the industry as a whole. The program provides a solid foundation for further study in the interior design field.

Mechanical Technology

Associate of Applied Science Degree

The Mechanical Technology Program is designed to prepare students for employment in mechanical design, manufacturing, and production industries. This program is designed for students interested in entry level positions as well as experienced technicians who wish to improve their skills. Emphasis is placed on computer aided design (CAD) along with the mathematical and communication skills required to function effectively as part of an engineering team. This program provides the foundation courses in science and mathematics leading graduates to a Bachelor of Science in Mechanical Engineering, which can be completed in three additional years.

Professional Pilot/Aviation Technology

Associate of Applied Science Degree

This program is designed for the individual who is seeking to gain an entry level position or increase his/her opportunities for promotion in professional aviation.

Students will complete commercial pilot requirements and additional specialized aviation training. Long range employment opportunities for aviation professionals are excellent and increasing steadily. Once students are enrolled with the College, flight instruction from a non-Baker College carrier will not be considered as fulfillment of course requirements in the aviation program.

Interior Design

Bachelor of Interior Design

This program prepares students for an entry level position in interior design. Industry professionals assist students to refine creative, technical, mechanical, and business skills with an emphasis in commercial environments. Students apply problem solving techniques relative to efficient and effective spatial design, aesthetics, function, and quality of interior environments. Students have the opportunity to conduct extensive research selecting and specifying building materials and mechanical/electrical systems. Current regulations, building codes, and business practices are applied to projects assuring public health, safety, and welfare.

Students are encouraged to develop individual style, creativity, and visual graphic presentation skills using manual and computer generated presentation techniques. Contractual documents, model building, and three-dimensional rendering presentations are created to communicate ideas from concept to completion. Students are encouraged to create professional portfolios that demonstrate practical, functional, and innovative ideas. Education, experience, and examination are needed to become a certified designer. This program provides students the opportunity to continue building design skills in preparation of becoming a qualified licensed professional.

Architectural Technology

Bachelor of Science in Architectural Technology

This program prepares graduates for entry level positions in the architectural and construction industry. Graduates will typically find employment with architects, engineers, contractors, building manufacturers, real estate developers, and various government agencies. The emphasis of study is on the systematic application of skills in the areas of building design implementation, computer-aided design, and structure. This program will provide qualified students the opportunity to advance their education in the professional field of architectural practice, as a step to meet the prerequisite requirement for registration as an architect.

Construction Management

Bachelor of Science in Construction Management

This program provides an education focusing on critical thinking that blends management with technology and liberal arts for a career in construction and related industries. The graduate provides leadership while working with the owner, architect, engineer, developer, contractor, and governmental agencies, using their professional knowledge to oversee the construction process. Graduates learn various skills to manage construction projects globally and sustainably to maximize product and overall project value for owners. A combination of architecture, construction, and management courses provide a strong foundation in the critical skills and knowledge needed by professionals. The program emphasizes project management skills rather than craft skills. Graduates of this program may begin their careers in a variety of positions involving construction project management, cost estimating, construction safety, project planning/scheduling, and contract administration.

Industrial Engineering

Bachelor of Science In Industrial Engineering

This program prepares an individual for involvement in a broad range of industries where the efficiency of people, machines, materials, and information are critical to the success of organizations. Industrial engineers are involved in the design, development, installation, and improvement of integrated systems in diverse areas such as computer, education, financial, government, health care, and manufacturing organizations.

Program Outcomes: Graduates will demonstrate: a) an ability to apply knowledge of mathematics, science, and engineering; b) an ability to design and conduct experiments as well as analyze and interpret data; c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability; d) an ability to function on multi-disciplinary teams; e) an ability to identify, formulate, and solve engineering problems; f) an understanding of professional and ethical responsibility; g) an ability to communicate effectively; h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context; i) a recognition of the need for an ability to engage in lifelong learning; j) a knowledge of contemporary issues; k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; 1) an ability to design, develop, implement and improve integrated systems that include people, materials, information, equipment, and energy.

This program is offered at the following Baker College campus: Flint.

Mechanical Engineering

Bachelor of Science in Mechanical Engineering

The mission of the Baker College Department of Mechanical Engineering is to provide quality higher education and training in the fundamental principles and sound practice of engineering which will enable graduates to be an asset to society and successful throughout challenging and rewarding careers. This program is accredited by the EAC Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; phone: 410-347-7700.

Program Educational Objectives: To prepare graduates who: 1) Demonstrate competence in engineering practice in local and global industry environments, or in related careers in government or academia. 2) Exhibit effective communication, team work, and readiness for lead-

ership while acting ethically and professionally. 3) Maintain awareness of societal and contemporary issues and fulfill community and society's needs. 4) Actively engage in lifelong learning, by completing professional development/training courses and workshops, acquiring engineering certification, or pursuing and completing an advanced degree.

Program Outcomes: Graduates will demonstrate: a) an ability to apply knowledge of mathematics, science and engineering; b) an ability to design and conduct experiments as well as analyze and interpret data; c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability; d) an ability to function on multi-disciplinary teams; e) an ability to identify, formulate, and solve engineering problems; f) an understanding of professional and ethical responsibility; g) an ability to communicate effectively; h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context; i) a recognition of the need for and an ability to engage in lifelong learning; j) a knowledge of contemporary issues; k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; 1) an ability to apply principles of engineering, basic science, and mathematics (including multivariate calculus and differential equations) to model, analyze, design, and realize physical systems, components, or processes; m) an ability to work professionally in both thermal and mechanical systems areas. Students may be able to test out of several beginning courses to complete the program in four vears.

Continuous Quality Improvement

Postbaccalaureate Certificate

The Continuous Quality Improvement Certificate Program is designed to provide the body of knowledge required to sit for the American Society of Quality (ASQ) Six Sigma Green Belt Exam. Students will become acquainted with use of quality improvement methods, philosophies and tools for use in manufacturing, healthcare, computer science, service industries, education and business. The program provides knowledge and hands-on experiences that will develop the students' skills in the various tools along with collection and statistical analysis of process information and data. The Students learn to select and use techniques in standard work, process analysis and improvement, pull systems, Toyota Production System (Lean methodologies), statistical process control, six sigma methodology (DMAIC), project management, team work and other continuous quality improvement techniques which are essential to the success of any company, healthcare facility or educational system.

General education requirements must be met for all certificates of substantial length (68 or more credit hours), as well as associate and bachelor degree programs. All graduates must meet the general education outcome requirements established by each academic program. The general education requirements are listed below each program's requirements. In addition, any student who places into a developmental education course(s) must meet those course requirements within the first academic year, prior to enrolling in the college level general education course(s).

College Success Strategies (COL 111A) is required for all first-time freshmen. College Success Online (COL 112) is required for all Baker College Online first-time freshmen and for all students enrolled in an online certificate or degree program. These courses will inform students of campus services, policies and procedures, and address learning styles and study strategies.

Many of the courses and programs at Baker College are offered in an online delivery format. See page 117 for Baker College Online programs. Contact your campus Academic/Administrative Office for details about online courses.

If electives are indicated in a program, please refer to the list of Elective Options on page 116.

If general education electives are indicated in a program, please refer to the General Education Course Requirements on page 21. (General education electives may consist of one or more of the following General Education Outcomes: communication, mathematical reasoning, personal and social environments, computer literacy, global and cultural perspectives, and scientific inquiry.)

A new student may choose an "Undeclared but Degree Seeking" program. A student also may add a limited number of "Student Elected Classes" to his/her program with the approval of an academic advisor. Information about both of these options, including course and credit hour limitations, can be obtained in the Academic Office.

Information regarding double majors and/or minors is located on page 250. Contact your campus Education and Human Service staff to discuss requirements.

9-1-1 Telecommunications

Certificate

This program prepares the graduate for a career as a 9-1-1 Telecommunicator and meets the Michigan State 9-1-1 Committee training standards. The program emphasizes roles and responsibilities, legal and ethical aspects, interpersonal skills and professionalism of a dispatcher working in a high stress, highly technical team situation. Graduates will receive both the basic and advanced courses required for certification in Michigan. A 30-hour fieldwork component is required to help integrate classroom learning into practical field applications.

Certified Addictions Counselor

Certificate

This program provides students with the education component required for the Michigan Certification Board of Addiction Professionals (MCBAP) Certified Addictions Counselor credential. This credential is required for inpatient and outpatient substance abuse treatment, drug courts, private and public agencies. Students completing the program will have the skills and knowledge of the 12 core counseling functions required for addictions treatment which include: screening, intake, orientation, assessment, treatment planning, counseling, case management, crisis intervention, client education, referral, report and record keeping, and consultation with other professionals in regard to client treatment/services. In order to qualify for the MCBAP credential, individuals must meet the following requirements as determined by the International Certification Reciprocity Consortium (ICRC) for Alcohol and Other Drug Abuse Counselors (ADOA): education, supervised work experience, supervised practical training, passing score on a written examination, and adherence to code of ethics statement.

Child Care Assistant

Certificate

This program blends an education in theoretical and practical study of child development and early childhood education with the unique aspects of the child care setting. The specific developmental, emotional, and recreational needs of young children are explored through application of art, literature, and play activities for the infant, toddler, and pre-schooler.

The graduate is prepared for an entry level early child care assistant position. In addition, this program prepares students for the Child Development Associate (CDA) assessment and process, the national credential recognized by the Council for Early Childhood Professional Recognition. The CDA credential is listed as a qualification for teaching staff and/or directors in child care regulations in fortysix states and the District of Columbia. Employment opportunities exist in school settings, day care centers, licensed day care homes, and other child care environments. The CDA courses are ECE101B, ECE111B, ECE165, and ECE191.

Corrections Officer

Certificate

This program prepares students for positions in federal, state, local, and private correctional facilities. This program provides all of the required elements established by the Michigan Correctional Officers' Training Council. Students successfully completing this certificate will be prepared to sit for the civil service test required for employment by the Michigan Department of Corrections.

Criminal Justice

Associate of Applied Science Degree

This program prepares graduates with the skills, tools, and methods needed to work in the criminal justice profession. The program explores the philosophical underpinnings of crime and justice. Graduates will understand the interrelatedness of police, corrections, and the courts. Concepts of justice, duty, and societal issues will be examined along with various ethical issues related to criminal justice topics. Graduates will model ethical behavior and a commitment to service with the skills necessary to respond to complex and dynamic situations appropriately. Interpersonal communication and writing skills germane to the criminal justice profession are practiced throughout the program.

Early Childhood Education

Associate of Applied Science Degree

This program prepares students for employment opportunities as a child care program director, a preschool teacher, a teacher assistant, or a family child care manager. Students learn to plan and organize age appropriate curricula and environments for infants, toddlers, preschool age children, and school age children. This program examines current challenges that early childhood educators will face as they enter this contemporary profession. Characteristics, skills, knowledge, and experiences important in becoming a teacher of young children are presented to the student. Students are involved in several hours of fieldwork experience within various child care settings. This program prepares the student for the Child Development Associate (CDA) assessment process, the national credential recognized by the Council for Early Childhood Professional Recognition. The CDA credential is listed as a qualification for teaching staff and/or directors in child care regulations in 46 states and the District of Columbia. The CDA courses are ECE101B, ECE111B, ECE165, and ECE191.

Human Service

Associate of Applied Science Degree

This program prepares students in the areas of psychology, stress management, conflict management, and social problems to work in entry level positions in a variety of human service settings. Graduates will work closely with social workers, counselors, and psychologists, focusing on the special needs of children, adolescents, families, developmentally disabled individuals, and the elderly. This program combines general education with training for competency in the field of human service in order for graduates to be prepared in their chosen fields of study and to continually enhance their own personal and professional growth.

Interpreter Training

Associate of Applied Science Degree

This program prepares graduates for employment as Sign Language Interpreters, who facilitate communication between deaf and hard of hearing individuals, and the hearing population. Upon successful completion of the associate's degree program, graduates will have the skills required for employment in school districts, and deaf and hard of hearing service centers. In addition, graduates will work as freelance interpreters in a wide range of settings in which interpretation is required, including education, employment, recreation, health care, and legal services.

Paraprofessional: Early Elementary

Associate of Applied Science Degree

This program provides an option for Title I paraprofessionals and those wanting to become paraprofessionals who must meet the requirements of the No Child Left Behind Act of 2001. Paraprofessionals who earn this degree can be translators, be involved with parents' activities, help with classroom management, assist in computer labs, and tutor students one-on-one during seatwork time. This program emphasizes the development of children and focuses on reading, writing, and mathematics skills.

Criminal Justice

Bachelor of Science in Criminal Justice

This program prepares graduates with the skills, tools, and methods needed to work in the criminal justice profession. The program explores the philosophical underpinnings of crime and justice. Graduates will understand the interrelatedness of police, corrections, and the courts. Concepts of justice, duty, and societal issues will be examined along with various ethical issues related to criminal justice topics. Graduates will model ethical behavior and a commitment to service with the skills necessary to respond to complex and dynamic situations appropriately. Interpersonal communication and writing skills germane to the criminal justice profession are practiced throughout the program.

Early Childhood Education

Bachelor of Science in Early Childhood Education

This program prepares students for a rewarding career in Early Childhood Education. It will blend higher level critical applications of the theoretical and practical study of child development and early childhood education in a multitude of professional applications. The Early Childhood Education Bachelor Degree program will require four years of college preparation. The goal of this program is to produce quality Early Childhood Education professionals. Successful graduates may be employed in supervisor and administrative positions, as family advocates, preschool teachers, home visitors, trained specialists, directors, curriculum developers, and child advocates. This program does NOT lead to elementary (K-8) certification.

This program is offered at the following Baker College campuses: Auburn Hills, Clinton Township, Flint, Jackson, Muskegon, Owosso, Port Huron.

BIOLOGY MINOR

This minor is offered at the following Baker College campuses: Clinton Township, Flint, Jackson, Port Huron.

CHEMISTRY MINOR

This minor is offered at the following Baker College campuses: Auburn Hills, Clinton Township, Flint, Muskegon.

ENGLISH MINOR

This minor is offered at the following Baker College campuses: Auburn Hills, Clinton Township, Flint, Jackson, Muskegon, Owosso, Port Huron.

MATHEMATICS MINOR

This minor is offered at the following Baker College campuses: Auburn Hills, Clinton Township, Flint, Jackson, Muskegon, Owosso.

Elementary Education and Early Childhood Education - Level Change

Postbaccalaureate Certificate

This program provides teachers with the knowledge and skills needed to add both an elementary and an early childhood endorsement to an existing Michigan secondary teaching certificate, allowing the holder to teach all subjects in kindergarten through grade 5 and in kindergarten through grade 8 self-contained classrooms. The level change may also extend the validity of existing endorsements to additional grade levels. Students complete both the elementary studies and early childhood minors and a portion of the professional education core that is specific to working with elementary students. Upon completing the program and passing the required state test, students will be eligible to apply for the endorsements.

POSTBACCALAUREATE CERTIFICATE Project Management and Planning

General education requirements must be met for all certificates of substantial length (68 or more credit hours), as well as associate and bachelor degree programs. All graduates must meet the general education outcome requirements established by each academic program. The general education requirements are listed below each program's requirements. In addition, any student who places into a developmental education course(s) must meet those course requirements within the first academic year, prior to enrolling in the college level general education course(s).

College Success Strategies (COL 111A) is required for all first-time freshmen. College Success Online (COL 112) is required for all Baker College Online first-time freshmen and for all students enrolled in an online certificate or degree program. These courses will inform students of campus services, policies and procedures, and address learning styles and study strategies.

If electives are indicated in a program, please refer to the list of Elective Options on pages 136.

If general education electives are indicated in a program, please refer to the General Education Course Requirements on page 21. (General education electives may consist of one or more of the following General Education Outcomes: communication, mathematical reasoning, personal and social environments, computer literacy, global and cultural perspectives, and scientific inquiry.)

A new student may choose an "Undeclared but Degree Seeking" program. A student also may add a limited number of "Student Elected Classes" to his/her program with the approval of an academic advisor. Information about both of these options, including course and credit hour limitations, can be obtained in the Academic Office.

Information regarding double majors and/or minors is located on page 250. Contact your campus academic staff to discuss requirements.

Baker College is one of the most successful providers of online education in the United States. Baker Online offers multiple master's, bachelor's, and associate's degree programs as well as certificates via the Internet. Students can supplement their campus-based program with online courses or complete their entire degree online.

Technical Requirements

Students must have the following hardware and software (additional equipment and software may be required for some courses):

PC Requirements

- Intel Core-2 compatible processor or higher
- Windows XP or higher required
- 2 Gb of RAM required
- CD ROM drive; DVD ROM drive recommended
- 80 GB hard drive or greater
- Internet service provider (ISP); broadband connection recommended
- Microsoft Office 2007 (Professional recommended and may be required in some courses).
- Internet Explorer 6.0, Mozilla Seamonkey 1.1, and/or Firefox 2.0 or higher browser(s). Other browsers may allow Blackboard access but not all functions will operate correctly and are not supported.
- Virus Protection Software
- Java 1.5 or later
- Webcam recommended and may be required in some courses.

Mac Requirements

- Intel, Mac OS X-compatible processor or higher
- Mac OS X Version 10.4.X or later
- 2 Gb of RAM required
- CD ROM drive required; DVD ROM recommended
- 80 GB hard drive or greater
- Internet service provider (ISP); broadband connection recommended
- Microsoft Office: Mac 2008
- Safari 3.0, Mozilla Seamonkey 1.1, and/or Firefox 2.0 or higher browser(s). Other browsers may allow Blackboard access but not all functions will operate correctly and are not supported.
- Virus Protection Software
- Mac supplied Java
- Webcam recommended and may be required in some courses.

Online courses at Baker College are delivered utilizing a secure learning management system. Students are required to comply with the Institution's policy regarding: (1) the "Policy on the Proper Use of Information Resources, Information Technology, and Networks at Baker College" and (2) "Information Systems Division: Conditions of Use Policy." Those abusing their privileges or violating these policies may be removed from the system and denied further access.

Computer Programming - Java Option

Associate of Applied Science Degree

Students with skills in computer science are in high demand to design and develop business information systems. Students in this program acquire skills in programming, systems analysis, and design based on the curriculum developed under the Sun/Java Academic Initiative. This program concentrates instruction with the Java programming language while also introducing students to C + + and VisualBASIC programming concepts. The knowledge gained in this program provides students with the skill sets for employability in a variety of businesses and industries in positions such as programmers, developers, and systems analysts.

Information Technology Support **Specialist**

Associate of Applied Science Degree

This program focuses on a growing segment of the Information Technology market that focuses on providing service and support for software applications configuration, training of users, maintenance of information, and communication processes between a company's back-end network administrators and middle to front-line employees and customers. The graduate's employment opportunities include a wide range of occupations within an IS/IT department and/or within the layers between an IS/IT department and the users it serves. Graduates would not only be proficient in the content and use of common business software applications and information processes (word processing, spreadsheet, database operating systems, network connectivity), but also be able to install, configure, train users, troubleshoot, and support those applications.

Management

Associate of Business Degree

At the associate's degree level, the Business Administration curricula are designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy.

Coursework includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of cases, communication, team building, and decision-making.

Through these skills students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Accounting

Bachelor of Business Administration

This program emphasizes practical application as well as the theoretical aspects of the discipline of accounting to prepare students for professional careers in public, managerial, and governmental accounting and/or advanced study within the discipline. Students will gain an understanding of the social, ethical, economic, legal, and regulatory environment in which businesses operate and develop the problem-solving, decision-making, communication, and leadership skills necessary to compete in a dynamic global marketplace. Students completing this degree are eligible to sit for the Uniform Certified Public Accountant Examination in Michigan (see note below). Beginning July 1, 2003, students pursuing a CPA licensure in the State of Michigan will be required to have obtained 225 quarter hours of credit prior to applying for a CPA license. While the BBA Accounting Program satisfies the requirements to sit for the Uniform Certified Public Accountant Examination, additional credit is needed for licensure. Individuals are therefore advised to contact the Michigan State Board of Accountancy Licensing Bureau for further information.

Students wishing to become eligible to sit for the examination in other states are recommended to check with the National

Association of State Boards of Accountancy (www.nasba.org), which services as a forum for the 54 U.S. boards of accountancy, for the state in which they intend to practice.

Business Administration - Accelerated Program

Bachelor of Business Administration

This program provides an opportunity for a holder of an associate's degree or equivalent, with significant full-time work experience, to earn a baccalaureate degree at an accelerated pace. This program is designed for the working professional and combines core coursework with experiential credit to provide a contemporary business degree for today's business environment. Individuals applying for this program must have completed an associate's degree or have an equivalent of 90 quarter hours of credit with a minimum GPA of 2.0. In addition, applicants must have two years of work experience and successfully complete a writing evaluation. For more details on application requirements see the Admissions Procedures section in the catalog. Experiential credit requirements are satisfied through portfolio, transfer credit, or additional coursework.

Applicants must have an associate's degree from a regionally accredited institution, with a major in Business Administration or a concentration in a business related area or a nationally accredited degree and/or a transcript with 90 quarter hours of college credit that will be reviewed to ensure specific business and general education prerequisites are met.

Finance

Bachelor of Business Administration

This program emphasizes finance as the study of resource allocation, which includes financial markets, instruments, individuals, and institutions that manage money and assets. Students will gain an understanding of financial theory and practice from various perspectives including banking, financial services, financial planning, and corporate finance. Students will gain an understanding of the social, ethical, economic, legal, and regulatory environment in which businesses operate and develop the problem-solving, decisionmaking, communication, and leadership skills necessary to compete in a dynamic global marketplace. Graduates from this program can enter the fields of corporate finance, investment banking, financial markets and services, and insurance.

This program is offered at the following Baker College campus: Online.

Human Resource Management

Bachelor of Business Administration

This program offers an opportunity for students to acquire a career focused Human Resource Management undergraduate degree with an integrative approach to understanding various human resource management functions. This program provides an intensive strategic understanding of workforce planning and development, compensations and benefits; global human resource management; and employee health and safety.

Human Resource Management -Corporate Track

Bachelor of Business Administration

This program examines how human resources can be directly linked to business strategy and provides a uniquely broad and unified exposure to the latest thinking and practice regarding human resource approaches that enhance competitive advantage. Each core course contains focused study in the content area accompanied by independent research. Individuals considering this program must have completed an associate's degree or have an equivalent of 90 quarter hours of credit with a minimum GPA of 2.0. In addition, applicants must have two years of work experience and successfully complete a written evaluation. For more details on application requirements see the Admissions Procedures section of the catalog. Experiential credit requirements are satisfied through portfolio, transfer credit, or additional courses.

Management

Bachelor of Business Administration

The major objectives of the management program is to train broadly competent administrators for service in a wide variety of organizations public or private, product or service oriented, profit or not for profit. To accomplish this basic objective, this program offers students the opportunity to acquire knowledge about the management of human and physical resources and to acquire skills useful in the management of any organization. This program emphasizes the importance of effective oral and written communication, teamwork, decision making, entrepreneurial management, and diversity in the business environment. In addition, this program introduces students to the application and strategic use of the acquired knowledge and skills in areas such as personnel management, organizational behavior, production management, international business, and small business.

Marketing

Bachelor of Business Administration

Marketers provide the link between businesses that have goods and services to sell and customers who want to purchase them. The marketing process involves a variety of activities, including research, strategic planning, product development, sales management, and marketing communications.

Students in this program will participate in active learning and demonstrate an understanding of basic business principles using case studies, business simulations; use computer technology and demonstrate communication skills in preparing spreadsheets, writing reports, analyzing business problems, and preparing professional presentations; develop and demonstrate ethical values, a global perspective, and human relations skills through individual and team activities in class and in business situations.

This degree offers a solid background in the concepts of marketing and business. A marketing degree can lead to a career in such areas as marketing management, marketing research, personal selling and sales management, retail merchandising and management, and promotional strategy and management.

The Management Electives must be four credit hour courses from the MGT discipline. This program is offered at the following Baker College campus: Online.

Project Management and Planning

Bachelor of Computer Information Systems

This program emphasizes the application of computer systems to solve business problems. Graduates of this program can be expected to pursue careers as programmers, programmer/analysts, and system analysts. This major prepares an individual for immediate application of the knowledge, skills, tools, and techniques that are utilized in the practice of project management. The philosophy as well as the set of methods learned in this program will enable graduates to lead projects, complete them on time and within budget. This program will help prepare students for certification as a project manager.

This program is offered at the following Baker College campus: Online.

Computer Science

Bachelor of Computer Science

This program is designed to work in conjunction with the associate's degree choice of the student to gain entry or increase his/her opportunity for promotion in his/her field. Students will acquire skills in software development, Internet communications, network administration and database administration, as well as foundational knowledge in the field of computer science.

Game Software Development

Bachelor of Computer Science

This program is designed to immerse students in the core knowledge of software engineering emphasizing animation and gaming development. This program will focus on leading programming technologies and will prepare students for entry level positions in the gaming industry. A comprehensive approach will carry students from modeling through animation and game programming, to the senior design project.

QUART	ER HOL	JRS REQUIRED FOR GRADUATION	180

Of the 108 hours required in the elective credit and concentration areas, a minimum of 32 hours of 300 and 400 level courses are required.

This program is offered at the following Baker College campus: Online.

Health Services Administration

Bachelor of Health Services Administration

This program will prepare individuals to develop administrative skills necessary to work effectively in a variety of health care settings. The combination of general education and health services courses are designed to cultivate critical thinking skills necessary for managing. This program prepares students to plan, direct, coordinate, budget, and assess activities in a variety of health care settings. Major Credit 52

Health Services Administration -**Accelerated Program**

Bachelor of Health Services Administration

This program is designed for those individuals who have successfully completed an associate's degree in a health care field or 90 quarter credit hours (60 semester hours) and are eligible for licensure, certification, or registration within their specific discipline and two years of current work experience in an administrative or clinical health care setting. Or an associate's degree in a field other than health care with two years of work experience in an administrative or clinical health care setting. Work experience will be verified with a current resume. Approved writing sample is also required. The program enables these individuals to develop the management skills necessary to mange, plan, direct, coordinate, budget, and assess quality of care issues in a variety of health care settings.

ASSOCIATE'S DEGREE OR APPROVED EQUIVALENT OF 90 QUAR-TER HOURS FROM AN ACCREDITED INSTITUTION, INCLUDING THE REQUIRED CORE COURSES BELOW. (MINIMUM GPA 2.0) Approved Credit ΕO

Information Technology and Security

Bachelor of Information Technology and Security

This program prepares graduates for career opportunities in information technology and security technology as network administrators, system analysts, or management of an information technology team. Employees with information technology and security knowledge are considered an integral part of many business' information technology teams. Information technology workers work in health care, business, information systems, technical, and engineering fields. They possess the skills to manage information technology teams as well as handle the technical aspects of the network infrastructure.

Psychology

Bachelor of Science in Psychology

Psychology is the study of mental processes and behavior. As such, a scholarly background in psychology is useful and versatile for students to have both personally and professionally. The Psychology program will help to prepare students for a variety of professions and careers or to enter graduate study in psychology, as well as in other related disciplines and fields. The American Psychological Association's Board of Educational Affairs Task Force established specific guidelines for undergraduate psychology major competencies (Undergraduate Psychology Major Learning Goals and Outcomes: A Report, March 2002). The undergraduate psychology major at Baker College Online adapts from, and conforms to, these guidelines and standards determined by the Task Force. The Psychology program will help students to develop and enhance knowledge, skills, and values congruent with the science and application of psychology and is applicable to a wide variety of occupations and workplaces.

The Bachelor of Science in Psychology at Baker College Online is a 100% online program and is not available through a Baker College campus. Students in this program will receive all support services through the Baker Online campus. Courses cannot be taken at another Baker College campus.

Web Development

Bachelor of Web Development

This program is designed to work in conjunction with the Associate of Applied Science degree in Web Design to provide individuals with additional technical skills in the Web development field. While the associate's degree gives students a generalist base of skills, this degree targets the programming and development skills required to develop interactive, database driven Web sites.

Project Management and Planning

Postbaccalaureate Certificate

This postbaccalaureate certificate prepares an individual for immediate application of the knowledge, skills, tools, and techniques that are utilized in the practice of project management. The philosophy as well as the set of methods learned in this program will enable graduates to lead projects completing them on time and within budget. This program will help prepare students for formal project management certification.

BACHELOR'S DEGREE OR APPROVED EQUIVALENT OF 180 QUAR-TER HOURS FROM AN ACCREDITED INSTITUTION IN ORDER TO ENROLL IN A POSTBACCALAUREATE CERTIFICATE PROGRAM.

PROFESSIONAL DEVELOPMENT DIVISION

Leadership Institute Personal Finance Project Management Quality Tools and Methods

General education requirements must be met for all certificates of substantial length (68 or more credit hours), as well as associate and bachelor degree programs. All graduates must meet the general education outcome requirements established by each academic program. The general education requirements are listed below each program's requirements. In addition, any student who places into a developmental education course(s) must meet those course requirements within the first academic year, prior to enrolling in the college level general education course(s).

College Success Strategies (COL 111A) is required for all first-time freshmen. College Success Online (COL 112) is required for all Baker College Online first-time freshmen and for all students enrolled in an online certificate or degree program. These courses will inform students of campus services, policies and procedures, and address learning styles and study strategies.

Many of the courses and programs at Baker College are offered in an online delivery format. See page 117 for Baker College Online programs. Contact your campus Academic/Administrative Office for details about online courses.

If electives are indicated in a program, please refer to the list of Elective Options on page 142.

If general education electives are indicated in a program, please refer to the General Education Course Requirements on page 21. (General education electives may consist of one or more of the following General Education Outcomes: communication, mathematical reasoning, personal and social environments, computer literacy, global and cultural perspectives, and scientific inquiry.)

Information regarding double majors and/or minors is located on page 250. Contact your campus academic staff to discuss requirements.

Medical Insurance Specialist

Certificate

This program prepares students to identify the major sources of health insurance and their rules and policies affecting billing and payment. An emphasis will be placed on the student's ability to abstract diagnostic and procedure codes, process claims in an outpatient setting, and management of account receivables to maximize optimum reimbursement. Graduates are encouraged to take the national certification exam.

Management

Associate of Business Degree

At the associate's level, the Business Administration curricula are designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy.

Coursework includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of cases, communication, team building, and decision making.

Through these skills students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Management

Bachelor of Business Administration

The major objective of the management program is to train broadly competent administrators for service in a wide variety of organizations public or private, product or service oriented, profit or not for profit. To accomplish this basic objective, this program offers students the opportunity to acquire knowledge about the management of human and physical resources and to acquire skills useful in the management of any organization. This program emphasizes the importance of effective oral and written communication, teamwork, decision making, entrepreneurial management, and diversity in the business environment. In addition, this program introduces students to the application and strategic use of the acquired knowledge and skills in areas such as personnel management, organizational behavior, production management, international business, and small business.

This program is offered at the following Baker College extension: Corporate Services.

Industrial Management

Bachelor of Industrial Management

This program is designed for the individual who is seeking to gain an entry level position or to increase his/her opportunities for promotion in industrial management.

ASSOCIATE'S DEGREE OR APPROVED EQUIVALENT OF 90 QUAR-TER HOURS FROM AN ACCREDITED INSTITUTION TO INCLUDE SPECIFIC BUSINESS AND GENERAL EDUCATION PROGRAM PRE-REQUISITES. (MINIMUM GPA 2.0)

SCI
Descriptions of Undergraduate Courses

ACCOUNTING

Introduces students to the concept of the accounting cycle and focuses on the interpretation of accounting information for decision-making purposes. An overview of the basic accounting process as well as an introduction to the presentation and uses of financial statement information is provided. Prerequisite(s): MTH 091 or placement exam.

ACC 122 Fundamentals of Accounting II4 QH

Continues the study of accounting concepts begun in Fundamentals of Accounting I, emphasizing financial statement analysis. Annual reports will be utilized extensively to reinforce key concepts. Managerial accounting and its role in decision-making will also be examined.

Prerequisite(s): ACC 121.

As an introduction to the accounting profession, this course is designed to enable the student to prepare, evaluate, and use accounting data. The mechanics of financial accounting and the overall effect of accounting procedures on published financial statements are examined in detail. Alternative accounting procedures and their impacts on the financial statements are also examined. Coverage includes extensive examination of the accounting equation as well as the accounting process as it relates to receivables, inventory, fixed assets, and bonds payable.

Prerequisite(s): ACC 122.

Studies all aspects of payroll operations, including personnel and payroll records, computations of wages and salaries, relevant laws and acts pertaining to payroll, preparation of payroll registers, recording of accounting entries, and preparation of payroll tax returns. Prerequisite(s): ACC 241.

ACC 295 Bookkeeper Certification Prep4 QH

Prepares students for the national bookkeeper certification exam. Topics include adjustments and error corrections, payroll, depreciation, inventory, and internal controls and fraud prevention.

Prerequisite(s): ACC 251, ACC 301, ACC 341B.

ACC 301 Intermediate Accounting I......4 QH

Begins an in-depth study of the theory and conceptual issues relevant to presentation of financial information for use in external decision-making processes. Emphasis is placed on reporting and disclosure requirements for a complex, classified balance sheet. Other topics include a review of the

accounting cycle, preparation of financial statements, the conceptual framework, GAAP, and account reconciliation.

Prerequisite(s): ACC 241 or ACC 291.

ACC 302 Intermediate Accounting II......4 QH Continues the in-depth study of the theory and conceptual issues begun in Intermediate Accounting I. Emphasis is placed on reporting and disclosure requirements for multi-step income statement. Other topics include reinforcement of the accounting cycle and the interrelatedness of the financial state-

ments and how various accounts affect them. Prerequisite(s): ACC 301.

ACC 303 Intermediate Accounting III......4 QH A continuation of the Intermediate series, this course expands on competencies

gained through previous study while addressing the reporting and disclosure requirements for the Statement of Cash Flows. In addition, pensions and other unique transactions, events, and disclosures will be addressed. Prerequisite(s): ACC 302.

ACC 312B Business Entities Taxation4 QH Provides in-depth coverage of the fundamentals of taxation related to business entities including C and S corporations, partnerships and exempt organizations. Emphasis is placed on the application of tax law to the preparation of Federal Income Tax and informational returns for these entities. Prerequisite(s): ACC 121 or ACC 291.

Analyzes costs for decision making, capital investment decisions, quantitative models for planning and control, and performance evaluation. Strategic control systems, using accounting data for internal decision making, and cost control are also emphasized.

Prerequisite(s): ACC 122.

ACC 341B Individual Taxation4 QH

Provides in-depth coverage of the fundamentals of federal and state taxation related to individuals. Students will examine the federal tax system; research and apply tax law; and calculate gross income, deductions, and future tax liability. Tax planning for the individual will also be addressed. Prerequisite(s): ACC 121 or ACC 291.

ACC 351R Accounting and Financial Management6 QH

Provides an introduction to the application of fundamental concepts of accounting and finance to managerial decision-making. Emphasis is placed on the interpretation and use of accounting information and its use in planning and control of organizational assets and operations. This course is exclusive to accelerated Bachelor of Business Leadership. Prerequisite(s): MTH 312R, WRI 312R.

controls in public and private sectors. This course examines the basic accounting and internal control systems before moving into the auditing cycle. Professional standards and responsibilities will also be emphasized. Prerequisite(s): ACC 303 or ACC 322A.

auditing process. Emphasis is placed on professional ethics and auditor's legal liability to clients and third parties as well as the use of specific techniques and procedures for auditing various transaction cycles. Prerequisite(s): ACC 411 or ACC 291, ACC 302.

leges, hospitals, voluntary health and welfare organizations, and other non-profit organizations. Students will compare and contrast non-profit accounting processes with those of for-profit enterprises by evaluating the differing regulations for recording transactions, financial reporting, and revenue recognition as well as funding options and budgeting. Prerequisite(s): ACC 302.

ACC 441 Advanced Accounting4 QH Provides students with the knowledge and skills necessary to perform account-

ing functions related to the acquisition of a business, consolidated financial statements, and disclosure requirements for industry segments. Prerequisite(s): ACC 303.

cation of the procedures and practices of the various accounting disciplines. Case studies will be used extensively to reinforce key concepts. This course is the capstone of the bachelor degree in accounting program. Prerequisite(s): ACC 312B, ACC 412, ACC 331A, ACC 341B, HUM 401A or

ACC 312B, ACC 322A, ACC 332, ACC 341A, HUM 401A.

ARCHITECTURAL TECHNOLOGY

AT 301 Fundamentals of Design4 QH Introduces students to design technology, concept of space, form, color, texture, and visual techniques necessary for design conceptualization and presentation. Fundamental aspects of architectural design methodology and techniques for conceptualization and presentation will also be introduced. Prerequisite(s): ACT 207.

AT 311A Architectural History I......4 QH Studies the history and philosophy of architecture in a context of related arts, crafts, and design settings, in significant periods of the western worlds - from Prehistoric and Ancient times, through the Middle Ages (including Byzantine and Islamic extension), up to the Gothic era.

AT 312 Architectural History II......4 QH Studies the history and philosophy of architecture in a context of related arts, crafts, and design settings, in significant periods of the western worldsfrom Renaissance and Baroque eras, through the 18th century and into the modern world.

materials in dealing with the state of rest of bodies under the action of forces. Applies the equilibrium conditions to the analysis of concrete structures formed by connected members, including reinforced beams, columns, floors, walls, and footings. The design process is studied in-depth, utilizing AISC and ACI Standards. A brief review of trigonometry and algebra is to be included. Prerequisite(s): ACT 201.

AT 322 Structural Design II......4 QH

Continues the study of material strength, basic design, and calculations of structural systems utilizing lumber and structural steel. Includes the strength, stiffness, and stability of various materials. Discusses the stresses caused by bending moments, shear forces, vertical and horizontal loadings, and how to size load supporting structural members under those influences. The design process is studied in-depth, utilizing AISC and AF&PA.

Prerequisite(s): AT 321.

processes, emphasizing the programming phase of project development and preliminary design creation. Students will learn the techniques and skills to research, develop, and create a simple project, including: plot plan, floor plan, main building sections, and elevations with enough detail to generate a conceptual estimate. Prerequisite(s): AT 301.

AT 402 Architectural Design II......4 QH Continues the development of architectural design principles, theories and processes, emphasizing the programming phase of project development and preliminary design creation. Students will learn the techniques and skills to research, develop, and create a moderate size project, including: plot plan, floor plan, main building sections, and elevations with enough detail to generate a conceptual estimate. Prerequisite(s): AT 401.

AT 403 Architectural Design III......4 QH

hours of lecture and 40 hours of lab are required.

Continues the development of architectural design principles, theories, and processes, emphasizing the programming phase of project development, leading to the creation of design development phase. Students will learn the techniques and skills to research, develop, and create a multiple floor project, including: plot plan, floor plan, main building sections, elevations, interior design, and MEP with enough detail to generate a preliminary estimate. Prerequisite(s): AT 402.

AT 404 Architectural Design IV......6 QH Continues the development of architectural design principles, theories, and processes, emphasizing the programming phase of project development, in conjunction with site planning principles and construction documents. Critical construction details and CSI format based specification for the architectural portion will be developed to perform a detailed cost estimate in the next term. Performance based MEP drawing and specifications will also be required. 40

Prerequisite(s): AT 403. AT 405 Architectural Design V......6 QH

Continues the development of proficiency in construction document execution to complete the project started in Architectural Design IV. This is a capstone course to complete a portfolio of a project as a tool to gain employment in a professional office. The portfolio will demonstrate skills, knowledge, and competency of students having a thorough understanding of architectural project development and documentation. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): AT 404.

AT 411 Advanced Code Analysis......4 QH

Studies the International Building Code (IBC) to have in-depth knowledge of its required design intent, as well as the utilization of its application to specific buildings in terms of building planning, accessibility, fire protection, and life safety.

Prerequisite(s): IND 301.

AT 421 Building Systems (MEP)4 QH

Studies the various HVAC, plumbing, fire protection, electrical power, lighting, auxiliary, and building operation systems and design coordination issues among themselves as they relate to the preparation of construction documents of a light commercial building. Study includes: lighting, power distribution, HVAC, ventilation systems, controls, fire protection, plumbing, sewage systems, etc. Develops the in-depth knowledge of initial systems' costs and life-cycle consideration.

Prerequisite(s): ACT 202.

AT 431 Site Planning and Development......4 QH

Provides students with a clear understanding of land utilization to best accommodate a building design. Students will learn the processes, theories, and methodology of fundamental civil engineering. Prerequisite(s): ACT 207.

AT 441 Professional Office Practice4 QH Develops a general awareness of project development and knowledge of professional practice, combined with exploring career alternatives, and the processes required to register as an architect. Students will learn professional ethics, proposal and contract development, permit approval processes, and interdisciplinary professional relationships.

Prerequisite(s): AT 403, AT 411, AT 421.

ARCHITECTURAL/CONSTRUCTION TECHNOLOGY

Surveys the use of drafting instruments and focuses on the basic concepts of lettering, geometric construction, sketching, multiview projection, dimensioning, and sectional view. This course is a prerequisite. Credit earned does not count toward any degree.

ACT 101 Architectural Drafting I4 QH Introduces the basic concepts of residential drafting in addition to basic lettering, linework, and dimensioning. Students will be exposed to preliminary design considerations and construction techniques related to residential architecture. The focus of the drawings will be on floor plans, footings, foundation plans, roofframing plans, building sections, and structural framing details. Prerequisite(s): ACT 099 or IND 121 or 1 year high school drafting.

ACT 102 Architectural Drafting II4 QH Introduces students to the residential mechanical (HVAC, plumbing, and electrical) roofing, and siding systems, as well as additional refinement in the lettering, linework, and dimensioning techniques. The drawings created will be the continuation of the residential plans started in ACT101. The focus of the drawings will be door and window schedules, exterior elevations, plumbing plans, electrical plans, climate control plans, and site plans. Prerequisite(s): ACT 101 or IND 221.

ACT 103 Computer Aided Architectural Drawing I......4 QH Introduces students to the use of the computer to draw plans for a single-family residence. A series of drawings will be required. Prerequisite(s): ACT 101 or ACT 192A or IND 221.

ACT 104 Building Materials and Construction4 QH Acquaints students with building materials as well as construction methods utilized in residential construction.

Provides students with an exposure to basic surveying techniques including the use of transits and builder's level. Concepts of plane geometry will be presented through practical applications. Prerequisite(s): MTH 124.

ACT 191A Blueprint Reading for Architecture2 QH Covers print layout of information, tolerance block, revision block, do not scale block, notes, bill of material, and product detail layout. Students sketch drawings of simple detail from selected architectural drawings to include dimensioning and notes as related to the understanding of reading a floor plan, elevation, and detailed blueprint.

Provides print reading experience in commercial construction drawings including architectural, civil, mechanical, electrical, plumbing, structural, and finish construction drawings. C.S.I. standard format for construction specifications will be covered. Students will practice visualizing the three dimensional building from two dimensional drawings. Sketching techniques will be practiced to prepare field drawings/as-builts.

Studies the structural properties of basic framing material (wood, steel, and concrete). Bending, deflection, shear, and moment diagrams will be developed by students as a method of study. Prerequisite(s): C or better in MTH 124.

Studies the basics of mechanical (HVAC, plumbing, fire protection), electrical (power, lighting, telephone, fire alarm, security, sound, etc.), and building operation (transportation, processing, automation) systems as they are related to the overall planning of a building. Emphasis will be on heating, cooling, ventilation, plumbing, fire protection, electrical, and operation requirements for space planning for various building types.

Focuses on the preparation of bid proposals, quantity take-offs, crew sites, daily outputs, and bid packages for general and subcontracted work. Prerequisite(s): ACT 104, ACT 206 or ACT 192A.

to it. At the completion of the course, students should be prepared to take the Builder's Exam.

Prerequisite(s): ACT 103 or IND 215.

or small commercial structures. Drawing projects will focus on completion of a set of working drawings.

Prerequisite(s): Architectural majors: ACT 103. Interior Design majors: IND 215.

ACT 206 Commercial Architectural Drawing I......4 QH Explores low-rise frame commercial structures - featuring steel, masonry and concrete construction. Drawings will focus on one of the following: small office building, small retail store, restaurant, or school-institutional building. Students

will complete a set of working drawings and material take-offs. Prerequisite(s): Architectural majors: ACT 102. Interior Design majors: IND 215.

Corequisite(s): ACT 205.

ACT 207 Commercial Architectural Drawing II......4 QH Continues exploring low-rise reinforced concrete structures - featuring steel,

masonry, and concrete construction. Drawings will focus on one of the following: small office building, small retail store, restaurant, or school-institutional building. Students will complete a set of working drawings, material take-offs, and specifications.

Prerequisite(s): ACT 206.

ACT 211 Architectural CAD Presentations4 QH

Introduces students to computer generated architectural reports and renderings in both 2-D and 3-D.

Prerequisite(s): ACT 207.

AUTOBODY TECHNICIAN

ABT 101 Painting and Refinishing I6 QH

Introduces students to the basics for all automotive refinishing work. Safety precautions, surface preparations, spray gun and related equipment operation, paint mixing and application are covered. 20 hours of lecture and 80 hours of lab are required.

Prerequisite(s): AST 099.

ABT 102 Painting and Refinishing II6 QH Advances the skills taught in ABT 101. In addition it covers paint matching, paint defects - causes and cures, spot repairs, contemporary color coat materials, and final detail. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): ABT 101.

Students will put their skills to work on complete full vehicles. The vehicles will be taken from body prep to final painting and detailing. 120 hours of lab are required. Prerequisite(s): ABT 102.

Introduces students to the basics for all automotive non-structural damage repair. Safety precautions, vehicle preparation, elementary repairs, outer body panel repairs, replacements, and adjustments are covered. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 099.

Advances the skills taught in ABT 111. In addition it covers metal finishing and body filling, movable glass and hardware repair, plastics and adhesives. Students will develop specific marketable repair skills. 20 hours of lecture and 80 hours of lab are required.

Prerequisite(s): ABT 111.

Students will put their skills to work on complete full vehicles. The vehicles will be taken from start to final prep for painting. 120 hours of lab are required. Prerequisite(s): ABT 112.

ABT 121 Mechanical and Electrical I6 QH

This course covers basic electrical repairs that apply to body repair work. Topics include but are not limited to: wiring diagnosis and repair, battery starter, charging diagnosis and repair, lighting diagnosis and repair, electrical component diagnosis and repair, restraint system diagnosis and repair. 20 hours of lecture and 80 hours of lab are required.

Prerequisite(s): AST 099.

This course covers basic mechanical repairs that apply to body repair work in the areas of suspension/steering and drive train. Topics covered but not limited to: diagnosis and repair of all steering components for front and rear wheel drive, chassis springs, struts, shock absorbers, and alignment, diagnosis, repair, and alignment of drive train components, cables, mounts, brake system, disc and drum, anti-lock, mechanical and hydraulic diagnosis and repair. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 099.

ABT 123 Mechanical and Electrical III6 QH

This course covers basic mechanical repairs that apply to body repair work in the areas of heating/AC, cooling, fuel with intake and exhaust system. Topics covered but not limited to: safety and regulations concerning refrigerants, A/C component diagnosis and repair, evacuation and recharge, inspect with diagnosis and repair of the fuel system components, exhaust system components with muffler and converters, (EVAP) component inspection, diagnosis and repair. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 099.

welding, TIG, oxyacetylene, resistance spot welding, and plasma cutting are included. Students learn the processes used in body repair. 15 hours of lecture and 70 hours of lab are required.

Prerequisite(s): AST 099.

AUTOMOTIVE SERVICES TECHNOLOGY

Presents an overview of basic automotive components, tools, and equipment. Presents basic functions and prepares students for the automotive technology programs. Credit earned does not count toward any degree.

Fuel, compression, and ignition systems are discussed. Major components of each are examined as background to viewing the engine as a system. 30 hours of lecture and 20 hours of lab are required. Corequisite(s): AST 106.

AST 102 Engine Performance I6 QH Focuses on an introduction to engine fault diagnosis and adjustment or repair. Computerized engine controls are reviewed as are ignition systems, fuel/air systems, and exhaust systems. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 101, AST 111A.

Continues the examination of engine fault diagnosis and adjustment or repair. Emission controls, effects of ignition timing, analysis of exhaust gases, and advanced engine services are studied. 20 hours of lecture and 80 hours of lab are required.

Prerequisite(s): AST 102.

AST 106 Introduction to Automotive Service4 QH

This introductory course orientates students to the Baker College Automotive Service Technology environment. Students will receive comprehensive instruction on laboratory procedures, policies, shop safety, and proper tool usage. Students are also introduced to the major automotive systems, computer usage, the automotive service industry, and state and industry certifications. 30 hours of lecture and 20 hours of lab are required.

Covers basic electrical/electronic theory, types of circuits, system components such as wiring, circuit protection devices, solenoids, relays, switches, operation of test equipment such as digital multimeters, test lights, jumper wires, and diagnosis of basic electrical/electronic faults. 20 hours of lecture and 60 hours of lab are required.

Corequisite(s): AST 106 or DSL 106.

Continues to study the electrical systems in the automobile. Topics covered, but not limited to, battery diagnosis and service, charging system diagnosis and service, starting system diagnosis and service, electrical and electronic switches, relays, solenoids, diagnosis and service, as well as tools and equipment used in electrical/electronic diagnosis and service. 15 hours of lecture and 70 hours of lab are required. Prerequisite(s): AST 111A.

not limited to, diagnosis and service to electrical accessories such as lighting, turn signals, instrument panel and gauges, motors, sensors, circuit boards, SRS, can/bus errors, and safety precautions for high voltage vehicles. Tools and equipment used in electrical/electronic diagnosis and service are also covered. 15 hours of lecture and 70 hours of lab are required. Prerequisite(s): AST 112B.

AST 201 Applied Engineering Technology......4 QH

Introduces the principles of trigonometry and physics. Trigonometric concepts are related to their application in physics. Physics principles are introduced on a system base. Each concept covered is applied to mechanical, fluid, or thermal systems. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): MTH 112.

AST 211 Introduction to Hybrid Vehicles......4 QH

Presents an overview of basic Hybrid theory and applications within an automobile. Topics covered but not limited to, introduction to Hybrid vehicles, Hybrid safety, Hybrid battery design and application, battery operated electric vehicles, mild and assist Hybrid technologies, full Hybrid applications and alternative fuel overview. 40 hours of lecture and 40 hours of lab are required. Corequisite(s): AST 113.

AST 221A Automotive Brake Service6 QH Focuses on the design and operation of the brake system. Both drum and disk

brakes are studied. Diagnosis of system problems as well as the machining and rebuilding of various system components will be performed. 20 hours of lecture and 85 hours of lab are required. Corequisite(s): AST 111A.

AST 231A Automotive Suspension/Steering6 QH

Examines front and rear drive vehicles and the suspension and drive system for each. Steering mechanisms and suspension components for both automatic and manual drives are discussed as are alignment techniques. 20 hours of lecture and 80 hours of lab are required. Corequisite(s): AST 106.

AST 241A Heating/Air-Conditioning6 QH

Covers automotive heating and air conditioning system theories, troubleshooting, and servicing. Proper refrigerant recovery, recycling, storage, and use of recharging equipment will also be covered. Students will be made aware of recent environmental concerns relevant to coolant and refrigeration. In addition, basic shop safety and safe use of recycling equipment will be discussed. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 111A.

AST 251 Automatic Transmission and Transaxle8 QH

Focuses on the front-wheel drive transaxle and components. Transaxle fundamentals and operation will be reviewed as well as common faults and servicing procedures. 40 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 111A.

AST 261 Manual Drive Train and Axles6 QH

Investigates the manual drive train and major components. Transmissions, drive shafts, differentials, and drive axles are examined. Diagnosis and troubleshooting are discussed. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 112B, DSL 141.

AST 271 Engine Repair8 QH

Reviews the procedures for failure analysis of the internal combustion engine. Disassembly and assembly, part inspection, use of manuals, and repair/replacement procedures will be applied to upper and lower engine components. 40 hours of lecture and 80 hours of lab are required.

Prerequisite(s): AST 101.

AVIATION

AVT 111 Private Pilot Ground School......4 QH

Prepares students for the FAA written test. Covers all test areas including aerodynamics, engines, weight and balance, performance charts, weather, weather reports, FAR's, E6-B computer, radio navigation, sectional charts, medical factors, and cross country flying.

AVT 112 Instrument Ground School4 QH Covers all school topics to pass the FAA written test for instrument pilots.

Provides training in ground school to become a competent commercial pilot. All areas will be covered.

Prerequisite(s): AVT 112 or passing score on instrument test.

AVT 131 Private Pilot Flight6 QH Provides students with all the flight time, and tasks as set forth in FAA FAR Part 141 Appendix B to include beginning flight training through solo, cross country, night flying, etc. Required tasks must be consistently and repeatedly performed in accordance with the Practical Test Standards as set forth in FAA-S-8081-14A. Flight fees and the Baker College Flight Training Policy apply. Corequisite(s): AVT 111.

AVT 132 Instrument Flight6 QH Provides students with the flight time, PCATD time and tasks required by the FAA as set forth in FAR Part 141 Appendix C to include attitude instrument flight, instrument failures, holding procedures, instrument approaches, etc. Required tasks must be consistently and repeatedly completed in accordance with the Practical Test Standards for the instrument rating as set forth in FAA-S-8081-4C. Flight fees and the Baker College Flight Training Policy apply. Prerequisite(s): Private pilot license or AVT 131. Corequisite(s): AVT 112.

AVT 133 Commercial Flight6 QH Provides students with the flight time and tasks as set forth in FAA FAR Part 141 Appendix D to include chandelles, lazy and pylon 8's, complex aircraft flight, etc. Required tasks must be consistently and repeatedly performed in accordance with the Practical Test Standards for the commercial rating as set forth in FAA-S-8081-12b. Flight fees and the Baker College Flight Training Policy apply. Prerequisite(s): Private pilot license with instrument privileges. Corequisite(s): AVT 113.

AVT 221 Cockpit Resource Management2 QH Covers the methods of making optimum use of the capability of the individuals and the systems in an aircraft to achieve the safest and most efficient completion of a flight. The pilot in command will be taught how to involve crew members in the decisions made during in-flight emergencies or hazardous situations. Corequisite(s): AVT 113.

AVT 241 Aviation Meteorology4 QH Covers aspects of meteorology that apply to flying, including obtaining weather briefings, thunderstorm development, wind shears, jet streams, world weather patterns, climate, and much more. Prerequisite(s): AVT 111, GEO 101B.

AVT 251A Aircraft Systems4 QH Covers three aspects of aircraft mechanics: what the pilot is legally allowed to do him/herself; a thorough understanding of what the AirFrame and Powerplant mechanic must do, including the paperwork and recordkeeping needed to keep a plane legal under the various sections of the FAR's. Includes hands-on experience on aircraft components as well as classroom training and field trips. Prerequisite(s): AVT 111.

Focuses on the applicable areas of knowledge required to pass the written and practical test for the Flight Instructor rating. This will include all areas of the Fundamentals of Instructing written as well.

Prerequisite(s): Commercial pilot license with instrument privileges. Corequisite(s): AVT 262.

in FAR Part 141 Appendix F to include flight from the right seat, instruction of the private pilot and commercial pilot courses, etc. Required tasks must be consistently and repeatedly completed in accordance with the Practical Test Standards for the instrument rating as set forth in FAA-S-8081-6B with Change 1. Flight fees and the Baker College Flight Training Policy apply. Prerequisite(s): Commercial pilot license with instrument privileges.

Corequisite(s): AVT 261.

Provides the knowledge to pass the Flight Instructor Instrument written and practical tests. All knowledge tasks as set forth in FAA-S-8081-9b will be covered. Test fee applies.

Prerequisite(s): Certified Flight Instructor rating. Corequisite(s): AVT 272.

AVT 272 Instrument Flight Instructor Flight......2 QH

Provides students with the flight time and tasks required by the FAA as set forth in FAR Part 141 Appendix G to include all the tasks of AVT132 from the right seat and all instructional requirements. Required tasks must be consistently and repeatedly completed in accordance with the Practical Test Standards for the Instrument Instructor rating as set forth in FAA-S-8081-9B with Change 1. Flight fees and the Baker College Flight Training Policy apply.

Prerequisite(s): Commercial pilot license with instrument privileges.

Corequisite(s): AVT 271.

AVT 381 Multi-Engine Flight2 QH

Provides the training in multi-engine aircraft needed for the multi-engine addon to the student's commercial license. Prerequisite(s): AVT 113, AVT 133.

AVT 382 Multi-Engine Flight Instructor2 QH

Covers all the required areas set forth in FAA-S-8081-6b section 2 to include teaching engine and system failures safely.

Prerequisite(s): AVT 261, AVT 262, AVT 271, AVT 272. Corequisite(s): AVT 381

AVT 421 Aviation Management4 QH

Gives students an understanding of various types of aviation management: airports, corporation flying programs, charter flight, and other business aspects. Papers, speakers, and field trips are included in this course.

BAKING AND PASTRY ARTS

BPA 111 Baking Techniques I6 QH

Introduces students to the basic principles of baking. Through hands-on experience students learn the identification of bakery tools and equipment, proper weighing and scaling of ingredients, and basic mixing methods. Students will learn to prepare basic breads, doughs, and starters along with choux products and pies. This course lays a foundation for the more advanced techniques presented in later coursework.

Prerequisite(s): CUL 115, CUL 131B.

Continues from BPA 111 and focuses on the production and theory of baked goods such as flat breads, hard crusted breads, laminated doughs, puff pastry and specialty breads in a lab and lecture format. This course continues a foundation for the more advanced techniques presented in later coursework. Corequisite(s): BPA 111.

BPA 151 Pastry Techniques I......6 QH Introduces students to the basic techniques used in pastry production. Through extensive hands-on labs, students will focus on the preparations involved with cake batters, foams, mousses, fillings, meringues, buttercreams, and Bavarian creams. Students will also focus on assembly and decoration of European cakes, basic glazing and icing techniques, syrup preparation and shortdough applications

Prerequisite(s): BPA 112.

Provides a focused, hands-on, comprehensive study of the techniques used in the production of International pastries, contemporary cakes, and restaurant cakes. Students will also utilize techniques in the design and layout of Charlottes and preparation of entremets and bombes.

Corequisite(s): BPA 151.

Expands on the concepts and skills from Pastry Techniques II, with a continuation of techniques used for further applications. Students will focus on the design and assembly of wedding cakes, showpiece cakes and special occasion cakes as well as the building methods and techniques used for showpiece cakes. Students will be introduced to the advanced skills used in sugar work, rolled, colored and formed gum paste, fondant and modeling chocolate pastes. Prerequisite(s): BPA 152.

Provides an in-depth introduction into the production of various pastries. Students focus on the skills and knowledge needed to produce tarts, petit fours, tea pastries, mignardise, molded mousses, napoleons, cream horns, Baklava and other pastries for sweet tables. Prerequisite(s): BPA 251.

of jellies, candies, cordials, crystallized fruits, sugared nuts, ganaches and other confectionary fillings for bonbons and truffles. Students will learn proper chocolate tempering techniques, confectionary mold preparation, cocoa butter painting and spraying.

Prerequisite(s): BPA 221.

Examines advanced confectionary production skills in the design and building of chocolate showpieces. Students will also utilize the techniques used in blown, pulled, and poured sugar showpieces and decorations, packed sugar and pastillage décor. The culmination of student knowledge will be exhibited with the design, fabrication and assembly of competition chocolate and sugar centerpieces.

Prerequisite(s): BPA 222.

BPA 251 Cafe and Restaurant Production4 QH Emphasis will be placed on preparing students in a working production environment. Students will focus on plated desserts for restaurant and banquet work, hot and cold desserts, trios, deconstructed desserts, samplers and ice creams. Students will develop proper plating and service selections, color, texture, height and focal point balance. Plate presentations of simple and complex desserts will be examined.

Prerequisite(s): BPA 151, BPA 152.

BUSINESS

Through this course, students will also be introduced to portfolio requirements, establish a template for their Integrated Portfolio Project (IPP) papers, and begin exploration of their "umbrella" topic as well as individual IPP paper topics. Prerequisite(s): acceptance in the program.

accounting information. Emphasis is placed on analysis of financial statements and their use in managerial decision-making. This course is exclusive to the accelerated Bachelor of Business Administration degree program. Prerequisite(s): MTH 312R, WRI 312R.

of accounting information. Specific topics include: financial statement analysis, valuation of and discounted cash flows involving the time value of money, valuation and structure of debt and equity capital both long- and short-term, working capital management, capital budgeting, and the risk-return relationship. All topics covered include the application and ethical implication on the decision-making role of financial managers in business organizations. This course is exclusive to the Accelerated Bachelor of Business Administration degree program. Prerequisite(s): BUS 311.

BUS 401 International Business......6 QH Analyzes the firm as it expands globally. Emphasis is placed on the understand-

ing and utilization of diversity and ethics in the development, operation and international expansion of the firm. Multicultural work environments, employment and labor issues, domestic and international law, global marketing, trade and finance will be examined. This course is exclusive to the Accelerated Bachelor of Business Administration degree programs. Prerequisite(s): MTH 312R, WRI 312R.

BUS 421 Marketing Management......6 QH

Covers the role of the marketing function in organizational operations with an emphasis on product/service promotion, placement, and pricing. Various marketing strategies will be evaluated. This course is exclusive to the accelerated Bachelor of Business Administration degree program. Prerequisite(s): MTH 312R, WRI 312R.

BUS 431 Management Strategy6 QH

Focuses on the strategy function of senior management and the establishment of the organizational mission, strategy, goals, objectives and plan of implementation and evaluation. This course is exclusive to the Accelerated Bachelor of

Business Administration degree programs. Prerequisite(s): BUS 371, BUS 401, ECN 301R, PSY 231R, SOC 321R.

BUS 499A Integration Portfolio......2 QH Integrates and demonstrates the student's professional and personal growth during his/her baccalaureate study. The culminating activity for this course is the completion of a major faculty-guided written project encompassing an area of theory and practical application in the field of business, developed over the duration of the BBA program of study, which demonstrates the student's knowl-edge of applied business research. This course is exclusive to Accelerated Bachelor of Business Administration degree program. Corequisite(s): BUS 431 or MGT 414R.

CERTIFIED CODING SPECIALIST

CCP 211 Healthcare Reimbursement4 QH

Healthcare reimbursement will introduce students to the various payment systems used in the healthcare inpatient and outpatient setting. Upon completion of the course students will be able to demonstrate and calculate payments using an applicable reimbursement methodology that maximizes incoming revenue for the healthcare facility.

Prerequisite(s): MTH 101.

CCP 221 Claims and Adjudication......4 QH

Analyze and determine the proper usage of coded data and health information in reimbursement and payment systems appropriate to all health care settings and managed care. Reinforcing the concepts of claim filing, handling rejections, posting payments, computer generated claim reports, and the tools and techniques for collection and storage of health care data found on the UB-04 and the CMS-1500.

Corequisite(s): CCP 211.

Provides a comprehensive review for students applying to the AAPC (American Academy of Professional Coders) in preparation for their coding credentials. The review will include ICD-9-CM coding, CPT-4 coding, anatomy and physiology, and medical terminology.

Prerequisite(s): C or better in CCP 221, C or better in MIS 201A.

CISCO CERTIFIED NETWORK ASSOCIATE

CSC 121A Network Fundamentals4 QH

Introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. Uses the OSI and TCP layered models to examine the nature and roles of protocols and services at the application, network, data link, and physical layers. The principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation.

Prerequisite(s): NET 102.

CSC 221A Routing Protocols and Concepts8 QH Describes the architecture, components, and operation of routers, and explains the principles of routing and routing protocols. Students analyze, configure, verify, and troubleshoot the primary routing protocols RIPv1, RIPv2, EIGRP, and OSPF. By the end of this course, students will be able to recognize and correct

common routing issues and problems. Prerequisite(s): CSC 121A.

CSC222 is a Cisco Academy class which prepares students to sit for the Cisco Wireless LAN Support Specialist exam (Cisco #642-582 WLANFE). After completing this course students will be able to design, configure and maintain enterprise-class WLANs and building-to-building wireless bridges. This course focuses on a comprehensive overview of WLAN radio technologies (802.11a,b & g) and topologies, products and solutions, site surveys, resilient WLAN design, and WLAN Security (802.1x, EAP, LEAP, WEP, SSID). Labs focus on wireless access point configuration and bridging applications. Prerequisite(s): CSC 221A.

Prepares students to sit for the Cisco Voice Over IP exam (Cisco #642-432 CVOICE). This course examines technologies that carry voice communications over an IP network, including digitization and packetization of voice and fax streams over packet and cell-based networks (FR and ATM). VoIP standards and protocols such as SIP and H.323 are addressed. QoS, traffic aggregation issues, bandwidth management and network assessment are also investigated. The major challenges of VoIP development, implementation, and major VoIP product development trends will be addressed. Prerequisite(s): CSC 222.

CSC 231A LAN Switching and Wireless8 QH Provides students with an in-depth understanding of how switches operate and are implemented in the LAN environment for small and large networks. Beginning with a foundational overview of Ethernet, this course provides detailed explanations of LAN switch operation, VLAN implementation, Rapid Spanning Tree Protocol (RSTP), VLAN Trunking Protocol (VTP), Inter-VLAN routing, and wireless network operations. Students analyze, configure, verify, and troubleshoot VLANs, RSTP, VTP, and wireless networks. Campus network design and Layer 3 switching concepts are introduced.

Prerequisite(s): CSC 221A.

Introduces students to WAN design and network management issues. This class explores other topics including PPP, ISDN, and Frame Relay. An important component of this class will be student preparation for certification exams and includes Network + and CCNA Certification Exam Reviews. Prerequisite(s): CSC 231A.

COLLEGE EXPERIENCE

COL 111A College Success StrategiesNo Credit

Provides students with knowledge of campus services, policies, and procedures. Learning styles and strategies, time management, and goal setting are also covered. This is a web-enhanced course. (This course is required for all full-time and part-time, first-time freshmen enrolled in a certificate or degree program.)

COL 112 College Success OnlineNo Credit

Provides online students with the technology skills required to succeed in the online format of Baker College courses. Students learn how to access support services of the College, how to access and learn the policies related to online students, and practice the procedures which will be essential in all of the online course offerings. The application of best practices for time management and goal setting related to the Blackboard format and tools that are used to provide online courses and the use of Blackboard structure to organize goal setting for success in online courses are major focuses. (This course is required for all fulltime and part-time, first-time freshmen enrolled in a certificate or degree program. Components of this course are also provided to transfer or graduate students or to students enrolled in on-ground courses who wish to take an occasional online course.)

COL 301A Life and Learning......2 QH Provides assistance to students in the preparation of the portfolio, which documents and verifies prior learning skills. The portfolio is assessed by appropriate Baker College professionals. Following evaluation, the portfolio will be returned to the student and can be used for future employment, promotions, transfers, or entering new job markets.

COMPUTER AIDED DESIGN (CAD)

CAD 111 Computer Aided Drafting I (CAD I)4 QH

Introduces students to the use of the computer in the creation of drawings in place of traditional drafting methods. Students will create and edit drawings using CAD software.

Prerequisite(s): ME 101. Corequisite(s): INF 121.

CAD 112 Computer Aided Drafting II (CAD II)4 QH

Continues CAD I and expands on the applications of CAD software. Advanced dimensioning and tolerancing techniques are covered as well as creating symbols for multiple use. Isometric drawing will introduce students to the 3-D aspects of CAD.

Prerequisite(s): CAD 111, INF 121.

Continues the computer based drawing experience and introduces students to 3-D modeling through the use of solid modeling software. Students will develop parts in 3-D. Advanced editing and dimensioning techniques will be covered. Prerequisite(s): CAD 111.

Prerequisite(s):	CAD	23	8.													

Introduces tool design and tool-making, covering tool-making practices and materials, design methods, and the design of jigs, fixtures, and other production tools. Design problems will be approached utilizing manufacturers' symbol libraries and/or standard component templates. Prerequisite(s): CAD 112.

Introduces topics in product design and development. Fundamentals in design of simple products including design constraints, material selection, strength, failure mode analysis, ergonomics, and cost analysis are explored. Designing for assembly, cost, maintenance, and other DFx topics are explored. Creative design and matrix selection are reviewed. Prerequisite(s): CAD 112.

Introduces design topics related to machine tool and equipment design. Included topics are inventive design for functionality, safety, reliability, cost, maintainability and manufacturability. Human-machine interface considerations are also explored. Prerequisite(s): CAD 112.

CAD 244 Vehicle Design......4 QH Introduces methods and practices used in the design of vehicles. Topics include: body design, interiors, powertrain, and other systems related to automobiles and other vehicles. Additional topics such as related regulatory standards QS9000, EMC, and design methodologies (i.e. C3P) will also be included. Prerequisite(s): CAD 112.

COMPUTER ANIMATION

Presents the development of Story and character concepts into finished images, working traditionally and on the computer. Concentrates on the development of these skills through the exploration of different topics and projects relevant to professional animation. Emphasis will be placed on storyboarding, elements of drawing, character development, functional body-mechanics, personality traits and other subjects related to story development and illusion of life.

CAP 151 Introduction to Computer Animation......4 QH Designed to introduce students to the basic concepts and terminology of computer graphics as it is used in film, visual effects, games, and animation. Students will have a better understanding of the different disciplines that collectively make up computer graphics production. Students will explore 2D animation production & compositing using Adobe Photoshop, After Effects and Premiere Pro.

Prerequisite(s): CAP 101.

Provides an advanced study in Texture Theory and Material creation building upon the skills acquired from previous coursework. Exploration into color and lighting, preparing images to be exported for interactive design, 3D gaming, material mapping, motion graphics and animation will be the focal point. This course will also introduce the student to the world of 3D modeling using 3Ds Max. Students will be required to import textures and materials into the Material Editor within 3Ds Max and learn how to manipulate them for object wrapping, lighting techniques, and bump maps.

Prerequisite(s): CAP 151, GRC 131A.

CAP 201A Computer Animation I......6 QH Provides the basics of 3D computer graphics and animation. This foundation course helps students understand 3D animation terminology and the role of the 3ds Max platform in providing artists with the ability to model, animate, and to render using an integrated workspace. Students will be able to create, animate and render 3D scenes using 3ds Max software. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): CAP 151 or CAP 161 or CS 111.

Provides students the opportunity to expand upon the basics of 3D computer animation and the 3ds Max interface. In this second course, students will focus on refining their 3D modeling and texture mapping skills and be introduced to particles and advanced animation concepts and techniques. Students will model and texture 3D objects and create animated sequences. Prerequisite(s): CAP 201A.

Continues the opportunity to expand upon the basics of animation and keyframes. Students will focus on understanding the basics of lighting, animate materials and synchronize animation to a sound track. Prerequisite(s): CAP 202.

Presents the opportunity to demonstrate, at an introductory level, the basic workflow for creating characters. Students will focus on developing a storyline, identifying what objects will be needed, what textures and color will be used and which objects will be animated.

Corequisite(s): CAP 202.

CAP 271 Computer Animation Portfolio Project4 QH

Requires students to compile and evaluate the body of work from the Computer Animation program into a portfolio on DVD format. By applying skills in the use of several leading software applications in the Adobe Production Suite (Photoshop, Premiere, After Effects and Encore DVD), the portfolio will include projects from the Graphics, Web, and Animation classes. Students will refine their projects based upon industry standards and produce a demo reel of the body of work of their choice which best highlights the skills they have acquired during the program to present to prospective employers.

Prerequisite(s): CAP 202. Corequisite(s): CAP 203.

COMPUTER INFORMATION SYSTEMS

Provides an introduction to computer hardware and software with a focus on operating systems concepts. Includes a comparison of the Microsoft Windows family of operating systems including Windows 2000 and Windows XP. Students will also receive a brief introduction to Microsoft Vista and Linux. This course, in conjunction with CIS 107A, partially prepares students for the CompTia Essentials exam.

Prerequisite(s): WPG 098 or high school typing/proficiency, ENG 098B or placement exam, INF 111 or INF 121 or NET 101.

CIS 107A Introduction to Hardware Concepts......4 QH

Provides an introduction to computer hardware and software with a focus on hardware concepts. Includes analysis of system boards, processors, memory components, peripherals, safety, and preventative maintenance. Students also receive an introduction to networking and system troubleshooting. This course, in conjunction with CIS 106A, partially prepares students for CompTia's Essentials exam.

Prerequisite(s): WPG 098 or high school typing/proficiency, any INF course or NET 101.

Introduces students to the fundamentals of computer operations, control language, and file design in the iSeries environment. Prerequisite(s): CIS 106A, INF 114A or NET 101.

CIS 132A RPG IV4 QH

Introduces program design and development using the RPG IV language. Students will analyze business problems and prepare program definitions as a basis for computerized solutions to those problems. Students interested in accounting applications are encouraged to choose this language option. Prerequisite(s): CIS 119A.

Examines the elements of establishing superior information technology service and support. Focus is on interdepartmental cooperation. Customer contact skills including listening, courtesy, conflict management, problem solving, decision making, ethics, follow-up, communications, and user training are covered to enhance the image of the business with internal and external customers. This is an introductory course for Computer Support Specialist majors. Prerequisite(s): CSS 211, MNP 221.

CIS 233A Advanced RPG IV4 QH Deals with advanced language features using the RPG IV language. Students are also introduced to the $\ensuremath{\mathtt{RPG}}$ II and $\ensuremath{\mathtt{RPG}}$ III languages. Prerequisite(s): CIS 132A.

CIS 251 Systems Development Methods4 QH

Presents traditional methodologies of system analysis, design, and implementation along with recent developments in the field providing a total approach to information systems development. This course focuses on how to develop information systems in an engineered, disciplined manner utilizing real-world situations and applications.

Prerequisite(s): One level of a programming language or Junior status.

CIS 302A Intermediate Database Management.......4 QH

Provides an intermediate level of study of personal and/or business database applications including relational database structure and theory, the structure and maintenance of tables, queries, forms, and reports, and an introduction to macros and switchboards.

Prerequisite(s): INF 114A or NET 101.

Provides coverage of computer hardware in relation to the system: mechanical implementation, electrical implementation, and optical implementation; system capabilities regarding processor function, storage functions, and communications functions; and computer system design factors. Data representation is covered in-depth, including integer data, floating point notation, character data as well as data structures. Processor technology and architecture will be covered, as will system integration and performance through logical and physical I/O, device controllers, I/O processing, data and network communication technologies, networks and distributed systems, network architecture, and OSI network layers.

Prerequisite(s): CIS 106A, CS 111, MTH 111.

Introduces object-oriented programming design using Visual BASIC.NET for Windows. Students will learn the tools and methods used to analyze real-life problems and develop programs that address those problems. BASIC language has been a long-standing standard for learning programming. Visual BASIC.NET builds on this tradition plus introduces students to the powerful tools of objectoriented programming that have fast become a standard in most Windows programming languages. Prerequisite(s): CS 111.

Driven (OOED) applications using Visual BASIC.NET. Using realistic case studies, students will exhibit their ability to write code for variables, selection structure, repetition, sequential access files, dialog boxes, error trapping, viewing and manipulating databases, and two-dimensional arrays. Students will also demonstrate their ability to work with a team to design, create, test, debug, document, and present an advanced, multi-form Visual Basic application that incorporates concepts learned in CIS310 and CIS311.

Prerequisite(s): CIS 310. CIS 313A Intermediate Spreadsheets......4 QH

Explores further the features of spreadsheets. Topics include a more in depth study of spreadsheet functions, database techniques, graphing, and an introduction to macros.

Prerequisite(s): INF 113.

CIS 314 Advanced Software Solutions4 QH

Focuses on application development in a Windows environment. This course covers advanced uses of database and spreadsheet packages, sharing of data between programs, and macros development to solve problems. Students also use presentation software, learned in the course, to present their solutions to case-study problems.

Prerequisite(s): CIS 302A, CIS 313A, INF 112.

CIS 331 Database Management Using SQL......4 QH

Expands on the concepts learned in the introductory course in database creation by introducing students to higher levels of database development and computer science concepts. Students learn SQL in order to study the manipulation of a relational database. This course also includes a survey of database platforms. Prerequisite(s): INF 114A or NET 101.

tion systems for the Web. Includes the development of data models including how to organize the modeling task, manage compromises, design for flexibility, achieve basic and advanced normalization, and develop and use generic models. Explains how to model a problem domain by abstracting objects, attributes, and relationships. Describes object-oriented approaches to model the dynamic behavior of a system in terms of state and process models. Students will construct data and object models using Entity-Relationship (ER), Unified Modeling Language (UML), and other techniques.

Prerequisite(s): CIS 302A or CIS 331.

Builds upon the theoretical concepts of the Development Cycle learned in the Systems Development Methods. The technical knowledge gained from programming, word processing, spreadsheet, and database applications will also be put to use for the tasks of this course. Students will use the appropriate systems development methodologies, in a team approach, and follow the life cycle methodology and/or the information center techniques learned previously to achieve a demonstrable working solution to a particular Systems Development problem.

Prerequisite(s): CIS 251.

Continues the study of processor function and system design. Students will evaluate the performance of a given microprocessor using common benchmarks, analyze instruction sets in HLL, RISC, and CISC architectures, and expand their understanding of binary operations and related impact on ALU design. Students will research and compare performance and design factors in parallel, pipelined, and multiprocessor designs; analyze branch prediction impact on program design; and evaluate the effectiveness of hierarchical memory designs. Throughout this course students will engage in periodic research on various topics and will also complete an independent, comprehensive, in-depth analysis of an instructor-approved topic in high performance computer architecture. Prerequisite(s): MTH 340, CIS 303A or EET 226.

CIS 421B Database Administration I4 QH Exposes students to database administration and the duties of a database administrator (DBA) to include database monitoring, backup and recovery, troubleshooting, and tuning for reliability and performance. Students will install, configure, and maintain an RDBMS including security, backup and recovery operations, and performance tuning. Prerequisite(s): CIS 302A or CIS 331.

Continues the database administration tasks introduced in CIS 421B with a focus on backup and recovery tools and techniques, archiving, loading and transporting data, network administration, and server-side and client-side configuration. Prerequisite(s): CIS 421B.

COMPUTER SCIENCE

CS 111 Introduction to Programming4 QH

Introduces students to programming concepts such as logic and flow charting as well as some basic programming techniques. Prerequisite(s): Any INF course or NET 101. Corequisite(s): MTH 111.

CS 217A C++ Programming......4 QH Introduces program design and development using C++ language. Uses

Microsoft Visual C++ to provide students with experience working with the visual development tools. Students will demonstrate the ability to use C++ to design solutions to problems.

Prerequisite(s): CS 111, MTH 112.

CS 218A Object Oriented Programming With C++.....4 QH Continues the development of C++ programming skills. Students will practice designing and developing C++ programs, modifying and debugging existing C++ programs, and developing complex object-oriented applications. Additional exposure to the Microsoft Visual development environment will also be gained.

Prerequisite(s): CS 217A.

Provides first time programmers the opportunity to learn programming using Java. Introduction to Java is part of the Sun Microsystems Academic Partnership Program and is a Java Programmer Certification class. This overview course helps students understand the significance of the Java programming language. Students will develop skills generally in object-oriented programming and specifically in Java technology. Students will be able to read and edit Java source code and create simple programs using Java technology. Sun Academic Initiative Course SL 110.

Corequisite(s): CS 111.

Provides students with a review of syntax and constructs from CS221 and provides a strong foundation in object oriented concepts and object oriented analysis and design as they relate to Java technology. This class also provides students with experience using relevant Java Programming language constructs. This is a preparatory course in design methodologies using Java technology intended to provide students with the necessary background for taking the next class in the series.

Prerequisite(s): CS 221.

CS 223 Java Object Oriented Programming4 QH

Teaches students the syntax of the Java programming language; object-oriented programming with the Java programming language; creating graphical user interfaces (GUI), exceptions, file I/O, threads and networking. Students will use skills acquired in this class and the previous two Java classes to develop a Java application.

Prerequisite(s): CS 217A, CS 222.

applications. This is the first of two JAVA programming courses. The use of JAVA in Web-based client and server programming is also covered. Prerequisite(s): CS 111 or one level of a programming language.

CS 242 Advanced Java Programming......4 QH Continues the use of the Java programming language for developing applications.

Prerequisite(s): CS 241.

and the design and analysis of computer algorithms. Topics include abstract data types and algorithm development using C++.

Prerequisite(s): CS 218A, MTH 340.

Expands on the concepts begun in Data Structures and Algorithms I, including stacks, queues, trees, and binary trees as fundamental conceptual structures of data. Various physical implementations for each conceptual view are examined with emphasis on the concept of abstract data types. Algorithm development continues with coverage of methods solving recurrences, divide-and-conquer

algorithms, dynamic programming, greedy algorithms, and graph algorithms. Prerequisite(s): CS 321. CS 332A Advanced HTML Programming4 QH Continues exploring programming for the World Wide Web. Topics will include: Web site enhancement and redesign, CSS, DHTML, AJAX, and other related

technologies. Students will demonstrate the ability to develop their own Web pages and apply available technologies to problems supplied by the instructor. Prerequisite(s): WEB 111A, and one level of a programming language.

Introduces program design and development using the Perl language. The course content includes basic Perl programming concepts as well as CGI applications for the Web, integration with databases, and system administration scripts.

Corequisite(s): CS 332A.

CS 413A XML Programming......4 QH Introduces students to the use of Extensible Mark-Up Language (XML) to create Web pages and sites. Topics include: CML components, creating and editing software, creating XML schemas, creating XML transformations, and XML binding basics

Prerequisite(s): CS 332A.

retrieve, and manipulate data. In addition, students will write queries to retrieve, summarize, and modify data using joins and subqueries. Students will learn how to create and execute stored procedures and functions. This course also introduces participants to database triggers. Prerequisite(s): CIS 331, CS 111.

CS 423 Database Programming II......4 QH Continues the database programming tasks introduced in CS 422A with a focus on creating custom forms and reports, using advanced debugging techniques, and integrating database applications. Prerequisite(s): CS 422A.

Covers the three areas of computer security: network security, system security, and application security. Students will demonstrate the ability to develop user administration tools to tighten security in an open systems environment. Prerequisite(s): LUX 261 or WEB 361.

CS 465 Advanced Database Topics......4 QH

Explores advanced database topics such as data mining, data warehousing, geographical information systems, and data-related ethics. This is a capstone course in which students will do an extensive research-based project or writing exercise.

Prerequisite(s): CIS 422, CS 423.

COMPUTER SYSTEM SECURITY

Provides students with a background in information security, security management, and the technical components of security. Students will be given an overview of the entire field of information security: the history, the terminology, and the management aspects of information security programs with sufficient detail to facilitate an understanding of information security systems and their management.

CSS 211 Introduction to Network Security4 QH Provides students with a strong foundation in network security concepts along with analysis and design of these systems. It is a preparatory course in network security methodologies. May lead to the CCSA Security certification in conjunction with Checkpoint Software Technology's Academic Partnership program. Prerequisite(s): NET 102.

Provides an understanding of basic concepts and skills necessary to configure VPN/Firewalls. Specifically, this course provides the following key elements: An overview and understanding of CheckPoint's Secure Virtual Network Architecture, firewall technology, hands-on training with Check Point VPN-1 NGX software, configuration of security policies and the management of firewalled networks. Students who complete this course are prepared to take the Management II class and will have the acquired preliminary skills to take the CCSA exam (Check Point Certified Security Administrator). Prerequisite(s): CSS 211.

Provides students with an understanding of key concepts and skills necessary to install and manage a firewalled network on internal and external networks, how to gain the maximum security from the firewall, and resolve firewall performance issues. Students who complete this course are prepared to take the CCSA exam (Check Point Certified Security Administrator) and have the acquired preliminary skills needed to prepare for the CCSE exam (Check Point Certified Security Expert).

Prerequisite(s): CSS 221.

CONSTRUCTION MANAGEMENT

Studies the design/build project delivery system. Emphasis is placed on comparing and contrasting construction management functions in design/build with those in more traditional forms of project delivery such as general contracting and construction management. Prerequisite(s): Junior status.

CM 306 Advanced Surveying4 QH Continues the development of surveying techniques, with strong emphasis of the technical skills in laying out sites and buildings. Prerequisite(s): ACT 105A.

governing construction industry standard for safety, such as: OSHA & MIOSHA. Prerequisite(s): ACT 204A.

CM 401 Advanced Building Technologies4 QH Focuses on major innovations in building technologies for structure, enclosure and material systems. Highlights the state-of-the-art building systems. Prerequisite(s): CM 421.

CM 406 Construction Estimating and Bidding......4 QH

Detailed cost estimates including quantity takeoffs, labor/material pricing, and overhead/profit. Also, included are bid strategies, and factors affecting construction cost. Computer applications are explored as part of the course. Prerequisite(s): ACT 203, CM 431, PPM 401.

CM 411 Legal Aspects of Construction4 QH

Introduction to the U.S. legal system as it applies to construction. Emphasis is placed on fundamental concepts of contract and law, claims, risk management, business formation and licensing, agency, insurance and bonding, and real property.

Prerequisite(s): ACT 204A, IND 301.

CM 416 Construction Contract Administration4 QH Provides an overview of construction contract administration and enforcement of contract requirements during the construction phase of the project. Computer applications are explored as part of the course. Prerequisite(s): CM 411.

Provides a thorough understanding of ecological site systems and sustainable building systems. Current aspects of sustainability will be explored including the impact of the LEED rating system, legislation, environmental law, corporate culture evolution, and integrated design process. Prerequisite(s): ACT 104, ACT 202, AT 421.

CM 431 Construction Project Scheduling......4 QH Develops advanced construction planning and scheduling techniques, building on previous experience with the critical path method. Integrates the use of computer software as a scheduling tool throughout. Prerequisite(s): PPM 311.

CM 491 Construction Project Management4 QH The program capstone course integrating all aspects of the construction management process. Students explore the roles and tasks of the construction manager and are required to utilize and extend their knowledge in all areas of expertise used by construction managers.

Prerequisite(s): Junior status, Dean's approval.

CONTINUOUS QUALITY IMPROVEMENT

Gives an overview of current and new trends in continuous quality improvement. Students will examine and analyze quality methodologies such as ISO, Lean Manufacturing, Tauguchi, Kaizen and other perspectives in continuous improvement, including team dynamics.

CQI 311 Statistical Process Control I4 QH Develops a working knowledge and skills in basic Statistical Process Control (SPC) which includes process data collection, display, interpretation, and application to improve the overall quality of a process system. Topics include quality responsibility, quality improvement techniques; fundamentals of statistics; control charts for variables; and process capability. Students will conduct a quality improvement project that is work related which applies the SPC tools discussed in this course.

Prerequisite(s): MTH 111 or acceptance in the program.

Develops a working knowledge and skills in basic Statistical Process Control (SPC) which includes process data collection, display, interpretation, and application to improve the overall quality of a process system. Topics include variable control charting, capability study development, techniques for batch processes and short runs, fundamentals of probability, attribute control charting, acceptance sampling, reliability, and measurement variation. Students will conduct a quality improvement project that is work related which applies the SPC tools discussed in this course. Prerequisite(s): CQI 311.

CQI 411 Analytical Tools Class using Statgraphics4 QH Introduces students to quality improvement application software used in identifying areas for improvement and those that contribute to critical factors in process dynamics.

Prerequisite(s): CQI 311, INF 113, INF 121, MTH 111 or CQI 311 and ACCeptance in the program.

Develops a working knowledge and skills in Advanced Statistical Process Control (SPC) which includes hypothesis testing, statistical estimation, single factor design of experiments, multifactor design of experiments, multilevel design of experiments, orthogonal arrays, the loss of function, and the concept of analysis of variance.

Prerequisite(s): CQI 311.

CQI 491 Preparation for Certified Quality Improvement Associate (CQIA)......2 QH

Reviews the required material and practice questions to help prepare students for ASQ's Certified Quality Improvement Associate (CQIA) certification based on the CQIA Body of Knowledge (BoK).

Prerequisite(s): CQI 311, CQI 421. Corequisite(s): CQI 312, CQI 411.

CRIMINAL JUSTICE

CRJ 101 Introduction to Criminal Justice4 QH

Introduces the skills, tools, and methods needed for various criminal justice professions. This course explores philosophical underpinnings of crime and punishments among police, corrections, and the courts. Various ethical and duty related issues are also examined. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

CRJ 106 Introduction to Corrections4 QH

Introduces the philosophy and history of corrections. This course also includes the development of current forms and approaches to corrections including probation, parole, security concepts, and related agencies. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

CRJ 111 9-1-1 Telecommunications I4 QH Provides content approved by the Michigan State 9-1-1 Committee meeting the requirements for the basic 40 hour dispatcher training program. Topics include telecommunicator roles, public safety overview, professionalism, teamwork, ethics, stress management, call classification, technology, and customer service. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

CRJ 112 9-1-1 Telecommunications II4 QH Provides content approved by the Michigan State 9-1-1 Committee meeting the requirements for the advanced 40 hour dispatcher training program. Topics include domestic violence, suicide intervention, 9-1-1 liability, stress management, and homeland security issues. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

Provides a more in-depth study of corrections as part of the criminal justice system. Specific discussions include the evolution of corrections, organization and development of jails in America, alternatives to incarceration, probation, parole, and the concept of community-based corrections, management and organization of correctional institutions, custodial care, safety and security, and prisoner rights. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

Examines the meaning and function of culture, the impact and meaning of discrimination, minorities, attitude formation, and professional responsiveness for criminal justice professionals. Must complete with a C (73%) or better. *Prerequisite(s): Student background check.*

CRJ 141 Criminology4 QH

Examines normal versus criminal behavior, human development and criminal patterns, specific problems and intervention strategies. This course explores psychological, sociological, and biological theories of criminal behavior. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

Provides a thorough examination of how the law impacts corrections related decisions. This course also examines constitutional law, the court process, U.S. courts, and prisoner rights. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

Focuses on unarmed defensive tactics, control and movement of prisoners, control of uncooperative subjects, use of non-lethal weapons, and officer survival. Practical training is based on methods of both defensive and offensive techniques used in the control of violent subjects. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

Provides students with an overview of the historical development and implementation of community-based correctional programs and the advantages, disadvantages, effectiveness, and community impact of such programs. Emphasizes supervision of individuals on probation and parole including interviewing, counseling and referral to resources, and preparing written court reports and oral presentations during pre-sentence investigations. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

CRJ 211 Interpersonal Communication and Conflict Management4 QH Provides students with interpersonal communication and conflict management skills that can be used to manage cooperative and uncooperative individuals in criminal justice environments. Application of the skills will be practiced through the use of role play exercises in simulated situations. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

(RJ 221 Interviewing, Investigations and Report Writing......4 QH Provides students the learning opportunity to conduct basic investigations, assessments, interviews, and interrogations which may be necessary in criminal justice settings. Students will practice providing oral summaries, note taking, and computer based report writing in a variety of formats, including logs, client assessments, incident reports, investigation reports, interview summaries, and other related documents. Must complete with a C (73%) or better. Prerequisite(s): CRJ 106, ENG 102, Student background check.

CRJ 231 Principles of Policing I......4 QH Examines both historical and contemporary methods of policing. An emphasis is placed on ethical behavior along with an introduction of tools, skills, and methods used for effective policing. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

vides additional strategies, techniques, and methods for effective policing. Assesses the societal impact that policing has on the community. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

CRJ 261 Retail Security......4 QH Explores the technology used in retail security operations focusing on loss prevention strategies and the impact that theft has on businesses and society. Techniques used for surveillance and recovery of stolen merchandise are also examined. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

CRJ 281 Criminal Justice Seminar I1 QH Provides students an opportunity to share current experiences to the didactic components of the program. This course is offered concurrently with the Criminal Justice Internship (WRK 281). The recommended class schedule is a two hour class session every other week, meeting a total of five sessions. Must complete with a C (73%) or better.

Prerequisite(s): Student background check. Corequisite(s): WRK 281.

Examines the history of juvenile justice models and current processing of juvenile offenders. This course will also examine how the processing of juvenile offenders differs from adult offenders and the unique problems associated with juvenile offenders. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

Focuses on foundational ethical principles and theories including the application of ethical decision making as it relates to criminal justice professionals. The societal implications of unethical behavior are also examined. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

Explores the legal system using classic and contemporary case law to provide a foundation of legal knowledge. The content and impact of several milestone Supreme Court decisions are also examined. Must complete with a C (73%) or better

Prerequisite(s): Student background check.

retrieve data as part of the investigatory process. Identify theft and various types of online fraud are also examined. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

CRJ 341 Introduction to Forensic Science......4 QH

Provides an overview of numerous forensic science tools used to investigate criminal activity and the collection of evidence ranging from finger printing to DNA. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

umenting, and storing evidence for later use in criminal proceedings. The consequences for mishandling evidence are also explored. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

Provides historical and contemporary perspectives of organized criminal activ-ity by the mafia and others. White collar crime and corporate corruption are examined along with the social dynamics of youth gangs, violence, prison gangs, and criminality. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

Provides an overview of the functions, roles, operations, and jurisdictional issues of various local and federal court systems addressing both criminal and civil matters. Includes an examination of various specialized courts to deal with specific societal issues ranging from truancy to substance abuse. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

This course examines "what works" to improve the effectiveness of policing and offender rehabilitation efforts. The course uses empirical studies to explore research methods commonly used within the social sciences to introduce and apply the concepts of evidence-based practices. Must complete with a C (73%) or better.

Prerequisite(s): Student background check.

Provides a global perspective on terrorism and its impact on homeland security issues post-911 ranging from airport security to local emergency response preparedness. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

CRJ 441 Organizational Leadership in Criminal Justice......4 QH

Explores supervisory/management techniques and strategies within paramilitary organizations, courts, and private enterprise to prepare future leaders within the criminal justice professions. Must complete with a C (73%) or better. Prerequisite(s): Student background check.

CRJ 481 Criminal Justice Seminar II1 QH

Provides students an opportunity to share current experiences to the didactic components of the program. This course is offered concurrently with the Criminal Justice Internship (WRK 481). The recommended class schedule is a two hour class session every other week, meeting a total of five sessions. Must complete with a C (73%) or better.

Prerequisite(s): Student background check. Corequisite(s): WRK 481.

CULINARY ARTS

CUL 100 Culinary Portfolio Prep......1 QH

Introduces students to the foodservice industry and the various components required for the CUL 275 portfolio. Class fee includes the required yearly membership dues for the ACF (American Culinary Federation). All aspects of the culinary portfolio will be explained and discussed.

CUL 105 Introduction to Gastronomy......2 QH Introduces students to the social, historical, and cultural forces that have affected the culinary as well as the baking, and pastry professions. Topics include the kitchen brigade system, contemporary challenges facing food professionals in the

twenty-first century and etiquette as a social and professional discipline. Students will be expected to complete several written assignments and present a group research project. Corequisite(s): CUL 100.

CUL 110 Product Identification

An in-depth introduction to the identification and use of vegetables, fruits, herbs, nuts, grains, dry goods, prepared goods, dairy products, and spices in various forms. Explores both fresh and prepared foods and students learn to identify, receive, store, and hold products. Students will also learn to evaluate products for taste, texture, smell, appearance, and other quality attributes. Prerequisite(s): CUL 131B.

CUL 115 Culinary Math......2 QH

Focuses on the math skills needed to calculate percentages, ratios, the metric system, conversion factors, yield tests, recipe conversion and recipe costing as they relate to the foodservice industry. Students will develop projections and analyze costs in yield tests and recipe pre-costing.

and state regulations. Topics to be covered include prevention of food-borne illness through proper handling of potentially hazardous foods, HACCP procedures, legal guidelines, kitchen safety, facility sanitation, and guidelines for safe food preparation, storing, and reheating. This course utilizes the National Restaurant Association ServSafe(r) materials, prepares for and culminates with the administration of the National Restaurant Association ServSafe(r) Certification examination

learn about basic nutrients, food labeling, nutritional principles, current issues in nutrition, and the application of nutritional principles to menu development. Students will also be involved in writing and nutritional analysis of recipes. Corequisite(s): CUL 131B.

of basic food preparation and cooking techniques in lecture and lab format. Extensive hands-on training is provided for using cooking methods in the areas of dry heat cooking, moist heat cooking, tasting, kitchen equipment, knife skills, classical vegetable cuts, stock production, thickening agents, soup preparation, grand sauces, timing, station organization, palate development, and culinary French terms. The lecture for this course focuses on cooking principles, theory and the application of culinary skills in the kitchen. This course lays a founda-tion for the more advanced techniques presented in later coursework. Prerequisite(s): CUL 115, CUL 131B.

CUL 152 Culinary Skills II8 QH Continues from CUL 151 and focuses on principles of food preparation and cooking techniques in lab and lecture format. Extensive hands-on training is provided for using basic cooking methods as they apply to specific products such as red meats, poultry, pork, game meats, fish, shellfish, vegetables, pasta, sauces, and soups. Expanded concepts of time lines and multi-tasking, station organization, and culinary French terms will continue. The lecture for this course focuses on advanced cooking principles, theory and the application of culinary skills in the kitchen. This course lays a foundation for the more advanced techniques presented in later coursework. Prerequisite(s): CUL 151.

CUL 153 Culinary Skills III8 QH Applies the skills and theories from CUL 152 and focuses on advanced principles of food preparation and cooking techniques in lab and lecture format. Students receive extensive hands-on training focusing on advanced and combination cooking methods for red meats, poultry, pork, shellfish, fish, vegetables, and game.

Breakfast cookery, salads, canapés, production cooking, hot and cold sandwiches, plate presentation, and advanced techniques for starch and vegetable preparation, will also be developed. Lecture for this course will focus on the advanced cooking principles, theories, and application of culinary skills in the kitchen. Prerequisite(s): CUL 152.

CUL 201 Restaurant Techniques......8 QH

Prepares the students for the innovation, creativity, speed, and multi-tasking abilities required in today's modern kitchen. The lab format for this class will offer students a real working kitchen environment in The Culinary Institute of Michigan's student-run, fine dining restaurant. An extensive range of advanced techniques, ingredients, and recipes illustrate the complex theories and applications. Upon completing this course, students will have achieved a high standard of quality and detail in culinary arts. The lecture for this course focuses on cooking principles, theory and the application of culinary skills in the kitchen. Prerequisite(s): CUL 152.

Focuses on the role that wines and spirits play as quality beverages in professional foodservice operations. The course will emphasize styles of wine from around the world; the theory of matching wine with food; tasting wines, beers, and other beverages; and organizing wine service. Subjects to be explored include purchasing, storing, issuing, pricing, merchandising, and serving wines and spirits in a restaurant setting. Responsible alcohol service will also be emphasized. Mixology and the preparation of common and uncommon cocktails are covered. Students also may participate in a restaurant-based wine and food tasting plus a field trip to a local winery. Prerequisite(s): CUL 222A.

UNDERGRADUATE/GRADUATE CATALOG

CUL 221 Purchasing and Cost Control4 QH

Examines the information and skills necessary to analyze and improve the profitability of a foodservice establishment. Topics include the flow of goods, income statements, forecasting sales, and controlling labor and food costs. Students will also analyze the complete purchasing cycle of a restaurant, beginning with product and vendor selection and ending with actual orders. Prerequisite(s): CUL 110, CUL 115.

à la carte restaurant serving the public. This class, which will be held in The Culinary Institute of Michigan's restaurant. The course will emphasize customer service, wine and spirits, restaurant trends and sales, merchandising, and sales. Students study and participate in the fundamentals of reservation and point-ofsale systems, controlling inventory, merchandising products and services, managing costs, assuring high-quality service to all customers, and managing service. Students will take the Federation of Dining Room Professionals(r) certification examination for Certified Dining Room Associate. Prerequisite(s): FBM 221.

Focuses on the three main areas of the cold kitchen: reception foods, plated appetizers, and buffet arrangements. Students learn to prepare hot and cold hors d'oeuvres, appetizers, forcemeats, pâtés, galantines, terrines, salads, and sausages. Curing, brining, and smoking techniques for meat, seafood, and poul-try items will be practiced, along with contemporary styles of presenting food and preparing of buffets. Students will also have hands-on experience in the fabrication and aging of fresh and cured products. Prerequisite(s): CUL 201.

throughout the Culinary Arts, Food and Beverage Management, and Baking and Pastry Programs. Students in the Culinary Arts, Food and Beverage Management, and Baking and Pastry programs will be required to complete a portfolio for graduation. Students will assemble and complete the program specific portfolio under the guidance of an Academic Advisor. The portfolio is designed to help students prepare and position themselves to enter the foodservice industry.

Prerequisite(s): CUL 131B.

DENTAL ASSISTING

Introduces students to the dental profession and the role of the dental assistant. Topics include the history of dentistry, dental equipment and instruments, infection control, team positioning, four-handed dentistry techniques and emergency dental management. 30 hours of lecture and 40 hours of lab are required. Prerequisite(s): Acceptance in the program.

DAS 102 Dental Assisting II5 QH Provides the foundation for dental charting, clinical examination, management of the medically compromised patient, assisting in restorative dentistry, management of pain and anxiety, and an introduction to clinical assisting through rotations in the Baker College dental hygiene clinic. 30 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in DAS 101.

DAS 111 Dental Anatomy/Histology and Embryology......4 QH

Provides a study of head and neck anatomy and tooth morphology with an introduction to the development and structural anatomy of the orofacial region. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): Acceptance in the program.

Provides an introduction to biomedical sciences as they relate to dentistry. Course content includes microbiology, pathology, and pharmacology. Prerequisite(s): C or better in DAS 111.

DAS 131 Dental Materials4 QH

Provides a study of the composition, chemical and physical properties, manipulation, and uses of dental materials. Laboratory experiences include the application and manipulation of various materials used in dentistry. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): C or better in DAS 101.

DAS 141 Dental Radiology......4 QH

Provides a study of radiation physics, hygiene, and safety theories. Emphasis on the fundamentals of oral radiographic techniques and interpretation of radiographs. Includes exposure of intra-oral radiographs, quality assurance, radiographic interpretation, patient selection criteria, and other ancillary radiographic techniques. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): C or better in DAS 111.

management, appointment control, receipt of payment for dental services, completion of third-party reimbursement forms, supply inventory maintenance, data entry for charges and payments, management recall systems, basic dental computer software, and operation of basic business equipment. Prerequisite(s): C or better in DAS 102.

DAS 161 Nutrition and Preventative Dentistry......2 QH

Provides a study of the prevention of the dental disease, oral hygiene instruction, fluoride, community dental health, and nutrition. Students will participate in a community preventive dental health project. Prerequisite(s): C or better in DAS 121.

DAS 201 Clinical Practice I......6 QH Provides dental assisting practice and experience in the workplace. Emphasis is placed on infection control, data collection, patient management techniques, communication, professionalism and ethics, and basic four-handed dental assisting procedures. A one hour weekly seminar for 10 weeks to integrate theory and laboratory for students to reflect on individual experiences, and 150 hours of clinical instruction is required for this course. Prerequisite(s): C or better in DAS 102.

place. Emphasis is placed on infection control, data collection, patient management techniques, communication, professionalism and ethics, dental radiography, four-handed dental assisting procedures, dental office management, and expanded functions in general dentistry and specialty practice offices. A one hour weekly seminar for 10 weeks to integrate theory and laboratory for students to reflect on individual experiences, and 180 hours of clinical instruction is required for this course. Prerequisite(s): C or better in DAS 201.

DAS 211A Registered Dental Assistant Functions 3 QH

Provides the knowledge and skills necessary to perform Registered Dental Assistant functions. Emphasis is on acid etch, sealant placement, provisional coverage, fluoride application, dental dam application, selective coronal polishing, fabrication of amalgam restorations and supragingival cement removal. 20 hours of lecture and 20 hours of lab are required. Prerequisite(s): C or better in DAS 102.

specialties are included: endodontics, oral and maxillofacial surgery, orthodon-tics, periodontics, pediatric dentistry, and prosthodontics. The course includes clinical skills related to each specialty. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in DAS 201.

course will explore the legal and ethical practice of dentistry, risk management and the study of the state Dental Practice Act. Content includes the exploration of interpersonal skills and factors related to job satisfaction. Prerequisite(s): C or better in DAS 201.

DAS 261 CDA/RDA Exam Preparatory4 QH

Prepares students to take the Dental Assisting National Board Exam and the State of Michigan Registered Dental Assistant Exam. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in DAS 211A.

DENTAL HYGIENE

DHY 111A Dental Hygiene I......6 QH

Introduces students to the dental hygiene clinical techniques of patient assessment and treatment. Students will develop skills in the taking of a medical/dental history, vital signs, and performing extraoral and intraoral examinations. Students will practice instrumentation techniques utilizing proper infection control procedures. All procedures are taught to clinical competence. 20 hours of lecture and 80 hours of clinical lab are required. Prerequisite(s): Acceptance in the program.

Provides students with the knowledge to perform clinical dental hygiene practices within the dental office setting in a safe and efficient manner, following all OSHA guidelines. Topics will include infection control, medical and dental emergencies, and basic dental office procedures.

Prerequisite(s): Acceptance in the program.

DHY 113A Dental Histology and Embryology3 QH Studies the developmental and structural microscopic anatomy of the orofacial region. The knowledge of how cells, tissues, and organs develop and function enhances the understanding of oral manifestations and the basis of their treatment. An introduction into tooth eruption patterns is presented.

Prerequisite(s): Acceptance in the program.

DHY 114 Oral Anatomy......4 QH

Provides a comprehensive study of the anatomy of the oral cavity. The function of various components of the orofacial area and how form, shape, and arrangement of the teeth aid in the prevention of dental disease are discussed. The laboratory portion of this course includes a comprehensive analysis of each individual tooth in the dentition. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program.

DHY 116 Head and Neck Anatomy I......2 QH

Provides a comprehensive study of the anatomy of the head and neck regions, including: skeletal, nervous, circulatory, lymphatic, and muscular systems and their relationship to dental hygiene clinical procedures. Prerequisite(s): B- or better in SCI 102C.

DHY 117 Head and Neck Anatomy II......1 QH

Provides a review of head and neck anatomy, specific anatomical landmarks important to the clinical dental hygienist, and an introduction to the application of this knowledge to the use of local anesthesia. Prerequisite(s): Dean's approval.

DHY 121 Clinical Dental Hygiene II......6 QH

Provides a continuation of performing patient assessment and treatment in the clinical setting. Additional topics such as patient communication, fluoride application, occlusal analyses, oral infection control, dental prostheses care, chemotherapeutics, and dental stain classification are introduced to enhance the student's ability to provide comprehensive dental hygiene services to patients. All procedures are taught to clinical competence. 20 hours of lecture and 80 hours of clinical lab are required. Prerequisite(s): Dean's approval.

Studies disease and the disease process. Emphasis will be placed on the detection and treatment of diseases of the oral region and the oral manifestations of systemic diseases. Case histories are presented in which the student's objective is to formulate a differential diagnosis of an unknown lesion and propose a rational approach for evaluation and treatment of the patient. Prerequisite(s): Dean's approval.

DHY 123 Dental Radiography4 QH Focuses on the theories and principles of the x-ray, its nature and properties, and recognition of the normal anatomical structures present in a properly exposed set of periapical and interproximal radiographs. Practice is provided in exposure, development, and mounting of dental radiographs using a variety of techniques. All technical skills are taught to a minimum of laboratory competence. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): Dean's approval.

DHY 131 Clinical Dental Hygiene III......6 QH

Provides a continuation of the study of performing patient assessment and treatment in the clinical setting. Emphasis will be placed on the recognition and treatment of the periodontally involved patient. Additional preventive and auxiliary procedures will be introduced, such as ultrasonic/sonic instrumentation, treatment of hypersensitive teeth, development of the maintenance appointment, and smoking cessation programs. All procedures are taught to clinical competence. 20 hours of lecture and 80 hours of clinical lab are required. Prerequisite(s): Dean's approval.

DHY 132 Periodontics I2 QH

Covers the diagnosis, treatment, and prevention of pathologic conditions affecting the periodontium. Prepares students to evaluate the patient's disease status and plan the appropriate treatment. Prerequisite(s): Dean's approval.

DHY 133 Dental Materials......4 QH Studies the composition and properties of materials used in the practice of dentistry. Emphasis is placed on the materials and procedures for which the dental hygienist is directly responsible. Students will practice proper care and manipulation of the materials in the laboratory. 30 hours of lecture and 20 hours of lab are required. All technical skills are taught to a minimum of laboratory competence.

Prerequisite(s): Dean's approval.

DHY 134 Dental Health Education2 QH

Exposes student dental health educators to many of the dental health care issues that affect society, the impact they have on dental health, and the educational techniques that can be employed to assist the individual on matters affecting health decisions. Further study will include human behavior, interpersonal relations and communication skills relating to patient education, motivation, and acceptance of health care.

Prerequisite(s): Dean's approval.

DHY 141 Clinical Dental Hygiene IV4 QH Continues patient assessment and treatment in the clinical setting emphasizing all previously taught clinical skills for patient care. All procedures are taught to clinical competency. 80 hours of clinical lab are required.

Prerequisite(s): Dean's approval.

DHY 201 Dental Pain and Anxiety Control4 QH

Provides students with the basic concepts of local anesthetics and pain control. The rationale for pain control, a review of specific anatomic landmarks, physiology, and pharmacology of anesthetic agents will be included. Through lecture and lab, detailed instruction in the use of local anesthesia and nitrous oxide, along with safety measures, will be provided. All procedures are taught to clinical competence. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): Dean's approval.

DHY 211A Clinical Dental Hygiene V8 QH

Continues the focus of performing patient care. Emphasis will be placed on treating the patient with special needs along with dietary assessment and planning for all age groups of patients. All procedures are taught to clinical competence. 20 hours of lecture and 120 hours of clinical are required. Prerequisite(s): Dean's approval.

DHY 212 Periodontics II2 QH Presents information on periodontal therapies relative to the hygienist's role as co-therapist in clinical practices. Further study includes the clinical and histological effects of periodontal procedures on oral tissues including surgical and non-surgical techniques used.

Prerequisite(s): Dean's approval.

Provides a general knowledge of the fundamentals and concepts of drugs com-monly used in dentistry and relates this information to the successful practice of clinical dental hygiene.

Prerequisite(s): Dean's approval.

DHY 221 Clinical Dental Hygiene VI8 QH Continues the study of clinical dental hygiene treatment designed to refine the technical skills learned from previous courses and provide a continuation of the study of the techniques and philosophies of handling patients with special needs. All procedures are taught to clinical competence. 20 hours of lecture and 120 hours of clinical are required.

Prerequisite(s): Dean's approval.

DHY 222 Community Dentistry4 QH

Surveys public health and community dentistry, comparing and contrasting the role of the dental hygienist in the community to that of private practice. An introduction is given to biostatistics with an emphasis on planning community programs. Prerequisite(s): Dean's approval.

DHY 223 Radiographic Interpretation1 QH Emphasizes the recognition of normal anatomical landmarks as well as pathological conditions commonly encountered in the practice of dental hygiene. This course is designed to complement DHY123 (Dental Radiography). Prerequisite(s): Dean's approval.

DHY 231 Clinical Dental Hygiene VII8 QH Continues the study of clinical dental hygiene treatment designed to increase the student's speed and ability. Discussions of current dental hygiene concepts are introduced. Clinical requirements include a case study of a patient with written documentation and a class presentation. All procedures are taught to clinical competence. 20 hours of lecture and 120 hours of clinical are required. Prerequisite(s): Dean's approval.

DHY 232 Dental Law and Ethics2 QH

Surveys the laws that govern the practice of dental hygiene. A discussion of ethical codes of conduct that guide the dental hygienist is provided. Prerequisite(s): Dean's approval.

fession. Examples of topics that may be discussed are new products in dentistry, procedures in specialty practices, and career development. A project and/or observation at a community agency/private practice will be required, along with journal article summaries.

Prerequisite(s): Dean's approval.

DIAGNOSTIC MEDICAL SONOGRAPHY

DMS 100A Introduction to Sonography4 QH

Introduces the role of a sonographer as a member of the health care team. Emphasis is placed on the professional, ethical, and attitudinal qualities of a sonographer. The history of sonography is presented as well as legal and ethical issues of the profession. This class will also introduce the basic role of ultrasound physics as well as an introduction to the ultrasound machine along with some basic scanning instruction.

Prerequisite(s): Acceptance in the program.

cols, basic machine operations, and patient preparation are presented. This course is designed to correlate with the students' beginning experiences in clinical training. Beginning level sonographic anatomy is presented. Prerequisite(s): Acceptance in the program.

DMS 210A Ultrasound of the Normal Abdomen and Pelvis4 QH

Presents advanced sonographic anatomy of the normal abdomen, retroperitoneum, and pelvis, including all soft tissue organs and major vascular structures. Normal variants in these areas are also covered. Students will be expected to achieve mastery level in all areas covered.

Prerequisite(s): B- or better in DMS 100A, B- or better in DMS 201.

DMS 211A Ultrasound of Abdominal Pathology......4 QH

Presents pathological conditions of the abdomen and retroperitoneum. Comparisons are made with normal sonographic appearances so students learn to recognize pathologies and abnormalities. All soft tissue organs and vascular structures in the abdomen and retroperitoneum are covered. Students will be expected to achieve mastery level in all areas covered. Prerequisite(s): B- or better in DMS 210A.

DMS 212A OB/GYN Ultrasound Normal and Pathology4 QH

Presents abnormal conditions of the female pelvis. Also emphasized at this time is the scanning of the pregnant uterus. In depth obstetrical scanning and protocols are presented. Comparisons are made with normal sonographic appearances so students learn to recognize pathologies and abnormalities. Students will be expected to achieve mastery level in all areas covered. Corequisite(s): DMS 211A.

DMS 213A Small Parts and Specialty Ultrasound......4 QH

Covers the normal and abnormal anatomy and sonographic appearance of the breast, prostate, and small parts. Included also is an introduction to vascular scanning and protocols. Comparisons are made with normal structures so students learn to recognize pathologies and abnormalities. Students will be expected to achieve mastery level in all areas covered. Prerequisite(s): B- or better in DMS 212A.

DMS 215A Principles of Ultrasound and Instrumentation I Presents the physics of ultrasound. Correlation will be made with machinery instrumentation as it relates to ultrasound and image acquisition. This course along with Principles of Ultrasound and Instrumentation II are preparatory courses for the physics portion of the national board exams administered by ARDMS. Students will be expected to achieve mastery level in all areas covered. Prerequisite(s): DMS 100A, DMS 201.

DMS 216A Principles of Ultrasound and Instrumentation II......4 QH

Builds on knowledge gained in Principles of Ultrasound and Instrumentation I. Students will continue to learn the concepts and physical laws that govern ultrasound. This course will prepare students to sit for the physics examination administered by the ARDMS. A mock registry examination will be included. Students will be expected to achieve mastery level in all areas covered. Prerequisite(s): B- or better in DMS 215A.

Introduces students to the hospital setting. Students will learn departmental protocols and expectations from the clinical supervisor. Actual patient scanning will begin at this time under the direct supervision of the clinical supervisor. Emphasis on functioning as a member of the health care team is stressed. Requires 360 clinical hours.

Prerequisite(s): B- or better in DMS 100A, B- or better in DMS 201, Student background check.

Continues having students scan and gain confidence under the supervision of the clinical supervisor. Emphasis is placed on structure identification. Recognizing pathological conditions is also stressed. Students continue to function as a member of a health care team. Requires 360 clinical hours. Prerequisite(s): B- or better in DMS 220.

Continues having students scan under the indirect supervision of the clinical supervisor. Competence to scan abdomens, retroperitoneums, and uteri should be attained without direct guidance. The level of independent scanning should be similar to that of an entry-level sonographer. Teamwork should characterize the clinical experience. Requires 360 clinical hours.

Prerequisite(s): B- or better in DMS 221.

DMS 223 Clinical IV6 QH Continues having students scanning independently under the guidance of the clinical supervisor during this portion of the clinical training. As an entry-level sonographer, students will be making independent decisions and functioning as a team member in the department. Scanning speed will be emphasized as well as competence in all areas of general ultrasound. Requires 360 clinical hours. Prerequisite(s): B- or better in DMS 222.

DMS 230A Ultrasound Review......4 QH

Reviews the major concepts presented in all previous courses. Students should use this course as a review for the upcoming registry examinations. A mock registry for the abdomen, obstetrics/gynecology and physics will be presented. Students will be expected to apply critical thinking skills and demonstrate mastery level in all areas of abdominal and OB/GYN ultrasound, as well as, the physics and instrumentation of ultrasound.

Prerequisite(s): B- or better in DMS 213A, B- or better in DMS 216A.

DIESEL

DSL 101 Diesel Engine Theory4 QH Deals with the theory of operation for the diesel engine. Fuel, compression, and other systems are discussed. Major components of each are examined as background to viewing the engine as a system. 30 hours of lecture and 20 hours of lab are required.

Corequisite(s): DSL 106.

and safety procedures required within the diesel courses as well as in diesel repair centers. Topics include safety, Material Safety Data Sheets (MSDS), starting and moving diesel tractors and the proper use of shop tools and equipment along with basic heavy equipment systems. 30 hours of lecture and 20 hours of lab are required.

DSL 141 Diesel Electrical/Electronic Systems I......5 QH Continues the coverage of electrical systems including lighting, electrical devices and accessories, and motor-driven electrical components. Computer controlled electronics is introduced including its use in security alarms, airbags, and sound systems. 15 hours of lecture and 70 hours of lab are required. Prerequisite(s): AST 111A.

Continues the coverage from previous courses focusing on advanced diagnostic techniques. Includes computerized testing and analysis of electrical/electronic systems. Advanced diagnostic techniques are utilized to analyze system problems. Also examines new technology including hybrid and fuel-cell systems, navigation systems, safety devices, and other vehicle features and options. 15 hours of lecture and 70 hours of lab are required. Prerequisite(s): AST 112B or DSL 141.

Topics include gas metal arc welding, shielded metal arc welding, plasma arc cutting, and flame cutting techniques. 10 hours of lecture and 60 hours of lab are required.

DSL 171 Diesel Engine Repair......5 QH

Complete cylinder head diagnosis and repair service will be covered. Covers the entire engine construction focusing on the cylinder head and the upper engine to include intake manifolds and exhaust manifolds. Cooling and lubrication systems, block, sleeves, and crankshafts will also be covered. 20 hours of lecture and 60 hours of lab are required.

Prerequisite(s): AST 111A, DSL 101.

DSL 181 Introduction to Diesel Maintenance and Repair......4 QH Introduces students to preventative maintenance of diesel equipment. Coverage

will include safety equipment, basic vehicle operation, instruments and controls along with hardware, inspections of the brakes, tires, wheels and suspension as well as steering systems. An introduction to Preventative Maintenance Plans (PMP) will be covered. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): AST 111A.

Focuses on the design and operation of the complete air brake system for a tractor and trailer. Diagnosis of system problems as well as the machining and rebuilding of various system components will be performed. Air compressors, air lines, and storage tanks as well as brake switches and trailer brakes will be covered. 20 hours of lecture and 85 hours of lab are required. Prerequisite(s): AST 111A.

Examines the suspension and drive systems for both single axle and dual axle tractors. Steering mechanisms and suspension components are discussed as well as diagnosis and repair of suspension and steering systems. Alignment techniques will be used to properly align a tractor. 20 hours of lecture and 80 hours of lab are required.

Prerequisite(s): DSL 106.

Focuses on heating and cooling of the truck cab (driver comfort) and preparation for the State License exam for Automotive Heating/Air Conditioning as well as EPA 609 certification. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 112B or DSL 141.

DSL 242 Heavy Duty Refrigeration/Air-Conditioning......4 QH Focuses on product refrigeration for freight industry as well as passenger com-

fort for the bussing industry. Prepares students for the EPA 608 certification. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): DSL 241.

DSL 251 Auxiliary Systems......4QH

Focuses on ADA and other systems used in the bussing industry. Topics and equipment covered include, but are not limited to, bus doors, ADA lifts, audio/video systems, passenger lighting, and comfort controls. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): AST 112B or DSL 141.

Focuses on manual transmission drive trains. Diagnosis, service and repair of manual transmissions, transfer boxes, clutches, and single and dual rear drive axles will be covered. 20 hours of lecture and 80 hours of lab are required. Prerequisite(s): AST 112B or DSL 141.

DSL 271 Diesel Engine Performance......5 QH

Focuses on an introduction to diesel engine fault diagnosis and adjustments and/or repair. Topics include computerized engine controls, fuel systems, turbo chargers and superchargers as well as the use of computerized diagnostic equipment. 20 hours of lecture and 60 hours of lab are required. Prerequisite(s): AST 112B or DSL 141, DSL 101, DSL 181.

Focuses on preventative maintenance of the engines, fuel system, air and exhaust system, and cooling system. Coverage will include safety equipment, instruments and controls along with hardware, inspections of the brakes, tires, wheels and suspension, and steering systems. Diagnosis and repair of problems related to any of the systems will be covered. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): DSL 181, DSL 221, DSL 231.

Focuses on maintenance, inspection, and repair of heavy equipment hydraulic systems. Topics and equipment include pumps, filtration, hoses and fittings, control valves, and actuators. 20 hours of lecture and 60 hours of lab are required.

Prerequisite(s): AST 112B or DSL 141, MTH 111.

DIGITAL VIDEO PRODUCTION

DVP 101 Digital Media Fundamentals......4 QH Introduces an overview of video production utilizing a digital camcorder and video editing equipment. Students study video technologies, basic equipment operation, edits composition, basic lighting and audio, storyboard creation, script writing, and production planning.

DVP 111 Script Writing and Storyboarding4 QH Introduces students to creating a video production from the concept stages. Presents a systematic/process approach to developing a video production through creating a script and producing storyboards for production use.

Prerequisite(s): ENG 091 or placement exam. DVP 121 Introduction to Audio Recording4 QH Introduces basic audio for practical use in video and media applications. Topics include digital sound characteristics, microphones, single and multi-track tech-

niques, and sound effects. Prerequisite(s): DVP 101, any of the INF courses.

Introduces shooting video on location within a controlled environment. Students practice various shooting techniques, audio and edit planning, following production shot lists, and shooting to scripted and storyboarded needs. Prerequisite(s): DVP 111, DVP 121.

DVP 151 Introduction to Digital Video Editing......4 QH Introduces students to the non-linear (digital) video editing process. Covers computer-based video editing technologies/software. Students practice on the fundamentals of organizing and creating streaming video footage for use with multi-media and/or Web applications. Prerequisite(s): DVP 121.

DVP 201 Motion Graphics4 QH Develops knowledge and skills to organize footage for use in creating professional on-screen motion graphics and special effects. Students will also work with character generated type to synchronize sound with on-screen graphic images. Students gain proficiency in the hands-on use of computer tools and software to integrate edited footage into a digital media production. Prerequisite(s): DVP 151.

DVP 252 Intermediate Digital Video Editing......4QH Provides students with the ability and working knowledge to create final edits for use in their digital video production by preparing digital footage through the use of digital video mark points. Combining sound and motion graphics are covered through the use of non-linear editing software as well. Prerequisite(s): DVP 151.

Creates basic on-screen graphics and effects. Students will utilize the video lab for final digital video production. Students will also work towards the completion of a final DVD product by implementing all edits, audio, and effects necessary for the final composite project for presentation. Prerequisite(s): DVP 131, DVP 151, DVP 201.

DVP 271 DVD Production Techniques......2 QH Uses authoring software in the production of final DVD media to allow students the opportunity to make digital copies for a portfolio and presentation. Students will also design and produce a resume as well as portfolio elements for the employment and/or internship interview process. Corequisite(s): DVP 261.

EARLY CHILDHOOD EDUCATION

Emphasizes introductory concepts of Early Childhood Education professions. Students participate in hands-on activities to develop an understanding of safe, healthy learning environments and parent involvement. Must complete with a C (73%) or better.

Prerequisite(s): DHS clearance, student background check.

ECE 111B Early Childhood Development4 QH

Focuses on social, physical, cognitive, communicative, and emotional development of children from birth through age 8. Practical application of theory occurs during group projects and presentations. Must complete with a C (73%) or better.

Prerequisite(s): ENG 098B or placement exam, DHS clearance, student background check.

ECE 131A Healthy Environments for Early Childhood......4 QH

Focuses on the creation of a safe and healthy learning environment to encourage play, exploration, and learning. Students learn how to use space, relationships, materials, and routines as resources for constructing an interesting, secure, and enjoyable ECE environment. Must complete with a C (73%) or better

Prerequisite(s): ECE 101B, DHS clearance, student background check.

encourage young children to express their creative natures. A hands-on approach is taken in order to demonstrate how creative expression may be incorporated into the early childhood classroom environment. Must complete with a C (73%) or better.

Prerequisite(s): DHS clearance, student background check.

ECE 151A Administration of Early Childhood Education Programs.......4 QH Focuses on the essential organization, planning, operations, and ongoing quality improvement of child care centers and preschool environments. Licensing, structure, and accreditation standards are reviewed. Must complete with a C (73%) or better.

Prerequisite(s): ECE 111B, DHS clearance, student background check.

ECE 165 Observation and Assessment Techniques for Early Childhood Education Programs4 QH

Studies the purposes for assessing children's behavior and the development of skills required for evaluating behavior. Emphasis will be placed on preparing reports for parents and institutions. Must complete with a C (73%) or better. Prerequisite(s): ECE 111B, DHS clearance, student background check. Corequisite(s): MTH 091 or placement exam.

ECE 171A Language Development and Language Arts4 QH Examines language development in children from birth through elementary school. Applies linguistic theory to language arts education, including its impact on oral and written communication, an overview of structural and transformational linguistics, and an exploration of the theory and techniques of listening, speaking, and writing effectively in the English language. Must complete with a C (73%) or better.

Prerequisite(s): ECE 111B or EDU 200, DHS clearance, student background check.

ECE 181 The School-Age Child4 QH

Provides professional development and specialized training in working with school-age children. This coursework includes curriculum planning, instructional strategies, and opportunities to collaborate with colleagues and the community. Must complete with a C (73%) or better.

Prerequisite(s): DHS clearance, student background check.

Offers students the necessary assistance to prepare for successful completion of the CDA criteria. Students will prepare all written criteria as outlined by the Council for Professional Recognition for the CDA credential. This course is designed to develop the CDA Resource File and prepare students for the Observational Assessment. Must complete with a C (73%) or better.

Prerequisite(s): ECE 101B, ECE 111B, DHS clearance, student background check. Corequisite(s): ECE 165.

ECE 201A Infant and Toddler Care2 QH

Provides an intense look at the special needs of infants and toddlers, and methods of designing and implementing appropriate programs. Must complete with a C (73%) or better.

Prerequisite(s): ECE 111B, DHS clearance, student background check.

ECE 211A Developing Anti-Bias Curriculum.......4 QH

Teaches cultural respect and disability awareness strategies to effectively manage gender and racial differences within the early childhood education classroom. Provides practical suggestions and training to develop anti-bias curricula. Must complete with a C (73%) or better.

Prerequisite(s): ECE 111B, DHS clearance, student background check.

ECE 221A Cognitive Activities for Young Children2 QH Instructs students to integrate math and science into the early childhood classroom. Science is incorporated into each learning center. Emphasis is placed on hands-on problem-solving skills. Must complete with a C (73%) or better. Prerequisite(s): ECE 111B, DHS clearance, student background check.

ECE 231 Guidance and Discipline......4 QH Focuses on applying age-appropriate guidance and discipline practices as well as a supportive environment in which children can begin to learn and practice appropriate and acceptable behaviors as individuals and as members of a group. Includes 20 hours of fieldwork. Must complete with a C (73%) or better. Prerequisite(s): ECE 111B, DHS clearance, student background check.

ECE 251 Developing Curriculum for Early Childhood......4 QH Studies how to design curricula and an environment to promote the growth in social and emotional, cognitive, and physical domains of the pre-school or early elementary child. Must complete with a C (73%) or better. Prerequisite(s): ECE 165, DHS clearance, student background check.

ECE 271B Early Childhood Education Practicum4 QH Provides students with first-hand experience in applying theories of child development and concepts of early childhood education practice in a practical setting. Includes 90 hours of observation and participation in a structured program for 3- to 5-year-olds. Must complete with a C (73%) or better.

Prerequisite(s): Dean's approval, DHS clearance, student background check. Corequisite(s): ECE 165.

Focuses on information and strategies that can be used by teachers to encourage parents to work in partnership with schools to promote the cognitive, affective, and physical development of their children. Must complete with a C (73%) or better

Prerequisite(s): DHS clearance, student background check.

ECE 301 Advocating for Young Children......4 QH Focuses on strategies for Early Childhood Education professionals to use community resources for the development of the rights of young children and their families. Addresses working with children suffering from abuse and neglect. Develops advocacy techniques on behalf of children promoting safe, healthy, and nutritional environments. Must complete with a C (73%) or better. Prerequisite(s): DHS clearance, student background check.

Explores contemporary early childhood educational practices and theoretical foundations of curriculum. Includes an introduction to Reggio Emilia and Maria Montessori's practices. Must complete with a C (73%) or better.

Prerequisite(s): ECE 251, DHS clearance, student background check.

ECE 361 Survey of Curriculum4 QH Evaluates the application of curriculum in 20 different early childhood programs and its effects on quality care for young children both on site and through research. The assessment tool will require knowledge of ECERS evaluations. The evaluations will be completed off campus. Must complete with a C (73%) or better.

Prerequisite(s): ECE 165, ECE 251, DHS clearance, student background check.

ECE 371 Early Childhood Education Practicum II4 QH Provides students with a direct fieldwork experience implementing curriculum content in a lead teacher role under a qualified teacher. Michigan curriculum standards will serve as the basis for instruction. Includes 120 hours of participation in a structured program for 3-5 year olds. Must complete with a \tilde{C} (73%) or better.

Prerequisite(s): ECE 271B, Dean's approval, DHS clearance, student background check. Corequisite(s): ECE 372.

ECE 372 Implementation of Curriculum in an Early Childhood Education Environment4 QH

Develops daily, weekly, and monthly lesson plans to be implemented within ECE371 Practicum II. Developmentally appropriate practices and Michigan curriculum standards will provide the framework for on-going assessment of the curriculum implementation. Must complete with a C (73%) or better. Prerequisite(s): DHS clearance, student background check. Corequisite(s): ECE

371

ECE 401 Advanced Infant/Toddler Care......4 QH Examines the importance of parent and caregiver relationships in developing

quality care for infants and toddlers. The essentials of infant and toddler care giving, developmental growth patterns, and direct observations will be emphasized. A 20-hour fieldwork observation will be required. Must complete with a C (73%) or better.

Prerequisite(s): ECE 201A, DHS clearance, student background check.

ECE 441 Music and Movement for Young Children......4 QH

Focuses on the physical development, music curriculum, and movement activities in an early childhood education environment. This course will require a hands on demonstration of skills. Must complete with a C (73%) or better. Prerequisite(s): ECE 141A, DHS clearance, student background check.

ECE 451 Early Childhood Education Practicum III4 QH

Provides a direct fieldwork experience in an administrative role implementing management techniques as an assistant director, director, curriculum developer, family advocate, or home visitor. Includes 120 hours of participation in a structured program for birth-five year olds. Must complete with a C (73%) or better. Prerequisite(s): ECE 151A, ECE 271B, Dean's approval, DHS clearance, student background check.

ECE 452 Administrative Operations in ECE......4 QH

Provides critical application of essential administrative duties as performed in an early childhood education environment. Knowledge of professional and ethical responsibilities will be evaluated. The duties shall include supervising, organizing, budgeting, accounting, and scheduling skills. Licensing standards and NAEYC accreditation will be emphasized. Must complete with a C (73%) or better.

Prerequisite(s): DHS clearance, student background check. Corequisite(s): ECE 451.

ECE 461 Early Assessment and Referral......4 QH

Focuses on the tools of assessment and methods of referral for young children with disabilities, with an emphasis on the goals and benefits of assessment. IFSP, IEP, early intervention and legal issues surrounding these topics will be featured. Must complete with a C (73%) or better.

Prerequisite(s): ECE 165, DHS clearance, student background check.

ECE 471 Early Literacy Intervention......4 QH

Provides essential background into speech, cultural, linguistic and language development of young children. An emphasis will be placed on the link between home and educational environment. Home-to-school activities will be developed. Must complete with a C (73%) or better.

Prerequisite(s): ECE 171A, DHS clearance, student background check.

ECE 481 Senior Practicum in Early Childhood Education11 QH Requires students to observe and teach in K-12 classroom settings for approximately 13 weeks during regular school hours, following the school district calendar and the supervising teacher's contractual agreement. Attendance at professional development conferences and seminars may be required. Prerequisite(s): Dean's approval, DHS clearance, student background check. Corequisite(s): EDU 491 or EDU 496.

ECE 486 Directed Teaching-Postbaccalaureate Early Childhood Education........5 QH Requires observation and teaching full-time in grades 1-3 for approximately five weeks. This course is only appropriate for certified teachers seeking to add the ZA (early childhood) endorsement to an existing teaching certificate. Prerequisite(s): Dean's approval, DHS clearance, student background check

Familiarizes students with the professional community of early childhood educators and with state and national curricula and assessment standards with a focus on early childhood education. Oral presentations and a final paper or project demonstrating subject matter and pedagogical knowledge are required. Licensing and regulation issues will be highlighted. This is the capstone course for students seeking the ZA teaching endorsement. Must complete with a C (73%) or better.

Prerequisite(s): Dean's approval, DHS clearance, student background check.

ECHOCARDIOGRAPHIC TECHNOLOGY

Provides an overview of EKG technology including the use of the EKG machine and patient hook-up. This course focuses on understanding and interpreting basic cardiac arrhythmias including sinus, atrial, junctional, and ventricular. An introduction to infarction and the 12-lead EKG is also covered. Corequisite(s): MED 103.

ECT 121A Introduction to Echocardiography QH

Focuses on an introduction to cardiac ultrasound, including m-mode, 2D and cardiac Doppler, basic machine controls, and image acquisition. These items will be discussed and demonstrated.

ECT 141 Cardiovascular Procedures2 QH

Focuses on various cardiovascular non-invasive and invasive testing, and the physical and interpretive skills required. Introduction to testing equipment and the situations in which testing is performed.

Prerequisite(s): Acceptance in the program, Student background check.

ECT 201 Fundamentals of Sonography4 QH

Provides an overview of the field of diagnostic cardiac sonography with a focus on basic cardiac diseases. Students will be introduced to basic sonographic techniques, including normal physiological processes and imaging planes, and an introduction to echo modes.

Prerequisite(s): Acceptance in the program. Corequisite(s): ECT 220A, ECT 202.

ECT 202 Cross-Sectional Sonography4 QH Presents information to students relative to both the normal body structure and the pathologic changes in the transverse and sagittal planes. This class will utilize textbook material, slides, scan planes, and various echo modes specific to the echocardiographic exam.

Prerequisite(s): Acceptance in the program. Corequisite(s): ECT 201, ECT 220A.

This course focuses on advanced cardiac ultrasound procedures, Doppler calculations, and provides an introduction to new technologies in the profession. Prerequisite(s): ECT 210A. Corequisite(s): ECT 212A, ECT 231B.

cardiovascular disease in this lecture course. The first pathology course will focus on valvular disease.

Prerequisite(s): B- or better in ECT 201, B- or better in ECT 202. Corequisite(s): ECT 211A, ECT 221B.

Provides an in-depth study of human physiology as it relates to cardiovascular disease in this lecture course. This second pathology course will focus on pericardial and ventricular disease.

Prerequisite(s): B- or better in ECT 201, B- or better in ECT 202. Corequisite(s): ECT 210A, ECT 221B.

Provides further understanding of normal and abnormal cardiac and circulatory physiology in more advanced disease states.

Prerequisite(s): B- or better in ECT 210A, B- or better in ECT 211A. Corequisite(s): ECT 231B.

Provides on site clinical observation in testing procedures covered in ECT105 and 141. Students will observe testing practices and obtain hands-on practice whenever possible. 120 clinical hours and 20 hours of lab are required. Prerequisite(s): Acceptance in the program. Corequisite(s): ECT 201, ECT 202.

ECT 221B ECT Clinical Affiliation #1......7 QH

Provides an opportunity for learning basic skills and the application of previous coursework within the cardiac echo setting. Requires students to observe and practice while under supervision. Additional class time is required for students to share clinical experiences and perform hands-on skills with other students. This is the second of three structured clinical rotations and the first echo rotation. 180 hours of clinical and 20 hours of lab are required.

Prerequisite(s): B- or better in ECT 201, B- or better in ECT 202, B- or better in ECT 220A. Corequisite(s): ECT 210A, ECT 211A.

ECT 231B ECT Clinical Affiliation #2......7 QH

Provides a continued opportunity to enhance basic skills and application of ongoing coursework within the cardiac echo setting. Requires students to observe and practice while under supervision. Additional class time is required for students to share clinical experiences and perform hands-on skills with other students. This is the third of three structured clinical rotations and the second echo rotation. This second echo rotation will focus on advanced skills and performing complete echo studies. 180 hours of clinical and 20 hours of lab are required.

Prerequisite(s): B- or better in ECT 210A, B- or better in ECT 211A, B- or better in ECT 221B. Corequisite(s): ECT 212A.

ECONOMICS

ECN 201 Principles of Macroeconomics......4 QH Includes an introduction to aggregate economics, the study of choosing the economic role of government, money and banking, national income analysis, employment, and inflation. Prerequisite(s): MTH 111.

ECN 202 Principles of Microeconomics4 QH Examines the basic tools of supply and demand, cost, revenue, and profits in the various product market structures. This course also covers input markets, market failures, externalities, and government intervention. Prerequisite(s): MTH 111.

Focuses on economic topics of international trade theories including advantages, costs, and barriers to free trade; capital mobility; balance of payments; and foreign exchange markets. Prerequisite(s): ECN 201.

Focuses on economic topics of international trade theories including advantages, costs, and barriers to free trade; capital mobility; balance of payments; and foreign exchange markets. This course is exclusive to the accelerated bachelor degree program. Hybrid delivery is required for this course. Prerequisite(s): MTH 312R, WRI 312R.

EDUCATION

Introduces students to the realities of the teaching profession, the structure and operation of schools, current educational issues and trends, and the foundations of education. Includes 20 hours of observation and participation in K-12 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): ENG 102, MTH 111, PSY 111, Dean's approval, student background check.

EDU 221 Supplemental Fieldwork......1 QH Provides observation and participation in K-12 classroom settings to students who transfer in credit for EDU200 but need the fieldwork component. Prerequisite(s): EDU 200 and student background check.

EDU 222 Supplemental Fieldwork A.....1 QH Provides observation and participation in K-12 classroom settings to students who transfer in credit for EDU312 but need the fieldwork component. Prerequisite(s): Student background check.

Prepares students to work as paraprofessionals in an educational setting. Includes 90 hours of observation and participation in K-12 classroom settings. Prerequisite(s): EDU 200, PSY 111 and student background check.

EDU 312 Educational Psychology6 QH Focuses on the learning process including the role of the teacher in learning; efficiency of learning as it is affected by the developmental processes; psychological principles that are central to the learning process and their relationship to the teaching situation; variables in learning; and evaluation of the outcomes of learning. Emphasizes application of learning theory and multicultural concepts in a field-based context. Includes 20 hours of observation and participation in K-12 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): EDU 200, PSY 111 and student background check.

EDU 321 Theory and Principles of Reading Instruction

Focuses on theory and process in developmentally-appropriate reading and writing instruction, including language and literacy acquisition, comprehension, word recognition, methods of instruction and assessment, program development, and planning for individual instructional needs. A grade of C or better must be attained to complete the Teacher Preparation Program. Prerequisite(s): EDU 312 and student background check.

Studies the physical, psychological, social, and educational factors related to exceptional individuals, including intellectually gifted and the handicapped. Emphasizes collaborative historical, legal, legislative, and futuristic aspects of educating the exceptional learner. Includes 20 hours of observation and participation in K-12 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): EDU 312 and student background check.

EDU 346 Instructional Media......4 QH Introduces selection, evaluation, and use of appropriate media, including microcomputers, as an integral part of the curriculum to achieve stated learning objectives. Provides hands-on experience in preparing and using audio visual materials and equipment for effective classroom presentations. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): EDU 200, INF 121, INF 131, INF 141A and student background check.

EDU 421 Reading in the Content Areas......4 QH

Studies the principles, techniques, and processes of literacy instruction needed to help students become independent, strategic learners in the content areas taught in the elementary school. Applies learning principles and practices to real-world teaching situations. Includes 20 hours of observation and participation in K-8 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): EDU 321 and student background check, acceptance in the program.

Introduces the theoretical foundation for literacy development and the methods and processes in developmentally-appropriate instruction. Emphasizes the principles, techniques, and processes of literacy instruction needed to help students become independent, strategic learners in the content areas taught in middle and high schools. Includes 20 hours of observation and participation in grade 6-12 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): EDU 312 and student background check, acceptance in the program.

This course focuses on appropriate elementary literacy assessments and how to use the results to differentiate instruction methods to meet the diverse needs of students in grades K-8. Applies learning principles and practices to real-world teaching situations. This course also has a field experience of 30 hours. As the focus of the field experience, the teacher will be required to administer and analyze a variety of assessments as well as plan lessons using various interventions with a group of students. The differentiated lessons will be prepared on the basis of the assessments in the areas of literacy outlined in the syllabus. Discussions about the reflections on the context of the group's needs and interventions, within the teachers' field experiences, will be an integral part of each classroom session. This course is only open to certified elementary teachers. Prerequisite(s): Dean's approval, student background check.

Focuses on the diagnosis and remediation of reading disabilities and differentiated instruction. Applies learning principles and practices to real-world teaching situations. Includes 30 hours of observation and participation with students in grades 6-12. This course is open only to certified secondary teachers. Prerequisite(s): Dean's approval, student background check.

EDU 441A Classroom Management......4 QH Focuses on the analysis of discipline, behavior modification, and group dynamics, and provides an opportunity for students to discuss various approaches to handling disruptive behavior with actual problem scenarios. Explores organization and management of instruction and state and local requirements and policies. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): EDU 312 and student background check, acceptance in the program.

EDU 445 Educational Foundations......4 QH

Studies education and schooling in American culture and society. Employs hypotheses and concepts drawn from a series of disciplines as a means of identifying and examining central characteristics of the American educational system. Focuses on the interpretation and appraisal of current educational practices and trends. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): Dean's approval, acceptance in the program, student background check.

EDU 451 Theory and Techniques of Instruction: Elementary (K-8)......6 QH

Introduces the theory of instruction, methods, and materials in the elementary school. Includes observations of classroom procedures, participation in simulation, and micro-teaching in elementary classrooms. Emphasizes the application of effective instructional theory and practice, sound decision-making, and multicultural education in a field-based context. Includes 30 hours of participation in K-8 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): Dean's approval, acceptance in the program, student background check.

EDU 461 Theory and Techniques of Instruction: Mathematics (6-12)......6 QH Introduces the theory of instruction, methods, and materials in the secondary

subject matter fields in which students expect to teach. Includes observations of classroom procedures, participation in simulation, and micro-teaching in mathematics. Emphasizes the application of effective instructional theory and practice, sound decision-making, and multicultural education in a field-based context. Includes 30 hours of participation in grade 6-12 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): Dean's approval, acceptance in the program, student background check.

Introduces the theory of instruction, methods, and materials in the secondary subject matter fields in which students expect to teach. Includes observations of classroom procedures, participation in simulation, and micro-teaching in English. Emphasizes the application of effective instructional theory and practice, sound decision-making, and multicultural education in a field-based context. Includes 30 hours of participation in grade 6-12 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): Dean's approval, acceptance in the program, student background check.

Introduces the theory of instruction, secondary methods, and materials in the subject matter fields in which students expect to teach. Includes observations of classroom procedures; participation in simulation and micro-teaching in social studies. Emphasis on the application of effective instructional theory and practice, sound decision making, and multicultural education in a field-based context. Includes 30 hours of participation in grade 6-12 classroom settings. A grade of C or better must be attained to complete the Teacher Preparation Program.

Prerequisite(s): Dean's approval, acceptance in the program, student background check.

EDU 471 Educational Work Experience10 QH

Consists of 300 hours of work experience in an education setting. This work experience could be at an early childhood center, a residential or private youth facility, a college or university, an intermediate school district, a textbook or other educational products company, or in a K-12 school as a paraprofessional or other staff member. Explores career options for people with degrees in education but without teaching certificates.

Prerequisite(s): Dean's approval, student background check.

EDU 481 Directed Teaching I11 QH

Requires students to observe and teach in K-12 classroom settings for approximately 13 weeks during regular school hours, following the school district calendar and the supervising teacher's contractual agreement. Attendance at professional development conferences and seminars may be required.

Prerequisite(s): Dean's approval, student background check. Corequisite(s): EDU 491.

EDU 482 Directed Teaching II11 QH

Continues from ECE481/EDU481. Requires students to observe and teach in K-12 classroom settings for approximately 13 weeks during regular school hours, following the school district calendar and the supervising teacher's contractual agreement. Attendance at professional development conferences and seminars may be required.

Prerequisite(s): ECE 481 or EDU 481, Dean's approval, student background check. Corequisite(s): EDU 492.

EDU 485 Directed Teaching-Level Change11 QH

Requires students to observe and teach in K-12 classroom settings for approximately 13 weeks during regular school hours, following the school district calendar and the supervising teacher's contractual agreement. Attendance at professional development conferences and seminars may be required. This course is open only to certified teachers who are in a level change program. Prerequisite(s): Dean's approval, student background check. Corequisite(s): EDU 495

teaching and reflect on professional practice. Emphasizes critical thinking, selfevaluation, and the use of a network of available resources.

Prerequisite(s): Dean's approval, student background check. Corequisite(s): ECE 481 or EDU 481.

Continues from EDU491. Provides student teachers with the opportunity to discuss current issues in teaching and reflect on professional practice. Emphasizes critical thinking, self-evaluation, and the use of a network of available resources. Prerequisite(s): EDU 491, Dean's approval, student background check. Corequisite(s): EDU 482.

EDU 495 Seminar: Directed Teaching-Level Change1 QH Provides student teachers with the opportunity to discuss current issues in teaching and reflect on professional practice. Emphasizes critical thinking, selfevaluation, and the use of a network of available resources. This course is open only to certified teachers who are in a level change program.

Prerequisite(s): Dean's approval, student background check. Corequisite(s): EDU 485

EDU 496 Seminar: Directed Teaching-Level Change-Early

Provides student teachers with the opportunity to discuss current issues in teaching and reflect on professional practice. Emphasizes critical thinking, selfevaluation, and the use of a network of available resources. This course is open only to certified secondary teachers who are in the Elementary Education and Early Childhood Education Level Change program.

Prerequisite(s): Dean's approval, student background check. Corequisite(s): ECE 481

EDU 499 Special Topics in Education......4 QH

Designed for current teachers and administrators who need college credit for continuing their certification.

Prerequisite(s): Dean's approval, student background check.

ELECTRICAL ENGINEERING

Surveys A.C. and D.C. circuits and includes current, voltage, resistance, inductance, capacitance, and impedance; nodal and mesh analysis; network theorems; equivalent circuits, and transient analysis. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): EET 111A, MTH 251, SCI 252.

ELECTRONIC AND ELECTRICAL TECHNOLOGY

EET 111A Electrical Technology4 QH Prepares students for further study of electricity and electronics and their

implementation. Introduces electrical nomenclature, electrical symbols, schematic diagrams, use of the multi-meter, and electrical control of equipment through relay logic and simple circuits. Students have the opportunity for handson exposure to the field as well as an overview of career paths related to the field.

Corequisite(s): MTH 099E or placement exam.

Covers SI units, atomic theory, properties of conductors, current, voltage, and resistance. Ohm's Law, Kirchoff's Laws, series, parallel, and series-parallel networks, analysis techniques: Thevenin, Norton, and Superposition Theorems. 40 hours of lecture and 40 hours of lab required.

Prerequisite(s): EET 111A. Corequisite(s): MTH 111.

Introduces CAD software for electronic system design and development. Topics include developing and producing schematics, documentation and prints, using software to convert schematics to board layouts, including flexible circuits, single, double and multi-layer boards. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): Any INF course. Corequisite(s): EET 111.

Examines capacitance, magnetism, inductance, alternating current, phasors, series, parallel, series-parallel A.C. circuits, and resonance. 40 hours of lecture and 40 hours of lab required.

Prerequisite(s): EET 115. Corequisite(s): MTH 112.

Covers the electrical control of machinery, the design and troubleshooting of control circuitry, and an introduction to robotics. Topics to be included are: control circuit components, timers, motor starters, motor control circuits, solid state control, and programmable control. Prerequisite(s): EET 111A.

discovering the functions of operational amplifiers. Corequisite(s): EET 135.

ductors used in electronic circuits. Topics to be studied include: semiconductor theory, p-n junctions, diodes, diode circuits, bipolar transistors, and transistor biasing circuits. 10 hours of lecture and 60 hours lab are required. Prerequisite(s): EET 125.

EET 136 Digital Circuits I......4 QH

Provides the first in a series of courses covering the operation of digital logic circuits. Topics to be covered include: number systems and codes, logic gates, Boolean algebra, DeMorgan's theorems, Karnaugh maps, combinational logic, circuit design, adders, comparators, encoders and decoders, multiplexers and demultiplexers, and parity generators. Prerequisite(s): EET 115, MTH 111.

include resonance, oscillators, operational amplifiers, basic transistors, AM and FM receivers, and antennas. Corequisite(s): EET 215.

Includes the study and application of transistor circuits. Topics covered include the following: Class A and B amplifier circuits, an audio amplifier, JFET amplifier, the SCR, and an introduction of operational amplifiers. Prerequisite(s): EET 135.

EET 216 Digital Circuits II......4 QH

Explores flip-flops and other multivibrators, counters and registers, memories, and interfacing. Prerequisite(s): EET 136.

EET 226 Microprocessor Fundamentals......4 QH Introduces the concepts of computer architecture, the operation of microprocessors, and hardware and software of the Intel 8085 processor. Prerequisite(s): EET 216.

EET 236 Microprocessor Applications4 QH

Examines applications and interfacing techniques, the use of the microprocessor as a controller in data communications, and comparison of capabilities of different processors.

Prerequisite(s): EET 226.

the principles, technology, design, implementation and control of manufacturing systems. Topics include: control systems, industrial robots, programmable controllers, basic pneumatic and hydraulic systems, team dynamics, flexible manufacturing systems, and troubleshooting and problem solving techniques involving these technologies. 20 hours of lecture and 40 hours of lab are required. Corequisite(s): EET 131, EET 215.

ELECTRONIC SYSTEMS TECHNOLOGY

Introduces students to the field of Electronic Systems Technology and career opportunities related to the field. The concept of a total systems integration approach is introduced. Provides an overview of low voltage systems, fire/intrusion alarm systems, telecommunication systems, fiber optics, wireless communication systems, and digital home technology systems, and the integration of these systems controlled by a central computer.

EST 111 Electronic Circuits and Components4 QH Provides students the fundamentals of all aspects of Electronics, from what a resistor and other components are, to the design, characterization, and fault-finding of active circuits. Both analog and digital circuitry is included. Students will learn circuit design through highly active Virtual Labs. Corequisite(s): EST 101.

niques, tools, and supportive hardware, raceways, and cabling is studied, along with the applicable standards and codes associated with low voltage systems. Job safety, job planning, and cost estimating are introduced. Students will gain experience through hands-on applications. Prerequisite(s): EST 101, EST 111, NET 101.

EST 131 Fiber Optic Systems......4 QH

Provides a comprehensive, in-depth study of fiber optic communication systems including system design, operating principles, characteristics, and the components that comprise fiber optic systems. Single and multi-mode cabling systems are covered in various configurations and environments. New and improved components and systems architectures are also covered. Topics include Raman amplifiers, time division multiplexing, and MEMs components. Hands-on experience is gained through labs. Prerequisite(s): EST 121

EST 211 Audio/Video Systems......4 QH This course covers audio/video systems that are installed in schools, hospitals, churches, corporate environments and home theater sound systems. Topics include sound reinforcement principles, system wiring, interfaces, equipment used, and psychoacoustics. Equipment coverage includes microphones, console automation, analog systems, digital systems, loudspeakers, and HDTV. Hands-on experience is gained through labs.

Prerequisite(s): EST 121.

EST 216 Video Surveillance Systems......4 QH This course covers the applications of various systems, how to design and install a system, and how to select the right hardware. Advancements in digital cameras and digital recorders, remote monitoring via the Internet is also covered. Intelligent distributed video surveillance systems, capable of handling numerous devices and adapting to the evolution of complex communication networks are explored by students. Various labs allow students to gain practical installation experience.

Prerequisite(s): EST 121. Corequisite(s): EST 211.

and troubleshoot modern security and alarm systems in residential, commercial, and industrial settings. Alarm system components and detector operation are detailed along with computerized control centers. Current provisions of the NFPA 72 installation code and the NEC code are discussed. Updated requirements for power supplies, survivability, and the spacing of detectors and notification appliances will also be discussed. Students configure a system during labs. Prerequisite(s): EST 121.

Provides students an industry overview of telecommunication systems. The fundamentals of POS and VoIP are covered along with circuit switched PBX's and public switched telephone network systems. Virtual Private Networks and other specialized network services are introduced. Students gain experience in system installation techniques using a type 110 punch down block, various installation tools, and connectors during labs.

Prerequisite(s): CIS 107A, ČSC 121A, EST 131. Corequisite(s): EST 236.

EST 236 Wireless Systems......4 QH Provides students with an overview of key wireless technologies and wireless system design fundamentals. Coverage includes path loss, small scale fading multipath, spatial-temporal channel modeling, and microcell indoor propagation. New wireless LAN technologies and 3G air interface standards are detailed, including W-CDMA, GPRS, UMTS, and EDGE.

Prerequisite(s): CIS 107A, CSC 121A, EST 131. Corequisite(s): EST 231.

EST 241 Electronic System Integration Strategies4 QH

Describes the important skills, knowledge and strategies necessary to master the integration of a computer centralized control system with other various electronic sub-systems. The electronic sub-systems include audio/video, telecommunications, wireless, low voltage, security and surveillance, HVAC, and building access. The applications cover commercial, industrial, and residential. Strategies of retrofitting older systems to a centralized computerized control are also discussed.

Prerequisite(s): EST 221, EST 231, EST 236.

Provides a comprehensive study to access control systems as small as a two card reader to a large scale multi-facility system. Topics include barcode readers through magnetic stride, proximity, biometric, and SMART card readers. Web based access control, digital video solutions along with software requirements are also covered. Students will learn about the rapidly expanding Radio Frequency Identification Systems (RFID) in detail. Labs cover access control systems technologies and RFID systems. Prerequisite(s): EST 236.

EMERGENCY MEDICAL SERVICES

EMS 101A Basic EMT I8 QH Provides an overview of the components of the Emergency Medical Services system including roles and responsibilities of the Basic EMT, airway management, patient assessment, and will address basic medical emergencies. 60 hours of lecture and 40 hours of lab are required. Prerequisite(s): Student background check.

EMS 102A Basic EMT II10 QH

Continues the study of the Basic EMT program in preparation for Basic EMT licensure. Topics include additional medical and behavioral assessment, trauma management, patient stabilization and transportation. This course will also focus on special populations and cultural considerations. 50 hours of lecture, 60 hours of lab and 60 hours of clinical are required.

Prerequisite(s): C or better in EMS 101A, C or better in SCI 100F.

EMS 201B Specialist EMT/Paramedic Training I12 QH

Includes specialized topics such as emergency vehicle operations and hazardous materials response. Introduces training in shock management, intravenous therapy, and advanced airway control techniques. This course reviews the specialist's role and responsibilities, addresses the field's medical and legal aspects, and instructs in EMS system operation at the Specialist and Advanced Life Support levels. Includes hands-on laboratory experiences and clinical work.

Prerequisite(s): C or better in EMS 102A or basic EMT license, Student background check.

EMS 202A Paramedic Training II12 QH

Introduces the concepts and terminology relative to cardiac arrhythmias and examines how to differentiate among them. This course presents electrical treatment modalities such as defibrillation and cardioversion for cardiac emergencies and includes extensive practical laboratory experience.

Prerequisite(s): C or better in EMS 201B or C or better in EMS 201C, Student background check.

EMS 203A Paramedic Training III12 QH

Introduces administration of certain medications; covers a variety of administration routes; addresses indication, contraindications, side effects, and dosages of emergency drugs. This course provides students with the opportunities to observe and assist in hospital emergency rooms and/or paramedic units while reinforcing assessment, intravenous therapy, and phlebotomy skills. This course also addresses EMS communications and telemetry.

Prerequisite(s): C or better in EMS 202A, Student background check.

EMS 204 Paramedic Training IV12 QH

Introduces the care of special patients including neonatal, pediatric, and geriatric populations. Includes extensive clinical experience in various hospital and non-hospital medical environments, and on Advanced Life Support ambulances. Begins to synthesize didactic and practical knowledge and develop paramedic critical thinking skills. Extensive skill performance evaluation is included. Prerequisite(s): C or better in EMS 203A, Student background check.

EMS 205 Paramedic Training V12 QH

Continues the development of critical thinking skills through scenario-based instruction. Introduces 12-lead electrocardiography and reinforces electrical therapy skills of defibrillation, cardioversion, and external pacing. Reviews emergency pharmacology and explores appropriate EMS system operations at the paramedic level. There is an emphasis on development of the paramedic as a professional. There will be a field internship of 250 hours. Prerequisite(s): C or better in EMS 204, Student background check.

EMERGENCY SERVICES MANAGEMENT

Focuses on legal, ethical, and bioethical aspects of emergency services. Included topics are licensure and certification, professional liability, quality assurance, and risk management.

Introduces students to a broad scope of strategic planning, marketing tactics, and operational decisions in emergency services management. This course also introduces students to an overview of basic accounting principles and finance in emergency services settings along with addressing considerations in budget preparation and management.

ESM 251 Emergency Services Management Seminar4 QH Discusses a variety of significant issues related to emergency services in today's dynamic, customer-driven environment. This course focuses on challenges of changes and management's response to change, the diversity of management methods, and managing strategies for the future. As a seminar, this course uses peer teaching and learning approaches, involves group learning experiences in a team environment, requires practical application of concepts and includes a capstone project. This course culminates the associate's degree in the emergency services management program.

Prerequisite(s): ESM 201, ESM 211.

ENGLISH

ENG 091 English Review4 QH Helps students develop fluency and confidence in their writing in preparation for the demands of college-level writing. Targeted instruction addresses concepts of thesis, development, support, citations, logical order, transitions, word level, sentence level, mechanics, and document design. Consistent class attendance is critical. Credit earned does not count toward any degree. Successful completion of this course requires passing a portfolio review. Students required to repeat a developmental education course will be placed on a learning contract.

ENG 098B College Reading4 QH

Improves critical reading skills and comprehension necessary for college level reading. Consistent class attendance is critical. Credit earned does not count toward any degree. Successful completion of this course requires passing a reading posttest. Students required to repeat a developmental education course will be placed on a learning contract.

ENG 101 Composition I......4 QH

Emphasizes academic writing by reading and thinking critically to strengthen essential communication skills through the use of the writing process. Prerequisite(s): ENG 091 or placement exam, ENG 098B or placement exam.

ENG 102 Composition II......4 QH

Continues developing students' critical thinking and writing skills through reading and argumentative writing. Emphasizes academic writing to articulate the relationships among language, knowledge, and power.

Prerequisite(s): C or better in ENG 101 or placement exam and approved writing sample.

ENG 211A Structures of English5 QH

Examines the structures of English by applying various theories of grammar including traditional, transformational, and structural grammars. This course also examines aspects of language such as syntax, morphology, phonology, etc. Analyzes language use in various social contexts and with various audiences with an emphasis on Standard American English. Prerequisite(s): ENG 102.

ENG 221 Critical Writing and Literary Analysis4 QH Studies and practices methods used to analyze the contents of a literary work; includes a review of major themes and schools of literary criticism. Prerequisite(s): ENG 102.

ENG 231 Language and Culture4 QH

Studies how and why people communicate the way they do. Habitual talking, listening, and writing behaviors of individuals and groups are examined as well as the influences of the history of the English language, home, community, and culture on the language structures and language uses of individuals. Culture, as it influences linguistic preference, is studied. Prerequisite(s): ENG 102.

position and in the course Workplace Communication. This course studies poetry forms and fiction writing techniques. It is not necessary that a student be an experienced creative writer, only that he or she be committed to the writing process.

Prerequisite(s): ENG 102.

ENG 321 Language Arts and Linguistic Foundations4 QH

Applies linguistic theory to language arts education. Includes an overview of structural and transformational linguistics and its impact on oral and written communication; techniques of handwriting; and an exploration of the theory and techniques of listening, speaking, and writing effectively in the English language.

Prerequisite(s): EDU 200, ENG 101.

ENG 411 Foundations of Mass Communications.......4 QH Studies theory of behavior in communications in general and the mass media

in particular. This course also covers the design and evaluation of public opinion studies and research topics in communications with an emphasis on the effects that the various media have on consumers. Prerequisite(s): ENG 102.

ENG 491 Senior Seminar: English4 QH

Familiarizes students with the professional community of English educators and with state and national curricula and assessment standards with a focus on strategies for teaching writing at the middle and high school levels. Oral presentations and a final paper or project demonstrating subject matter and pedagogical knowledge are required. This is the capstone course for elementary and secondary English majors.

Prerequisite(s): Senior status, Dean's approval.

ENG 492 Senior Seminar: Language Arts......4 QH Familiarizes students with the professional community of language arts educators and with state and national curricula and assessment standards with a focus on elementary language arts. Oral presentations and a final paper or project demonstrating subject matter and pedagogical knowledge are required. This is the capstone course for elementary language arts majors. Prerequisite(s): Senior status, Dean's approval.

ENGLISH AS A SECOND LANGUAGE

ESL 101 English as a Second Language: Speaking and Listening4 QH

Focuses on preparing students for mainstream studies by developing academic English language speaking and listening skills. Comprehension exercises focus on prediction, distinguishing between main ideas and supporting details, and notetaking skills. In addition, students are be given extensive guided practice to develop effective speaking and pronunciation skills. Correct advanced grammatical structure and sophisticated academic syntax are also emphasized.

ESL 102 English as a Second Language: Reading and Writing......4 QH Focuses on preparing students for mainstream studies by developing academic English reading and writing skills. Authentic reading selections and writing practice using American academic style are the cornerstones of the class. Correct advanced grammatical structure and sophisticated academic syntax are

ESL 103 English as a Second Language: Beginning English Grammar......4 QH Focuses on preparing ESL students for mainstream studies by explaining complex aspects of English grammar. Advanced sentence structure and grammatical systems of the language are the primary components of the class. Written and verbal application of instruction as well as error analysis are emphasized.

FINANCE

FIN 101 Personal Finance......4 QH

Provides a balanced exposure to development and understanding the various aspects involved in managing one's personal finance.

Prerequisite(s): ENG 091 or placement exam, MTH 091 or placement exam, ENG 098B or placement exam.

value of money, financial statement analyses, valuation of financial instruments, term structure of interest rates, and analyses of short- and long-term capital markets

Prerequisite(s): MTH 111, ACC 122.

Examines the all-encompassing nature of pure risk on the individual, business, and society; illustrating ways in which risk management plans can be implemented. Exposure to this content enables students to deal with various situations where there is uncertainty about the outcome and that the possibility exists for an unfavorable outcome.

Prerequisite(s): FIN 301A.

FIN 325 Banking and Financial Institutions......4 QH Focuses on the monetary system; introduction to the financial markets; and regional and national banking institutions including thrifts, savings and loans, credit unions, brokerage firms, insurance companies, investment companies, and money center banks.

Prerequisite(s): FIN 301A.

differences between personal and commercial credit. Students receive exposure to how lines of credit are determined as well as various methods individuals and businesses can use to procure funds.

Prerequisite(s): FIN 301A.

FIN 355 Financial Markets4 QH Examines the development of modern financial markets with emphasis on the factors that determine interest rates, pricing mechanisms for fixed-income securities, and private and public raising of financial capital. Prerequisite(s): FIN 301A.

purpose and the individual investments included within that portfolio to assess whether financial goals can/are being met. Students will work to specify realistic financial goals given available resources. Students will gain an awareness of the resources available and sources of income used to obtain the financial goals, as well as an understanding of the risk/reward ratio of each investment alternative.

Prerequisite(s): FIN 355.

FIN 451A International Financial Management4 QH Introduces students to investing in non-domestic securities or assets as another way to diversify a portfolio or holdings. Students will explore the various risks-political, exchange rates, foreign taxation, and different reporting methods--that are inherent in international investing. Since foreign investment returns are not correlated with U.S. returns, hedging and various market instabilities can offer unique opportunities for portfolio diversification and will be explored. Prerequisite(s): FIN 401.

FIN 461 Investment Management......4 QH Acquaints students with the various investment alternatives and examines the advantages and disadvantages of each. Students will be given the opportunity to assess and evaluate investment alternatives using various techniques including fundamental and technical analysis, risk/reward models, and diversification. Prerequisite(s): FIN 401.

FIN 471 Financial Statement Analysis4 QH Explores the use of fundamental financial analysis and valuation techniques when evaluating the balance sheet, income statement, and cash flows statement. The focus of this course is on financial data that can be analyzed to assist in investment, commercial lending, or other economic decisions.

Prerequisite(s): FIN 451A, FIN 461.

of analysis and assessment of financial markets, corporate financing, and personal financial planning. This is a capstone course for the Bachelor of Business Administration - Finance degree program. Prerequisite(s): FIN 471.

also emphasized.

FOOD AND BEVERAGE MANAGEMENT

FBM 221 Menu Planning and Analysis4 QH

Introduces students to all aspects of menu development. Students will develop menus start to finish; including, analyzing a business, creating a concept that is appropriate to a theme of a restaurant, and developing a menu appropriate to the theme. Students will utilize industry specific mathematics to cost out menus, and analyze existing menus. Students will learn to analyze a balanced menu based on food cost, labor cost, operating expenses, and extensive market research.

Prerequisite(s): CUL 131B, CUL 141.

FBM 241 Food and Beverage Management4 QH

Focus is given to the development of a food service operation plan and essential skills needed to manage a variety of food service operations. Emphasis is given on strong leadership skill development, developing front of the house and back of the house teams, staffing, labor cost, human resource management, and creating restaurant long term plans.

Prerequisite(s): FBM 221.

FBM 281 Restaurant Operations8 QH

Provides students with an introductory learning experience in the essentials of food and beverage front of the house management. Focus is given to: guest needs and customer service, cost controls, marketing, forecasting, and focuses on teamwork while analyzing various management styles. Students will attend class lectures and experience day to day management activities in a supervised food service environment. *Prerequisite(s): CUL 222A*.

Prerequisite(s): CUL 202A, FBM 281.

FBM 351A Banquet Meeting and Planning......4 QH

Provides analysis of banquet planning from initial customer contact to delivery of food and beverage. Focus is given on organizational communication, guest need assessment, cost control, facility layout, and learning ability to multi-task with awareness of all facets of foodservice operation functions. *Prerequisite(s): FBM 281, WRK 286.*

Provides a comprehensive analysis of food service human resource management. Facilitates the process of evaluating employees within a hospitality organization through development of appraisal systems, measurement tools, and roles of training and development. Focus is also given on hospitality employment laws, management and labor relations, and social issues within the work environment.

Prerequisite(s): FBM 281.

FBM 441 Hospitality Ownership and Entrepreneurship......4 QH

Presents growth and development of hospitality opportunities while focusing on present status and future trends of the food and lodging industry. Includes special problems of operating small and medium sized establishments. Introduces credit and account procedures, management of staff, marketing, advertising, and security, as well as; the personal attitudes, qualifications and ethics of own-ership.

Prerequisite(s): PSY 231, WRK 286.

FBM 451A Controlling and Analyzing Foodservice Operational Costs4 QH

Analyzes total food service operations management. Students will apply accounting principles to the analysis of financial data in food and beverage operations. Budgeting systems, restaurant profitability, and cost control measures will be covered with an eye toward implementing and building effective management and personnel cost control initiatives. *Prerequisite(s): ACC 121, CUL 221.*

GAME SOFTWARE DEVELOPMENT

Introduces students to storyboarding, game layout, and game design. Students will create scripts and storyboards for existing games and games of their own design.

Prerequisite(s): ENG 102.

Prerequisite(s): GSD 311.

GSD 401 3-D Character Design4 QH

Provides the basics of 3-D character design. Students will design and model characters using wire frame techniques, texturing, character rigging, and rendering. *Prerequisite(s): GSD 341.*

GSD 411 3-D Character Animation......4QH

Provides the basics of 3-D character animation. Students will design the associated movie clips for a 3-D character's range of motion, reviewing walking, facial, and animal motion.

Prerequisite(s): GSD 401.

GSD 421 Artificial Intelligence......4 QH

Introduces students to AI technologies for interacting with and playing against large-scale, networked games. Students will learn standard AI techniques including character following, knowledge representation and reasoning, search, learning, and planning.

Prerequisite(s): GSD 341.

games. Topics covered will include particle effects, working with the Karma Physics engine, Bot development and AI navigation, and creating scripted sequences.

Prerequisite(s): GSD 431.

Provides students with an opportunity to demonstrate mastery of game design. At the end of this course students will have designed and programmed a complete game that highlights acquired skills for prospective employers. *Prerequisite(s): GSD 432, Dean's approval.*

GEOGRAPHY

GEO 101B World Geography I......4 QH

Provides an overview of world regional geography, with special attention paid to the western world and the Americas. The concepts of regionalism, culture, and national environment are explored, along with the political and economic forces that shape people's lives.

GEO 102B World Geography II......4 QH Continues the overview of world regional geography. Given basic concepts of world population, landscape, and culture, how human-geographic forces shape the culture and history of areas such as Africa, the Middle East, and Southeast Asia is studied.

GRAPHIC COMMUNICATIONS

Explores two-dimensional space by recognizing and manipulating design elements in a logically consistent and formally coherent manner using simple means of point, line, plane, shape, mass, scale, composition, and color.

GRC 104 Introduction to Digital Design/Illustration4 QH Emphasizes integration of color design and other two-dimensional imagery with emphasis on development of rational design methodology and sign-symbol communication.

Prerequisite(s): GRC 101A, any INF class.

GRC 121 Introduction to Desktop Publishing4 QH Focuses on the basics of page layout using one of the most popular software programs in the field. Integrating the design elements of text, graphics, and white space into an attractive and well-constructed document will become faster and more accurate

Prerequisite(s): INF 112 or WPG 122.

Students will learn basic image adjustment and retouching as well as techniques for manipulating and combining images.

duced and applied to solve typographic design problems. Prerequisite(s): GRC 104.

Introduces more complex graphic software and equipment in a personal computer environment. This course examines design process methods and visual problem-solving skills to achieve effective graphic communication. Prerequisite(s): GRC 201B.

Continues to examine design process methods and visual problem-solving skills to achieve effective graphic communications. The use of complex graphic software applications and the integration of these programs to design solutions are

Emphasizes the independent application of advanced graphics software skills to solve graphic communication problems. Advanced technical skills in electronic image production for printing specifications are examined and applied. Prerequisite(s): GRC 212B.

GRC 241 Graphic Production Methods4 QH

Emphasizes the technology and processes used in the preparation of digital files to create electronic camera-ready art for commercial printing. Traditional photomechanical methods are also introduced. Prerequisite(s): GRC 201B.

GRC 251 Digital Media Business Practices4 QH

Provides and in depth study of the business of design and the essentials for conducting a successful design practice. Corequisite(s): DVP 252 or GRC 212B.

Rework designs created in earlier courses as well as freelance and intern projects to develop both a traditional and a digital portfolio. Also, students will design and write a resume to deliver a quality self-promotional package. Prerequisite(s): GRC 212B.

GRC 301B Intermediate Graphic Imaging4 QH

Emphasizes electronic imaging skills with continuous application of design process methods and visual problem-solving skills. Prerequisite(s): GRC 213B.

GRC 311B Advanced Graphic Imaging
Covers state-of-the-art methods of image production, conversion, and display.
Included in the concepts covered are elements of photography commercial
printing video and laser scanners
Prerequisite(s): GRC 301B

GRC 331 Integrated Design and Conceptual Media4 QH Emphasizes integration of proposals, project management, concept development and industry standard software packages for print and Web design to achieve the desired outcome in a project based environment.

Prerequisite(s): GRC 311B.

Introduces techniques and equipment used for audio and visual production. Multimedia presentation concepts and skills are emphasized. Prerequisite(s): GRC 311B.

Explores advanced techniques and equipment used for audio and visual production. Multimedia production concepts and skills are emphasized. Prerequisite(s): GRC 401.

GRC 411 Graphic Presentation4 QH Emphasizes the design and creation of graphic communication presentations utilizing advanced graphic production skills and techniques.

Prerequisite(s): GRC 401.

HEALTH INFORMATION TECHNOLOGY

Includes an in-depth study of the health information management profession, opportunities and career options in health information, health care in the hospital setting, health care reimbursement overview, and accreditation and certification applicable to health records.

records; storage and retrieval systems; numbering and filing systems; documentation requirements; forms and screens designs and content; use and structure of health care data and data sets; and how these components relate to primary and secondary record systems.

Prerequisite(s): C or better in HIT 100. Corequisite(s): HIT 103A.

HIT 103A Organization and Supervision......4 QH Introduces the principles of organization and supervision in order to develop effective skills in leadership, motivation, and team-building techniques. Corequisite(s): HIT 101A.

Includes an in-depth study of health statistics (sources, definitions, collection, reporting, presentation, and analysis of data). Special projects, policies, and procedures will be used to enhance the student's ability to use health care data. Prerequisite(s): C or better in HIT 101A.

HIT 211 Coding/Classification Systems I4 QH Emphasizes basic coding principles of ICD-9-CM and provides an introduction to the different types of nomenclatures and classification systems. Prerequisite(s): Č or better in HIT 101A, C or better in HSČ 206, C or better in MED 103, C or better in SCI 102C, C or better in SCI 211.

HIT 212 Coding/Classification Systems II4 QH Introduces advanced coding principles of ICD-9-CM. Projects include the hands on coding of actual medical records and computerized coding systems. Prerequisite(s): C or better in HIT 211. Corequisite(s): HIT 213.

HIT 213 Coding/Classification Systems III4 QH

Emphasizes basic coding principles of CPT/HCPCS. Prerequisite(s): C or better in HIT 211. Corequisite(s): HIT 212.

HIT 214A Coding/Classification Systems IV2 QH Expands coding principles of ICD-9-CM accomplished in Coding/Classification Systems I and II by simulating a coding professional practice experience. Coding skills are enhanced by use of advanced case scenarios, actual patient records, and computerized coding systems.

Prerequisite(s): C or better in HIT 212. Corequisite(s): HIT 235.

HIT 221B Clinical Quality Assessment and Performance Improvement4 QH

Introduces the principles of the quality assessment process and provides a framework for gaining skills in collecting and analyzing data. Students will be introduced to federal, state, and local requirements and accrediting agency requirements as they apply to performance improvement in health care. Students will participate in simulated quality assessment and data retrieval activities

Prerequisite(s): C or better in HIT 231A.

HIT 231A Legal and Ethical Issues4 QH

Includes an in-depth study of current legal and ethical issues applicable to health information.

Prerequisite(s): C or better in HIT 103A.

HIT 235 Reimbursement Methodologies and Information Management......4 QH

Studies the uses of coded data and health information in reimbursement and payment systems appropriate to all health care settings and managed care. Students will also become familiar with the concepts of computer technology related to health care, and the tools and techniques for collecting, storing, defining, and assessing the quality of health care data.

Prerequisite(s): C or better in HIT 212, C or better in HIT 213. Corequisite(s): HIT 214A.

HIT 243A Health Information Technology Professional Practice Experience4 QH

Provides students with a 160-hour, supervised, learning experience in a traditional and alternative health care facility under the supervision of experienced health information practitioners. Through this unpaid work experience, students will perform health information functions, procedures, and interact with professionals in the health care field.

Prerequisite(s): Minimum GPA 2.50, Student background check.

HIT 251 Tumor Registry......6QH

Provides students with a primary focus on the organizational and operational functions of a cancer registry. The medical management of the patient, the physiology of the disease processes, methodology used in evaluating extent of disease and assessing outcome through patient follow-up, and use of the ICD-9 classification system will be presented. The impact of data quality and availability in relation to utilization of the registry will be addressed.

Prerequisite(s): C or better in HIT 212, C or better in MED 103, C or better in SCI 102C.

Provides students with the National Cancer Registrar Association (NCRA) mandatory 160-hour, supervised, learning experience in a health care facility Tumor Registry department, under the direct supervision of a Certified Tumor Registrar.

Corequisite(s): HIT 251.

HIT 291 RHIT Review......2 QH

Provides a consistent, accurate, and organized review of all HIT content areas in preparation for the AHIMA National Certification Examination. Corequisite(s): HIT 214A.

HEALTH SCIENCE

HSC 100B Community First Aid1 QH

Provides adult, child, and infant CPR/AED and First Aid training according to American Heart Association standards. Students will obtain AHA First Aid-Heartsaver/AED certification. Current American Heart Association certification for both First Aid and Heartsaver CPR must be provided to fulfill the requirements of this course.

HSC 102 BLS Provider Training and First Aid......1 QH Provides adult, child, and infant CPR/AED and First Aid training according to the American Heart Association (AHA) standards. Will also include relief of obstructed airway in adult, child, and infant and the use of mouth/mask and bag/mask ventilation. Students will attain American Heart Association First Aid/Basic Life Support Provider Certification upon successful completion of this course

HSC 103 The Human Body-Holistic Perspective4 QH

Applies anatomy and physiology content to an analysis of health and illness sit-uations from a holistic perspective. Case studies will be used to study the whole person: mind, body, and spirit. Nutritional, allopathic and alternative healing modalities will be explored and applied to the case. Various information resources will be identified and utilized in this learning experience. Prerequisite(s): Nurse and Practical Nurse majors: B- or better in SCI 102C. All

other majors: C- or better in SCI 102C.

Introduces students to the fundamental aspects of the study of diseases. Emphasis will be on the definition, etiology, diagnosis, and treatment of specific diseases. This course will concentrate on clinical abstracting from the medical record.

Prerequisite(s): C or better in MED 103, C or better in SCI 102C or C or better in SCI 100F. No minimum grade requirement for Phlebotomy or Pharmacy Technician majors.

Exposes allied health students to basic concepts of patient care that will confront them in the medical setting. Theory and practice will include such areas as medical ethics, legal concepts, infection control, microbiology, history taking, vital signs, dealing with emergencies, and patient positioning and transfer methods. Emphasis on the total patient is presented with regards to the patient's physical, psychological, social, and spiritual needs. This course is comprised of 40 hours of lecture and 20 hours of lab. Prerequisite(s): B- or better in SCI 101C.

Acquaints students with a variety of perspectives about existing health care systems. A particular emphasis on the complexity of the American health care

system will be made. Comparisons with other health care delivery models and national trends will be discussed. Current events are incorporated throughout this course.

HSC 112 Clinical Documentation1 QH Introduces medical documentation for rehabilitation professionals. Offered early in the OTA and PTA programs. Prerequisite(s): Acceptance in the OTA or PTA program.

HSC 161 Legal Concepts to Medical Practice......2 QH Focuses on the legal, ethical, and bioethical aspects of medical practice. Included are licensure, professional liability, quality assurance, and risk management.

HSC 181 Acoustical Physics......4 QH

Presents the fundamental principles of acoustical physics. This course will cover acoustical properties, instrumentation, transducer types and characteristics, Doppler principles, and biological effects.

Prerequisite(s): Echocardiographic majors: MTH 112, B- or better in ECT 121A. Vascular majors: MTH 112, Corequisite(s): VAS 101A.

Provides a theoretical foundation for the fundamental principles and concepts of pharmacotherapeutics and classification of drugs. A grade of "C-" or better must be maintained to satisfactorily complete this course.

Prerequisite(s): Health Information majors: C or better in SCI 102C. All other majors: C- or better in SCI 102C.

HSC 207 Nursing Pharmacology4 QH Provides a theoretical foundation for the fundamental principles and concepts of pharmacotherapeutics with a focus on classification, usage, dosage, calculations, delivery methods, and nursing implications of medications.

Prerequisite(s): B- or better in SCI 102C. Corequisite(s): SCI 211.

HSC 211 Lifespan Development......2 QH Focuses on human development in the gross, fine, cognitive, and psychological domains from birth to death. Emphasis is placed on gross motor and psychological development.

Prerequisite(s): C or better in HSC 281.

Teaches students how the logic of science is applied to basic nutrition concerns, including food groups and recommended nutritional guidelines. Focuses on the neuroanatomy of the central and peripheral nervous systems as

it relates to normal motor control and sensory integration. The neurological foundations of therapeutic exercise principles are introduced. Prerequisite(s): Acceptance in the BRS, OTA, or PTA program.

Focuses on an advanced investigation of specific orthopedic, neurological,

rheumatological, and medical conditions. Prerequisite(s): C or better in SCI 211, acceptance in the BRS, OTA, or PTA program.

Addresses legal issues, restraints, and problems arising from organization and delivery of health care services. Topics to be included are: tort law; hospital, physician, nurse, and other health professionals liability; informed consent; medical records; legal reporting obligations; abortion; autopsy, donation and experimentation; sterilization and artificial insemination; euthanasia; patient rights and responsibilities; labor relation; insurance; trial procedures; and restraint of trade are topics which are included. Prerequisite(s): HSC 111, Junior status.

Researches and examines the steps to planning, implementation, and evaluation of health services. Includes the development of measurable objectives and the compilation and presentation of a report. Prerequisite(s): HSC 401, HSC 312, HSC 403.

Covers the basic principles of health care administration including planning,

organizing, staffing, directing, and controlling. The emphasis will be on administration of hospitals, organizational structure, trustee responsibility, medical staff relationships, third-party payors, and fiscal management. Prerequisite(s): HSC 111, Junior status.

Examines the current ethical issues in the health care system. Problems and conflicts posed by interpersonal, professional, and client relationships as well as business considerations will be discussed. Ethical issues explored may include right to live, right to die, transplants, informed consent, sterilization, abortion, and human experimentation. Prerequisite(s): Junior status.

Examines basic accounting principles and finance in health care settings. Considerations in budgetary preparation will be discussed.

Prerequisite(s): HSC 401, HSC 312.

Studies current health care issues such as managed care, health insurance, foreign health care systems, and the policies of health care. Individual or group projects will be a component of this course.

Prerequisite(s): HSC 401, HSC 312, HSC 403, HSC 402A. Corequisite(s): HSC 315.

HEATING, VENTILATION, AND AIR CONDITIONING

Focuses on various heating and cooling systems, components, and applications. Topics include heating and cooling requirements, heating fuels, the refrigeration cycle, electrical symbols and schematics, identification of component parts and uses, and the operation of HVAC equipment.

HVAC 112A HVAC Installation, Maintenance and Repair4 QH Expands on the knowledge students obtained in previous HVAC courses. Installation of heating and cooling systems, preventative maintenance, system inspections, and systematic troubleshooting of problems will be covered. Prerequisite(s): HVAC 123A. Corequisite(s): HVAC 116.

Covers the skills and techniques for the installation and operation of domestic and commercial heating systems. Topics include structural considerations, gas piping, gas pressure testing, chimneys, liners, venting, electrical and plumbing coordination, and general installation procedures with a focus on forced-air heating systems.

Prerequisite(s): HVAC 101, HVAC 151A.

HVAC 116 Heating II......4 QH Continues topics from HVAC115 and explores the theory and application of hydronic heating systems. Topics include boiler types and characteristics, copper piping, terminal devices, electrical and mechanical controls, and safety considerations.

Prerequisite(s): HVAC 115.

HVAC 121 EPA Recovery/Certification......2 QH

Covers the EPA regulations on recovery and recycling of all refrigerants. Topics also include refrigerant types and characteristics, leak testing, and repair. Corequisite(s): HVAC 123A.

Combines lecture and hands-on laboratory exercises. Students learn to diagnose and repair domestic and commercial refrigeration systems. Topics include lubricants, copper piping methods, compressor types, electrical and mechanical controls, an introduction to recovery, recycling and reclaiming of refrigerants, and safety considerations.

Prerequisite(s): HVAC 121.

HVAC 123A Air Conditioning and Heat Pumps4 QH

Covers the theory and application of heat pumps and air-conditioners in domestic and commercial heating and cooling systems. Topics include heat pump principles and controls, air conditioning and heating cycles, defrost cycles, reverse cycles, maintenance, troubleshooting, and performance. Prerequisite(s): HVAC 101, HVAC 151A.

HVAC 131 Mechanical Code......2 QH

Familiarizes students with the methods and techniques used in field inspection of mechanical systems. The Uniform Mechanical Code will be covered along with appropriate portions of the Building Officials and Code Administrators (BOCA) Code.

Prerequisite(s): HVAC 101.

HVAC 151A HVAC Electrical Systems and Applications I4 QH Provides the foundational knowledge and skills to understand and safely install, service, and troubleshoot HVAC/R electrical circuits and electronics. Topics include basic electrical theories, HVAC/R electricity and electronic symbols and schematics, proper meter usage, motors, controls, and other electrical/electronic devices. The sequence of operation and diagnostic troubleshooting, utilizing pictoral, schematic, and hands-on approaches are also stressed. Corequisite(s): MTH 091 or placement exam.

Continues coverage from HVAC151A. Topics include selecting, installing, and troubleshooting HVAC components and systems. Heating systems include oil, gas, electric, and heat pumps. Refrigeration systems include residential and commercial systems. Modern control systems and solid-state control circuits are also included. Diagnostic troubleshooting utilizing schematic diagrams and test equipment are emphasized in this course. Prerequisite(s): HVAC 151A.

HVAC 201 HVAC Control Systems4 QH

Focuses on the installation and operation of direct digital-control systems and other HVAC control system considerations. Prerequisite(s): HVAC 112A, HVAC 151A.

Focuses on design, layout and construction of flat duct, offsets, and fittings to move air for heating and cooling equipment. Focuses on Manual D (R) from the Air Conditioning Contractors of America (ACCA), the industry standard for this type of work.

Prerequisite(s): HVAC 112A.

HVAC 231 Heating and Cooling Analysis2 QH

Focuses on the calculations for heat loss and gain for residential construction as prescribed in Manual J (R) from the Air Conditioning Contractors of America (ACCA), the industry standard for this type of work. Topics include heat loss, heat gain, furnace and air conditioning sizing, and duct sizing. Prerequisite(s): HVAC 116, HVAC 123A, MTH 111.

HISTORY

HIS 201 United States History to 1865......4 QH

Encourages students to analyze significant events and accomplishments of early American men and women. This course considers how the nation evolved. It studies how the past has created a distinctive American character, which continues to have an impact on the nation and on the world.

HIS 202 United States History Since 18654 QH

Focuses on events since 1865. Students are encouraged to analyze how people and events have changed the United States as a nation and as a people. The significance of events and how the United States fits into a broader perspective are included.

HIS 211 History of Organized Labor in the U.S.4 QH Introduces students to the historical, social, and economic climates resulting in the formation of U.S. labor unions. These include labor bills, union organizations and leaders, the evolution of working conditions, and demographics of the workplace.

Studies significant people and events during Michigan's history, including the roles of the Native Americans, French, and British, becoming a territory and becoming a state, the Toledo War, the Erie Canal, the Civil War, the Underground Railroad, Michigan's economic growth, the Great Depression, the roles of labor and minorities, the state's natural resources, and the state constitution.

Explores the experiences of women and provides an overview of the present and historic influences on contemporary women in social, political, and economic roles.

Prerequisite(s): ENG 102.

Integrates the disciplines of geography, history, political science, and economics into an overview of the structure of the respective disciplines. Provides solid content background and resources for the elementary school teacher. Prerequisite(s): SOC 201, GEO 102B or POL 201A.

HIS 321 Ancient World4QH Investigates ancient times, including the Ancient Middle East, Ancient Greece, and the Roman Republic and Empire.

Investigates European politics, religion, and ideas from the Fall of Rome to the Napoleonic Wars, with emphasis on the barbarian kingdoms, the Reformation, religious and dynastic wars, scientific revolution, absolute monarchies, the Enlightenment, and the French Revolution.

Examines the development of modern Europe from the Age of Reaction through World War II. A major focus is on the ascendancy of Europe to its dominant stance on the world stage and the effects of European political, economic, and

societal impulses on other regions of the world.
HIS 411 Emerging Nations4 QH Introduces the patterns of political, social, religious, and economic development of emerging nations in Asia, Africa, and Latin America.

HIS 421 World History Since 1945......4 QH Examines the relationship of world powers with developing nations of the world from 1945 to the present. A major focus is on the development of global awareness and understanding of economic policies, political development, and social issues in the world.

HIS 491A Senior Seminar: History and Social Studies4 QH Examines historiography, the relationship of history to the other social studies content areas, historical methods of research and interpretation, representative period articles/books, and major events in American and world history. Serves as the capstone course for the undergraduate history/social studies program. Prerequisite(s): Senior status, Dean's approval.

HUMAN RESOURCE MANAGEMENT

HRM 215 Securing Human Resources......4 QH Studies the challenges of a comprehensive staffing model that identifies all the key components of staffing, external influences, and staffing system management. Major areas covered are the staffing model, external influences (economic, laws and regulations), staffing strategy and planning, job analysis, measurement, external and internal recruitment, selection, decision making, and the final match.

Prerequisite(s): MGT 212.

HRM 225 Developing Human Resources......4 QH

Examines the various aspects of training and development of employees in the workforce. Covered topics include: orientation, strategic training, needs assessments, new training technologies, employee career development, and career management.

HRM 291 Human Resource Seminar4 QH

Focuses on material studied in previous associate degree level courses at Baker College. Students will evaluate and analyze current topics in HR through case analysis and through the development of a policy manual/employee handbook. This is the capstone course in the human resource management associate's degree program.

Prerequisite(s): HRM 215, HRM 225, HRM 300, HRM 315.

HRM 300 Compensating Human Resources4 QH Examines a variety of compensation methods and their relationships to organizational strategies, pay structures, and employee performance. Topics include total compensation, design of pay levels, benefit options, compensating special groups, cost management, and administration.

Prerequisite(s): MGT 212.

HRM 315 Evaluating Human Resources......4 QH Provides a comprehensive analysis of how human resource management facilitates the process of evaluating employees within an organization through the development of appraisal systems, measurement tools, and the roles of training and development. This course will examine how the functions of human resources support an organization in the execution of its mission and vision and how to measure human resource effectiveness. Prerequisite(s): MGT 212.

HRM 401 Human Resources and Employment Law......4 QH Provides an introduction to employment law and labor law for a non-legal professional in human resource management and labor relations. An emphasis will be placed on employment, labor, and social issues in the work environment. Prerequisite(s): LAW 211.

HRM 401R Human Resources and Employment Law6 QH Provides an introduction to employment law and labor law for a non-legal professional in human resource management and labor relations. An emphasis will be placed on employment, labor, and social issues in the work environment. This course is exclusive to the Accelerated Bachelor of Business Leadership program.

Prerequisite(s): MTH 312R, WRI 312R.

HRM 435B International Human Resource Management......4 QH Examines how global human resource management is distinctive from domestic human resource management. Students will analyze the challenges that multinational corporations are confronted with which include cultural, political, social, and legal issues; the level of managerial skill and education; technological development in the host country. Issues such as expatriation versus local management, selecting and preparing for international assignments, cultural adaptation at the individual and system level, and the influence of globalization on future HRM practices are also examined.

Prerequisite(s): HRM 291.

HRM 491 Strategic Human Resource Management4 QH Focuses on the way strategies can be formed and enacted in organizations, and on the internal and external environmental contexts from which human resource strategies emerge. Students will be given the opportunity to enhance their analytical skills in organizational analysis and strategic thinking through case studies. Students will be provided with opportunities to synthesize managerial strategy issues with HRM processes, in a considered and reflective manner. This is the capstone course in the Human Resource Management program.

Prerequisite(s): HRM 435B. Corequisite(s): HRM 401.

HUMAN SERVICE

Serves as an overview of the historical developments in the field of human service and provides an introduction to the philosophical framework, the major theoretical models, and the interdisciplinary nature of human service. Students will explore human service occupations, professional organizations, community resources, and ethical and legal issues. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): student background check.

HUS 121 Family Dynamics4 QH Provides students with a healthy foundation of knowledge and skills for building strong relationships and families. This course emphasizes family strengths, the benefits that come from diversity, and the fact that families are systems of relationships. These systems interact within themselves and are also influenced by society at large. The concepts and ideas presented are directly applicable to students' lives as well as their future professional work. Must complete with a "C" (73%) or higher to qualify for an internship. Prerequisite(s): student background check.

Acquaints students with available human service resources including those that are governmentally based, private sector based, and community service affiliated. Particular emphasis will be placed on client definition, needs assessment, eligibility requirements, and the referral process. Must complete with a C (73%) or higher to qualify for an internship. Prerequisite(s): student background check.

HUS 141 Abuse and Neglect in the Family4 QH Explores the addictive and dependent personality, abusive and neglectful behaviors, evidence of signs and symptoms of abusive patterns, and appropriate reporting procedures. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 101A, student background check.

Assists students in developing and demonstrating the knowledge and skills required by the twelve core functions of addictions counselors in the case management process. The core functions, which will provide the framework for the course are: Screening, intake, orientation, assessment, treatment planning, counseling (individual, group, and significant others), case management, crisis intervention, client education, referral, report and record keeping, and consultation with other professionals in regard to client treatment/services. Must complete with a C (73%) or higher.

Prerequisite(s): MTH 091 or placement exam, student background check.

HUS 171 Ethical Issues in Addictions Counseling......2 QH Introduces students to the development and understanding of the Certified Addictions Counselor Code of Ethical Conduct, and how to apply the Code to analysis of incidents and dilemmas that occur in counseling situations. The principles of the Code of Ethical Conduct are: non-discrimination, responsibility, competence, legal and moral standards, public statements, publication credit, client welfare, confidentiality, client relationships, interprofessional relationships, remuneration, and societal obligations. Must complete with a C (73%) or higher.

Prerequisite(s): student background check.

Explores the types of substance abuse prevalent in communities, factors that lead to substance abuse and the impact on families, the workplace, and society in general. This course introduces students to current treatment programs and their various philosophies. Reimbursement methods will also be discussed. Must complete with a C (73%) or higher to qualify for an internship. Prerequisite(s): student background check.

HUS 211 Assessment, Recording, and Reporting4 QH

Teaches students how to conduct a client assessment, including interviewing and appropriate manual- and computer-based recording and reporting of client records in to an organized and comprehensive assessment report. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 131Å, PSY 241, student background check.

HUS 221 Case Management I......4 QH Emphasizes prevention and intervention strategies for less severe cases in human service. Students will learn parenting skills, listening skills, planning, assessment of community resources, referral procedures, general crisis intervention, and setting appropriate boundaries in his/her role as a case manager. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): Human Service and Gerontology majors: C or better in HUS 211, Corrections majors: COF 251, All majors: student background check. Corequisite(s): HUS 231.

HUS 231 Crisis Intervention......2 QH

Emphasizes the assessment of diverse crisis situations with emphasis on the use of short-term intervention and problem-solving techniques to help individuals and families de-escalate crisis situations and develop appropriate coping techniques. This course will address the A-B-C Model of Intervention, brief and short-term interventions, and multicultural issues in crisis intervention situations. Must complete with a C (73%) or higher to qualify for an internship. Prerequisite(s): C or better in HUS 141, student background check. Corequisite(s): HUS 221.

Consists of 125 clock hours of paid/unpaid, experience in a social service or mental health agency in the community under supervision of agency and Baker College staff. The students will also be required to complete 20 hours of lecture, in seminar format, to integrate learning in the field with classroom instruction. This course is the beginning internship required of all human service majors in both the associate's and bachelor's degree programs. The primary focus of this internship is the development and application of knowledge and skills in community resources.

Prerequisite(s): ENG 102, C or better in HUS 131A, minimum GPA 2.50, student background check, Dean's approval.

ing and communication skills, assessing family needs and strengths, eliciting relevant cultural information, formulation of family support plans and appropriate outcomes, problem-solving strategies, recordkeeping, making referrals, and resolving ethical dilemmas. The approach is a family-centered, solutionfocused model of integrated family services. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): Human Service and Gerontology majors: C or better in HUS 121, Corrections majors: COF 223, All majors: student background check.

HUS 301 Research Methods in Human Service4 QH Examines research and theory within the human service community. Topics such as grant writing, ethics in research, psychological/sociological research in society, research design and application, and using research results in a variety of human service communities will be addressed. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): Human Service and Gerontology majors: C or better in HUS 211, Corrections majors: COF 251, All majors: MTH 112, student background check.

HUS 306 Introduction to Gerontology......4 QH Provides an introduction to the field of human aging and the aging process. The course will explore various dimensions of the aging process from several perspectives, including, but not limited to, the aging individual, the social context of aging from cross-cultural perspective, and societal responses to an aging population. Topics covered will include the demographic, biological, psychological and sociological effects of aging as well as the role of the older adult in the family, community and institutions for the aged. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): student background check.

HUS 321 Human Service Administration I4 QH Introduces students to human service supervision and management at the firstline level. Students will attain an understanding of organizational management perspectives on staff motivation and administrative planning in human service agencies and organizations, including a review of professional and governmental agency standards. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): Human Service majors: C or better in HUS 101A, Corrections majors: COF 121, All majors: student background check.

Introduces students to a survey of child welfare services. Topics include family support, protecting abused and neglected children, foster care, delinquency, adoption, and family court process. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): Human Service majors: C or better in HUS 131A, C or better in HUS 141, Corrections majors: COF 127, COF 241, All majors: student background check.

Focuses on the relationship between students' past and present human service program courses and their WRK352 internship experiences. Topics will be generated by the students' internship experiences. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): Student background check. Corequisite(s): WRK 352.

Consists of 125 clock hours of paid/unpaid, experience in a social service or mental health agency in the community under the supervision of agency and Baker College staff. The students will also be required to complete 20 hours of lecture, in seminar format, to integrate learning in the field with classroom instruction. This course is the second internship required for all Human Service majors in the associate's degree and bachelor's degree programs. The primary focus of this internship is the development of case management plans to treat identified problems. Students will observe agency staff and assist in client assessment, reporting, and recording.

Prerequisite(s): C or better in HUS 271, minimum GPA 2.50, student background check, Dean's approval.

HUS 403 Mental Health Services......4 QH

Introduces students to the Community-Counseling Model for the delivery of mental health services. Topics include preventive education, outreach to vulnerable populations, client advocacy, facilitating specialized groups, and the provision of services within the client's community. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): PSY 411, student background check.

HUS 406 Care Management for Older Adults4 QH

Emphasizes theory and practice of care management. Content includes development of comprehensive care plans, monitoring of the client's progress toward achieving intervention goals, and discussion of ethical practice standards. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 221, C or better in HUS 306, student background check.

HUS 411 Institutional Treatment and Alternative Settings in Human Service ...4 QH

Provides a comprehensive examination of various placement and treatment environments from the most restrictive setting to independent living. This course considers diagnostic criteria and a variety of conditions under which institutional placement and other treatment alternatives are indicated relative to particular case situations and case monitoring of clients in these settings. Must complete with a C (73%) or higher to qualify for an internship. Prerequisite(s): C or better in HUS 221, student background check.

Emphasizes prevention and intervention strategies for more severe cases. Students will learn how to coordinate interventions for clients with multiple and complex problems, determine when to make referrals to social and legal agencies, facilitate the reintegration of families, intervene in crisis situations, and conduct evaluations for licensing of alternative home placements. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 221, student background check.

Examines the local structures, both public and private, which provide services for the elderly within the larger framework of national and state structures. Includes considerations in working with the adult population and appropriate advocacy education. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 131A, C or better in HUS 306, student background check.

HUS 417 Activity in Aging2 QH

Focuses on the analysis of concepts, theories and programming related to the role activity plays in successful aging. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 306, student background check.

HUS 421 Human Service Administration II4 QH

Introduces students to human service management and administration at the middle and upper management levels. This course also presents an evaluation and analysis of major components in human service delivery systems, including budgeting, program evaluation, employee relations, in-service training programs, and collaboration among agencies and organizations. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 321, student background check.

HUS 426 Hospice Care......4 QH Examines the physical, spiritual, legal, economic, cultural, and ethical issues associated with care at the end of life. Content includes working with the elderly and support strategies for families and friends. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 446, PSY 211, student background check.

HUS 431 The DSM System......4 QH

Introduces students to the multiaxial diagnostic system for the classification of mental disorders and explores the 17 major categories of mental disorders. Students will learn to differentiate various forms of psychopathology, evaluate alternative interventions, and develop proficiency in the language used by a variety of professionals to communicate about mental health and human service problems. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): PSY 311, student background check.

HUS 436 Public Policy and Aging......4 QH

Examines the policy process, focusing on issues such as retirement, pensions, health care, housing, social services, and intergenerational issues. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 416, C or better in HUS 446, student background check.

HUS 441 Home Visitation2 QH Introduces students to the history and philosophy of home visitation interviewing, establishing positive relationships and professional boundaries with clients, developing helping skills, and addressing the needs of high risk families. This course identifies and explores issues relevant to supporting a wide range of families through home visiting. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): Human Service majors: C or better in HUS 211, C or better in HUS 292A, Corrections majors: COF 251, HUS 292A, All majors: student background check.

HUS 446 Social Gerontology4 QH

Focuses on the sociological aspects of aging in American society including economics, health, and concepts and theories in the study of aging. Must complete with a C (73%) or higher to qualify for an internship.

Prerequisite(s): C or better in HUS 306, SOC 301, student background check.

Consists of 125 clock hours of paid/unpaid, experience in a social service or mental health agency in the community under the supervision of agency and Baker College staff. The students will also be required to complete 20 hours of lecture, in seminar format, to integrate learning in the field with classroom instruction. This is the third and final internship required for all Human Service bachelor degree students. The primary focus of this internship is the development of knowledge and skills in treatment planning and intervention. Students will observe and participate in the treatment planning process and assist in the implementation of interventions and preventions with process and outcome documentation.

Prerequisite(s): C or better in HUS 371, minimum GPA 2.50, student background check, Dean's approval.

HUMANITIES

HUM 101 Survey of Art and Architecture I (Antiquity to Renaissance)...........4 QH

Develops the student's appreciation and enjoyment of art. Time periods, geographical centers, stylistic characteristics of major art movements, and a knowledge of the artists from each movement from the prehistoric period through the Renaissance are studied.

Cultivates the student's appreciation and enjoyment of art. Time periods, geographical centers, stylistic characteristics of major art movements, and a knowledge of the artists from each movement from the Baroque period to the present are studied.

Studies elements of art with orientation to a variety of media and techniques. Emphasizes preparation of innovative, motivating art lessons appropriate to elementary grades.

HUM 355 Music for the Classroom Teacher2 QH Provides students with a basic knowledge of the melodic, rhythmic, and harmonic elements of music and the opportunity to read and play music using classroom instruments. Prerequisite(s): EDU 200.

HUM 401A Philosophy of Ethics4 QH

Examines the philosophical foundations for personal and professional ethics. Students identify and analyze ethical situations in modern society. Prerequisite(s): ENG 102.

INDUSTRIAL AND SYSTEMS ENGINEERING

Studies the relationship between product engineering and manufacturing engineering. Casting processes, bulk deformation processes, sheet metal processes, mechanics of material removal processes, non-traditional machining, plastics and powder metallurgy, fastening and joining methods, design for manufacturing, and the factory of the future are covered. Prerequisite(s): MTH 124.

ISE 321A Engineering Economy I......4 QH

Introduces the foundations of engineering economy. Students will develop an understanding and the ability to work problems that account for the time value of money, cash flow, and equivalence at different interest rates. The techniques are mastered from the basis of how an engineer in any discipline can take economic value into account in virtually any project environment. Eight factors commonly used in engineering economy computations are introduced and applied. One or more engineering alternatives are formulated to solve a problem or provide specified results. Different methods by which one or more alternatives can be evaluated economically using factors and formulas learned. Prerequisite(s): MTH 112 or MTH 131.

ISE 322 Engineering Economy II......4 QH Reviews the principles of Engineering Economy I to extend the use of economic evaluation tools in real-world situations. Replacement analysis is performed and applied to the evaluation tools to make the correct economic choice. Breakeven analysis is introduced and used to assist in the economic evaluation of process. The effects of inflation, depreciation, income taxes in all types of studies, and indirect costs are incorporated into the methods previously performed in Engineering Economy I. An expanded version of sensitivity analysis is developed, and students will formulate the approach to examine parameters that vary over a predictable range of values. The elements of risk and probability are considered using expected values, probabilistic analysis, and Monte Carlo - based computer simulation.

Prerequisite(s): ISE 321A.

ISE 331 Introduction to Industrial and Systems Engineering.......4 QH

Focuses on the principles of systems engineering for accomplishing organizational goals in manufacturing and service industries. This course includes capabilities, productivity measurement, work and methods study, process planning, and design for productivity enhancement. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): ISE 311.

ISE 335 Work Analysis and Design4QH

Teaches students to effectively utilize methods analysis tools and techniques in the design and improvement of manufacturing systems and to apply work measurement techniques in the appropriate situations. Prerequisite(s): ISE 331, MTH 401.

ISE 401 Industrial Cooperative Education4 QH

Allows bachelor's degree students in engineering or technology to be employed in their major field while attending college. Students will complete a minimum of 120-hours of work experience. Requires work assignments related to academic and career goals with progressively greater responsibilities. Includes a written report describing the work experience and its educational benefits. Prerequisite(s): Junior or senior status, minimum GPA 2.50.

ISE 411 Computer Integrated Manufacturing4 QH

Introduces students to the integration of computers in the manufacturing process. This course includes such concepts of Computer-Integrated Manufacturing (CIM) as: production planning, robotics, industrial automation, CAD/CAM, and design for CIM manufacturability. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): one level of 3-D modeling.

of organizational systems and is applied to problems that concern how to conduct and coordinate the operations or activities within an organization. The process begins by carefully observing and formulating the problem and then constructing a scientific (typically mathematical) model that attempts to abstract the essence of the real problem in the context of the entire system. Operations research solutions yield an optimal value of the system measure of desirability. Topics include: linear programming, network analysis, dynamic programming, probability theory, queuing theory, inventory theory, reliability, and decision analysis. Prerequisite(s): MTH 112.

Covers the techniques for achieving organizational goals in the design of manufacturing and service facilities. Includes plant location, building design, plant layout, and material handling. Prerequisite(s): ISE 335.

course recognizes the challenges associated with the flow of the production system and allows students to understand and apply principles and practices of lean manufacturing. The Toyota Production System is used as an example of a lean production system. Prerequisite(s): ISE 335.

ISE 491 Engineering Project Management......4 QH Emphasizes project management strategies for planning and assignment of work, estimating hours for project completion, tracking for progress and change in job requirements. This course includes critical path scheduling, resource allocation, and client/customer interface. Students may not receive credit for both ISE491 and ME491.

Prerequisite(s): Senior status, ISE 321A.

ISE 495 Industrial Management Seminar......4 QH

Provides a capstone class for the Bachelor of Industrial Management. Prerequisite(s): Dean's approval.

ISE 499 Senior Design Project4 QH Continues the topics in ISE491 (Engineering Project Management) and utilizes concepts from industrial and/or mechanical engineering courses to complete a design project and prepare an engineering report on the design. This is a capstone course where the students work in teams. Students may not receive credit for both ISE499 and ME499.

Prerequisite(s): Dean's approval, senior status, ISE 491.

INFORMATION SYSTEMS

INF 111 Information Systems Theory2 QH Introduces terminology, concepts, and principles related to information processing systems. Hardware, software, data, data storage, and the development of computer information systems are covered along with other related topics.

INF 112 Word Processing2 QH Introduces students to word processing software and applications. This will include demonstrating the ability to perform basic Windows operations commands and word processing commands, which include creating, saving, printing, formatting, editing, and retrieving documents.

Prerequisite(s): WPG 098 or high school typing/proficiency.

INF 113 Electronic Spreadsheets......2 QH

Introduces students to beginning electronic spreadsheet terminology, concepts, and applications. Students will gain the ability to enter/edit, save/retrieve files, format, and print spreadsheets and reports. Students are also introduced to basic formula development.

Prerequisite(s): WPG 098 or high school typing/proficiency.

INF 114A Introduction to Database Applications......2 QH Introduces beginning database terminology, concepts, and applications using a file management software program. Students will demonstrate an understanding of data hierarchy; the ability to design simple files, edit file content, print file content, and simple reports; and the ability to search and sort files and use pre-existing formulas.

Prerequisite(s): WPG 098 or high school typing/proficiency.

INF 121 Introduction to Windows......2 QH Provides students with hands-on experience in the basics of using the Windows XP environment. The areas of exploration will include the Start button, task bar, My Computer, Windows Explorer, WritePad, Settings, Customizing Displays, Paint, and the use of shortcuts.

INF 131 Internet and the World Wide Web......2 QH Covers the fundamentals of using the Internet. Topics include Internet terminology, connecting to the Internet, e-mail, netiquette, browsing and searching the World Wide Web, referencing material used in research papers, copyright considerations, downloading and installing software, and creating a Web page.

to develop computer-based presentations. Topics include creating slides, handouts, speaker's notes, and outlines as well as the use of PowerPoint Wizards and Templates.

INFORMATION TECHNOLOGY AND SECURITY

ITS 305 Security Policies and Auditing4 QH

Discusses the key structure elements and terms of written information protection policy and reviews some typical policy contents. Prepares students to develop the related standards, procedures, and guidelines for implementing the policy. Evaluates the tools needed to select, develop, and apply a security program that meets business goals.

Prerequisite(s): NET 102, WPG 098 or high school typing/proficiency.

ITS 315 Information Systems Threat Assessment4 QH

Prepares students to assess and then correct the vulnerabilities present within information systems. Details methods and tools used in attacks and discusses countermeasures. Discusses available security resources. Analyzes attack "types. " Specifically covers intrusion detection systems. Prerequisite(s): ITS 305.

ITS 321 Legal and Ethical Issues in Information Technology4 QH Explores legal and ethical issues faced in the information technology field. Students will learn about ethical issues within an organization as they relate to relationships internally as well as with customers, partners, and society. In addition, students will learn of current legal issues in information technology such as intellectual property, privacy rules, and legislative actions. Exploration of the impact of these issues on current and proposed technical strategies will help

prepare students to provide influence with regard to legal and ethical issues they will face in today's organizations.

Prerequisite(s): CSS 211 or ITS 301.

Prepares students to understand the inherent vulnerabilities of a variety of systems, including UNIX, Windows, and Novell, and proactively defend against attacks on these systems. Covers security of wireless, dial-up, phone, web, and VPN systems. Discusses countermeasures against exploitation of proxy and packet filtering firewall vulnerabilities. Corequisite(s): ITS 315.

tems requiring advanced planning. Once networks or systems are open to either the Internet or an internal user base, they are exposed to threats ranging from viruses to out right destruction. Therefore, designing these systems and networks with an understanding of their function and security needs before being exposed to these threats will provide information with its best defense. The objectives of this course are to create a framework to define the needed functions of the network or systems and ensure that secure methods are used to provide these tools. This course will focus on the use of tools to update these functions to continue to provide secure services. Finally, this course will also explore sites and services that can be used to discover new exploits and methods to secure them, and tools used by security professionals to audit the vulnerability of the network and systems. Prerequisite(s): CSS 211 or ITS 301.

ITS 341 Scripting for Network Administrators......4 QH

Introduces scripting language and its environment. Students will build scripts and utilities to automate system tasks and create powerful system management tools to handle the day-to-day tasks that drive a system administrator's life. The course covers batch scripting, secure scripting and string processing. Students will also learn how to automate the scripting of security related functions. Prerequisite(s): LUX 205, MCSE 261 or MNP 211.

Prepares students to understand web and Internet security from an administrator, developer, and end user's perspective. Covers topics regarding Web site security, including SSL encryption and web authentication. Examines risks that threaten a site and hardware and software tools available to protect against hacking, port scanning, and denial-of-service attacks. Prerequisite(s): ITS 325.

ITS 411 Information Security Risk Management4 QH

Focuses on how insecure systems or networks are at risk of being breached. No system or network will ever be 100% secure from either inside or outside attack. Information security managers must, therefore, manage the risk and balance usability with security. The objectives of this course are to identify and quantify information security risks and benefits and drawbacks of security technologies. This course will also explore the impact of corporate policy on information security and information security on business operations. Special focus will be placed on how corporate policies can be used to enhance technical solutions to provide highly secure networks and systems. Prerequisite(s): ITS 311.

Prepares students to protect private networks from external security threats

through the use of firewall systems. Discusses security holes in common Internet services and how to proactively defend against external attacks. Discusses the philosophies of firewall design, access lists, authentication, and general security policy. Covers a wide variety of firewall systems over multiple operating systems.

Prerequisite(s): ITS 305.

ITS 421 Tactical Perimeter Defense.......4 QH Examines the critical defensive technologies needed to secure network perimeters. Includes coverage of network security threats and goals, advanced TCP/IP concepts, router security, intrusive detection, firewall design and configuration, IPSec and virtual private network (VPN) design, and wireless network design and security. Material maps to the Security Certified Network Specialist certification (SCO-451).

Prerequisite(s): ITS 331.

ITS 425 Computer Forensics and Investigation.......4 QH Provides students with an overview of computer forensics, operating systems and how they function. Students are introduced to forensic tools along with concepts such as chain of custody and documentation of evidence/procedures. Students learn how to act as an expert witness if needed to appear at a trial. The outcomes of this course map to the International Association of Computer Investigative Specialists certification (LACIS). Prerequisite(s): ITS 305.

Prepares students to identify risks within businesses and how to minimize loss. Discusses cost/benefit analysis of disaster recovery planning. Identifies methods for minimizing the risk of a disaster and the response tasks to be performed during a disaster. Details the development of a disaster recovery plan (DRP). Prerequisite(s): ITS 305.

Integrates the knowledge and skills students have obtained in this program to plan, design, and research a network security environment that would mirror a real-world environment. This course will require a written research paper, an oral presentation, and the design of a network that utilizes the concepts learned within the core and specialization minors of their degree. This is a capstone research project.

Prerequisite(s): Dean's approval.

INTERIOR DESIGN

IND 100 Introduction to Interior Design.......4 QH Introduces personal skills and resources needed to become a professional interior designer. Students utilize visual and creative skills to develop functional designs for interior spaces. Study focuses on: basic elements and principles of

design, space planning, color theory, lighting, furniture arrangement, surface materials and portfolio building. Visual and oral presentation skills are introduced to prepare students professionally.

IND 102 Workroom Practices......4 QH Offers a basic study of materials and components used in interior design. Focuses on selection, specification, and calculation of surface materials, drapery, and cabinetry.

Provides an in-depth study of the business of interior design and the essentials for conducting a successful design practice.

Prerequisite(s): IND 102, IND 111A. IND 105C Textiles4 QH

Generates an understanding of the textile industry and of the products the textile industry produces. Students learn to analyze and identify natural and synthetic fibers, the methods of construction and finishing of fabric, and the properties of fabric for its intended end uses.

UNDERGRADUATE/GRADUATE CATALOG

IND 111A Space Planning L......4 QH Applies basic theory of proxemics and human behavior to the design of residen-tial facilities. Study includes advanced spatial planning of furniture and floor plan arrangements. Projects incorporate kitchen elevations and layout design, and allows students to research and specify materials.

Focuses on more advanced space planning, requiring higher level skills. This course will include a capstone design project that will require code compliance

and specifications. Prerequisite(s): IND 221.

Introduces basic drafting skills necessary to create construction drawings. This course is essential for a basic understanding of proper use and application of drafting equipment. Students apply proper lettering, linework, and dimensioning techniques to produce floor plans, isometric drawings, and perspective drawings.

dation to move to greater productivity with the software in subsequent CAD courses

Prerequisite(s): IND 111A, any of the INF courses.

IND 141 Electrical and Mechanical Factors......4 QH

Examines mechanical and electrical systems including HVAC, plumbing, electrical, fire protection, and vertical transportation. Interior designers need to coordinate the location of plumbing fixtures, air diffusers, sprinklers, and other visible mechanical elements with the overall design. Students will learn how to deal properly with the initial location or relocation of the mechanical fixtures and electrical devices.

Prerequisite(s): IND 121.

IND 201 History of Furnishing4 QH Gives interior design students a clear understanding of the architecture and fur-

niture styles from prehistoric to present days. IND 202 Rendering Techniques and Perspectives4 QH

Helps students develop an individual rendering style, to produce perspective drawings, and to visually illustrate ideas. Prerequisite(s): IND 111A.

IND 214 20-20 CAD......2 QH

Expands student's kitchen and bath design capability through the use of 20-20 design software.

Prerequisite(s): IND 111A.

IND 215 Interior Design CAD4 QH

Introduces students to the use of the computer in the creation of drawings in place of traditional drafting methods. Students will create and edit drawings using computer software for interior design. Prerequisite(s): IND 131, IND 221.

nical skills in residential building systems, codes, and construction. Students will also be exposed to methods of detailing and material usage. Prerequisite(s): IND 111A.

Applies design principles and presentation standards in the planning and designing of bathrooms. Following NKBA guidelines, students study proper application and construction techniques using electrical and plumbing fixtures. Cabinet selection and proper room layout applications will be covered. Projects include manual- and computer-generated drawings using 20-20 design software. Prerequisite(s): IND 214, IND 221.

IND 241 Studio Kitchen4 QH Applies design principles and presentation standards in the planning and designing of efficient kitchen layouts. Following NKBA guidelines, students obtain hands-on experience studying basic lighting, venting, plumbing, electrical, and construction techniques. Proper cabinet, appliance, and fixture selection and application will be covered. Projects include manual- and

Explores the various methods used in the design and presentation of portfolios. Students will be required to submit a portfolio. Prerequisite(s): Dean's approval.

Studies residential and commercial construction techniques and their applicable codes for accessibility, fire protection, and life safety. Prerequisite(s): ACT 102 or ACT 192A or IND 112A.

IND 321 Advanced Rendering Techniques and Perspectives4 QH Involves individual and team exploration with an emphasis on problem solving through varying types of rendering design typologies and sketching. This class helps students to develop individual rendering style, and reinforce skills in 3dimensional drawing techniques. Students would further develop their creative thinking by exploration of a variety of approaches and concepts with originality and elaboration.

Prerequisite(s): IND 112A, IND 202.

Explores the presentation of design solutions in 3-D form with emphasis on model making.

Prerequisite(s): IND 112A.

terminology, and calculation methods. Prerequisite(s): IND 112A.

IND 421 Historical Preservation......4 QH Applies the study of historical art and architecture to appropriate design periods. Topics include strategies for identifying local community restoration and preservation efforts and current restoration planning techniques and procedures. Posed with a restoration problem-solving scenario, students will prepare a project restoration plan.

Prerequisite(s): Dean's approval.

as restaurants or bistros and retail such as boutiques. Students would concentrate on project management including problem identification, identification of client and user needs and information gathering research and analysis and space planning. Students will be required to render by any medium, manual or computer-generated, that successfully communicates the design intent. This course would also teach students to express ideas clearly in oral presentations and critiques.

Prerequisite(s): IND 321, IND 112A, IND 401.

and office environments including the relationship between human behavior and the built environment. Students would concentrate on problem identification, client and user needs, and information gathering research and analysis for the corporate and office environments. This course would teach students space planning with systems furniture including the use of adjacencies, circulation, and the articulation and shaping of space. Prerequisite(s): IND 431.

IND 499 Senior Design Portfolio2 QH

Concentrates on existing portfolios by adding work completed during the bachelor program and enhancing work already included at the associate level. Students must have their portfolio reviewed and approved by a panel of professionals from the industry. Prerequisite(s): Dean's approval.

INTERPRETER TRAINING

ITP 101 The Deaf Community......2 QH Studies the variety of cultural experiences and perspectives among people who are deaf or hard of hearing. Topics include the relationship of language and community, audiological vs. cultural deafness, dynamics in families with persons who are deaf or hard of hearing, and the role of the interpreter.

ITP 111 American Sign Language I......4 QH Provides basic knowledge of American Sign Language (ASL) vocabulary, grammar, and syntax. Begins the exploration of Deaf culture and the language of that culture. Emphasis is on comprehension and production skills.

ITP 112 American Sign Language II......4 QH Continues the development of American Sign Language (ASL) skills for communicating with Deaf people who sign. Emphasis is on expansion of ASL vocabulary and continued development of expressive and receptive sign skills. Prerequisite(s): ITP 111.

ITP 113 American Sign Language III......4 QH Provides additional vocabulary and synthesis of grammatical elements of American Sign Language (ASL) through expressive and receptive use of conversational sign language. Prerequisite(s): ITP 112. ITP 121 Expressive Manual Communication......2 QH Focuses on integrating the grammatical components of American Sign Language (ASL) into an expressive means of communication. Promotes and creates an awareness of conversational behaviors used by the Deaf community, and provides practice of those behaviors in the classroom and other settings. Prerequisite(s): ITP 111 or ITP 131. ITP 131 Beginning Fingerspelling2 QH Provides practice in expressive and receptive fingerspelling skills with focus on manual alphabet and numbers. ITP 132 Advanced Fingerspelling2 QH Provides advanced instruction and practice in expressive and receptive fingerspelling skills. Prerequisite(s): ITP 131. ITP 141 Beginning Sign to Voice......4 QH Provides development of the student's receptive skills in conversational sign language. Concentration is on understanding manual communication systems used by Deaf persons. Prepared videotapes are used to facilitate advanced proficiency of sign to voice systems. Prerequisite(s): ITP 112, ITP 121. ITP 214 American Sign Language IV4 QH Improves understanding and facility of American Sign Language (ASL) with focus on interpreting paragraphs, larger informational chunks and short stories. Prerequisite(s): ITP 113. ITP 221 Introduction to the Interpreting Profession4 QH Introduces the roles, ethics and responsibilities of the interpreting profession. Explores needed skills of the interpreter in various settings, including educational, mental health, vocational rehabilitation, legal, religious, phone, television, medical, deaf, blind, and minimal language skills. Corequisite(s): ITP 271. ITP 231 Linguistic Principles......4 QH Explores the linguistic organization of American Sign Language (ASL). Includes basic linguistic perspectives, how American Sign Language is learned, and the relationship with the English language. Emphasizes topics in interpreting, such as linguistic variation and translation. ITP 242 Intermediate Sign to Voice4 QH Expands and advances the basic facility and fluency in receptive sign language and for voicing all levels of communication of Deaf persons. Focus is on interpreter inquiries, listening, attending, internal message formulation, vocabulary search, and monitoring output. Prerequisite(s): ITP 141.

Provides in-depth coverage of interpreting skills such as voice projection. breathing and relaxation, analysis of sign information, anticipation and prediction, closure, modality switching, correction, image search, and pacing. Prerequisite(s): ITP 242.

ITP 251 Beginning Interpreter/Transliterating......4 QH Expands upon previously learned concepts needed for interpreter qualification. Provides simulated testing situations using interactive videotapes of hearing and Deaf individuals requiring students to interpret/transliterate. Prerequisite(s): ITP 221. Corequisite(s): ITP 272.

ITP 261 Deaf Culture and History I4 QH Examines the life experiences of persons in the Deaf community, the history of the Deaf community in America, and the sociology of the Deaf and the hard of hearing.

Prerequisite(s): ITP 113.

Consists of supervised placement in various interpreting settings with directed observation and application of practical interpreting skills. A minimum of 120 hours of field experience will be completed in diverse settings throughout the Deaf community in Michigan.

Prerequisite(s): student background check. Corequisite(s): ITP 221.

ITP 272 Signing Internship II.......4 QH

Consists of supervised placement with directed observation and application of practical interpreting skills. A minimum of 120 hours field experience will be completed in diverse settings throughout the Deaf community in Michigan. Prerequisite(s): student background check. Corequisite(s): ITP 251.

ITP 281 Mock QA......4 QH Develops skills necessary for interpreter and transliterating evaluation through simulated testing using interactive videotapes of hearing and Deaf individuals.

LAW

Provides students with an introduction to the legal issues inherent in dynamic business environments. Topics covered include the legal system, including an examination of constitutional law; business torts; contracts; intellectual property; criminal law; and the ethical considerations for business decision-making.

LAW 312 Advanced Business Law4 QH Advances the business student's knowledge of the law as it relates to topics such as sales, negotiable instruments, creditors' rights, secured transactions, bankruptcy, employment and labor laws, federal securities acts, personal property, real property, environmental law, insurance, and business ethics. Prerequisite(s): LAW 211.

LEAN MANUFACTURING

LNM 311 Introduction to Lean......4 QH Examines the history of the Toyota Production System - more commonly known as Lean Manufacturing - and the impact it has had on manufacturing operations throughout the world. Case studies will be analyzed to gain additional insight into the success of these practices. The various tools such as: Takt time, Pitch Supermarkets, Line Balancing, 5 S, Total Productive Maintenance, Standardized Work, Heijunka - Level Loading and others will be explained and demonstrated in various simulations throughout the quarter. Prerequisite(s): MTH 091 or placement exam.

Focuses on applications of Lean methods that can be used to minimize all forms of waste and maximize value for the customer, including value stream mapping, Takt time, line balancing, standardized work, continuous flow, Kaizen, quick changeovers, and pull scheduling. Because the course design has a heavy practice orientation, as much as half of the class time is spent working through interactive practice exercises. The Lean methodology is presented with numerous case studies and examples drawn from service, healthcare, education, business process, and manufacturing applications. Prerequisite(s): LNM 311.

LNM 411 Six Sigma Basics-Green Belt......4 QH Covers the Six Sigma methodology to ensure customer satisfaction and ensure profitability. Six Sigma is a world class, fact based, system approach for both administrative and manufacturing operations. Students will follow the five phase D-M-A-I-C process in two unique case studies. This course will help prepare students to obtain Green Belt certification.

LNM 412 Advanced Six Sigma-Green Belt......4 QH Provides hands-on use of the DMAIC tools and expands the knowledge learned in the Six Sigma Green Belt Basic class. In order to stay competitive, organizations need to continuously improve their processes. Six Sigma Green Belts are often expected to be the leaders of a process improvement team. The Define-Measure-Analyze-Improve-Control methodology is presented with numerous case studies and examples drawn from service, healthcare, education, business process, and manufacturing applications. Prerequisite(s): LNM 411.

LNM 491 Preparation for Certified Six Sigma-Green Belt (CSSGB)......2 QH Reviews the required material and practice questions to help prepare students for ASQ's Certified Six Sigma Green Belt (CSSGB) certification based on the CSSGB Body of Knowledge (BoK). Prerequisite(s): LNM 312, LNM 412.

LINUX/UNIX

Provides an introduction to Linux/Unix, its history, characteristics, and system basics from a user's perspective. The following concepts are introduced: basic file structures; navigational tools; file manipulation tools; file permissions and access; 'vi' editor basics; remote terminal emulation; mail; shell fundamentals; quoting and special characters; filename generation; input/output redirection; pipelines; multitasking and input arguments. Students will demonstrate the ability to use Linux/Unix commands at the command-line level.

Prerequisite(s): WPG 098 or high school typing/proficiency. Corequisite(s): INF 111 or INF 131 or INF 121 or NET 101.

Introduction to Linux/Unix course. This course is designed for users who have mastered basic commands for the file manipulation and directory navigation. It examines the C, Bourne, and Korn shells with emphasis on one particular version. This course gives an in-depth look at the advanced utilities such as sort, grep, sed, and awk and provides an overview of the differences among the shells.

Prerequisite(s): LUX 205.

LUX 261 Linux/Unix System Administration I......4 QH

Introduces system administration for individual or local Linux/Unix systems. The topics will cover the essential duties of a Linux/Unix system administrator including: booting and shutting down systems, user administration, root system powers, file system creation and administration, devices and drivers, adding hardware, backing up/restoring file systems, system log files, and kernel modifications. Students will demonstrate the ability to utilize shell scripts to automate system administration and troubleshooting problems.

Prerequisite(s): LUX 211. Corequisite(s): NET 102.

LUX 262 Linux/Unix System Administration II......4 QH Continues the system administration tasks introduced in Linux/Unix System Administration I with a focus on networking and network applications. The skills developed include: TCP/IP routing, networking hardware, sub-networking, Domain Name Service (DNS), Network File System (NFS), Sharing System Files with Network Information Service (NIS), Point to Point Protocol (PPP), Serial Line Interface Protocol (SLIP), Electronic Mail, Network Management, and Security. The topics will enable students to network Linux/Unix systems and other TCP/IP systems into one networked environment. Prerequisite(s): LUX 261.

Introduces a variety of common applications and procedures implemented in Linux/Unix systems. The applications include: usenet news, printing and imaging, disk space management, performance analysis, daemon management, and policies and politics. This course will investigate adding applications to systems, X window environment for Linux and Unix systems and patching the OS and additional software. This course will stress securing services and protocols. Prerequisite(s): LUX 262.

Builds on the knowledge gained from the previous coursework to produce a project that demonstrates effective system design. This course will focus on design, implementation, and testing. Special attention will be placed on the necessary information to pass applicable certification and job testing knowledge. This is the capstone course for the Linux/Unix administration program. Prerequisite(s): LUX 262.

LITERATURE

Studies contemporary authors who may be classified as Modern or Post-Modern; figures include principal ethnic and minority writers. Prerequisite(s): ENG 102.

Studies classical and contemporary writing for children and dramatization of stories. Covers a selection of materials with reference to the interests, needs, and abilities of children. Prerequisite(s): ENG 102.

Surveys American literature of various genres from colonial times (1600) to World War I (1914). American literary movements and their historical contexts are revealed through works representing a full range of American ethnicities. Students learn to critically analyze many types of literature through class discussion, activities, and writing.

Prerequisite(s): ENG 102.

Surveys American literature of various genres from World War I (1914) to the present. American literary movements and their historical contexts are revealed through works representing a full range of American ethnicities. Students learn to critically analyze many types of literature through class discussion, activities, and writing.

Prerequisite(s): ENG 102.

tact relationships.

LIT 401A Survey of English Literature......4 QH Introduces selections from major English authors. Emphasis is on the writers' ideas, relationship to culture, and forms of expression. Prerequisite(s): ENG 102, ENG 221.

voung people: violence in society, search for identity, family life, friendship, historical fiction, poetry, short stories, adventure, and fantasy. Prerequisite(s): ENG 102.

all types of literature such as poetry, novels, and short stories. Prerequisite(s): ENG 102, ENG 221.

MANAGEMENT

Provides a basic understanding of many aspects of business through an overview of the changing business environment, the roles of small businesses, entrepreneurs, and the importance of customer relations, management, and marketing. Financial management, accounting, and banking will also be addressed.

MGT 114 Customer Service......4 QH Examines the elements of establishing superior service with a focus toward interdepartmental cooperation and treating vendors, suppliers, and distributors the same as external customers. Customer contact skills including listening, courtesy, conflict management, problem solving, decision making, ethics, follow-up, and communication are covered to enhance the image of the business with internal and external customers. Recommended as an introductory course for business majors or anyone having business to business customer con-

Explores the growth in electronic commerce and studies the challenges in adapting current business practices to this new market. Students develop skills in understanding a networked community for business functions and transactions.

MGT 211 Management and Supervision......4 QH Investigates the developmental role of the modern manager. Areas covered in the course are planning, decision-making, forecasting, goal-setting, motivation, communication, staffing, and utilizing problem-solving concepts through group simulation and case studies.

deal directly with departmental organization, employment procedures, methods of testing, occupational descriptions, job evaluation, merit rating, wage plans, wage and salary control, aids to employees, safety, health and recreation, and employer-employee relations are covered.

MGT 222 Management Seminar4 QH Discusses a variety of significant issues related to business and organizational leadership in today's dynamic, customer-driven, global economy. This course focuses on the challenges of change and management's response to change, the diversity of management methods, and managing strategies for the future. As a seminar, this course uses peer-teaching and learning approaches, involves group learning experiences in a team environment, requires practical application of concepts, and includes research and case studies. This course culminates the associate's degree management program. Prerequisite(s): MGT 211 or MGT 241.
MGT 231 Small Business Management......4 QH

Examines the role of small businesses in the economy with emphasis on marketing, human resources, management, and financing of the small business. The role of the entrepreneur in business will be examined.

MGT 241 Business Success Seminar......4 QH Affords students the opportunity to develop the personal and interpersonal skills necessary for success in business careers. Course topics include goal setting and goal achievement strategy, stress management, problem solving, personal financial management, time management, a brief study of business culture and the role of the individual in a business environment.

Prerequisite(s): Management majors: MGT 211, MGT 212. Marketing majors: MKT 201, MKT 202.

MGT 250 Conflict Management4 QH Teaches the fundamental concepts and theories of conflict resolution and negotiation as well as the application of these concepts and theories through exercises and case analysis.

MGT 301 Organizational Behavior......4 QH Introduces students to the evolution of key management concepts. Topics include foundations of organizational behavior, the individual in organizations, groups and interpersonal influence, organizational structure and process, and

leadership in organizations.

Prerequisite(s): MGT 222.

MGT 311 Organizational Change......4 QH Examines the effects of environmental change on organizations and organizational systems. Emphasis is placed on sustaining change by building organizational capability involving human resource and organizational practices and processes which have the potential to sustain the organization's ability to continually adapt in a dynamic environment. Topics include strategic interventions, approaches to systems, system analysis and design, implementation techniques, monitoring, complementary human assets, contextual relations and linkages. Specific examples are drawn from industry experience and models. Prerequisite(s): MGT 101 or MGT 212.

MGT 321 Management Information Systems......4 QH Explores the role of information systems in organizations. The course covers the major types of information systems and the impact that these systems have on organizations, including how information systems improve decision making and support the business strategy. Information system development and planning are covered, as well as information security and the challenges of future

technology changes. Prerequisite(s): INF 114A, Junior status.

Examines the expanding role of service organizations in the economy, with specific focus on service firm operations, management, customer relations, marketing, and organization. Prerequisite(s): MGT 222.

MGT 401 Labor Management Relations4 QH

Deals with the basic concepts of managing a unionized workforce. Topics include the history of labor union movements, the collective bargaining process, and labor law.

Prerequisite(s): MGT 301 or PSY 231.

MGT 405 Contemporary Management Strategies4 QH

Examines the evolution and development of various contemporary management approaches and their application. The goal is to portray a selection of individuals whose ideas have made a difference in the way we practice business management. Students will learn to synthesize the thoughts and apply the concepts of current management thinkers in order to be a more effective leader. Prerequisite(s): MGT 222.

MGT 414R Strategic Leadership6 QH

Introduces students to the value, purposes, and methods of effective strategic planning and implementation. It includes the investigation, design, development, implementation, assessment, and evaluation of the strategic planning process. This course includes the application of this process through the use of actual case studies. This course is exclusive to the Bachelor of Business Leadership program.

Prerequisite(s): ACC 351R, ECN 301R, HRM 401R, MGT 451R, PSY 231R.

MGT 422 Operations Management4 QH Introduces students to a broad scope and major strategic, tactical, and operational decisions of operations management, as well as important interactions with other functional areas. Emphasis is on a conceptual understanding of the operations function and includes the following topics: product/process selection and design, facility location and layout, capacity, material management, inventory planning and control, and quality management. Prerequisite(s): MTH 112.

MGT 431 Strategic Management4 QH Addresses the strategic function of an enterprise. By integrating functional courses into a balanced, overall view, this course focuses upon the interaction and interrelationships of an organization with its environment. This is the capstone course in the Bachelor of Business Administration in Management program.

Prerequisite(s): MGT 301 or MGT 311.

Examines factors that shape cultural diversity on a global basis. It develops the ability to analyze situations and develop appropriate management techniques to deal with a variety of business situations. It examines cultures and business practices among key global marketplaces. Prerequisite(s): MGT 301 or PSY 231.

Examines a variety of leadership and management styles and strategies. Teaches the definitions, personal traits, characteristics and behaviors of effective leaders and managers. Assists students in recognizing and developing their own leadership/management skills and potentials. This course is exclusive to the Bachelor of Business Leadership program.

Prerequisite(s): MTH 312R, WRI 312R.

MARKETING

MKT 111B Principles of Marketing......4 QH Examines the essentials of an introductory course that can be either a survey course or a prerequisite to more advanced marketing studies. Study includes product identification, positioning and pricing strategies, consumer need identification and making the connection between consumer needs and product advertising, basic distribution strategies, and some of the decision-making tools at the disposal of the marketing manager. This course is recommended as a first course for marketing majors.

Acquaints students with the basic principles of effective sales techniques. Topics include personal analysis, personality development, buying motives, product knowledge, company awareness, technology, relationship selling, sales presentations, sales resistance, and sales closings.

MKT 202 Advertising4 QH Introduces the principles and practices of advertising - the planning and research functions, the techniques and execution of advertising, the way the message is created, media decisions, and current issues facing the industry. Analyzes the effects of advertising on the consumer and examines the structure of the advertising messages and how they are adapted to specific audiences.

MKT 215 Applied Marketing4 QH

Provides a balanced exposure to marketing theory and practice with significant application of marketing principles via case studies and project work. Prerequisite(s): MKT 111B, MKT 201, MKT 202.

ing business. Focus will be on developing a total analysis package based on material studied in previous associate's degree level classes. This is a group activity similar to that of a marketing team in the world of consulting. Prerequisite(s): MKT 215.

MKT 312 Consumer Behavior4 QH Studies consumer functions such as decision-making, attitude formation and change, cognition, perception, and learning. The marketing concepts of prod-

uct positioning, segmentation, brand loyalty, shopping preference and diffusion of innovations are considered in context with the environmental, ethical, multicultural, and social influences on an increasingly diverse consumer base. Prerequisite(s): MKT 215 or MKT 291.

MKT 401 Marketing Research......4 QH Explores the notion that in order to satisfy a need and create customer satisfaction, a business must know about its customers. Students will examine a systematic and objective approach to marketing research focusing on gathering and analyzing information to make better marketing decisions. Research methods will focus on planning, problem solving, and controlling. Methodologies covered include correlation, experimentation, observation, survey, and case study research. Prerequisite(s): MKT 215 or MKT 291.

MKT 402 Advertising Management4 QH

Focuses on advancing the advertising campaign beyond MKT202 (Advertising) and managing the functions for getting the advertising proposal to an actual advertising initiative. This course addresses the functions of advertising agencies, media-services, agency-client relationships, integrating graphic design and marketing concepts, in-house and contractual advertising management issues, timetables, and production issues. Strategic applications, pulsing, and advertising personnel issues are also studied. This includes the study of advertising legal environments, copyrighting, types of consumer promotions and trends, and understanding specific media jargon including rate/cost calculations. Prerequisite(s): MKT 202.

MKT 421 Marketing Management4 QH

Analyzes the relationship of the marketing mix to the total business environment. Outside-of-class group work is required for this course. This is the capstone course of the marketing sequence, taught in seminar fashion. Prerequisite(s): MKT 312.

Focuses on the nature of competition and the importance of customer service. This course identifies how to access and serve target markets and support the organizational mission. This course is exclusive to the Bachelor of Business Leadership program.

Prerequisite(s): ACC 351R, ECN 301R, HRM 401R, MGT 451R, PSY 231R.

MATHEMATICS

Covers math concepts relating to whole numbers, fractions, decimals, ratios, percents, and the basic use of signed numbers, exponents, and order of operations. This course is designed as a review of basic mathematics concepts for those students whose experience and/or placement test scores indicate that a review is needed to improve chances for success in subsequent mathematics and mathematics-based courses. Consistent class attendance is critical. Credit earned does not count toward any degree. Successful completion of this course requires passing a comprehensive exit exam. Students required to repeat a developmental education course will be placed on a learning contract.

MTH 099E Pre-Algebra......4 QH Covers the basic elements of algebra. Included in the course are operations on whole numbers, fractions, integers, rational numbers, solving a linear equation and its applications, proportions, percents, and the rectangular coordinate system. Consistent class attendance is critical. Credit earned does not count toward any degree. Successful completion of this course requires passing a comprehensive exit exam. Students required to repeat a developmental education course will be placed on a learning contract.

Prerequisite(s): MTH 091 or placement exam.

MTH 101 Mathematics for Business4 QH

Presents the application of mathematical skills to business functions to provide students with the basics needed to compute problems in the areas of simple interest, ratios, percentages, compound interest, annuities, and present values. Prerequisite(s): MTH 099E or placement exam.

rational, and irrational numbers), linear graphing, variable expressions, linear equations, polynomial operations and factoring, systems of equations, and quadratic equations.

Prerequisite(s): MTH 099E or placement exam.

MTH 112 Intermediate Algebra4 QH

Continues the coverage of the basic elements of algebra. Included are rational functions, quadratic equations, radical expressions, complex numbers, exponential functions, and logarithmic functions.

Includes trigonometric functions, their properties, solution of right and oblique triangles, radian measure, graphs, trigonometric equations, and applications. Prerequisite(s): C or better in MTH 112.

Studies functions, their inverses, graphs, and properties. Specifically polynomial, rational, exponential, logarithmic, and trigonometric functions are explored. Students solve equations and real-world problems involving these functions. Graphing calculators are an integral part of this course. Prerequisite(s): MTH 124.

Includes topics such as functions, limits, continuity, differentiation, integration, logarithmic and exponential functions, inverse trigonometric functions, polar coordinates, parametric equations, conic sections, and sequences and series. Prerequisite(s): Education majors: MTH 140. Mechanical Technology, Industrial and Mechanical Engineering majors: B- or better in MTH 124.

MTH 142 Calculus II	4 QH
Continues the presentation of topics covered in Calculus I.	
Prerequisite(s): MTH 141.	

Continues the presentation of topics covered in Calculus I and II. Prerequisite(s): MTH 142.

Introduces the principles of key mathematical concepts in a problem-solving environment. Focuses on number sense and numeration, whole number operations, fractions and decimals, computational algorithms, patterns, relations, functions, and informal algebra. Includes a variety of materials, activities, and strategies for teaching elementary school mathematics. Prerequisite(s): MTH 111.

Introduces the principles of key mathematical concepts in a problem-solving environment. Focuses on mathematical logic, properties of two- and threedimensional figures, similarity and congruence, motion geometry, common and metric measurement, statistical methods to describe, analyze, and use data, and probability applied in everyday life. Includes a variety of materials, activities, and strategies for teaching elementary school mathematics. Prerequisite(s): MTH 111, MTH 211.

simple events; build probability models; use the addition law for mutually exclusive and not mutually exclusive events; use the multiplication law of probability; and find the conditional probability of a given event, including using trees, counting techniques, combinations, and permutations. Students determine the probability of a random variable taking on specific values, identify a binomial process, and find the associated probabilities. Prerequisite(s): MTH 112.

MTH 244 Calculus IV......4 QH Includes topics such as functions of several variables, partial differentiation,

multiple integration, and three space vectors. Prerequisite(s): MTH 143.

MTH 251 Introduction to Differential Equations......4 QH Includes the principles and methods for solving first, second, and higher order differential equations. Applications of differential equations are also covered. Prerequisite(s): MTH 244.

Introduces students to linear algebra including algebra of matrices, vectors in space, vector spaces and subspaces, eigenvalues, linear transformations, and the applications of matrix methods to find solutions to systems of linear equations

and linear programming problems. Prerequisite(s): MTH 143.

Emphasizes analytical and inferential skills needed for decision making, using basic descriptive and inferential statistical procedures. Focus is on research design and interpretation using technology. Students develop skills in applying statistical methods used in decision making. This course is designed to introduce students to primary research methodology. This course is exclusive to the Accelerated Bachelor Degree program.

Prerequisite(s): Acceptance in the program. Corequisite(s): BUS 301.

MTH 315 Algebraic Thinking and Proportional Reasoning.......5 QH Builds algebraic thinking through examination of patterns and relationships, logic, and functions as well as developing appropriate symbolic forms to represent and analyze mathematical situations and structures. Multiple representations of situations are used and the interrelationships of these representations are stressed. Attention is given to developing proportional reasoning by investigating number theory, ratio and proportion, and decimals and percents as extensions of the whole number system.

Prerequisite(s): MTH 112, MTH 211.

MTH 331 Geometry for Elementary Teachers4 QH

Introduces a variety of materials, activities, physical models, manipulatives, and dynamic software as learning tools. This course analyzes characteristics and properties of two and three dimensional geometric objects and their measurement using different representational systems; it also analyzes mathematical situations and uses visualization and spatial reasoning to solve problems both within and outside mathematics. Prerequisite(s): MTH 211.

MTH 340 Discrete Mathematics......4 QH

Focuses on the applications of discrete mathematics in computer science. This course includes set theory, propositional logic, relations, Boolean algebra, and minimization of equations. Prerequisite(s): MTH 124.

MTH 351 Modern Algebra4 QH

Explores the ideas, methods, applications, and questions of modern algebra. Students study the basic properties and theorems related to groups, rings, integral domains, and field; the familiar number systems serve as models for the abstract systems. This course provides experience in abstract reasoning, making and testing conjectures, and proving theorems. Prerequisite(s): MTH 142, MTH 340.

Methods covered include measures of central tendency, probability distributions, sampling, and regression analysis. Prerequisite(s): MTH 112.

Makes and investigates mathematical conjectures, develops and evaluates mathematical arguments and proofs, selects and uses various types of reasoning and methods of proof as appropriate ways to foster systematic thinking, conjecturing, and marshaling of evidence that are precursors to formal mathematical argumentation.

Prerequisite(s): MTH 140, MTH 315, MTH 340.

Uses electronic technologies to help elementary school students understand mathematics. Calculators, graphers, and computers are used in a laboratory setting to investigate patterns; test conjectures; explore and analyze data; connect numerical, symbolic, and graphical representations; visualize geometric concepts; and investigate and solve real-world problems. Prerequisite(s): MTH 211.

MTH 431 Foundations of College Geometry4 QH

Familiarizes students with Euclidean geometry, finite geometries, geometric transformations, non-Euclidean geometries, geometric proofs, and application of geometric concepts to real-world situations. Uses interactive software. Prerequisite(s): MTH 142.

Develops a working knowledge of logic and the standard methods of mathematical proof; uses set theory concepts and notations; develops the notion of relation, especially equivalencies relations; explores the basic properties of functions and operations of functions; and the properties of the real number system

Prerequisite(s): MTH 142, MTH 340.

MTH 491 Senior Seminar: Elementary Mathematics......4 QH Familiarizes students with the professional community of mathematics educators and with state and national curricula and assessment standards with a focus on elementary mathematics. This course explores the historical development of mathematics. Oral presentations and a final paper or project demonstrating subject matter and pedagogical knowledge are required. This is the capstone course for elementary mathematics majors.

Prerequisite(s): Senior status, Dean's approval.

MTH 492 Senior Seminar: Secondary Mathematics4 QH Familiarizes students with the professional community of mathematics educators and with state and national curricula and assessment standards with a focus on secondary mathematics. This course explores the historical development of mathematics. Oral presentations and a final paper or project demonstrating subject matter and pedagogical knowledge are required. This is the capstone course for secondary mathematics majors.

Prerequisite(s): Senior status, Dean's approval.

MECHANICAL ENGINEERING

ME 101 Engineering Graphics......4 QH

Surveys the use of drafting instruments and computers to generate the necessary geometry for design, analysis, and manufacturing. 30 hours of lecture and 20 hours of lab are required.

ME 105 Introduction to Engineering & Design.......4 QH

Surveys the profession of engineering through analysis and design problemsolving examples. This course also introduces students to engineering sketching.

Prerequisite(s): MTH 124.

ME 107 Introduction to 3-D Modeling......4 QH Introduces students to 3-D computer aided design modeling techniques using industry typical software. Builds on connection between 2-D drawings/sketches and 3-D solid modeling. Introduces concepts of projects, parts, libraries, catalogs, and other topics related to industry application of CAD programs.

ME 171 Computing for Engineers......4 QH Introduces students to programs useful for solving engineering problems. Covers the design and implementation of algorithms and topics in computer programming: arrays, files, functions, pointers, and structured data types. Prerequisite(s): INF 113. Corequisite(s): MTH 124.

Introduces the basic principles of mechanics with engineering applications. This course includes the concepts of vectors; moments and couples; equilibrium of rigid bodies; and free body diagrams.

Prerequisite(s): SCI 215 or SCI 251. Corequisite(s): MTH 142.

Introduces students to the mechanics of deformable solids. This course includes the concepts of stress and strain; ductile and brittle material behavior; and stress and strain constitutive laws. Axial, torsional, and bending deformations are considered. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): ME 201.

Introduces the principles of engineering materials. This course covers the correlation of the internal structure and service conditions with the mechanical, thermal, and electrical properties of metals, polymers, and ceramics. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): SCI 241.

ME 299 Design Project4 QH

Provides students with the opportunity to work in teams to solve an engineering design problem. Students will prepare designs, a report, and make a presentation of the solutions. This is a capstone course in the Mechanical Technology Associate's Degree program and should be taken during the last quarter in the program.

Prerequisite(s): Dean's approval.

Introduces students to the application of computer technology to the engineering design process. Explores new design methodologies and techniques used throughout the design process from a product's conceptual design and simulation through manufacturing. Using 3-D solid model software taught in a labbased class, students will learn the benefits of solid modeling as it relates to engineering design and the role it plays in the product development process. Prerequisite(s): ME 107.

ME 305 Introduction to FEA4 QH

Introduces students to finite element theory, problem formulation, and computer analysis. The concepts covered are isoparametric formulation, element stiffness and load matrices, global stiffness matrix, governing equations, boundary conditions, temperature effects, pre- and post-processing, scalar field, deformation and stress analysis, commercial FEA software, and application in 1-D-, 2-D, and 3-D-models.

Prerequisite(s): ME 211, MTH 261.

ME 306 Intermediate FEA4 QH

Continues the development of the finite element method including a deep dive into applications. Element types and modeling techniques will be explored, followed by analysis types and convergence. Modeling assumptions will be discussed in terms of their effect on solution development and accuracy. Prerequisite(s): ME 211, ME 305, MTH 261.

ME 311 Biomechanics and Biomaterials......4 QH

Introduces students to bioengineering related topics such as biomechanics, and biomaterials used in medical applications. Students will use the principles of kinematics and dynamics to analyze and interpret a variety of human body movements. Includes a survey of biomaterials including properties and specific medical applications.

Prerequisite(s): SCI 215 or SCI 251.

ME 321 Dynamics4 QH

Introduces students to the kinematics and kinetics of particles, systems of particles, and rigid bodies. This course includes energy and momentum principles. Prerequisite(s): ME 201, SCI 251.

of kinematics are studied and applied to machines to determine positions, displacements, velocities, and accelerations of their parts. Prerequisite(s): ME 321.

substance; work, heat, energy, enthalpy, and entropy; first and second laws of thermodynamics; and power and refrigeration systems. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): MTH 143, SCI 253.

ME 341A Fluid Mechanics I4 QH

Introduces students to the mechanics of fluids. This course includes fluid properties, kinematics, fluid statics, Bernoulli equation, control-volume and differential forms of the fundamental laws, dimensional analysis, similitude, and fluid/flow phenomena. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): ME 321, ME 331. Corequisite(s): MTH 251.

ME 342 Fluid Mechanics II4 QH

Continues the study of fluid mechanics. This course includes the differential forms of the fundamental laws, dimensional analysis, similitude, surface resistance, flow in conduits, flow measurement, turbomachinery, and an introduction to computational fluid mechanics. Prerequisite(s): ME 341A.

ME 350 Ergonomics for Engineers......4 QH

Studies the natural laws of work. This topic deals with the minimization of the hazards and maximization of the efficiency of the work system in which the human is a part. The scope of this system can be as simple as a carpenter and a hammer or as complicated as the control system of a nuclear power plant. Prerequisite(s): ME 105, ME 201.

ME 351 Mechanical Design I4 QH

Introduces students to machine design including materials and process considerations. Topics include load determination; stress, strain, and deflection; static, fatigue, and surface failure theories. A design project is required. Prerequisite(s): ME 211, ME 321, ME 281 or CAD 141.

couplings; bearings and lubrication; spur, helical, bevel, and worm gears; springs; screws and fasteners; clutches and brakes. This is a capstone course and a design project is required. Prerequisite(s): ME 351.

ME 361 Dynamic Systems and Control......4 QH

Introduces mathematical modeling of mechanical, fluid, and electrical systems in graphical and state equation form. This course includes time and frequency response of linear systems and linear feedback control. Prerequisite(s): EE 311, ME 321, MTH 251.

ME 371 Heat Transfer4 QH

Covers the mechanisms of heat transfer including conduction, convection, and radiation. This course also includes the design, analysis, and selection of heat exchangers. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): ME 341A, MTH 251.

ME 421 Vibrations4 QH

Focuses on oscillatory motion including free vibration, harmonically excited vibration, transient vibration, two degree of freedom systems, properties of vibrating systems, and normal mode vibration of continuous systems. Prerequisite(s): ME 321, MTH 251.

ME 425 Noise, Vibration, and Harshness......4 QH

Explores the physics of noise, vibration, and harshness and the relationship between the three, as well as, their implications. This course will also cover development in vehicle and component noise and vibration control, analysis, subjective evaluation acoustic material, and measurement as applied to mobility industry.

Prerequisite(s): ME 421.

work, estimating hours for project completion, and tracking for progress and change in job requirements. This course includes critical path scheduling, resource allocation, and client/customer interface. Students may not receive credit for both ME491 and ISE491. Prerequisite(s): Senior status, ISE 321A.

ME 495 Engineering Topics.....4 QH

Selected topics in engineering. Prerequisite(s): Dean's approval.

ME 499 Senior Design Project4 QH

Continues the topics in ME491 (Engineering Project Management) and utilizes concepts from industrial and/or mechanical engineering courses to complete a design project and prepare an engineering report on the design. This is a capstone course where the students work in teams. Students may not receive credit for both ME499 and ISE499.

Prerequisite(s): Dean's approval, Senior status, ME 491.

MEDICAL

MED 103 Medical Terminology4 QH

Examines the fundamentals of word analysis by body system and emphasizes the spelling, pronunciation, and definitions of medical terms.

MED 105A Certified Nurse Aide8 QH

Prepares students to work as a nursing assistant or home health aide in a hos-pital, home health facility, or nursing home. Clinical skills are taught through lecture, lab demonstration and hands-on training in a nursing facility. Students are eligible, after successful completion of the course work, to sit for the Clinical Competency and Knowledge Test, to receive the designation of C. N.A (Certified Nurse Aide). This course contains 44 hours of lecture content, 48 hours of lab content, and 30 clinical hours.

Prerequisite(s): Student background check.

MED 106 Asepsis1 QH

Introduces the concept of medical and surgical asepsis and infection control. This course includes Universal Precautions and OSHA Regulations. 5 hours of lecture and 10 hours of lab are required.

Prerequisite(s): C or better in MED 103, Sophomore status.

Introduces the basic insurance coding skills required of medical office staff. Students will be introduced to proper diagnostic coding of diseases and symptoms and proper procedure coding of medical procedures for billing insurance carriers.

Prerequisite(s): C or better in MED 103, C or better in SCI 100F or C or better in SCI 102C, Acceptance in the program.

MED 112 Medical Office Finance......2 QH Introduces the fundamentals of bookkeeping skills required for medical staff. This course includes the pegboard system with ledgers, day sheets, petty cash control, and reconciliation of bank statements. Payments will be posted from patients and insurance companies. Basic collection skills will be addressed. Prerequisite(s): C or better in MED 103, MTH 091 or placement exam.

MED 113 Math for Health Occupations2 QH Introduces students to the metric system and methods of conversion between the standard system and the metric system. Teaches dosage calculations for the administration of medications through various formulas including ratio proportions, fraction proportions, and the formula method. Students will also learn to calculate dosages based on body weight as well as body surface area. Prerequisite(s): MTH 099E or placement exam.

MED 116 Patient Assessment2 QH Introduces the basic clinical skills required of medical office staff such as vital signs and assisting with physical examinations. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in MED 103, C or better in SCI 100F or C or better in SCI 102C, Acceptance in the program. Corequisite(s): MED 106.

Introduces the role of the unit coordinator as part of the nursing team. Particular emphasis is placed on the roles of the team members, hospital environment, and the legal issues involved in patient care. Communication and interpersonal skills will be emphasized. Theory and applications of unit coordinator skills will be implemented through lecture and simulation, including transcription of doctors' orders, specific treatment, medication orders, and coordination of patient care with other health care departments.

Prerequisite(s): MED 103, SCI 100F or SCI 102C.

MED 171 Electronic Medical Records......4 QH

Presents students with an in depth study of electronic medical records application. Students will be able to use, enter, access and correct medical documentation using an electronic software system. Emphasis will be directed toward understanding the role of computer based content, structure, retrieval and storage as it is used in the medical office. Compliance with HIPPA regulations and confidentiality will be emphasized.

Prerequisite(s): INF 112, MED 109. Corequisite(s): MED 116, MED 205D.

MED 185 Phlebotomy......2 QH

Prepares students to properly perform skin and venipuncture in a professional manner. This course will include a review of the cardiovascular system, the role of the phlebotomist as part of the health care team, and the physiological and psychological aspects of patient care. Some hands-on lab experiences will be included. Students must have Hepatitis B immunization or sign a declination form. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in SCI 102C or C or better in SCI 100F, C or better in MED 106, C or better in MED 116.

MED 186 EKG2 QH

Prepares students to perform an electrocardiogram using a 12-lead and a 3-channel electrocardiograph. This course will include a review of the cardiac cycle, major arrhythmias, and cardiac disorders that may lead to cardiac emergencies. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in SCI 100F or C or better in SCI 102C, C or better in MED 103. Corequisite(s): MED 106, MED 116.

MED 190A Advanced Nurse Aide Theory......4 QH

Provides modules in specialty acute nursing areas, e.g. oncology and MEDical/surgical. Each module will include the anatomy and physiology,

common diseases, terminology, and patient care aspects of each specialty area. Prerequisite(s): B- or better in MED 105A or CNA registration within MI.

MED 191A Advanced Nurse Aide Lab......2 QH

Focuses on, in a lab setting, students gaining experience in advanced level skills for the acute care setting. This course contains 40 hours of lab experience and hands-on practice.

Prerequisite(s): HSC 102, B- or better in MED 190A, MTH 091 or placement exam. Corequisite(s): MED 192A.

Provides a 60 hour, unpaid, supervised clinical experience in an acute care facility. Corequisite(s): MED 191A.

MED 203C Physician's Office Billing......4 QH

Introduces the basic insurance claim form processing and the major sources of health insurance and their billing requirements. Upon completion of the course, students will have generated claim forms for Medicare, Medicaid, Blue Cross/Blue Shield, Tricare, Worker's Compensation and other commercial insurers. Emphasis is placed on the student's ability to use billing references and coding books to accurately verify insurance company rules for proper billing. Prerequisite(s): Acceptance in the program. Corequisite(s): MED 109.

MED 205D Specialty Examination......4 QH

Provides students with the skills needed in an office to prepare patients and to assist the physician with specialty examinations. The specific exams include pediatrics, gynecology, proctosigmoidoscopy, spirometry, and sensory. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in SCI 100F or C or better in SCI 102C. Corequisite(s): MED 106, MED 116.

MED 207 Medical Office Procedures4 QH

Prepares students in the administrative skills of the medical office. Competency in scheduling and appointment techniques, filing and mail procedures, written communication, transcription skills, and the management of patient records are required. Risk management and facility environments are also discussed. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): INF 112, C or better in MED 103.

MED 208 Minor Office Surgery2 QH

Equips students with the skills necessary to prepare patients and to assist the physician with minor office surgeries. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in MED 106, C or better in MED 116, C or better in SCI 100F or C or better in SCI 102C.

MED 218B Administration of Medications4 QH

Focuses on the basics of pharmacology along with the clinical administration of medications including oral and parenteral routes. Emphasis will be placed on accuracy in calculation and preparation of medications and safety in the laboratory. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in HSC 104, C or better in MED 106, C or better in MED 113, C or better in MED 116, C or better in SCI 100F or C or better in SCI 102C.

MED 220C Physician's Office Laboratory4 QH Presents advanced clinical laboratory skills for the medical assistant. Emphasis will be placed on patient preparation, accuracy in test performance, and safety in the laboratory according to OSHA guidelines. This course includes theory and procedures for the following: microbiology, urinalysis, hematology, and chemistry. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in SCI 100F or C or better in SCI 102C, C or better in MED 106, C or better in MED 116. Corequisite(s): MED 185.

MED 221 Medical Transcription I4 QH Prepares students in the skills required to transcribe medical dictation. The dictation is sequential from easy to more complex reports in order to build vocabulary that has been introduced. This course also includes the principles of law and ethics related to the medical field.

Prerequisite(s): C or better in MED 103, C or better in SCI 100F.

MED 222A Medical Transcription II6 QH Continues student's training in transcribing all of the medical specialties with an emphasis on development of accuracy, speed, and medical knowledge. It includes dictation covering a myriad of medical and surgical conditions. Prerequisite(s): C or better in MED 221.

Extends Medical Transcription II with an emphasis on advanced level transcription. Surgical reports and advanced terminology will be stressed as well as reinforcing previously learned skills.

Prerequisite(s): C or better in MED 222A.

MED 225A Phlebotomy Integration......4 QH Provides students with an advanced level of phlebotomy practice techniques. Emphasis is placed on the advanced knowledge required to sit for the phlebotomy certification exam. 35 hours of lecture and 10 hours of lab are required. Prerequisite(s): B- or better in MLT 111, MTH 091 or placement exam.

MED 241 Practice Management4 QH Develops student's concept of a computerized medical management system using new and up-to-date software with hands-on computerized processing of health insurance claims and practice management reports. 20 hours of lecture and 40 hours of computer lab are required.

Prerequisite(s): INF 112, C or better in MED 103.

MED 291A CMA Review2 QH Provides a comprehensive review for individuals interested in taking the AAMA certification exam. The review will include the general, administrative, and clinical content areas of the examination.

Prerequisite(s): Completion of a CAAHEP accredited medical assisting program for initial certification or a current CMA requiring CEU's or C or better in all major core classes.

MEDICAL INSURANCE

MIS 101 Overview of Medical Insurance......2 QH

Defines the role of and responsibilities of the medical insurance specialist and acquaints students with the history of health insurance, coding systems, and major insurance programs. This course includes general information on how medical claims are handled.

MIS 111A CPT Coding......8 QH

Focuses on the organization of the procedural coding systems developed throughout the United States and how they are used in Michigan. This course enables students to translate written descriptions of procedures/services performed to their highest specificity. Specific sections of the Current Procedural Terminology (CPT) manual will be covered in-depth to include: Evaluation and Management, Anesthesia, Modifiers, Introduction to Surgery, Integumentary System, Musculoskeletal System, Respiratory System, Cardiovascular System, Hemic and Lymphatic Systems, Mediastinum and Diaphragm, Digestive System, Urinary System, Male Genital System, Intersex Surgery, Female Genital System/Maternity Care and Delivery, Endocrine System, Nervous System, Eye and Ocular Adnexa, Auditory System, Radiology, Laboratory and Pathology, Medicine, and Level II National Codes.

Prerequisite(s): Medical Insurance majors: C or better in HSC 104, C or better in MIS 101. Coding Specialist majors: C or better in MIS 101. Corequisite(s): HSC 104.

MIS 131 ICD-9-CM Coding......4 QH

Emphasizes the organization of diagnosis codes and the basic ICD-9-CM coding rules. Written descriptions of diseases, disorders, and injuries are translated into ICD-9-CM codes to their highest level of specificity and to match the procedure/service performed.

Prerequisite(s): C or better in HSC 104, C or better in MIS 101.

MIS 161A Advanced Medical Coding......4 QH

Develops the student's knowledge of medical specialties with the use of case studies using family practice, internal medicine, pathology/laboratory, radiology, orthopedics, general surgery, durable medical equipment, and home health billing scenarios.

Prerequisite(s): C or better in MIS 111A, C or better in MIS 131.

MIS 201A Medical Claims Processing......8 QH

Defines the role and responsibilities of the medical insurance specialist and acquaints students with the history of health insurance. Students will be given pertinent information on how to access carrier guidelines and manuals via the Internet and hands-on training to gain expertise in identifying information placement on the CMS-1500 claim form for the United States government health carriers, Medicare, Medicaid, Tricare; Blue Cross Blue Shield of Michigan, PPOM, Workers' Compensation, and other pertinent commercial/HMO carriers in the State of Michigan. Students will also learn the legal aspects involved in submitting claims to these carriers. An introduction to vouchers, referral forms, and status inquiry will be covered for these carriers.

Prerequisite(s): C or better in MIS 111A, C or better in MIS 131, C or better in MED 241. Coding Specialist majors: C or better in MIS 111A.

provides students with expertise from the UB04 Hospital Billing Manual. Students will learn Michigan insurance billing to Medicare, Medicaid, and Blue Cross related to the UB04 form using ICD-9 diagnosis codes, CPT-4 procedure codes, Revenue codes, Condition codes, et al, for inpatient and outpatient settings.

Prerequisite(s): C or better in MIS 111A, C or better in MIS 131, C or better in MED 241. Coding Specialist majors: C or better in MIS 111A.

services to obtain maximum reimbursement for the physician and the patient. Students will be taught how to access the Internet and locate updates regarding HIPAA, compliance, CCI, insurance carrier guidelines, and the federal registry. In-depth information will be covered using front-end edits, rejection codes, status inquiry, and the appeal process. The pegboard concept will be used to give students hands-on use of the payment voucher to include posting, adjustments, write-offs, non-sufficient funds, and balance billing to the patient or secondary insurance carrier. Telephone scenarios will be conducted with the carrier and patients.

Prerequisite(s): C or better in MIS 201A.

MIS 291 Coding Review2 QH

Provides a comprehensive review for individuals interested in taking one of the coding certification exams. The review will include ICD-9-CM coding, CPT-4 coding, and medical terminology. To satisfactorily complete this course, 80% accuracy is expected.

Prerequisite(s): C or better in MIS 161A, C or better in MIS 201A.

MEDICAL LABORATORY TECHNICIAN

Introduces clinical laboratory procedures, instruments, and calculations used by laboratory personnel. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): Acceptance in the program.

Introduces students to the clinical laboratory setting and all aspects of pre-analytical testing. This course prepares students to perform methods of skin and venipuncture procedures safely and professionally. Emphasis is placed on specimen integrity, laboratory terminology and the phlebotomist's integral role as a healthcare professional. Students must have hepatitis immunization or sign a declination form. This course is taught in 20 hours of lecture and 20 hours of lab weekly.

Prerequisite(s): Phlebotomy majors: SCI 100E. Medical Laboratory Technician majors: B- or better in SCI 101C, acceptance in the program. Corequisite(s): SCI 102C.

includes antigen-antibody reactions, compatibility testing and blood group typing. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): B- or better in MLT 205B.

lytes found in components of the blood and other body fluids. Laboratory includes qualitative and quantitative measurements of several analytes. 35 hours of lecture and 10 hours of lab are required.

Prerequisite(s): B- or better in SCI 221, acceptance in the program.

MLT 203A Medical Microbiology......4 QH

Studies medically significant bacteria. Methods of isolation, identification, and classification of various microorganisms found in clinical specimens are also studied. 30 hours of lecture and 20 hours of lab are required. *Prerequisite(s): Acceptance in the program.*

MLT 204 Hematology4 QH Introduces basic theories and techniques in the study of blood and their application in a clinical laboratory. The laboratory component will emphasize differentials and other blood tests. 30 hours of lecture and 20 hours of lab are required. *Prerequisite(s): Acceptance in the program.*

MLT 205B Immunology/Serology3 QH

Provides a solid understanding of the basic concepts of immunology including procedural theories and disease manifestations.

Prerequisite(s): Acceptance in the program.

MLT 206B Urinalysis.....

Introduces basic theories and techniques in urinalysis, body fluids and clinical microscopy. Renal function and body fluid tests are explored and results are correlated to their clinical significance. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program.

MLT 207 Mycology, Parasitology/Virology......2 QH Introduces students to medically significant viruses, parasites, and fungi. Emphasis will be on media selection and staining of organisms for identification purposes.

Prerequisite(s): Acceptance in the program.

process including the structure and function of platelets, the vascular system and plasma coagulation factors. 20 hours of lecture including procedural demonstrations are required.

Prerequisite(s): Acceptance in the program.

MLT 271 Clinical Laboratory I12 QH

Provides the first clinical laboratory experience in a qualified health facility and an opportunity for students to observe procedures and demonstrate competency in selected areas. A rotation through the clinical laboratory areas of hematology, coagulation, urinalysis, microbiology, chemistry, immunohematology, and serology is started. 400 clinical hours are required.

Prerequisite(s): Student background check, Dean's approval.

...? QH

MLT 272 Clinical Laboratory II12 QH Provides the second clinical laboratory experience in a qualified health facility in a continued rotation through the remaining clinical laboratory areas. 400 clinical hours are required. Prerequisite(s): B- or better in MLT 271.

PAGE 184

MICROSOFT CERTIFIED PROFESSIONAL

MCSE 161 Implementing and Supporting Microsoft Windows XP Professional4 QH

Provides students with basic knowledge about implementing Windows XP in a network environment. Students focus on automated and remote installations, configuring the desktop environment, installing and supporting hardware devices and drivers, administering resources, and configuring and troubleshooting network protocols and services including TCP/IP, Internet Information Services, and remote access. Additional focus is placed on optimizing memory, processor, and application performance, managing security using Group Policy, Encrypting File System (EFS), NTFS permissions, and backing up and restoring files and system state data. This course assists in preparation for Microsoft test #70-270. Successful completion of this exam will earn students the MCP certification and also count towards MCSA/MCSE certification.

Prerequisite(s): CNE 250 or NET 102.

Provides students with the knowledge and skills to manage accounts and resources in a Microsoft Windows Server 2003 environment. This course is intended for systems administrators and systems engineer candidates who are responsible for managing accounts and resources. These tasks include managing user, computer, and group accounts; managing access to network resources; managing printers; managing an organizational unit in a network based on Active Directory service; and implementing Group Policy to manage users and computers. This is the second course in the Systems Administrator and Systems Engineer tracks for Windows Server 2003 and serves as the entry point for other courses in the Windows Server 2003 curriculum. This course prepares students for the Microsoft certification exam #70-290. *Prerequisite(s): MCSE 151 or MCSE 161.*

MCSE 264 Implementing a Windows 2003 Network Services Infrastructure ...4 QH

Provides students with the knowledge and skills that are needed to effectively implement, manage, and maintain networking services and protocols on a computer running one of the operating systems in the Microsoft Windows Server 2003 family. In addition, it provides students with the skills and knowledge necessary to maintain a Microsoft Windows Server 2003 networking infrastructure. Students expand their understanding and abilities to implement, manage and maintain DHCP, TCP/IP addressing, DNS, Network Security, Routing and Remote access. This course assists in preparation for Microsoft exam #70-291. Passage of the corresponding exam will count towards completion of the MCSA/MCSE certifications.

Prerequisite(s): MCSE 261.

MCSE 266 Implementing and Managing Microsoft Exchange Server 20034 QH Provides students with the knowledge and skills that are needed to update and support a reliable, secure messaging infrastructure. This infrastructure is used for creating, storing, and sharing information by using Microsoft Exchange Server 2003 in a medium-sized to large-sized (250 to 5,000 seat) messaging environment. This course offers a significant amount of hands-on practice, discussions, and assessments that assist students in becoming proficient in the skills that are needed to update and support Exchange Server 2003. This course assists in preparation for Microsoft exam 70-284. Passage of the corresponding exam will count towards completion of the MCSA/MCSE certifications. *Prerequisite(s): MCSE 264*.

MICROSOFT NETWORKING PROFESSIONAL

Provides students with the skills and knowledge necessary to: install and upgrade Windows Vista; configure and troubleshoot post-installation system settings; configure network connectivity; configure Windows security; configure applications included with windows Vista; maintain and optimize systems that run Windows Vista; and configure and troubleshoot mobile computing. This Microsoft Official Academic Course prepares students for the Microsoft Certified Technology Specialist (MCTS) examination, 70-620. *Prerequisite(s): NET 102.*

MNP 221 Configuring Windows Server 2008 Network Infrastructure......4 QH

Provides students with the knowledge and skills that are needed to effectively configure remote access, Network Access Protection (NAP), network authentication, IPv4 and IPv6 addressing, and Domain Name System (DNS) replication; capturing performance data and monitoring event logs; and managing file and print services. The course assists in preparation for Microsoft exam #70-642. Passage of the corresponding exam will count towards completion of the MCITP certifications.

Prerequisite(s): MNP 171.

Prerequisite(s): CIS 331, MCSE 264 or MNP 211. Corequisite(s): CSS 211 or ITS 301.

Focuses on the skills required to plan, design, configure and deploy Microsoft Office SharePoint Server 2007. Topics include configuring and securing SharePoint Technologies, disaster recovery as well as monitoring and troubleshooting SharePoint deployments. Content of this course maps to Microsoft's 70-630 certification examination.

Prerequisite(s): MNP 301, MCSE 264 or MNP 221, CSS 211 or ITS 301.

Prerequisite(s): CSS 211 or ITS 301, MCSE 264 or MNP 211.

MNP 401 Configuring Windows Server 2008 Applications Infrastructure......4 QH Teaches students how to plan, implement, and support Terminal Services and Internet Information Server 7.0. Content of this course maps to Microsoft's 70-643 certification examination.

Prerequisite(s): MCSE 264 or MNP 221, CSS 211 or ITS 301.

MNP 421 Configuring Microsoft Perimeter Defense4 QH Provides students with the knowledge and skills to install and configure ISA Server as a cache server and as a firewall. The course topics include the use of authentication for outgoing Web requests, configuring access policies, VPN access, and access to selected internal resources. Students will learn how to monitor ISA Server activities by using alerts, logging, reporting, and real time monitoring. Students will also learn how to install and configure ISA Server in an enterprise environment, to explain the role of ISA Server in a small business, in a branch office, and in an enterprise. Content of this course maps to Microsoft's 70-351 certification examination.

Prerequisite(s): ITS 421, MNP 311 or MNP 321, MCSE 264 or MNP 221.

NETWORKING TECHNOLOGY

Introduces students to the field of computing. Topics include occupations within the field, terminology, basic computer and networking concepts and database concepts.

Focuses on the basic issues related to data communications and networking technologies. Topics include the OSI model, network topologies, protocols, and the fundamentals of internetworking. TCP/IP addressing is also covered. Prerequisite(s): INF 111 and INF 112, or INF 111 and INF 114A, or INF 121 and INF 114A, or NET 101. Corequisite(s): CIS 106A.

NET 211 Wireless Networking4 QH Explores the planning, designing, installing and configuring of wireless LANs. Offers in-depth coverage of wireless networks with extensive coverage of IEEE 802.11 b/a/g/pre-n implementation, design, managing, security, and troubleshooting. Material is reinforced with hands-on projects. This course prepares students for the Certified Wireless Network Administrator (CWNA) certification. Prerequisite(s): NET 102.

NET 222 Introduction to Routers and Routing......4 QH Provides an introduction to the concepts of routers, the OSI reference model, IP addressing, subnetting, data link and network addresses, and concepts of data encapsulation. Includes hands-on exercises. Prerequisite(s): NET 102.

NET 224 Advanced Routers and Routing......4 QH Examines router elements, RIP and IGRP routing protocols, router operating system software, configuration and installation, and LAN segmentation using bridges, routers, and switches. Covers the operation of the Spanning Tree protocol. Focus is on Cisco technology. Includes hands-on exercises. Prerequisite(s): NET 222.

NET 226A Designing Internetwork Solutions4 QH Prepares students for the CCDA exam through the use of theory followed by hands-on labs. Students will plan, design, implement, and document a complete network using the existing lab equipment. In addition, management tasks, such as network monitoring, are addressed. Case study problems are used to develop problem-solving skills that further assist in the review of the CCNA materials learned in the previous courses. Prerequisite(s): NET 224.

NET 301 Building Multi-Layer Switched Networks......4 QH Provides students with the knowledge and skills necessary to build scalable multilayer switched networks; create and deploy a global intranet, and implement troubleshooting techniques in environments that use multilayer switches for client hosts and services. Covers topics on switching technology, implementation and operation, planning and design, and troubleshooting. Prepares students for the Cisco 642-811 CCNP certification exam. Prerequisite(s): NET 224.

NET 311 Building Scalable Internetworks......8 QH Discusses advanced IP addressing and routing principles, including implementing scalability for routed LAN and WAN networks. Focuses on the EIGRP, OSPF, IS-IS, and BGP routing protocols. Demonstrates the use of route maps to manipulate routing updates. Prepares students for the Cisco 642-801 CCNP certification exam.

Prerequisite(s): NET 224.

NET 321A Implementing Secure Converged Wide Area Networks......4 QH Covers the implementation of remote access technologies in enterprise environments, including Cable, DSL, and MPLS. Demonstrates the use of IPSEC, IPS systems, and firewalls to create a robust, secure WAN environment. Prepares students for the Cisco 642-825 CCNP certification exam. Prerequisite(s): NET 224.

PAGE 186

NET 401 Internetwork Troubleshooting......4 QH

Provides students with the knowledge and skills necessary to troubleshoot suboptimal performance in a converged network environment. Covers topics on establishing a baseline, determining an effective troubleshooting strategy, resolving problems at the physical and data link layers, resolving problems at the network layer, and resolving problems at the transport and application layers. Prepares students for the Cisco 642-831 CCNP certification exam. Prerequisite(s): NET 321A, NET 411A.

NET 411A Securing Networks with Firewalls4 QH Prepares students for implementing advanced security solutions on Cisco PIX and ASA firewalls, focusing on access-lists, NAT, site-to-site IPSec VPNs, and remote-access VPNs. Covers the fundamentals of firewall and internetwork security, and demonstrates the use of the PIX/ASA command-line and ASDM interfaces. Prepares students for the Cisco 642-523 CCSP certification exam. Prerequisite(s): NET 311.

NET 421A Internetwork Design Project......4QH Capstone course that integrates the knowledge and skills students have obtained throughout the Routing program. Requires that students implement enterpriselevel Routing, Switching, Remote-Access, Wireless, Security, and QoS solutions. Exposes the students to real-world troubleshooting and design scenarios through a series of complex labs. Prerequisite(s): NET 411A.

NURSING

NUR 101 Nursing Fundamentals......4 QH Provides nursing students with the basic fundamental knowledge and skills necessary in the delivery of care to the adult patient utilizing the nursing process. Health patterns of the adult patient will be examined. Critical thinking skills and the process of clinical judgment will be stressed. A "Caring" philosophy as applied to the holistic care of the adult patient will permeate this course.

Prerequisite(s): Acceptance in the program, B- or better in all prerequisite courses, Student background check. Corequisite(s): NUR 102, NUR 103.

NUR 102 Nursing Fundamentals Lab......2 QH Provides students with basic nursing skills to give safe and competent care to the adult client utilizing the nursing process. Opportunity will be provided for supervised practice of skills and discussion of application to patient care. 40 hours of lab are required.

Prerequisite(s): Acceptance in the program, B- or better in all prerequisite courses. Corequisite(s): NUR 101, NUR 103.

Introduces students to the provision of nursing care for the adult client in a longterm health care setting. Basic nursing skills will be utilized. Students will apply the nursing process through participation in basic nursing care of adult clients in uncomplicated health care situations. 60 clinical hours are required.

Prerequisite(s): Acceptance in the program, B- or better in all prerequisite courses. Corequisite(s): NUR 101, NUR 102.

NUR 111 Health Assessment2 QH Focuses on a holistic approach to the physical examination and health assessment, an essential element of the nursing process. This course will enable students to develop and demonstrate elementary skills to accomplish the health history and physical examination of the adult client. Threads of caring for the biopsychosocial and spiritual well being of the client will be emphasized in this learning experience. Health Assessment skills will be practiced in a laboratory setting. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program, B- or better in all prerequisite courses. Corequisite(s): NUR 101.

NUR 121 Medical/Surgical Nursing L......4 QH

Addresses the theoretical application of the nursing process to concepts of care. Concepts included in this course are: health promotion and maintenance, principles of pharmacology, nutrition, communication, pain, infection control, and selected health conditions. The focus of this course will be on the care of patients with chronic illnesses or commonly recurring health problems. Prerequisite(s): B- or better in NUR 101, B- or better in NUR 102, B- or better in NUR 103, B- or better in NUR 111. Corequisite(s): NUR 122.

NUR 122 Medical/Surgical Nursing | Practicum 3 QH

Provides a clinical opportunity for students to apply the nursing process to medical/surgical nursing care in the acute care setting. Students, under the supervision of a clinical instructor, will practice nursing assessment and nursing management skills in the care of the adult client with altered health conditions. 90 clinical hours are required.

Prerequisite(s): B- or better in NUR 101, B- or better in NUR 102, B- or better in NUR 103, B- or better in NUR 111. Corequisite(s): NUR 121.

NUR 131 Nursing Strategies Across the Lifespan and Across the Continuum...2 QH

Focuses on health promotion throughout life in a variety of community settings. The emphasis is placed on application of the nursing process to wellness and disease prevention for culturally diverse clients.

Prerequisite(s): B- or better in NUR 101, B- or better in NUR 102, B- or better in NUR 103, B- or better in NUR 111.

NUR 141 Nursing Drug Applications2 QH

Provides nursing students with the knowledge and skills necessary to safely administer medications. Included is an overview of pharmacologic essentials such as: three systems of measurement, abbreviations and symbols, classifications of drugs, and commonly used drugs. In applying the nursing process, the procedures for administration of medications and the importance of safe practice will be stressed. Administration of medication skills will be practiced in a lab setting. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): B- or better in NUR 101, B- or better in NUR 102, B- or better in NUR 103, B- or better in NUR 111.

Introduces students to the developing family during the childbearing time as a focus for nursing. The emphasis is placed on the care of the mother as well as the care of the fetus and newborn. The nursing process is utilized in assessment of all elements and phases of pregnancy, planning, providing and evaluating nursing interventions that promote optimal wellness. The effects of culture, ethnic, and economic influences as well as the interaction with the extended family and/or community will be discussed. In addition, the complications of pregnancy and pregnancy outcomes that threaten the childbearing family will be examined from both physiologic and psychosocial aspects.

Prerequisite(s): Nursing majors: B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): NUR 152. Nursing (LPN to RN Ladder) majors: B- or better in NUR 191. Corequisite(s): NUR 152.

Assists students in applying theory and developing competence in utilizing the nursing process to provide care for families in the childbearing cycle. The effects of cultural, ethnic, spiritual, and psychosocial factors will be emphasized. Principles of family theory are integrated in the care of the childbearing families. 60 hours of clinical are required.

Prerequisite(s): Nursing majors: B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): NUR 151. Nursing (LPN to RN Ladder) majors: B- or better in NUR 191. Corequisite(s): NUR 151.

Focuses on issues of children and their families with an emphasis on the application of the nursing process. Personal values, attitudes, and feelings about children and their families will be explored. Common disorders of body systems and the use of pharmacological agents in children are emphasized. A clinical component will accompany this course in which students will have the opportunity to engage in caring relationships with children and their families in an acute care setting.

Prerequisite(s): Nursing majors: B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): NUR 162. Nursing (LPN to RN Ladder) majors: B- or better in NUR 191. Corequisite(s): NUR 162.

Provides the opportunity to apply knowledge and skills to the care of children and their families, as students apply the nursing process to this patient population. Jean Watson's carative factors will be used to analyze clinical experiences. A multidisciplinary team approach is emphasized. 60 hours of clinical are required. Prerequisite(s): Nursing majors: B- or better in NUR 121, B- or better in NUR 122,

B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): NUR 161. Nursing (LPN to RN Ladder) majors: B- or better in NUR 191. Corequisite(s): NUR 161.

NUR 171 Legal Issues in Nursing2 QH

Explores liability and malpractice issues related to nursing as well as the legal basis for the practice of nursing in Michigan. The social context of nursing is emphasized. Personal and professional development are integrated into the content and the process of learning in this course.

Prerequisite(s): B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141.

NUR 191 LPN to RN Transition2 QH

Facilitates growth from the role of LPN toward the role of RN. Emphasis will be on enhancing critical thinking skills, examining theoretical application of the nursing process, and discussing the role differences and expectations between LPN and RNs. The course will validate prior knowledge and skills. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program.

NUR 201 Mental Health Nursing......3 QH

Presents the essential concepts of mental health and mental illness within the context of relationship centered care. Emphasis will be on enhancing mental wellness of individuals, families or groups through a transpersonal caring model as students apply the nursing process. Theoretical content will focus on therapeutic communication, exploration of therapeutic use of self, major psychiatric disorders, stress and crisis, legal and ethical aspects of practice, and culturally competent care.

Prerequisite(s): B- or better in NUR 151, B- or better in NUR 152, B- or better in NUR 161, B- or better in NUR 162, B- or better in NUR 171 or B- or better in NUR 191. Corequisite(s): NUR 202.

NUR 202 Mental Health Nursing Practicum2 QH

Focuses on the application of theory from the Mental Health Nursing course. Students will have opportunities to practice nursing assessment and interventions based on the Standards of Psychiatric/Mental Health Clinical Nursing Practice. A variety of clinical settings across the continuum of care will be used. Contemporary society problems relevant to community mental health and impact on quality of care will be explored as students apply the nursing process. 60 hours of clinical are required.

Prerequisite(s): B- or better in NUR 151, B- or better in NUR 152, B- or better in NUR 161, B- or better in NUR 162, B- or better in NUR 171 or B- or better in NUR 191. Corequisite(s): NUR 201.

Focuses on issues of the elderly and terminally ill with an emphasis on health promotion and living fully, even while dying. Personal values, attitudes, and feelings about aging, maturity, and dying will be explored. Common disorders of body systems and the use of pharmacological agents in the aged are emphasized. Hospice care will be explored including history, philosophy, and services provided. The nursing process will be applied to the care of the elderly and terminally ill client. A clinical component will accompany this course in which students will have the opportunity to engage in caring relationships with elderly and/or dying clients.

Prerequisite(s): B- or better in NUR 151, B- or better in NUR 152, B- or better in NUR 161. B- or better in NUR 162. B- or better in NUR 171 or B- or better in NUR 191. Corequisite(s): NUR 212.

Provides students the opportunity to apply the nursing process and skills to the care of the elderly and/or terminally ill clients in a variety of settings. Jean Watson's carative factors will be used to analyze clinical experiences. A multidisciplinary team approach is emphasized. 60 hours of clinical are required. Prerequisite(s): B- or better in NUR 151, B- or better in NUR 152, B- or better in NUR 161, B- or better in NUR 162, B- or better in NUR 171 or B- or better in NUR 191. Corequisite(s): NUR 211.

NUR 221 Nursing Leadership2 QH Prepares students to make the transition from student to entry-level practitioner. Personal qualities of effective leadership are emphasized. Decisionmaking skills and conflict resolution are stressed in relation to working collaboratively with others to provide caring service to clients/patients. The nursing process is applied to leadership/management issues. Personal and professional development are integrated into the content and the process of learning in this course.

Prerequisite(s): B- or better in NUR 151, B- or better in NUR 152, B- or better in NUR 161, B- or better in NUR 162, B- or better in NUR 171 or B- or better in NUR 191.

NUR 231A Medical/Surgical Nursing II......4 QH

Builds upon previously learned content and provides a more in-depth study of complex, health-illness situations. Students will become proficient at utilizing the nursing process to design care for clients experiencing chronic and acute health problems. Nursing theories are utilized in planning, implementing, and evaluating care. Critical thinking and problem-solving skills are refined. The focus is on managing and delivering safe patient care to adult clients in diverse settings. Prerequisite(s): B- or better in NUR 201, B- or better in NUR 202, B- or better in NUR 211, B- or better in NUR 212, B- or better in NUR 221. Corequisite(s): NUR 232, NUR 241A.

Provides practice opportunities for students to acquire and practice advanced technical skills and application of the nursing process in caring for the adult client with acute and chronic medical conditions. Comprehensive knowledge and skills gained throughout the nursing program will be applied to medical-surgical, critical care, emergency, and perioperative phases as they occur across the lifespan. The professional growth of the nursing student is realized as one accomplishes this clinical experience. 180 hours of clinical are required. Prerequisite(s): B- or better in NUR 201, B- or better in NUR 202, B- or better

in NUR 211, B- or better in NUR 212, B- or better in NUR 221. Corequisite(s): NUR 231A, NUR 241A.

NUR 241A Nursing Seminar2 QH Provides an opportunity to synthesize the total learning experience including general and nursing education. The focus is on readiness for professional nursing practice tempered by awareness of and commitment to life-long learning. Case studies, application of the nursing process, NCLEX-RN review questions, and clinical experiences will be used for the analysis and synthesis of knowledge and skills needed to respond to complex health situations. A portfolio for the final program will be completed in this course.

Prerequisite(s): B- or better in NUR 201, B- or better in NUR 202, B- or better in NUR 211, B- or better in NUR 212, B- or better in NUR 221. Corequisite(s): NUR 231A, NUR 232.

OCCUPATIONAL THERAPY

OCC 101 Introduction to Occupational Therapy......4 QH Provides students with initial exposure to the profession of occupational therapy. Content will include a history of the profession, professional organizations, relationship to other health professionals, ethics, credentialing of professions, and the educational process of becoming a registered therapist. Uniform terminology for occupational therapy is covered in detail.

Provides students with an understanding of activities and their historical implications in the practice of occupational therapy. Activity analysis will be explored in detail. Analysis opportunities will occur in areas like activities of daily living/self-care and leisure skills. Crafts and the use of mediums will be presented to assist students with understanding the importance of being able to teach life tasks. 40 hours of lecture and 20 hours of lab are required. Prerequisite(s): B- or better in OCC 101, B- or better in SCI 271A.

OCC 202B Therapeutic Use of Occupation II......5 QH Reviews purposeful activity in occupational therapy. Activity analysis, adapting, and grading activities for therapeutic purposes are covered in detail. Students are introduced to sensory, neuromotor, cognitive, and psychosocial dimensions of performance. The client interview process will be introduced. Clinical reasoning and the teaching of an activity will be covered. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in OCC 201B.

Focuses on range of motion assessment and applying manual muscle testing techniques in a laboratory-based setting. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): B- or better in OCC 101, B- or better in SCI 271A.

OCC 221A Level | Fieldwork (Children)2 QH Provides field observation of children of varying ages and needs. Students have the opportunity to observe and consider the implication a disability has on development. A weekly seminar provides the instructor with the opportunity to tie the observations to the occupational therapy process. 10 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in OCC 202B, Student background check, DHS clearance. Corequisite(s): OCC 241.

OCC 231 Assessment of Occupational Performance.......4 QH

Introduces the concepts of occupational therapy assessment. This course includes a discussion of the processes involved for choosing assessment tools and types of assessments; the relation of the assessment process to the performance areas of self-care, work, play, and leisure skill areas; and a discussion of the assessment of sensory, neuromotor, cognitive and psychosocial performance components. An overview of the physiologic dimensions of activity and assessment is provided. Students are required to use hands-on experience in using assessment in a simulated test situation. Recent literature on assessment is reviewed. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): C or better in OCC 202B.

OCC 241 Child Development and the Implications of Pathology/Conditions4 QH Examines child development from birth through 18. This course covers reflexes and motor and sensory development through age 5 in detail. Pathology/conditions and their implications to development are discussed thoroughly. Prerequisite(s): PSY 221, SCI 211. Corequisite(s): OCC 221A.

OCC 302 Mental Health Conditions and Occupational Dysfunction4 QH Outlines conditions and disorders including etiology and clinical progression from adulthood to late adulthood. The impact on performance and implication to independent functioning will be discussed. Prerequisite(s): C or better in OCC 332.

OCC 313 Personal and Environmental Adaptations......4 QH Includes designing and restructuring the physical environment to assist selfcare, work, play, and leisure performance. Emphasis is on architectural barriers and utilization of wheelchairs and other equipment. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): C or better in OCC 231.

OCC 314A Introduction to Documentation in the Health Care System4 QH Provides students, in a laboratory-based setting, with hands-on opportunity to develop documentation skills centered around a problem-based format. Prerequisite(s): Acceptance in the program.

Students will investigate services that assist people in regaining performance/independence. A weekly seminar provides the instructor with the opportunity to tie community services to the occupational therapy process. 10 hours of lecture and 20 hours of lab are required. Prerequisite(s): C or better in OCC 221A. Corequisite(s): OCC 341.

OCC 323A Level I Fieldwork (Late Adulthood)......2 QH Provides field observation in settings that offer services for the older adult. Students consider implications of the aging process and the need to retain skills/performance. A weekly seminar provides the instructor with the opportunity to tie the observations to the occupational therapy process. 10 hours of lecture and 20 hours of lab are required. Prerequisite(s): C or better in OCC 332.

OCC 331 Evaluation of Occupational Performance.......4 QH Provides students a clinically-based approach to apply occupational therapy evaluation/assessment to individuals with physical dysfunction. Students will determine an individual's abilities and capacities to carry out occupational function. This course will build on concepts from assessment of occupational performance, ROM, and MMT. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): C or better in OCC 205, C or better in OCC 231.

Introduces students to the development of theory and the relationship of theory to current professional practice. This course utilizes current occupational therapy theory to examine practices in both psychosocial and physical disabilities. Prerequisite(s): C or better in OCC 231, SCI 311.

OCC 341 Disease/Injury and Occupational Dysfunction4 QH Studies disease/injuries, including etiology and clinical progression from young through late adulthood. The impact on performance and implication to independent functioning will be discussed. This is a continuation of OCC241. Prerequisite(s): SCI 211, SCI 311.

OCC 351 The Aging Process and the Implications of Pathology/Conditions.....4 QH Completes the study of conditions that impact normal development and performance. The aging process as well as specific diseases/conditions commonly experienced by the older adult are presented. Current concepts addressing prevention are explored.

Prerequisite(s): PSY 221.

Emphasizes application of theory to practice with an adult population. Intervention strategies to assist people with regaining performance are covered. Consideration is also given to conditions seen frequently in practice settings. This course requires students to prioritize needs and demonstrate proficiency with common modalities. 40 hours of lecture and 20 hours of lab are required. *Prerequisite(s): OCC 341.*

OCC 403A Program Planning/Intervention Strategies (Late Adulthood)5 QH

Explores assessment, treatment planning, and development of intervention strategies with the older adult. Strategies designed to enhance/retain performance with emphasis on quality of life are presented. Performance areas including activities of daily living, work, and play or leisure are analyzed as applied to this population. 40 hours of lecture and 20 hours of lab are required. *Prerequisite(s): OCC 351, C or better in OCC 402A.*

OCC 406 Complementary Therapies, Wellness and Occupation......4 QH Focuses on the basic concepts, evolution, utilization, and legislative issues surrounding wellness, complementary, and integrative therapies used in treatment. Students will experience the use of complementary/integrative therapies to enhance personal wellness and clinical skills.

Prerequisite(s): B- or better in SCI 271A, C or better in OCC 402A.

OCC 413 Roles of Occupation and Psychosocial Treatment Interventions4 QH Introduces the organization, administrative structure, and functions of occupational therapy service programs. Emphasis is on communication techniques, differentiating the levels of functions of staff and legal implications of service delivery. In addition, exploration of practice settings will occur (ie: workergonomics). Development of positions in existing and new practice settings will be emphasized. 30 hours of lecture and 20 hours of lab are required. *Prerequisite(s): C or better in OCC 332*.

Prerequisite(s): C or better in OCC 313.

Explores a variety of roles for the occupational therapist in community-based settings. Students will learn to apply the philosophical roots of occupational therapy to contemporary practice. In addition, students will gain an overview of funding sources, governmental policies, and documentation needs relevant to community-based practice. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in OCC 331.

OCC 416 Applied Assessment and Documentation......4 QH

Provides students a clinically-based approach to apply occupational therapy evaluation/assessment. Students will determine an individual's abilities and capacities required to carry out occupational function. *Prerequisite(s): C or better in OCC 231.*

OCCUPATIONAL THERAPY ASSISTANT

Introduces students to the foundations, history, philosophy, and development of occupational therapy. The scope of occupational therapy practice and organizations will be defined. Delineation between the roles and functions of the registered occupational therapist and occupational therapy assistant will be emphasized. Initial observation experiences in at least two different occupational therapy settings are required. *Prerequisite(S): B- or better in HSC 111.*

OTA 120 Elements of Therapeutic Media......3 QH

Introduces OTA students to therapeutic activity and various forms of media utilized in occupational therapy treatment settings. Students develop and apply critical thinking and problem-solving skills to identify, analyze, and adapt purposeful activities in the areas of self-care, work, and leisure. Extensive activity analysis and application to various patient care areas are emphasized. Students will become familiar with group interaction and group processes. Recreational and music/movement groups are also explored. 20 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the BRS or OTA program.

OTA 141A Fundamentals of Occupational Therapy Assistant Practice3 QH

Focuses on the fundamental practice issues in occupational therapy, including standards of practice, COTA supervision, the therapeutic intervention process, medical documentation, team interaction, and general service operations. The following topics are covered: professional ethics, legal aspects, insurance reimbursement, and quality improvement. 20 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the BRS or OTA program.

OTA 171A OTA Level I Fieldwork A1 QH

Provides clinical observation of client services in the area of mental health. Observation skills, group interaction, and documentation are emphasized and integrated into the occupational therapy process with concurrent OTA course-work. 40 hours of clinical are required.

Prerequisite(s): Acceptance in the BRS or OTA program, Student background check or Fingerprinting. Corequisite(s): OTA 211B.

OTA 172A OTA Level I Fieldwork B1 QH

Provides clinical observation of client services in the area of physical dysfunction. Observation skills, treatment implementation, and documentation are emphasized and integrated into the occupational therapy process with concurrent OTA coursework. 40 hours of clinical are required.

Prerequisite(s): C or better in OTA 211B. Corequisite(s): OTA 221A.

Prerequisite(s): Acceptance in the BRS or OTA program. Corequisite(s): OTA 211B.

tice therapeutic skills and activities utilized in the area of physical dysfunction throughout the lifespan. 40 hours of lab are required. *Prerequisite(s): C or better in OTA 201B. Corequisite(s): OTA 221A.*

Prerequisite(s): Acceptance in the BRS or OTA program. Corequisite(s): OTA 201B.

OTA 251 OT in Specialty Areas2 QH

Explores the role of occupational therapy and introduces the occupational therapy assistant to the specialty areas of orthopedics, industrial rehabilitation, pain management, and aquatics. Observation and beginning level skills, strategies, applications, and goal planning will be emphasized. 15 hours of lecture and 10 hours of lab are required.

Prerequisite(s): C or better in HSC 211.

Explores the psychosocial and physical aspects of aging and the role of occupational therapy with the older adult. Treatment planning, application, and preventative strategies are explored in the performance areas of activities of daily living, leisure, and work.

Prerequisite(s): C or better in HSC 211.

OTA 261 OTA Professional Preparation......1 QH Provides OTA students with the preparation for the Level II Fieldwork experience. The areas reviewed are: ethical and professional behavior, liability, communication skills, reinforcement of academic knowledge, and treatment selection/application. This course provides OTA students with case study applications, in-servicing, and clinical preparation. Bloodborne pathogen training is required as part of the course content.

Prerequisite(s): C or better in OTA 171A. Corequisite(s): OTA 172A.

OTA 262 OTA Fieldwork Integration1 QH

Provides a seminar-style format for this course offered between Level II Fieldwork experiences. Students will present a comprehensive case study at the completion of this course allowing further integration of Level II clinical education

Corequisite(s): OTA 271B, OTA 272B.

OTA 271B OTA Level II Fieldwork A**6 QH** Provides an unpaid affiliation in the clinical setting, performing the delivery of occupational therapy services under the supervision of an occupational therapy practitioner. Students must complete a minimum of 320 hours (or the equivalent of eight weeks, full-time) for this Level II Fieldwork. The clinical site will assess clinical competency including clinical decision-making skills and professionalism

Prerequisite(s): C or better in OTA 261. Corequisite(s): OTA 262, OTA 272B.

OTA 272B OTA Level II Fieldwork B......6 QH

Provides an unpaid affiliation in the clinical setting, performing the delivery of occupational therapy services under the supervision of an occupational therapy practitioner. Students must complete a minimum of 320 hours (or the equivalent of eight weeks, full-time) for this Level II Fieldwork. The clinical site will assess clinical competency including decision-making skills and professionalism.

Corequisite(s): OTA 262, OTA 271B.

OTA 291 OTA Board Review1 QH

Provides the OTA student with a comprehensive review in preparation for the National Board Certification in Occupational Therapy (NBCOT) examination. This review will include all domain areas of the examination. Students will be required to satisfactorily complete a mock certification examination. Prerequisite(s): C or better in OTA 221A.

OFFICE ADMINISTRATION

OAD 121 Technologies and Procedures I......4 QH Provides training in the skills that are needed for an entry-level office position. Course curriculum includes telephone skills, document preparation, voice mail, e-mail skills, calendaring software, mail procedures, office machines, introduction to ARMA filing rules, and prioritizing tasks. Soft skills will include office etiquette, ethics, stress, anger, and time management.

Prerequisite(s): WPG 122. Corequisite(s): WPG 123.

Prepares students to handle records from their creation to disposal both manually and electronically. Basic filing rules and management techniques will be emphasized. Students will learn how databases are used in records management and apply simple electronic file management techniques. Prerequisite(s): INF 114A.

OAD 221 Technologies and Procedures II......4 QH

Emphasizes training in the latest technology in the office environment. Topics such as the use of PDAs (Personal Digitals Assistants), voice recognition software, multimedia equipment, Microsoft Outlook, trouble shooting minor problems with a desktop computer, and more complex applications of skills learned in OAD121.

Prerequisite(s): OAD 121, WPG 123.

OAD 231 Integrated Applications, Web Editing, and Desktop Publishing.......4 QH

Provides training in the skills that are needed to perform advanced integration software applications, utilize Desktop Publishing software, and do basic editing of HTML code.

Prerequisite(s): WPG 123, INF 131 or INF 141A. Corequisite(s): CIS 302A, CIS 313A.

OPTICIANRY

OP 101 Introduction to Opticianry......4 QH

Introduces students to the eve-care field and the profession of opticianry. Emphasis is placed on the scope of activities performed by opticians in the ophthalmic profession. This course will also identify the other professionals that work in the ophthalmic arena.

OP 111 Ocular Anatomy, Physiology, and Pathology4 QH

Emphasizes the anatomical structure of the eye and its adnexa. An overview of common pathologies and pharmacology of the eye, as well as the function of the parts of the eye as they relate to vision and the fitting of spectacles and contact lenses will be presented.

OP 121A Optical Laboratory Theory3 QH This course introduces students to the terminology, instruments, lenses, frames, and materials used in the optical laboratory to fabricate prescription evewear. Prerequisite(s): C or better in OP 101.

Presents the basic fundamentals, terminology, instrumentation, and practical procedures used in evaluating the visual system. Basic information is presented on theory and use of opthalmic instruments. Various problems associated with vision will also be presented.

Prerequisite(s): Acceptance in the program, C or better in OP 101, C or better in OP 111, C or better in OP 121A.

OP 211 Optical Theory I3 QH

Examines the nature of light and details the behavior of light when it encounters various refractive and reflective surfaces. Examines lens power, indices, and prisms. Establishes the foundation for advanced optical applications.

Prerequisite(s): Acceptance in the program, C or better in OP 101, C or better in OP 111, C or better in OP 121A.

Continues the study of Optical Theory I, including prism notation, vertical imbalance and methods of correcting for it, vertex power, illuminance, reflection and absorption, diffraction, third-order lens aberrations and lens tilt, anisometropia, and spectacle magnification.

Prerequisite(s): C or better in OP 211.

OP 221A Optical Dispensing I Theory3 QH Optical Dispensing Theory I provides fundamental knowledge for frame selec-

tion and dispensing techniques.

Prerequisite(s): Acceptance in the program, C or better in OP 101, C or better in OP 111. C or better in OP 121A.

OP 222A Optical Dispensing II Theory3 QH

This course provides more in depth study into dispensing techniques for low vision, sports vision, and geriatric vision. Prerequisite(s): C or better in OP 221A.

OP 231 Introduction to Contact Lenses2 QH

Introduces students to the history of contact lenses, contact lens materials, contact lens fitting philosophies, selection of lenses, inspection and verification, follow-up care, lens care and storage, and regulations regarding contact lenses. Prerequisite(s): Acceptance in the program, C or better in OP 101, C or better in

Allows students to apply the knowledge gained from Introduction to Contact Lenses to expand their knowledge base to the fitting philosophies of current contact lens designs. Students will have 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in OP 231.

care office. Teaches the analysis, creative thinking, judgment, planning strategy, and implementation skills necessary for today's optical business challenges. Prerequisite(s): Acceptance in the program, C or better in OP 101, C or better in OP 111, C or better in OP 121A.

dents to take the national certification exams for both spectacles and contact lens as well as current developments in lens materials, lens designs, and government regulations as they affect opticians.

Prerequisite(s): C or better in OP 212, C or better in OP 222A.

OP 261 Optical Dispensing Laboratory3 QH

This is a hands on course in which the students will develop the technical skills that they will need to become opticians. 60 hours of in-house laboratory clinical. Prerequisite(s): C or better in OP 121A.

OP 271 Opticianry Externship......8 QH

Provides students with the real-world optical dispensing experience. Externships will allow students to experience the different settings in which an optician may work. 240 hours of externship are required.

Prerequisite(s): Dean's approval, minimum GPA 2.50, all professional track Opticianry courses with a grade of C or better.

ORTHOTIC/PROSTHETIC TECHNICIAN

Introduces orthotic/prosthetic technology students to the history of orthotics and prosthetics. Students will acquire a working knowledge of the materials and equipment involved in the fabrication of orthotic and prosthetic devices. Fabrication of plastic, aluminum, and steel projects will be completed by students in the lab portion of this course. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): B- or better in HSC 111, B- or better in SCI 100F.

Introduces orthotic/prosthetic technology students to the history of diabetic foot care, foot orthoses, and shoe modifications. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the foot and ankle. Fabrication of the UCBL, foot orthoses and shoe modifications will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): Acceptance in the program.

Introduces the orthotic/prosthetic technology students to the history of lower

extremity orthotics. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the lower extremity. Fabrication of various plastic and hybrid lower extremity orthoses will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in OPT 201, C or better in OPT 211A, C or better in OPT 221.

Introduces orthotic/prosthetic technology students to the history of lower

extremity orthotics. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the lower extremity. Fabrication of various metal lower extremity orthoses will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in OPT 203, C or better in OPT 212, C or better in OPT 233. Corequisite(s): OPT 213, OPT 241A.

Introduces orthotic/prosthetic technology students to the history of partial foot and Symes prosthetics. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the foot and ankle. Fabrication of partial feet, and Symes prostheses will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required. *Prerequisite(s): Acceptance in the program.*

Introduces orthotic/prosthetic technology students to the history of below-knee prosthetics. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the below-knee amputee. Fabrication of exoskeletal and endoskeletal prostheses will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in OPT 201, C or better in OPT 211A, C or better in OPT 221

prosthetics. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the above-knee amputee. Fabrication of above-knee prostheses will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in OPT 203, C or better in OPT 212, C or better in OPT 233. Corequisite(s): OPT 204, OPT 241A.

Introduces orthotic/prosthetic technology students to the history of upper extremity orthotics. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the upper extremity. Fabrication of hand, wrist, and humeral fracture orthoses will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required. Prerequisite(s): Admission to the program.

Introduces the Orthotic/Prosthetic Technology student to the history of below elbow and above elbow prosthetics. The student will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the below and upperelbow amputee. Fabrication of body powered below and upper elbow prostheses will be completed by the student in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in OPT 201, C or better in OPT 211A, C or better in OPT 221.

OPT 241A Spinal Orthotics6 QH

Introduces orthotic/prosthetic technology students to the history of spinal orthoses. Students will acquire a working knowledge of bony and soft tissue anatomy and landmarks of the neck and torso. Fabrication of spinal orthoses will be completed by students in the lab portion of this course. 40 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in OPT 203, C or better in OPT 212, C or better in OPT 233. Corequisite(s): OPT 204, OPT 213.

Introduces orthotic/prosthetic technology students to the public and private practice. Students will acquire a working knowledge of the orthotic and prosthetic lab and participate in the fabrication of orthoses and prostheses devices for patients. This is the externship portion of the program. Students will com-plete 120 hours in orthotics and 120 hours in prosthetics for a total of 240 hours. Prerequisite(s): Dean's approval.

PARALEGAL

PAR 101 Law, Legal Profession, and Terminology......4 QH Provides a basic understanding of the procedural and practical aspects of being a paralegal. Emphasis is on legal terminology, legal concepts, skills needed to perform paralegal tasks, and the ethical considerations involved.

PAR 111 Legal Writing, Research, and Analysis I4 QH Provides students with a general understanding of the nature of legal research including book research and legal citation forms using specific techniques and methodologies. Students will develop research strategies that will enable them to begin drafting and analyzing a variety of legal documents. The mechanics of the construction of documents will be examined.

Prerequisite(s): ENG 101 or acceptable English essay or placement exam.

PAR 112 Legal Writing, Research, and Analysis II4 QH Consists of advanced legal drafting and writing. Students will continue to review and analyze case law and legal materials in the preparation of writing court briefs, pleadings, and memorandums. Unique problems of legal research will be explored. Students will be introduced to online legal research tools. Prerequisite(s): PAR 111.

PAR 113A Legal Writing, Research, and Analysis III......4 QH

Provides a capstone experience for the legal research and writing series in the paralegal program. This course will reinforce and continue to develop the high level research skills necessary for today's paralegals. Manual and CALR methods will be expounded upon for further skill refinement, written and oral communications will continue to be a focus as students demonstrate their proficiency in this area through an extensive legal research project that requires them to produce the applicable legal documentation and then present their findings as they would in the legal setting. Prerequisite(s): PAR 112.

PAR 131 Law Office Management and Ethics4 QH Introduces students to the study of concepts and skills specific to the adminis-

tration of the law office and the application of the modern day business practice to the private law firm. Topics include the establishment of legal fees, the hiring and supervision of personnel, types of legal settings, equipment and facilities management, billing and timeslips, docket control, the concept of delegation of work to associates and legal assistants, and the ethical implications of each. The differences between the various legal structures, such as the sole proprietorship, the partnership, the professional corporation, and the professional limited liability corporation, including a discussion of liability associated with each will also be discussed.

Introduces students to tort law, including intentional torts such as assault and battery; torts based on the failure to use reasonable care such as negligence; and strict liability torts, which make the actor liable without any fault for dangerous activities such as mining and blasting operations. In the introduction of negligence students will become familiar with the four elements of all negligence lawsuits, duty, breach of duty, proximate causation, and damages. Major areas of tort litigation will be examined including products liability. Prerequisite(s): PAR 101.

PAR 211 Criminal Law and Procedures4 QH

Introduces students to the various offenses that constitute a crime as well as the general principles of culpability and justification. Constitutional safeguards and procedures necessary from arrest through the trial, sentencing, and punishment will be examined. The First, Fourth, Fifth, Sixth, and Eighth Amendments will be examined.

Prerequisite(s): PAR 101.

disadvantages of doing business as a sole proprietorship, partnership, corporation or limited liability corporation. The rights, duties, and powers of partners will be explored and how a partnership can be terminated will be examined. Students will learn the basic characteristics of a corporate entity, the processes to form a corporation, the effects of improper incorporation, dissolution of a corporation, and the differences between stocks and bonds. The duties of corporate directors and officers, and the rights and liabilities of shareholders are explained. Students will become familiar with limited liability companies and how they operate. Prerequisite(s): PAR 101.

PAR 231A Wills, Trust, and Probate Administration......4 QH Familiarizes students with the basic elements of a will, types of wills as well as the responsibilities of a personal representative. Classes of trusts and rules governing trusts will be examined. Discussion will include the purposes of estate planning, probate forms and procedures, and guardianships. Students will assess and analyze tax ramifications of estate plans as well as the different classifications of property.

Prerequisite(s): PAR 101.

PAR 241 Contract Law4 QH Introduces students to the fundamental principles and practices associated with contract law. Topics include the elements of a binding legal contract, such as the offer, acceptance, and consideration, the distinction between the common law of contracts and the Uniform Commercial Code (UCC) treatment of contracts, the study of sales transactions and commercial contracts, an analysis of the concept of performance and the legal remedies available for breach of contract, and the preparation of valid contractual agreements. Prerequisite(s): PAR 101.

Introduces students to the stages of a lawsuit, including pretrial, trial, and posttrial procedures. Preparation of pleadings, motions, and subpoenas will be examined. This course will familiarize students with the fundamentals of discovery including interviewing techniques and case investigations. The Michigan Court Rules will also be examined.

Prerequisite(s): PAR 101, PAR 113A, PAR 201, PAR 211.

PAR 299 Paralegal Seminar1 QH

Provides students with an opportunity to share current work experiences and discussion of the current legal environments as applicable to their internships. Corequisite(s): WRK 215.

annulment, guardianship, and adoption. Topics discussed may include custody, child support, alimony, property distribution, and domestic partnerships, as

well as the role of the attorney and paralegal in interviewing, determining jurisdiction, counseling, investigating, drafting, serving and filing of legal papers. Prerequisite(s): PAR 101.

PAR 335 Health Care and Insurance Law4 QH

Provides an overview of the current issues in health care and insurance law. Topics may include malpractice by physicians and hospitals, tort reform and its impact on the health system, a discussion of insurance coverage, including private health insurance policies, Medicare, Medicaid, disability, long-term care and no-fault insurance, issues relating to access to health care as well as access to records, HIPAA and confidentiality of patient information, and advance directives

Prerequisite(s): PAR 101 and PAR 201

Provides an overview of the legal issues facing our aging population. Topics covered may include estate planning, health and personal care planning, advance directives, financial powers of attorney, availability of benefits including Social Security, Supplemental Security Income, Veterans, Medicare and Medicaid, alternative housing arrangements such as assisted living facilities and nursing homes, elder abuse and neglect, and ethical issues inherent in the area of elder law.

Prerequisite(s): PAR 101, PAR 231A.

PAR 345 Alternative Dispute Resolution4 QH

Provides an overview of Alternative Dispute Resolution (ADR) as an alternative to traditional litigation. The basic methods of ADR, including binding as well as non-binding arbitration, mediation and negotiation, will be discussed. Students will learn the main areas where disputes often arise, how one or more methods of ADR apply, and how to determine the most appropriate method for resolving a matter. Topics covered may include the various forms of ADR, the application of ADR to specific disputes in various areas of the law, sources of ADR services, and the role of the paralegal in ADR. Prerequisite(s): PAR 101.

PAR 351 Property and Real Estate Law......4 QH Exposes students to the practical side of real property transactions, emphasizing the residential process. Students will learn about preparing and recording documents for transfer of title, including purchase and sale agreements, mort-

gages and deeds, financing, the closing process, and landlord-tenant relationships.

Prerequisite(s): PAR 101.

PAR 361 Employment and Labor Law4 QH Provides an overview of the laws that deal with the employment relationship, such as hiring and firing, wages and benefits, hours and overtime, and working conditions. Topics covered may include the various types of discrimination, federal wage and hours regulation, the concept of at-will employment, labor law, privacy laws, harassment in the workplace, workplace injuries and remedies, and employee handbooks. Prerequisite(s): PAR 101.

PAR 371 Debtor/Creditor Law (Bankruptcy)......4 QH Introduces and familiarizes students with the legal issues, rights and remedies involving debtors and creditors. Topics covered may include Chapter 7 bankruptcy liquidation, Chapter 11 bankruptcy reorganization, and Chapter 13 wageearner plans, as well as the areas of receivership, garnishments, secured creditors, and liens.

Prerequisite(s): PAR 101.

PAR 421 Administrative Law4 QH Provides an overview of administrative law, namely those rules and regulations set forth by agencies of government whether at the state, local or federal level. We will address the function of administrative agencies, as well as how these agencies operate. Topics may include rule-making, constitutional and statutory limitations on agency operation, and specific administrative policies. The course will also discuss the role of the paralegal and the possibility of paralegal representation during administrative hearings. Prerequisite(s): PAR 101.

PAR 431 Legal Technology and Software4 QH

Provides students with practical application of specialized legal software and computer technology in the legal setting. Topics may include a discussion of technology and software options for time management, billing, calendaring and docketing, document management, word processing, legal research, litigation support, and specialty areas of law. Electronic filing and discovery, as well as the paperless office, will also be examined. Prerequisite(s): PAR 101, PAR 113A, PAR 131.

PAR 435 Immigration Law4 QH Provides an overview of the structure of immigration law, practice and procedure. Students will learn how to recognize the legal issues, prepare petitions and applications, and learn when, why, and where filings should be made. Students will gain a basic understanding of the history of immigration law, as well as the general procedures, terminology, and agencies that are involved in this area of law. Topics may include completing standard immigration forms, researching immigration law, and accessing government and other online materials relating to this field

Prerequisite(s): PAR 101, PAR 113A

PAR 445 Intellectual Property Law......4 QH

Covers the field of intellectual property law, including the areas of copyrights, trademarks, trade secrets and patents. Students will gain a basic background in intellectual property law and will be introduced to the skills that are required of an intellectual property paralegal. Topics may include ownership of works, the fair use doctrine, registration of copyrights, trademarks and patents, infringement of rights, trade secrets, and use of online research tools in the area of intellectual property. Prerequisite(s): PAR 101.

PAR 491 Evidence (Litigation II)......4 QH

Provides an overview of general evidentiary principles and application in the trial process. Topics may include relevancy of evidence, judicial notice, presumptions, weight and sufficiency of evidence, burden of proof, competency of witnesses, objections to evidence, admissibility, and rules relating to examination and cross-examination of witnesses, including the concept of hearsay and its exceptions. This course will also discuss the role of the paralegal in the litigation process and emphasize the skills necessary for a litigation paralegal. Prerequisite(s): PAR 291.

PHARMACY TECHNICIAN

PHT 101 Introduction to Pharmacy Technology2 QH Provides an introduction to the pharmacy profession. This course will focus on the role of pharmacy technicians in various work settings, medical and pharmaceutical terminology, prefixes, suffixes, symbols, abbreviations used to interpret prescription orders, and the legal and ethical issues specific to pharmacy. Procedures for national certification are introduced.

PHT 111A Pharmacy Technology I......4 QH Introduces the basic concepts of pharmacology and drug references. Explores drugs and diseases associated with various body systems. Prerequisite(s): C or better in SCI 100F, C or better in PHT 101.

PHT 112A Pharmacy Technology II4 QH A continuation of PHT111A. This course explores drugs and diseases associated with various body systems.

Prerequisite(s): C or better in PHT 111A.

PHT 121 Interpretation of Medication Orders......4 QH

Provides students the skills needed to correctly fill medication orders. Students will learn to interpret medication orders, understand manufacturers' labels, calculate drug dosages, and translate prescriptions.

Prerequisite(s): MED 103, C or better in MTH 111, C or better in PHT 101.

PHT 211B Hospital Pharmacy......4 QH

Applies basic pharmacy principles and procedures to the hospital environment. Focuses on aseptic technique and sterile product preparation. Proper procedures for IV admixtures and parenteral administrations are discussed and practiced. Introduces students to pharmacy calculations involving parenteral dosages, dosages measured in units, and IV flow rates. 40 hours of lecture with laboratory demonstrations.

Prerequisite(s): C or better in PHT 121, C or better in PHT 111A.

Applies basic pharmaceutical principles and procedures to the community setting. Identifies the various ambulatory pharmacy settings. Focuses on proper preparation of a prescription with regards to product selection, label construction, measuring, mixing, and compounding. Students will be introduced to the use of computers in preparing a prescription. Basic components of third party insurance companies will be discussed. Inventory, marketing, monetary policies, and customer relations will be addressed. Commercial calculations involving selling price, cost, and mark-up are also introduced. 40 hours of lecture with laboratory demonstrations.

Prerequisite(s): C or better in PHT 121, C or better in PHT 111A.

PHYSICAL THERAPIST ASSISTANT

PTA 111 Introduction to PTA2 QH

Introduces physical therapist assistant students to the foundations and principles of the profession and the American Physical Therapy Association. Basic theories and practices of physical therapy are emphasized, with a detailed analysis of the boundaries between the physical therapist and the assistant. Ethical standards in practice and legislation governing the utilization of the PTA are also covered in detail. Scientific research design, psychological reactions to disability, and other issues relating to the profession and patient care are also discussed. Prerequisite(s): B- or better in HSC 111.

PTA 171 Level | Fieldwork1 QH

Provides a part-time, unpaid, practical, work experience at a clinical setting, performing under the supervision of a licensed physical therapist. Clinical experience time is integrated with ongoing academic coursework to facilitate the transition from classroom to clinic. Clinical competencies, as expected of a developing clinician, will be assessed by the student's clinical instructor. Students are expected to complete full day assignments as scheduled. 40 clinical hours are required.

Prerequisite(s): Acceptance in the BRS or PTA program, Student background check.

PTA 172 Level I Fieldwork1 QH

Provides a part-time, unpaid, practical, work experience at a clinical setting, performing under the supervision of a licensed physical therapist. Clinical experience time is integrated with ongoing academic coursework to facilitate the transition from classroom to clinic. Clinical competencies, as expected of a developing clinician, will be assessed by the student's clinical instructor. Students are expected to complete full day assignments as scheduled. 40 clinical hours are required.

Prerequisite(s): \vec{C} or better in PTA 171.

Begins the student's experience with patient care. Patient preparation and monitoring of vital signs are reviewed. Assessment techniques of goniometry and muscle screening and treatment techniques of massage are learned in lecture and laboratory experiences. 20 hours of lecture and 40 hours of lab are required. *Prerequisite(s):* Acceptance in the BRS or PTA program.

PTA 212 PTA Techniques II......4 QH Includes theory, principles of application, and development of technical skills with a variety of physical therapy treatments. Traction, superficial thermal agents, circulatory assistive devices, and electrotherapy agents are presented with basic competencies evaluated in laboratory experiences. Functional anatomy and basic patient handling skills are emphasized. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): C or better in PTA 211.

PTA 221A Therapeutic Exercise I4 QH

Covers kinesiological principles as applied to the human body. Exercise physiology in rehabilitation, tissue regeneration, and basic isotonic, isometric, and isokinetic exercise are learned. Students will also be instructed in methodology of basic fitness testing and basic terminology and techniques of extremity manual therapy. Joint assessment and a problem-solving approach to therapeutic exercise prescription are utilized. Joints of the extremities and the truck are systematically reviewed by analyzing pathological conditions and orthopedic management. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): Acceptance in the BRS or PTA program.

Introduces advanced exercise and rehabilitation techniques using the clinical problem-solving approach to patient care. All professional level coursework is integrated into this course with the introduction of clinical neuroanatomy, developmental sequencing, and a variety of neurological approaches. Common neurological pathologies and their clinical manifestations are discussed. Laboratory participation and the case study approach to patient care decision making is emphasized. 20 hours of lecture and 60 hours of lab are required. Prerequisite(s): C or better in PTA 221A.

PTA 231B Functional Mobility4 QH Describes the levels of independence along the mobility spectrum addressing safety, positioning, and guarding techniques for each level. Bed mobility, wheelchair utilization, assistive device training, and transfers, using proper body mechanics are learned. Normal gait patterns are studied and deviations are reviewed. Basic orthotics and prosthetics are presented. The primary objective of this course is to familiarize students with methods to optimize patient mobility. 20 hours of lecture and 40 hours of lab are required. Prerequisite(s): Acceptance in the BRS or PTA program.

Provides an in-depth study to analyze the unique physical therapy challenges of the geriatric and acute care patient populations. Topics covered in detail include burn and open wound management, cardiac rehabilitation, multiple trauma, circulatory assistive devices, postsurgical management, and orthopedic and neurological conditions common to the elderly.

Prerequisite(s): C or better in PTA 211.

PTA 258 Special Topics in Physical Therapy3 QH

Presents a focused study of the special rehabilitation needs of patient groups including athletes, adults with neurological disorders, children, and workers. Topics covered include patient education, injury prevention, special rehabilitation techniques, and other specific information for each group. A variety of areas may be covered including: aquatic exercise programs, sports medicine for the athlete, industrial rehabilitation, treatment and positioning of the pediatric patient, adult neurological rehabilitation, and other current topics in physical therapy. Assessment and treatment of common diagnoses in these groups are addressed.

Prerequisite(s): C or better in PTA 211.

PTA 261B Professional Preparation I.....1 QH

Focuses on professionalism, the role of the interdisciplinary health care team, effective communication skills, and patient interviewing techniques. Also described in detail are the critical nature of self-assessment, recognition of stressors, and utilization of appropriate coping mechanisms. This course will also orient students to the part-time clinical experience process. Prerequisite(s): Acceptance in the BRS or PTA program.

PTA 262A PTA Capstone1 QH Provides PTA students with a capstone experience to assimilate previous didactic and clinical material in preparation for sitting for the licensure examination including academic review and application process. Requirements of this course include submission of written case study, submission of portfolio, and sitting for a timed practice licensure examination.

Prerequisite(s): Dean's approval. Corequisite(s): PTA 271C.

PTA 263 Professional Preparation II......1 QH Presents an overview of the organizational structure in a physical therapy department and orientation to management/supervisory styles. Also described in detail are operational issues impacting the PTA in today's health care arena, including documentation guidelines, billing and insurance issues, and total quality improvement. This course will also orient students to the full-time clinical affiliation process.

Prerequisite(s): C or better in PTA 261B.

PTA 271C PTA Level II Fieldwork6 QH

Provides a six-week, unpaid, practical, learning experience at a clinical setting, performing under the supervision of a licensed physical therapist. In-services may be required by the clinical site. Clinical competencies will be assessed by the student's clinical instructor. Students are expected to complete 240 hours. Prerequisite(s): C or better in PTA 222B.

PTA 272C PTA Level II Fieldwork6 QH Provides a six-week, unpaid, practical, work experience at a clinical setting, per-

forming under the supervision of a licensed physical therapist. In-services may be required by the clinical site. Clinical competencies will be assessed by the student's clinical instructor. A greater emphasis on independence, professional confidence, and competent decision making will be expected in this final clinical experience. Students are expected to complete 240 hours. Prerequisite(s): Dean's approval. Corequisite(s): PTA 262A.

POLITICAL SCIENCE

POL 201A American Political Systems......4 QH

Studies the functions of government at the national, state, and local levels. Particular emphasis is placed on the effects of government policies on individuals and businesses. The areas of study include the Constitution, federalism, interest groups, courts, the bureaucracy, the economy, congress, the Presidency, and political parties.

Includes the study of international relations theory, development, and communications as well as American and comparative foreign policy analysis, international law, comparative politics, and peace studies, including conflict resolution and arms control.

Prerequisite(s): POL 201A.

POLYSOMNOGRAPHIC TECHNOLOGY

PST 101 Introduction to Polysomnography......4 QH

Introduces students to the profession of polysomnographic technology. Topics include the history and an overview of sleep medicine. Additionally, this course will discuss the skills necessary to evaluate and assess the patient and their medical record for information that is pertinent to appropriate data acquisition, patient care, and therapeutic acquisition

Prerequisite(s): B- or better in ENG 102, B- or better in MED 103, B- or better in MTH 112, B- or better in SCI 102C, B- or better in SCI 221. Corequisite(s): PST 111.

Presents a series of discussions by professionals about the field of polysomnography. Weekly lectures include insight into the profession from various medical specialties and the relationship that sleep studies have on the human body. Corequisite(s): PST 101.

PST 112 Polysomnographic Seminar II1 QH Presents a continuous series of discussion by professionals on current topics in polysomnography and other related areas of medicine. Weekly lectures include insight into the profession about individual clinical problems.

Prerequisite(s): B- or better in PST 111, B- or better in PST 121, B- or better in PST 131, B- or better in PST 201, B- or better in PST 261.

PST 121 Patient Preparation......2 QH Focuses on general patient assessment, communication skills, and basic techniques in patient handling. Skill sets will include; vital signs, lead placement, interview and documentation techniques, the administration of pre- and postprocedure questionnaires and follow-up processes as well as patient safety precautions.

Prerequisite(s): Acceptance in the program. Corequisite(s): PST 131, PST 201, PST 261.

gists, patients, and other health professionals as it relates to legal and ethical principles of patient care. Current trends in confidentiality, behavioral observa-tions and documentation will be included. In addition, the day to day operational functionality and management of the facility will be explored.

Prerequisite(s): Acceptance in the program. Corequisite(s): PST 121, PST 201, PST 261.

PST 201 Electronic Theory and Instrumentation Monitoring4 QH

Provides students with an introduction to general electrical theory, safety and amplification. Students will learn to calculate calibration signals required by electrophysiologic monitoring devices and summarize the process of measuring the electromechanical functions of the human body. Proficiency in equipment evaluation and troubleshooting skills will be key outcomes for this course. Prerequisite(s): Acceptance in the program. Corequisite(s): PST 121, PST 131,

PST 261.

PST 211 Therapeutic Interventions4 QH Introduces students to the organization and study of the international classification of sleep disorders. Emphasis will be on etiology and epidemiology as it relates to all classifications of sleep disorders. Other areas of inquiry will include; symptomology, indicated test procedures, and appropriate therapeutic modalities for disorders of sleep.

Prerequisite(s): B- or better in PST 121, B- or better in PST 131, B- or better in PST 201, B- or better in PST 261.

PST 221A Neuroanatomy and Pathology......2 QH

Explores basic EEG and reviews the anatomy and physiology of the nervous and cardiopulmonary systems with emphasis on abnormalities during sleep and wake. Topics include; the anatomy of the upper airway, pulmonary and cardiac systems, pulmonary ventilation mechanics, and pulmonary blood flow. Discussions will include the structure and function of the brain, its relationship to the generation of sleep and benefits of normal sleep architecture and consequences of sleep deprivation as well as the mechanism of breathing.

Prerequisite(s): B- or better in PST 121, B- or better in PST 131, B- or better in PST 201, B- or better in PST 261.

PST 231 Cardiorespiratory Pharmacology2 QH Explores the treatment options for sleep apnea syndrome to include; CPAP, Bi-level, humidification, surgical, oral/dental, positional therapies, pharmacology, sleep hygiene, and nutrition. Other topics that will be covered are the affect of drugs in common use have on the polysomnogram, and recognizing and responding to emergency situations.

Prerequisite(s): B- or better in PST 121, B- or better in PST 131, B- or better in PST 201, B- or better in PST 261.

PST 241 Sleep Analyzing Computers......4 QH

Focuses on learning the computer systems used for the collection, analysis, and archiving of sleep studies. Evaluation of computer hardware, software, in-lab and portable digital systems and database management will be discussed. Windows and Windows NT based programs will be emphasized. The computer technology used in monitoring human sleep will introduce students to software programs designed to specifically record EEG, EMG, ECG, airflow, respiratory effort, oximetry, snoring, ETCO2 as well as other possible parameters of sleep. Students will develop skills in patient data entry, creating and managing patient databases and printing reports. Other areas include; biomedical or IS support, warranties, extended service plans, and software updates. 20 hours of lecture and 40 hours of lab are required.

Prerequisite(s): B- or better in PST 112, B- or better in PST 211, B- or better in PST 221A, B- or better in PST 231, B- or better in PST 262.

Provides students with the first on site laboratory clinical experience in sleep study technology. Participants will gain insight from day-to-day sleep laboratory operations and interactions with patients and practitioners. This 40 hour laboratory clinical experience will begin developing the technical and patient skills needed to actively participate in sleep study activities.

Prerequisite(s): Acceptance in the program. Corequisite(s): PST 121, PST 131, PST 201.

Integrates the student's clinical application of knowledge with their ability to perform polysomnographic testing. Skills include; patient interaction, setup and monitoring of equipment and patient interaction. Beginning CPAP and Bi-level titrations, documentation and completion of study to include; tear down and clean up will be included. Scoring of the various sleep monitoring events will be explored. 80 clinical hours are required.

Prerequisite(s): B- or better in PST 121, B- or better in PST 131, B- or better in PST 201, B- or better in PST 261, Student background check.

Requires students to participate in a 160 hour clinical experience with patients and technologists at an approved sleep disorder center or hospital. This internship will include all aspects involved in a polysomnologist's responsibilities. Students must be prepared and willing to participate on any shift that may be required to complete this 160 hour internship experience.

Prerequisite(s): Dean's approval, B- or better in PST 112, B- or better in PST 211, B- or better in PST 221A, B- or better in PST 231, B- or better in PST 262.

PST 281 Advanced Polysomnography4 QH

Advance techniques and integration of all the components of sleep medicine technology will be addressed in this course. Evaluation and assessment techniques, scoring, quality control, and facility protocols.

Prerequisite(s): B- or better in PST 112, B- or better in PST 211, B- or better in PST 221A, B- or better in PST 231, B- or better in PST 262.

PST 291 Polysomnography Registry Review......2 QH

Focuses on didactic lectures and mock reviews which review the subject matter needed to successfully complete the Board of Registered Polysomnographic Technologist (BRPT) examination. The course will consist of a review of already acquired technical and clinical skills. Students' areas of test weaknesses and strengths will be identified through practice exams with instructor feedback. *Prerequisite(s): PST 231, PST 221A, PST 262, PST 112, PST 211. Corequisite(s): PST 281, PST 271, PST 241.*

PRACTICAL NURSING

PN 101 Basic Nursing Concepts in Practical Nursing......2 QH

Provides students with the basic concepts of nursing including the history and development of practical nursing. The process of critical thinking and basic nursing theories will be introduced. Students will learn cultural and spiritual assessments for clients and develop a personal philosophy of nursing.

Prerequisite(s): Acceptance in the program, Student background check, DHS clearance.

PN 106 Practical Nursing Pharmacology4 QH

Provides students with the knowledge necessary to safely administer medications. Included is an overview of pharmacologic essentials such as: three systems of measurement, abbreviations and symbols, classifications of drugs, and commonly used drugs. In applying the nursing process, the procedures for administration of medication and the importance of safe practice will be stressed. Common medication classifications will be presented. *Prerequisite(s): Acceptance in the program.*

PN 111 Practical Nursing Fundamentals......4 QH

Provides students with the basic fundamental knowledge and skills necessary to deliver care to the adult patient. Students will learn and apply the nursing process to residents in long term care facilities. Development of a "caring" philosophy as applied to the holistic care of adults will permeate this course. *Prerequisite(s): Acceptance in the program. Corequisite(s): PN 112, PN 113.*

Prerequisite(s): Acceptance in the program. Corequisite(s): PN 111, PN 112.

Prerequisite(s): B- or better in PN 101, B- or better in PN 106, B- or better in PN 111, B- or better in PN 112, B- or better in PN 113.

Corequisite(s): PN 122.

PN 122 Medical/Surgical Nursing I for Practical Nurses - Clinical Applications ...3 QH Provides a clinical opportunity for students to apply the nursing process to medical/surgical nursing care in the acute care setting. Students, under the supervision of a clinical instructor, will practice nursing assessment and nursing management skills in the care of the adult client with altered health conditions. 8 hours of lab and 112 hours of clinical are required.

Prerequisite(s): B- or better in PN 101, B- or better in PN 106, B- or better in PN 111, B- or better in PN 112, B- or better in PN 113.

Corequisite(s): PN 121.

PN 126 Practical Nursing Law and Ethics2 QH

Provides an exploration of the liability, practice, ethics, and other issues related to practical nursing in Michigan.

Prerequisite(s): B- or better in PN 101, B- or better in PN 106, B- or better in PN 111, B- or better in PN 112, B- or better in PN 113.

Prerequisite(s): B- or better in PN 141, B- or better in PN 142, B- or better in PN 146, B- or better in PN 147. Corequisite(s): PN 132A.

PN 132A Maternity Nursing for Practical Nurses - Clinical Applications1 QH Provides a clinical opportunity for students to observe the nursing process to maternity nursing care. Students, under the supervision of a clinical instructor, will observe and apply basic nursing assessment and nursing management skills in the care of the pregnant client. 30 hours of clinical with occasional lab demonstrations.

Prerequisite(s): B- or better in PN 141, B- or better in PN 142, B- or better in PN 146, B- or better in PN 147. Corequisite(s): PN 131A.

PN 136A Pediatric Nursing for Practical Nurses _____2 QH Provides an exploration of practical nursing care for infants and children. Students will learn to assess wellness and common childhood illnesses and immunizations. *Prerequisite(s): B- or better in PN 141, B- or better in PN 142, B- or better in PN 146, B- or better in PN 147. Corequisite(s): PN 137A.*

PN 137A Pediatric Nursing for Practical Nurses - Clinical Applications.......1 QH Provides a clinical opportunity for students to observe the nursing process to pediatric nursing care in the health care setting. Students, under the supervision of a clinical instructor, will observe and participate in nursing care of the client. 30 hours of clinical with occasional lab demonstrations.

Prerequisite(s): B- or better in PN 141, B- or better in PN 142, B- or better in PN 146, B- or better in PN 147. Corequisite(s): PN 136A.

Provides a more complex study and focus on the care of the surgical patient preand post-operatively as well as issues of medical patients. Advanced acute disease processes will be studied.

Prerequisite(s): B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): PN 142.

PN 142 Medical/Surgical Nursing II for Practical Nurses -Clinical Applications2 QH

Provides a clinical opportunity for students to apply the nursing process to medical/surgical nursing care in an acute care setting. Students, under the supervision of a clinical instructor, will practice advanced nursing assessment and nursing management skills in the care of the adult client with altered health concerns. 60 hours of clinical with occasional lab demonstrations.

Prerequisite(s): B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): PN 141.

PN 146 Gerontology Nursing for Practical Nurses2 QH Provides a focus on the health needs of the older adult. Theories and concepts of the aging process will be addressed. Both social and psychosocial changes will be discussed.

Prerequisite(s): B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): PN 147.

PN 147 Gerontology Nursing for Practical Nurses - Clinical Applications2 QH

Provides a clinical opportunity for students to apply the nursing process to gerontological nursing care. 60 hours of clinical with occasional lab demonstrations

Prerequisite(s): B- or better in NUR 121, B- or better in NUR 122, B- or better in NUR 131, B- or better in NUR 141. Corequisite(s): PN 146.

PN 171 Practical Nursing Seminar4 QH Integrates the previously acquired knowledge and skills necessary to begin a career in nursing. Topics include delegation and leadership, dealing with conflict, and career growth. Standardized testing with remediation as well as case studies and the nursing process will be utilized. The portfolio will be finalized in this course.

Prerequisite(s): B- or better in PN 141, B- or better in PN 142, B- or better in PN 146, B- or better in PN 147, Sophomore status.

PROJECT MANAGEMENT AND PLANNING

PPM 301 Project Management......4 QH

Introduces students to the five processes of project management: initiating, planning, executing, controlling, and closing. Topics include an overview of the evolution of project management, tools and techniques, and the project life cycle. Students will gain experience with the basic techniques of project planning, scheduling, execution, and closure.

Prerequisite(s): Junior status.

PPM 311 Project Planning4 QH

Expands on student's knowledge of project planning. Topics include project and scope definition, feasibility studies, activity sequencing, and identification of measures of success. Students will learn how to create, plan and effectively use planning tools, including project management software to work with subtasks, assign resources, and resolve time and resource conflicts.

Prerequisite(s): Junior status, WPG 098 or high school typing/proficiency.

PPM 321 Negotiation Strategies4 QH

Provides students with complete coverage of the knowledge, attitude, and skills necessary for success in negotiation. Topics include strategies and techniques for negotiation, different forms of negotiation, ethical and unethical behavior, conflict resolution, and mediation. Students will practice these principles to increase their negotiating ability.

Prerequisite(s): Junior status.

Introduces students to accounting concepts and principles necessary for developing project budgets and monitoring budget costs. This course also covers cost estimation techniques. Students will practice developing a project budget, tracking costs, and reporting financial cost information. Also addresses issues related to risk analysis, risk minimization, risk control, and risk management. Prerequisite(s): Junior status, MTH 091 or placement exam.

PPM 411 Leading Project Teams.......4 QH

Addresses effective utilization of human resources in project management. Provides an understanding of project leadership techniques, authority and power, motivation, team development, as well as problem-solving, decisionmaking, and interpersonal skills. Students will develop an understanding of effective communication techniques for communicating project status as well as recruitment of project team members.

Prerequisite(s): Junior status.

PPM 421 Contracting and Procurement for Project Managers......4 QH

Explains the contracting and procurement process and the roles and responsibilities of the project manager in successful contracting to meet a project's objectives. Topics include procurement planning and management, preparing statements of work, proposal requests, contractor selection, and types of contracts. Introduces principles of contract and subcontract administration and reviews the differences between government and private purchasing processes. Prerequisite(s): Junior status.

PPM 499 Senior Design Project in Project Management4 QH Provides students with an opportunity to demonstrate mastery of the nine areas of the project management body of knowledge: scope, quality, time, cost, risk, human resources, procurement, communications, and integration management. This is a capstone course that integrates the content of the other project management and planning courses. Taught in a guided self-study format, students will complete a comprehensive project and prepare for certification tests by taking a practice test.

Prerequisite(s): Dean's approval.

PSYCHOLOGY

PSY 101 Human Relations4 QH Explores the aspects of self and human interaction with applications to both personal and professional growth. Topics include stress and stress management, self concept and self esteem, goal setting, problem solving, communication skills, and relationship skills.

PSY 111 General Psychology4 QH Examines the science of behavior and mental processes. Topics include human development, perception, emotion, motivation, personality, social psychology, behavior disorders, and therapy.

PSY 121 History of Psychology......4 QH Explores the history and development of psychology as a discipline. Compares and contrasts important theories and their historical roots. Selected content

areas within psychology and their occupational potential are discussed. Prerequisite(s): PSY 111. behavior therapy. Topics include maladaptive thought patterns and cognitive

behavior therapy solutions, several expressions of cognitive behavior therapy, and cognitive behavior therapy applications to common problems such as fear, anger, addiction, and depression. Prerequisite(s): PSY 101 or PSY 111.

PSY 211 Psychology of Death & Dying......4 QH

Presents the topic of death and dying with the aim of enhancing the student's understanding and ability to cope with the social processes of dying, death, and bereavement.

Prerequisite(s): PSY 101 or PSY 111.

PSY 221 Developmental Psychology......4 QH

Examines changes that occur across the human life span, from conception to old age and death. Topics include physical, perceptual, cognitive, personality, social, and emotional changes. Prerequisite(s): PSY 111.

PSY 231 Organizational Psychology4 QH

Explores selection, placement, and evaluation of personnel, work motivation, leadership, worker well-being, group organization, and processes in the workplace.

Prerequisite(s): PSY 101 or PSY 111.

Explores selection, placement, and evaluation of personnel, work motivation, leadership, worker well-being, group organization, and processes in the workplace. This course is exclusive to the Accelerated Bachelor Degree program. Prerequisite(s): MTH 312R, WRI 312R.

PSY 241 Theories of Counseling4 QH

Provides a foundation for understanding the field of counseling. This course covers what counselors do, the qualities of effective counseling, and presents basic concepts of the most influential theories of modern counseling, considering the strengths and weaknesses of each. It also examines legal, ethical, and cross-cultural issues.

Prerequisite(s): PSY 101 or PSY 111.

and long-term storage, perception, memory, concept formation, language acquisition, problem solving, imagination, and creativity. Students explore how people acquire, process, store, and use information. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 221, PSY 121.

sis, treatment, rehabilitation, and health care delivery are studied. Positive and negative health behaviors and social support are evaluated. Students explore career options and requirements in the field of health psychology. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 121.

individuals with a focus on improving athletic performance both mentally and physically. Assisting athletes to achieve their potential is examined. Students explore career options and requirements in the field of sports psychology. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 121.

Develops a personal understanding of stress and a proactive approach for confronting negative stressors and reactions to stress through class discussion, small group interaction, and projects.

chopathology. Topics include current theory and research; ethical and social issues; and historical and current approaches to treatment of mental illness. Prerequisite(s): PSY 101 or PSY 111.

PSY 321 Psychology of Disability......4 QH

Explores the psychosocial adjustment to physical and emotional disability from the patient, family, and caregiver perspectives. Abnormal reactions and methods of facilitating adjustment are also discussed. Prerequisite(s): PSY 101 or PSY 111.

PSY 331 Human Development I......4 QH

Focuses on theories and research in human development from conception to puberty. Selected topics include physical, language, intellectual, moral, personality, and socioemotional development. Prerequisite(s): PSY 111.

PSY 332 Human Development II......4 QH

Examines the theories and research in human development from adolescence to old age and death. Topics covered are physical, cognitive, personality, and socioemotional development, including identity, delinquency, drug use, career, relationships, retirement, and health care. Prerequisite(s): PSY 111.

of a wide range of topics in the area of human sexuality. Emphasis is on the development of an understanding and appreciation of variations of sexual expression and the role of sexuality throughout the various phases of the life cycle.

Prerequisite(s): PSY 101 or PSY 111.

PSY 336 Psychology of Gender4 QH

Explores the bio-cultural influences that contribute to gender differences. Theories, myths, and stereotypes related to gender are reviewed. Topics include historical trends, role conflicts, impact of life events, identity development, and employment. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 221

PSY 350 Child Psychology4 QH

Explores human development from conception through adolescence, with an emphasis on mental, social, and emotional growth. Developmental processes of socialization, cognition, emotional growth, and personality development are examined. Theories about child development are assessed. Research findings on disorders common to children are considered. Prerequisite(s): PSY 221.

ing dynamics. This course focuses on understanding and working with adolescents and pre-adolescents in our society, with an emphasis on behavior development. It includes physical, emotional, social, and intellectual growth of adolescents.

Prerequisite(s): PSY 111.

PSY 355 Personality Psychology4 QH Surveys major studies of personality and theories related to personality development. Examines how interpersonal behavior is influenced by individual differences. Students are provided opportunities to analyze the results of personality indicators. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 221, PSY 121.

PSY 361 Introduction to Psychological Research......4 QH Provides a foundation for understanding research in the field of psychology. Issues involving conducting assessments of experimental and field research (sampling strategies, questionnaire construction, interviewing, coding and analysis, and interpretation), as well as ethical aspects of scientific inquiry, are addressed. Career paths and options are investigated. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 221, PSY 121.

PSY 371 Quantitative Methods......4 QH Examines how to critique and conduct quantitative research studies, write literature reviews, and develop theories and hypotheses. Tools of research, research planning and design, research methodologies and communication of research results are also investigated. Students receive experience in APA writing, citing references, finding sources, conducting quantitative research, and collaborative learning. The relationship between research and theory is addressed. The distinction between descriptive and inferential statistics will be evaluated. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 361, MTH 401.

Examines the influence of culture on the individual. Illustrates commonalities and differences in behavior in a variety of cultures. Some topics covered include perception, gender, emotions, cognition, verbal and nonverbal communication, sexual orientation, and socialization. Multicultural views and cultural adaptation are addressed. This course is exclusive to the Bachelor of Science in Psychology

(Online only). Prerequisite(s): PSY 361.

PSY 385 Area Studies in Psychology4 QH Provides the opportunity to conduct in-depth research on a career-related topic of interest. Topics vary from other Baker College Bachelor of Science in Psychology offerings. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 121.

PSY 386 Scientific Topics in Psychology4 QH Provides the opportunity to conduct in depth research on scientific topics of interest. Topics vary from other Baker College Bachelor of Science in Psychology offerings. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 121.

PSY 387 Specialized Topics in Psychology4 QH Provides the opportunity to conduct in-depth research on a topic of interest related to diversity. Topics vary from other Baker College Bachelor of Science in Psychology offerings. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 121.

PSY 391 Bio-Chemical/Neural Psychology4 QH

Includes the study of primate brain activity, bio-chemical and electrical processes, and neural patterns that underlie behavior. Students develop an understanding of brain functions in relation to behavior. Normal brain activity is compared and contrasted with abnormal brain activity. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 361.

PSY 395 Specialized Practical Experience4 QH

Provides an opportunity for career exploration by receiving experience in chosen area of psychology and applying it in a work environment. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 121.

PSY 396 Practical Experience in Science4 QH Provides an opportunity for career exploration by receiving and applying scientific experience in a work environment. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 121.

PSY 397 Practical Experience4 QH Provides an opportunity for career exploration by receiving experience in a

work environment with varying types of populations. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 121.

such as attitudes and attitude change, altruism, effects of being in a group, conformity, obedience, persuasion, and interpersonal attraction are studied. *Prerequisite(s): PSY 101 or PSY 111.*

late adulthood. Topics include physical and mental health, health care, living arrangements, intellectual and perceptual functioning, marriage and family, sexuality, widowhood, retirement, leisure activities, social relations, the dying process, and bereavement.

Prerequisite(s): PSY 332.

PSY 405 Psychopharmacology.....2 QH

Studies the history and development of psychopharmacological agents, their effects on the biochemistry of the human being, the legitimate use of medications, and their importance for treatment. Topics include a review of the classes of psychotropic drugs, drug overdose, the side effects and interactions of psychotropic drugs, and drug tolerance.

Prerequisite(s): PSY 311.

PSY 411 Clinical Methods in Mental Health......4 QH Surveys the theoretical and practical issues and concerns involved in helping people with behavioral and emotional problems. The topics covered include psychological interviewing, diagnostic testing, individual and group counseling, and psychotherapy. Hospitalization and medical treatments are also discussed. Prerequisite(s): PSY 311.

PSY 421 Qualitative Methods4 QH

Focuses on the qualitative methods of conducting research in a continuation of PSY 361. Students critique and conduct qualitative research studies and write literature reviews. Developing hypotheses and theories relating to qualitative research is studied. An understanding of appropriate research methodologies is developed. Students continue to demonstrate appropriate use of research tools, research planning and design, methodologies, and communication of results. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 371.

development. Students explore the relationship among brain function, physio-

logical processes, and behavior. Other topics include sensory motor activities and the influence of hormones on behavior. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 391.

PSY 441 Sensation and Perception4 QH Provides an overview of the five senses (vision, hearing, touch, taste, and smell) with a specific concentration on vision and hearing. Students develop an understanding of how humans distinguish the use of these senses in interpreting the world. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 391.

PSY 442 Learning and Memory......4 QH

Surveys issues related to learning and retention of learning among various species, including Homo sapiens. Major theories about memory are evaluated. Topics of classical and operant conditioning, cognitive learning theory, information processing, attention, and models of short- and long-term memory are assessed. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 441.

PSY 445 Motivation and Emotion......4 QH

Explores the biological and physiological bases that control instinctive drives. Additional emphasis is placed on curiosity, aggression, and emotional responses to external information, as well as the history of motivation. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 391.

PSY 451 Psychopharmacology for Psychology Majors......4 QH Surveys psychopharmacology, psychotropic drugs, and drug therapy, with an emphasis on the influence of drugs on mental capacity, performance, and tolerance. Examines current and possible drug treatments for psychopathological symptoms. Addictive drugs, over medicating, substance abuse, over diagnosing, and alternative methods are evaluated. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 311, PSY 391.

PSY 471 Data Analysis in Social Science4 QH Allows students to pilot assessment measures developed over the course of PSY 361, 371, and 421; collect data; and analyze the results using SPSS. Students receive experience analyzing data from both qualitative and quantitative studies. Students learn the appropriateness of various analytical procedures for various data sets and use a variety of data analysis methods. Reliability and validity of measures are evaluated. This course is exclusive to the Bachelor of Science in Psychology (Online only).

Prerequisite(s): PSY 421.

personalities. Theories surrounding inventory development are examined. Procedures to develop and use various testing and measurements are studied. The significance of ethics in testing is addressed. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 371.

PSY 491 Senior Seminar: Psychology......4 QH Reflects a synthesis of the student's program through completion of individual occupationally-oriented research project stemming from prior work completed in PSY 361, 371, 421, and 471. This course is exclusive to the Bachelor of Science in Psychology (Online only). Prerequisite(s): PSY 471, Senior status.

RADIATION THERAPY

RDT 101 Introduction to Radiation Therapy4 QH Gives students an overview of radiation therapy and its contribution to the health care team. This course addresses such topics as professional standards of competencies, accreditation, credentialing, professional organizations, and career mobility. Additionally, students will explore current oncology problems, theories of cancer development, cancer prevention, cancer management, treatment techniques, and protocols used in providing optimal cancer management. Prerequisite(s): Dean's approval.

and probable routes of spread for cancer of anatomical sites treated primarily with radiation. Topographic landmarks, anatomical imaging, overview of simulation equipment, and patient positioning are the focus of this course. 35 hours of lecture and 10 hours of lab are required.

Prerequisite(s): Acceptance in the program.

RDT 103A Imaging for Oncology II4 QH

Continues the study of design and simulation of treatment ports of primary cancer sites and probable routes of spread via the simulator for cancer of anatomical sites treated primarily with radiation. 35 hours of lecture and 10 hours of lab are required.

Prerequisite(s): B- or better in RDT 102A.

RDT 104A Processes and Procedures for Radiation Therapy2 QH

Provides students with an understanding of the principles of exposure while per-forming an analysis of radiographic quality of films produced in a simulation process for radiation therapy. Students will produce radiographs during the laboratory sessions according to specific guidelines for simulation. 18 hours of lecture and 4 hours of lab are required. Prerequisite(s): Acceptance in the program.

RDT 211A Oncology Management I4 QH Introduces normal/abnormal cytology, cell pathology, radiation reactions, and patient care protocols. Multidisciplinary modalities of treatment and rationale

for treatment choices are introduced. Prerequisite(s): B- or better in RDT 271A.

RDT 212A Oncology Management II4 QH

Continues the study of multidisciplinary approach to patient treatment and prognosis as well as psychosocial interventions with patient and family. Prerequisite(s): B- or better in RDT 211A.

RDT 244 Dosimetry I......4 QH

Introduces students to the concepts of treatment planning, i.e., external beam (photon & electron) techniques, depth dose, isodose curves, summation of plans, and manual and computer calculations. Prerequisite(s): B- or better in RDT 312.

RDT 245 Dosimetry II......4 QH

Continues the concepts of treatment planning, including but not limited to, irregular field techniques, moving beam therapy, and brachytherapy with manual and computer calculations.

Prerequisite(s): B- or better in RDT 244.

RDT 251 Quality Management2 QH

Provides the principles and concepts of quality management/assurance as they relate to radiation therapy and regulatory bodies. Methods for performing various tasks/evaluations involved in quality management will be discussed. This course will include quality assurance factors for identifying optimal parameters for a functioning radiation therapy department. *Prerequisite(s): Acceptance in the program.*

RDT 260 Radiobiology......2 QH

Provides an in-depth presentation of cell response to radiation. Factors which influence the effects of radiation, tissue sensitivity, and environmental responses are discussed.

Prerequisite(s): Acceptance in the program.

RDT 271A Patient Care Management......2 QH

Exposes the radiation therapy student to basic concepts of patient care, chemotherapy protocols, agents and side effects, oncologic problems, and emergencies as well as psychological aspects of the cancer patient that will confront students in the medical setting. Emphasis on the total patient is presented with regard to the patient's physical, psychological, social, and spiritual needs. Prerequisite(s): Acceptance in the program.

Introduces students to the various treatment machines, recordkeeping mechanisms, treatment planning processes, etc., in the clinical education center. This course is an observatory/hands-on laboratory conducted at the clinical education center(s) for 80 hours. Some evening labs may be required.

Prerequisite(s): B- or better in RDT 212A, Student background check.

RDT 311 Radiation Therapy Physics I4 QH Introduces basic physics concepts and their relationship to radiation and protection. This course covers forces, matter and energy, heat and heat transfer, waves, light, electricity and magnetism, atomic physics, and radioactivity.

Properties and production of x-rays, radiation, interactions with matter, radiation exposure, x-ray tubes, and circuitry are included. Prerequisite(s): Acceptance in the program.

RDT 312 Radiation Therapy Physics II......4 QH

Focuses on the principles of radiation therapy physics and protection and how they relate to the operation of radiation therapy equipment, fundamental procedures in dose measurement and certification, and machine calibration as well as radioactive materials.

Prerequisite(s): B- or better in RDT 311.

Provides students with an understanding of 3-D medical imaging and its value to radiation therapy in relationship to tumor localization, volume visualization, treatment planning, visualization of normal and abnormal anatomy, and 3-D patient geometry as well as the machinery used to produce the images. Prerequisite(s): B- or better in RDT 104A.

RDT 401 Clinical Practicum I......8 QH Provides hands-on opportunities at clinical education centers. This is the first

in a series of four courses. Students actively participate/observe simulation, treatment planning, custom block making, treatments, and patient care procedures. Students will also attend "tumor" and other relevant conferences to enhance their knowledge of cancer and its processes, which in turn allows them to procure the skills/competencies necessary to become a radiation therapist. All objectives are competency based. 320 clinical hours are required. Prerequisite(s): Dean's approval.

RDT 402 Oncology Practicum I4 QH Provides students with the chance to express his/her knowledge of the principles of oncology management, normal/abnormal cytology, pathology, radiation reactions, and patient care, for specific anatomical sites. This is the first course in a series of independent study courses. Students will state the multidisciplinary modality treatments and rationale for these treatments based on the

anatomical site of interest. All objectives are based on knowledge previously acquired in the radiation therapy didactic courses and clinical practicums. Prerequisite(s): Dean's approval.

RDT 403 Clinical Practicum II8 QH Provides students with hands-on experience in a radiation oncology center. This is the second in a series of four courses. Students will continue to actively participate in all aspects of radiation therapy with an emphasis on competencybased objectives. 320 clinical hours are required. Prerequisite(s): B- or better in RDT 401.

Provides students the chance to express his/her knowledge of principles of oncology management, normal/abnormal cytology, pathology, radiation reactions, and patient care for specific anatomical sites. This is the second in a series of four independent study courses. Students will state the multidisciplinary modality treatments and rationale for these treatments based on the anatomical site of interest. All objectives are based on knowledge previously acquired in the radiation therapy technology didactic courses and clinical practicums. Prerequisite(s): B- or better in RDT 402.

RDT 405 Clinical Practicum III8 QH

Provides students with hands-on experience in a radiation oncology center. This course is the third in a series of four courses. Students will continue to actively participate in all aspects of radiation therapy with an emphasis on competencybased objectives. 320 clinical hours are required. Prerequisite(s): B- or better in RDT 403.

RDT 406 Oncology Practicum III4 QH

Provides students the chance to express his/her knowledge of oncology management. This is the third in a series of four independent study courses. The emphasis shifts to specific case histories for which students will be required to analyze the contents of the history and define the expected treatment/outcome. Prerequisite(s): B- or better in RDT 404.

RDT 407 Clinical Practicum IV8 QH Provides students the opportunity to actively participate in all aspects of radiation therapy with an emphasis on competency-based objectives. This is the fourth and final course. Students are expected to perform all assignments at the level of an entry-level radiation therapist. 320 clinical hours are required. Prerequisite(s): B- or better in RDT 405.

RDT 408 Oncology Practicum IV......4 QH

Provides students the chance to express his/her knowledge of oncology management. This is the fourth and final course in a series of four independent studies. The emphasis continues on specific case histories for which students will be required to analyze the contents of the history and define the expected treatment/outcome.

Prerequisite(s): B- or better in RDT 406.

RADIOGRAPHY

RAD 131 Introduction to Radiographic Practice......2 QH

Introduces an overview of the foundations in radiography and the role of the radiographer as a member of the health care team. Principles, practices and policies of the health care organization are examined and discussed in addition to the professional responsibilities of the radiographer. The history of radiography will be presented along with legal and ethical issues related to the profession. Radiation protection will be introduced.

Prerequisite(s): Acceptance in the program. Corequisite(s): RAD 151, RAD 141.

RAD 141 Patient Care in Radiography......5 QH Exposes radiography students to basic concepts of patient care that will confront them in the medical setting. Theory and practice will include such areas as infection control, microbiology, history taking, vital signs, dealing with emergencies, and patient positioning and transfer methods. Emphasis on the total patient is presented with regards to the patient's physical, psychological, social, and spiritual needs. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program. Corequisite(s): RAD 151, RAD 131.

RAD 151 General Imaging I5 QH Explores the diverse field of diagnostic imaging equipment used in radiographic/fluoroscopic machines and generators. Radiographic film processing, types of film, and equipment problems will be investigated. Various image receptions will be analyzed. Emphasizes the concepts and tools used to generate exposures and create images. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program. Corequisite(s): RAD 131, RAD 141.

RAD 152 General Imaging II5 QH Explores the diverse field of diagnostic imaging equipment used in radiographic/fluoroscopic machines and generators. Radiographic film processing, types of film, and equipment problems will be investigated. Various image receptions will be analyzed. Emphasizes the concepts and tools used to evaluate images and modify exposures. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in RAD 161, C or better in RAD 211, C or better in RAD 221, C or better in RAD 231. Corequisite(s): RAD 241, RAD 212.

Content is designed to impart an understanding of the components, principles and operation of digital imaging systems found in diagnostic radiology. Factors that impact image acquisition, display, archiving and retrieval are discussed. Principles of digital system quality assurance and maintenance are presented. Prerequisite(s): C or better in RAD 151, C or better in RAD 131, C or better in RAD 141. Corequisite(s): RAD 211, RAD 221, RAD 231.

Applies anatomical knowledge of structure and terminology of the chest, abdomen, upper and lower extremities to the production of diagnostic x-ray images. Positioning devices and techniques will be introduced. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in RAD 151, C or better in RAD 131, C or better in RAD 141. Corequisite(s): RAD 161, RAD 221, RAD 231.

Applies increasing anatomical knowledge of structure and terminology of the thorax, spine, abdomen, and skull to the production of diagnostic x-ray images. The optimal use of positioning devices and techniques will be reinforced in this course. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in RAD 161, C or better in RAD 211, C or better in RAD 221, C or better in RAD 231. Corequisite(s): RAD 152, RAD 241.

RAD 213 Radiographic Positioning III5 QH

Applies knowledge of structure, function, and terminology of oral and intravenous contrast studies. Positioning devices, immobilization techniques, and trauma radiography will be included along with emphasis on radiation protection during fluoroscopy. Special considerations related to pediatric radiography will be introduced. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): C or better in RAD 152, C or better in RAD 241, C or better in RAD 212. Corequisite(s): RAD 251. RAD 213L Radiographic Positioning III Lab

RAD 221 Radiographic Pharmacology2 QH

Content is designed to provide basic concepts of pharmacology. The theory and practice of basic techniques of venipuncture and administration of diagnostic contrast agents and/or intravenous medications is included. The appropriate delivery of patient care during these procedures is emphasized.

Prerequisite(s): C or better in RAD 151, C or better in RAD 131, C or better in RAD 141. Corequisite(s): RAD 161, RAD 211, RAD 231.

RAD 231 Radiographic Science Theory2 QH

Explores basic concepts in general physics such as energy, power, work, momentum, force velocity, and acceleration. Fundamental theories of photon (quantum) properties are introduced. Analysis of the various interactions of ionizing radiation with matter is emphasized. Sources and measurement of ionizing radiation are discussed.

Prerequisite(s): C or better in RAD 151, C or better in RAD 131, C or better in RAD 141. Corequisite(s): RAD 161, RAD 211, RAD 221.

RAD 241 Radiographic Biology and Protection2 QH Explores biological principles that are fundamental to understanding radiation safety. The relationship of radiation dose level to somatic, genetic, and stochastic effects are emphasized. The importance of x-ray energy level and area of exposure is reinforced.

Prerequisite(s): C or better in RAD 161, C or better in RAD 211, C or better in RAD 221, C or better in RAD 231. Corequisite(s): RAD 152, RAD 212.

RAD 251 CT and Advanced Procedures4 QH Expands the knowledge of special radiographic procedures, equipment, and techniques. Attention will be given to the areas of sectional anatomy, computed tomography (CT), angiography, and mammography. Advanced radiographic procedures will also be discussed.

Prerequisite(s): C or better in RAD 152, C or better in RAD 241, C or better in RAD 212. Corequisite(s): RAD 213.

RAD 271 Radiographic Clinical I12 QH

Provides the opportunity for development and application of basic clinical skills in a radiologic practice setting. This is the first of three clinical courses. Requires students to observe, participate, and independently prove competency in radiographic procedures presented in RAD 271-RAD273. Students will function under the direct supervision of a registered technologist until competency is proven; then supervision may be indirect. Many of the clinical objectives are outcome based on competency requirements of the ARRT. Other course objectives are outcome based on professional behavior and the continued learning of theoretical material from the prior year of study. Radiographic theory will be reinforced and expanded. This is a 12 week rotation including 472 clinical hours. Prerequisite(s): C or better in RAD 251, C or better in RAD 213.

RAD 272 Radiographic Clinical II12 QH Provides the opportunity for development and application of intermediate clinical skills in a radiologic practice setting. This is the second of three clinical courses. Requires students to observe, participate, and independently prove competency in the radiographic procedures presented in RAD 271-RAD 273. Students will function under the direct supervision of a registered technologist until competency is proven; then supervision may be indirect. Many of the clinical objectives are outcome based on competency requirements of the ARRT. Other course objectives are outcome based on professional behavior and the continued learning of theoretical material from the prior year of study. Radiographic theory will be reinforced and expanded through web-based instructional tools. This is a 12 week rotation including 472 clinical hours. Prerequisite(s): C or better in RAD 271.

RAD 273 Radiographic Clinical III10 QH Provides the opportunity for development and application of advanced clinical skills in a radiologic practice setting. This is the final clinical course for the program. Requires students to observe, participate, and independently prove competency in the radiographic procedures presented in RAD 271-RAD 273. Students will function under the direct supervision of a registered technologist until competency is proven; then supervision may be indirect. Many of the clinical objectives are outcome based on competency requirements of the ARRT. Other course objectives are outcome based on professional behavior and the continued learning of theoretical material from the prior year of study. Radiographic theory will be reinforced and expanded through web-based instructional tools. Activities that encourage professional development beyond entrylevel will be included. This is a 10 week course including 380 clinical hours. Prerequisite(s): C or better in RAD 272. Corequisite(s): RAD 291.

RAD 291 Preparation to Achieve Student Success (PASS)......2 QH Emphasis will be placed on preparing the student to achieve the successful outcome of professional certification by synthesizing knowledge from previous coursework in radiography. Strategies for reinforcement of concepts that summarize cumulative knowledge will be introduced. A simulated radiography registry exam will be administered as a primary test for the graduation candidate. A passing score must be achieved on this test for successful completion of the course.

Corequisite(s): RAD 273.

REHABILITATION STUDIES

RHS 471 Evidence-Based Practice and Clinical Research I......4 QH

Culminates the completion of the Bachelor of Rehabilitation Studies coursework in this first of two capstone courses. Students will conduct professional literature reviews and examine evidence-based practice research pertaining to the occupational and physical therapy professions. Areas of study include: neurological rehabilitation, orthopedics, wellness and health promotion, and geriatrics. A professional portfolio containing evidence-based clinical research, literature reviews, clinical observations/discussions, and professional presentations is required.

Prerequisite(s): Dean's approval.

RHS 472 Evidence-Based Practice and Clinical Research II4 QH

Culminates the completion of the Bachelor of Rehabilitation Studies program in this final capstone course. Students will conduct professional literature reviews and examine evidence-based practice research pertaining to the occupational and physical therapy professions. Areas of study include: acute care and rehabilitation, pediatrics, mental health, and special topics. A professional portfolio containing evidence-based clinical research, literature reviews, clinical observations/discussions, and professional presentations is required. *Prerequisite(s): RHS 471, Dean's approval.*

RESPIRATORY CARE

Provides an introduction to respiratory care as a health care profession. This course also provides orientation and lecture to basic practices of respiratory care including gas laws, administrations of medical gases, infection control, essentials of equipment maintenance and sterilization, aerosol, and humidity therapies.

Prerequisite(s): Acceptance in the program. Corequisite(s): RSC 206A.

Provides continuation of lecture for procedures, techniques, and equipment used in respiratory care. Topics include the use of volume expansion therapy, bronchopulmonary hygiene therapy, airway care/management, and resuscitation. Protocols and documentation used in the practices of respiratory care will be emphasized.

Prerequisite(s): B- or better in RSC 201, B- or better in RSC 206A. Corequisite(s): RSC 207A.

Introduces the study of ventilation drive mechanisms, ventilator support devices, and related physical principles. Factors leading to ventilator initiation, dependence, directed weaning protocol, assessment, monitoring and maintenance; discontinuation and documentation for adult care will be discussed. *Prerequisite(s): B- or better in RSC 202, B- or better in RSC 207A. Corequisite(s): RSC 208A.*

Focuses on advanced applications in clinical practice. Covers testing and values related to spirometry, pulmonary function, chest radiography, EKGs, chest tube drainage, and hemodynamic monitoring. Students will be expected to give an oral presentation in this course.

Prerequisite(s): B- or better in RSC 203, B- or better in RSC 262. Corequisite(s): RSC 241, RSC 263.

RSC 205 Respiratory Care Practices and Procedures V4 QH

Studies pulmonary rehabilitation strategies and smoking cessation and covers homecare equipment, maintenance, procedures, patient assessment, protocols, and documentation. Students may be required to attend a state or local conference or symposium as related to course topics.

Prerequisite(s): B- or better in RSC 204. Corequisite(s): RSC 264.

RSC 206A Respiratory Care Practices and Procedures Lab I2 QH

Serves as a laboratory counterpart to RSC201. Students will develop pre-clinical skills in storage and administration of medical gases, infection control, essentials of equipment maintenance and sterilization, aerosol, and humidity therapies. This lab includes 40 contact hours.

Prerequisite(s): Acceptance in the program. Corequisite(s): RSC 201.

Serves as a laboratory counterpart to RSC202. Students will continue to develop pre-clinical skills in basic respiratory care procedures including volume expansion therapies, chest physiotherapy, humidity and aerosol treatments, and airway care/management, and resuscitation. The ABG puncture and technique will also be emphasized. This lab includes 40 contact hours.

Prerequisite(s): B- or better in RSC 201, B- or better in RSC 206A.

Corequisite(s): RSC 202, RSC 261.

Serves as a laboratory counterpart to RSC203. Students will begin to develop preclinical skills in mechanical ventilatory support. Introduction to assembly, operation, clinical application, monitoring systems, maintenance, and troubleshooting. Clinical documentation will be practiced. This lab includes 40 contact hours.

Prerequisite(s): B- or better in RSC 202, B- or better in RSC 207A. Corequisite(s): RSC 203.

Prerequisite(s): B- or better in RSC 211. Corequisite(s): RSC 202, RSC 261.

Prerequisite(s): B- or better in RSC 221. Corequisite(s): RSC 203, RSC 262.

Prerequisite(s): Acceptance in the program. Corequisite(s): RSC 201, RSC 211.

Prerequisite(s): B- or better in RSC 222, B- or better in RSC 262. Corequisite(s): RSC 204, RSC 263.

Provides students a supervised opportunity to work with a preceptor or clinical instructor, applying the concepts learned in the laboratory and lecture formats. Beginning therapy skills including oxygen, aerosol and drug delivery, lung expansion therapies, and other modalities will be developed in the patient care setting. This course requires 16 contact hours per week. Experience consists of 160 actual contact hours.

Prerequisite(s): B- or better in RSC 206A, B- or better in RSC 211, Student background check. Corequisite(s): RSC 202, RSC 221.

Expands on the concepts learned in the laboratory and lecture formats in RSC201 and 202. Basic floor therapy will continue, with an introduction to mechanically ventilated patients, blood gas interpretation, and development of critical thinking skills in the clinical environment. This course requires 24 contact hours per week. Experience consists of 240 actual contact hours.

Prerequisite(s): B- or better in RSC 261. Corequisite(s): RSC 203, RSC 222.

Provides a clinical experience using advanced respiratory care equipment in the clinical setting with an emphasis on critical thinking skills, gathering data, and decision making relative to adult critical care, ventilatory mechanics and airway management. This course requires 24 contact hours per week. Experience consists of 240 actual contact hours.

Prerequisite(s): B- or better in RSC 262. Corequisite(s): RSC 204, RSC 241.

RSC 264 Clinical Care IV......8 QH

Provides a clinical experience with emphasis on problem-solving, critical-thinking, and decision-making skills in the clinical setting. This clinical provides students with specialty rotations, which may include PFT lab, neonatal/pediatric care, homecare, polysomnography, out-patient clinic, sub-acute care, and skilled nursing facilities. This course requires 32 contact hours per week. Experience consists of 320 actual contact hours.

Prerequisite(s): B- or better in RSC 263. Corequisite(s): RSC 205.

Covers ethical issues and reviews trends and issues related to respiratory care. Topics include review for national board examination preparation (CRT and RRT) and clinical proficiency using computer-assisted instruction and other modalities. Students will take NBRC self-assessment examinations (SAE). Prerequisite(s): B- or better in RSC 264.

SCIENCE

SCI 100F Structure and Function of the Human Body......4 QH

Introduces students to the structural organization of body systems. This course is designed for students with limited background in chemistry and biology. This course is intended for allied health students who need an overview of body systems. Students should check specific program requirements for anatomy and physiology before enrolling.

and function of body parts, organs, and systems and their relationship to the whole body. Laboratory work may include the use of the microscope, experiments/demonstrations in physiologic principles, and the dissection of animal parts. 40 hours of lecture and 20 hours of lab are required.

SCI 102C Human Anatomy and Physiology II......5 QH

Emphasizes the structure and function of the various body systems. Laboratory work will include the dissection of mammal organs. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): B- or better in SCI 101C. Radiologic Technology majors: C+ or better in SCI 101C. Health Information Technology majors: C or better in SCI 101C.

Provides an introduction to basic biological concepts. Topics include classification of plants and animals, cell theory, cell structure, plant and animal tissues and organs, nutritional requirements of plants and animals, energy metabolism, and use of basic biology laboratory techniques and equipment. 40 hours of lecture and 20 hours of lab are required.

SCI 121 Physics Concepts2 QH

Introduces various topics in physics. Motion, energy, and the dynamics of particles are investigated. The physical concepts of fluid mechanics, thermodynamics, and wave motion are explored as well as selected topics in atomic and nuclear physics.

Prerequisite(s): MTH 112.

SCI 211 Pathophysiology......4 QH

Examines general disease mechanisms with an emphasis on the disease processes within each body system.

Prerequisite(s): B- or better in SCI 102C. Radiologic Technology majors: C+ or better in SCI 102C. Health Information Technology majors: C or better in SCI 102C.

Introduces the principles of physics. Concepts explored include mechanical, fluid, electromagnetic, and thermal systems. Prerequisite(s): MTH 124.

Introduces the basic theories and laboratory examinations of the basic composition of living cells. Structure and function of various microbes will be explored; the human diseases caused by these microbes in addition to their treatments will be presented. A 20 hour laboratory will be a component of this course; students will perform several experiments to reinforce the material presented in lecture

Introduces students to general chemical principles, particularly emphasizing periodic properties, fundamental chemical calculations, formulas, equations, bonding, and nomenclature. Students develop selected chemistry lab skills through the practical application of techniques and procedures. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): B- or better in MTH 111.

Provides an overview of biochemical structures and reactions that occur in living systems. Emphasis is placed on the areas of energy, proteins, and catalysis as well as metabolism and molecular genetics. Prerequisite(s): SCI 221.

SCI 241 General Chemistry I......4 QH Explores atomic structure, chemical bonding, periodicity of atoms, and stoichiometry. The concepts of acid-base theory, chemical equilibria, and chemical thermodynamics are presented. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): SCI 221.

Continues the presentation of topics covered in General Chemistry I. 30 hours

of lecture and 20 hours of lab are required. Prerequisite(s): SCI 241.

SCI 251 General Physics I......4 QH Covers classical mechanics. 30 hours of lecture and 20 hours of lab are required. Corequisite(s): MTH 141.

SCI 252 General Physics II......4 QH

Covers heat and thermodynamics, electricity, and magnetism. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): SCI 251. Corequisite(s): MTH 142.

SCI 253 General Physics III......4 QH

Covers oscillatory motion, heat and thermodynamics, optics, and modern developments. 30 hours of lecture and 20 hours of lab are required. Prerequisite(s): SCI 252.

Emphasizes advanced human anatomy and physiology as well as the study of movement biomechanics and basic physics principles. Angiology, arthrology, osteology, and myology are explored by anatomical region. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): B- or better in SCI 102C.

Gives students a base of knowledge of the organizing principles of human neural structure and function. Upon completion of the course, students should have a good foundation for future clinical or other advanced courses in neuroscience. Prerequisite(s): B- or better in SCI 102C.

SCI 321 Principles of Astronomy4 QH

Provides a comprehensive introduction to astronomy. Topics include the solar system, stars, galaxies, cosmology, and history of astronomy. Astronomical laboratory investigations are part of the course.

SCI 331 Organic Chemistry4 QH

Introduces students to the field of organic chemistry. Emphasis is placed on nomenclature, structure, and physical and chemical properties of the major functional groups found in organic molecules. Prerequisite(s): SCI 242.

SCI 332 Advanced Biochemistry4 QH

Explores the anabolic and catabolic pathways in the metabolism of lipids, carbohydrates, and proteins. This course also introduces students to the synthesis and utilization of DNA and RNA. Emphasis is placed on the clinical implications of metabolic pathways.

Prerequisite(s): SCI 231, SCI 331.

Introduces the basic concepts of inorganic chemistry: atoms, molecules, the periodic table, chemical reactions, and chemical equations. This course also introduces the principles of life science: plant and animal cells, ecosystems, human body systems, genetics, evolutionary change, and natural selection. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): MTH 111.

SCI 352 Science Foundations II: Astronomy, Earth Science, and Physics5 QH Studies the solar system, the earth's structure, and the laws and forces which

govern our planet and the universe as a whole. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): MTH 111, SCI 351.

Studies zoology from the levels of single-celled organisms to complex organ systems. The course addresses the general principles of modern zoological theory, systematics, evolution, reproduction, development and animal diversity. Students explore the general concepts of zoology and taxonomic classification, characteristics of living organisms, Darwin's principle of evolution, and Mendel's principles of genetics. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): SCI 111.

Explores the principles of genetics with application to the study of biological function at the level of molecules, cells, and multi-cellular organisms, including humans. The topics include structure and function of genes, chromosomes and genomes, biological variation resulting from recombination, mutation, and selection, population genetics, use of genetic methods to analyze protein function, gene regulation and inherited disease. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): SCI 111.

Explores the relationship between man and the environment. Students examine the balance between natural resources including wildlife, their habitats, and the needs of man in the twenty-first century.

Familiarizes students with the professional community of chemistry educators and with state and national curricula and assessment standards with a focus on chemistry. Emphasis is on nomenclature, mole concepts, gas laws, laws of thermodynamics, chemical structure, and physical and chemical properties. Prerequisite(s): Senior status, Dean's approval.

SCI 493 Senior Seminar: Biology4 QH

Familiarizes students with the professional community of biology educators and with the state and national curricula standards with a focus on biology. Emphasis is on integration of biological concepts with ecological, environmental, and social issues facing our community in order to gain in-depth knowledge and explore possible solutions.

Prerequisite(s): Senior status, Dean's approval.

SMALL BUSINESS MANAGEMENT/ENTREPRENEURSHIP

Provides an introduction to prospective small business owners/operators of the principles involved in the planning and operations of a small business. Emphasis is placed on factors that contribute to a successful small business operation

Prerequisite(s): ENG 091 or placement exam, MTH 099E or placement exam.

SBM 121A Small Business Marketing and Promotion Techniques......4 QH Developing and refining the marketing and promotions plans for small businesses. Topics to include: research, merchandise/service resources, budgeting, competition, market segmentation, pricing, promotion, non media promotion, and strategic planning.

Prerequisite(s): ENG 091 or placement exam, MTH 099E or placement exam. Corequisite(s): MGT 101.

SBM 131 Managing Small Business Operations4 QH

Establishes a framework for an entrepreneur to manage day-to-day operations of a small business. Students learn to develop an understanding of short-term cash and credit operations, managing resources, accounting for inventory, establishing pricing policies and recognizing changes in the industry that affect dayto-day operations.

Prerequisite(s): MTH 099E or placement exam.

SBM 211A Accounting, Finance, and Tax for Small Businesses4 QH

Provides opportunities to develop accounting systems, financial plans, and budgets for small business. Financing sources for start-up and growing small businesses as well as income tax considerations for small businesses will be addressed. Exposure to financial accounting software will be used to illustrate automation of the financial and accounting functions. Applicable financial management ethics and laws will also be addressed. Prerequisite(s): ACC 122.

Provides students with an introduction to human resources and management for small businesses with an emphasis on: management and supervision, human resource planning, recruitment and selection, training, performance management, compensation, employee benefits, employment law, and conflict management as they relate to small businesses.

Prerequisite(s): ENG 091 or placement exam, MTH 099E or placement exam, MGT 101.

SBM 291 Small Business Management Seminar......4 QH Provides students with a survey of leadership issues and practices in an entrepreneurial business context. This course will lay out a map of the business

enterprise with individual class sessions focusing on the elements of that map. Students will gain perspective of the integrated components of operating a business.

Prerequisite(s): WRI 115, SBM 211A, SBM 131, SBM 121A, SBM 115. Corequisite(s): SBM 241.

SOCIOLOGY

SOC 201 Sociology4 QH Examines social organization, culture, and the relationship between society and the individual. The areas studied are social groups, roles and statuses, institutions, social stratification, socialization, social change, and social policy.

SOC 301 Social Problems......4 QH

Analyzes problems of contemporary society: drugs; poverty; environment; delinquency; and gender, race, and ethnic relationships. Prerequisite(s): SOC 201.

Examines the social construction of groups based on race, ethnicity and national origin, religion, gender, age, sexual orientation, and able-bodiedness. Sociological (as well as psychological, historical, economic, and anthropological)

perspectives are applied to concepts such as prejudice, stereotyping, discrimination, racial and ethnic identity, racial formation, power and privilege, assimilation and pluralism, and tolerance. Emphasis is on increasing knowledge, personal awareness, and sensitivity.

Examines the social construction of groups based on race, ethnicity and national

origin, religion, gender, age, sexual orientation, and able-bodiedness. Sociological (as well as psychological, historical, economic, and anthropological) perspectives are applied to concepts such as prejudice, stereotyping, discrimination, racial and ethnic identity, racial formation, power and privilege, assimilation and pluralism, and tolerance. Emphasis is on increasing knowledge, personal awareness, and sensitivity. This course is exclusive to the Accelerated Bachelor degree program.

Prerequisite(s): MTH 312R, WRI 312R.

SOC 341 Global Perspectives4 QH

Examines the values and cultural contexts of global professional settings. Emphasis is on analyzing problems and possible solutions in global interactions.

SPANISH

Introduces students to the basics of Spanish grammar, syntax, and communication. This course focuses on written and oral comprehension, spoken communication, and cultural understanding. Students are encouraged to communicate through a variety of practices with frequently used structures in everyday situations. Grammatical structures covered include conjugation of regular and irregular verbs; basics of correct pronunciation, agreement and placement of adjectives, nouns, and articles; and the formation of questions. Primary vocabulary areas covered include numbers, colors, classes, greetings, weather, and dates

Prerequisite(s): ENG 091 or placement exam.

SPN 102 Spanish II4 QH

Covers major grammatical topics including noun-adjective agreement, reflexive and stem-changing verbs, the present progressive construction, and the past tense. Vocabulary topics include personal care, health, clothing, the home, and travel. Cultural reading is presented to increase comprehension, and class participation is expected.

Prerequisite(s): SPN 101 or 1 year high school Spanish.

SPEECH COMMUNICATIONS

Develops confidence and skill in many facets of oral communication. Students explore diverse topics and formats, using both organization and research to support themselves during oral presentations.

physical expression. The literature emphasized is prose, poetry, and drama, which is analyzed for meaning, mood, and rhythm. Prerequisite(s): SPK 201.

SPK 211 Group Dynamics4 QH Integrates and applies knowledge gained from the oral communication and human relations classes. Specifically, small group communication in work and social organizations, both verbal and nonverbal, is the primary focus. Prerequisite(s): PSY 101 or PSY 111, SPK 201.

Practices individual formal presentations in a business context. The format includes a variety of speaking situations such as parliamentary procedure, briefings, sales, formal and informal discussions, and formal report presentations. Prerequisite(s): SPK 201.

STERILE PROCESSING TECHNICIAN

SPT 101 Introduction to Sterile Processing.....2 QH Introduces students to the profession of sterile processing. In addition to professional and personal liability, other outcomes will include patient bill of rights, consents, surgical conscience, certification, alternate career paths for sterile processing technicians, national and state professional associations, legislation relating to both health care and the profession of sterile processing, and the governmental organizations that regulate hospitals and sterile processing departments. Teamwork, customer service, and cultural diversity will also be addressed. A research paper relating to the profession will be required.

SPT 188B Sterile Processing, Distribution, and Materials Management4 QH Familiarizes students with the role and function of the sterile processing technician. Particular emphasis is placed on the personal characteristics necessary for the role. Introduces students to the operation of the department, principles, and concepts related to sterilization and distribution, packaging and storage, modes of transmission of common diseases, standard precautions, safety measures in the department, and principles of asepsis.

Prerequisite(s): C or better in MED 103, C or better in SPT 101, MTH 091 or placement exam. Corequisite(s): SPT 192.

SPT 192 Surgical Instrumentation, Decontamination, and Sterilization (with Lab)......4 QH

Focuses on various specialties and the instrumentation associated with each. Identification, assembly, care, and handling of surgical instruments and equipment will be introduced. In addition, the basic principles of decontamination, sterilization, packaging, maintaining sterility, and storage will be addressed. Safety considerations and regulations will also be discussed. There is a laboratory component to this course. Students will gain hands-on experience cleaning, packaging, and wrapping surgical instrument sets for processing and distribution. This course consists of 20 hours of lecture and 40 hours of lab. Prerequisite(s): C or better in MED 103, C or better in SPT 101, MTH 091 or placement exam. Corequisite(s): SPT 188B.

SURGICAL TECHNOLOGY

Provides insight into the operational requirements of surgical services. Content will include: organizational structures, agency compliance, professional organizations, code of ethics, patient's rights, and the roles and responsibilities of departmental personnel.

Covers the fundamentals of practice for the surgical technologist. Principles of asepsis, sterilization, wound healing and closure, sutures, dressings, catheters, drains, positioning, draping, and electrical safety will be studied. There is a laboratory component within this course to allow students to practice and apply the concepts learned in this course. Students will demonstrate competency in fundamental aseptic technique. 40 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program. Corequisite(s): STC 201A.

STC 201A The Surgical Patient4 QH

Provides an introduction to the biopsychosocial needs of the surgical patient, as well as cultural aspects related to patient care. Further discussion covers the legal, moral, and ethical responsibilities involved in surgery as well as the preoperative, operative, and postoperative phases of surgery. Additionally, patient transporting, positioning, and monitor placement will be studied. 30 hours of lecture and 20 hours of lab are required.

Prerequisite(s): Acceptance in the program. Corequisite(s): STC 101A.

STC 211A Surgical Pharmacology......4 QH Introduces students to basic types of anesthesia and the various agents used in the administration of anesthesia. Students will also become familiar with other types of pharmacologic agents that are used in the operating room and those specifically related to perioperative care.

Prerequisite(s): B- or better in SCI 211, C or better in STC 101A, C or better in STC 201 or C or better in STC 201A. Corequisite(s): STC 221, STC 231.

Continues content from STC101A enabling students to develop a foundation of knowledge in instrumentation, perioperative techniques, and intraoperative functions of the surgical technologist. Students will participate in mock procedures and identify specialized skills necessary to function and assist in the operating room. Students will demonstrate competency in perioperative surgical techniques. 60 hours of lab are required.

Prerequisite(s): B- or better in SCI 211, C or better in STC 101A, C or better in STC 201 or C or better in STC 201A. Corequisite(s): STC 211A, STC 231.

Acquaints students with the different sub-specialties of surgery including: general surgery, obstetrical surgery, gynecological surgery, ENT surgery, orthopedic surgery, and urogenital surgery. Students will also be introduced to endoscopic, laparoscopic, and technology utilized in surgical procedures. Prerequisite(s): B- or better in SCI 211, C or better in STC 101A, C or better in STC 201 or C or better in STC 201A. Corequisite(s): STC 211A, STC 221.

Continues on the content of STC231. Acquaints students with advanced procedures and future trends in surgical technology including: neurological surgery, ophthalmic surgery, peripheral vascular surgery, cardiovascular surgery, thoracic surgery, and oral/maxillofacial surgery. Biomedical sciences will be addressed as well as laser surgery. Guest speakers will include physicians, prac-

ticing CST's in specialty practice, and surgical equipment specialists. Prerequisite(s): C or better in STC 211A, B- or better in STC 221, C or better in STC 231. Corequisite(s): STC 271.

STC 271 Surgical Clinical Externship I10 QH

Develops clinical skills needed in an operating room. Students will actively participate in and assist with selected surgical procedures under the supervision of qualified personnel (32 clinical hours per week), for a total of 320 hours. *Prerequisite(s): C or better in STC 211A, B- or better in STC 221, C or better in*

STC 231, Student background check. Corequisite(s): STC 232.

STC 272 Surgical Clinical Externship II10 QH Helps students gain mastery of the specialized skills necessary to function in the operating room. Students will actively participate in and assist with a broad range of surgical procedures (32 clinical hours per week), for a total of 320 hours. *Prerequisite(s): C or better in STC 232, C or better in STC 271. Corequisite(s): STC 291.*

Provides STC students with the needed preparation to complete the certification exam process. This course reinforces academic knowledge, professional accountability, independent decision making, and the critical nature of selfassessment. Students will explore alternate career options. The completion of a mock certification exam is required.

Prerequisite(s): C or better in STC 232, C or better in STC 271. Corequisite(s): STC 272.

THERAPEUTIC MASSAGE

MSG 102 Massage Therapy II......4 QH

Broadens the student's experience by introducing more advanced techniques utilized in massage therapy. Students will be acquainted with and understand the essential principles of these bodywork systems.

Prerequisite(s): B- or better in MSG 101, B- or better in SCI 100F.

begin to assess clinical problems associated with kinesthetics. *Corequisite(s): MSG 102.*

MSG 121 Energy-Based Massage Techniques......4 QH

Explores theories of the flow of energy. Students will be introduced to various energy-based modalities.

Prerequisite(s): B- or better in MSG 101.

MSG 141 Therapeutic Massage Techniques......4 QH

Studies additional clinical issues that can be addressed by massage therapy techniques. This course offers a clinical approach to various areas of the body, addressing specific problems that cause pain and dysfunction. Critical thinking skills will be utilized in the assessment and care of musculoskeletal and soft tissue conditions.

Prerequisite(s): B- or better in MSG 102, B- or better in MSG 111.

Prerequisite(s): B- or better in MSG 102, B- or better in MSG 111.

Introduces students to the principles, rationale, and application of professional documentation for the field of therapeutic massage. Legal aspects of proper documentation and effective communication skills with other health care professionals will be emphasized.

Prerequisite(s): B- or better in MSG 101.

MSG 211B Pathology and Pharmacology for Therapeutic Massage4 QH Examines pathologies and common drug interactions that massage therapists encounter in professional practice.

Prerequisite(s): B- or better in MSG 102.

Corequisite(s): MSG 171A, MSG 102.

Students will refine their assessment skills in bodywork sessions with volunteer clients. Students will be supervised by instructors as they work throughout their 60 hours of work.

Prerequisite(s): B- or better in MSG 221B.

MSG 231A Preparation for Certification Examination......1 QH

Prepares students for a Certification Examination. This course is intended to be taken just prior to graduation.

Continues the development of client interaction skills in a 90-hour professional clinical setting. Students will be evaluated by on-site evaluators as well as massage therapy instructors.

Prerequisite(s): B- or better in MSG 211B, B- or better in MSG 222A, B- or better in MSG 261A. Corequisite(s): MSG 251.

natives and solutions to these issues. Prerequisite(s): B- or better in MSG 211B, B- or better in MSG 222A, B- or better in MSG 261A. Corequisite(s): MSG 241A.

MSG 261A Ethics for Therapeutic Massage2 QH

Explores various unique ethical issues typically encountered in therapeutic massage. Appropriate personal, professional, social, and client relationships will be discussed.

Prerequisite(s): B- or better in MSG 102.

TRUCK DRIVING/TRANSPORT MANAGEMENT

TRN 101A CDL Preparation I.....2 QH

Introduces student drivers to the requirements, mandated by the State, that they must achieve prior to earning their Commercial Drivers License (CDL). Prepares students for the first step in achieving their CDL, which is the successful completion of the knowledge tests administered by the State of Michigan prior to the issuing of a Temporary Instructional Permit (TIP). Additional instruction provided for all endorsement knowledge tests with the exception of the "passenger" endorsement.

Prerequisite(s): USDOT medical exam and drug screen.

Introduces student drivers to the basic skills required to operate a "big rig." Develops familiarity with driver techniques most often used in backing, parking, coupling, and uncoupling. This course is a combination of classroom/lecture and driving range instruction. This course requires minimum completion of 17.50 hours behind the wheel instruction in addition to classroom work. Prerequisite(s): Current TIP issued by Michigan.

TRN 112A Safe Operating Procedures2 QH Familiarizes students with safe operating practices and the perceptual skills required to operate a commercial vehicle under various driving conditions. Subject areas such as speed and space management, driving techniques for extreme conditions and evasive steering, and emergency braking techniques will be discussed. Students are also introduced to trip-planning and life on the road including topics such as time management, personal health, personal budgets, route planning, road rage, and fatigue.

TRN 122 Vehicle Maintenance......2 QH Focuses on the function of key systems; exposes students to pre-trip, en route

and post-trip inspection requirements. Introduces preventive maintenance and vehicle servicing procedures. Prepares student drivers for Part I of the State Administered Skills exam. This course requires 12.25 hours of lab instruction in addition to classroom time.

TRN 131 Technology in Transportation2 QH Exposes students to current innovations in transportation. Focus will be on Information Technology (IT) as it relates to cargo tracking, customer information, and global positioning. Qualcom systems and related hardware/software will be demonstrated. Software peculiar to the industry, such as driver management systems, dispatching programs, log checker and mileage maker will be introduced. Technologies in truck safety will also be discussed.

TRN 141 Introduction to Safety Supervisor's Functions.......2 QH Provides an abbreviated review of the more common job functions as they per-tain to safety supervisors and similar positions. Basic subjects will include vehicle inspections, fleet operations and maintenance records, driver qualification files, hours of service compliance, OSHA compliance, hazard identification and control, accident investigation, administration of drug testing programs, and loss prevention activities. Students will be required to use technologies introduced in TRN131 to develop qualification files, monitor student/employee logs, and insure compliance with hours of service regulations. Corequisite(s): TRN 131.

TRN 151 Practical Application-Behind the Wheel5 QH

Provides instruction in equipment that is comparable in size and power that is the industry norm. Instruction will normally occur on public streets and highways. Any combination of pre-planned routes and forced dispatch routing may be used to satisfy course outcomes. During at least 25% of street instruction the trailer will be loaded with a minimum of 15,000 pounds. Students will learn to use proper visual searches, communication techniques, speed management and space management. Practical basic operational skills will also continue to be addressed such as docking, drop and hooks, shifting, etc. Night operations are required. Majority of time at task is spent behind the wheel however some lab/classroom is involved. Successful students will earn a minimum of 30 hours behind the wheel and at least 6.5 hours of classroom/lab. This is a Pass/Fail course. Students failing the course will not be eligible for 3rd Party State CDL exam and the PTDI Certificate of Attainment.

Prerequisite(s): TRN 111, Current TIP issued by Michigan, USDOT medical exam & drug screen.

TRN 161 Practical Application for Decision Driving1 QH

Provides students with the opportunity to perform emergency/evasive maneuvers within a controlled environment. Students will learn to apply braking techniques, emergency steering, and how to manage skids and jackknifes. Students must meet all performance criteria. This course is Pass/Fail. Student who will be disgualified from being eligible for the PTDI Certificate of Attainment. This course is offered off-site in Marshall, Michigan at the Decision Driving Course, commonly referred to as the skid pad.

TRN 201A CDL Preparation II......2 QH Focuses on the final preparation for students prior to sitting for his/her State Third Party CDL Test. This course concentrates on the final development of the walk-around-inspection, basic skills, and road skills required to successfully test for a Commercial Drivers License. A minimum of 10 1/2 hours behind-thewheel instruction and three and a half hours of lab in addition to classroom hours are required. It is also required that students pass all school practical final exams and pass the Third Party State CDL exam to successfully complete the course.

experience with an approved commercial truckload carrier - local, regional, or over-the-road. Students will continue to develop the skills and competency necessary to become a solo, first-seat driver. Prerequisite(s): TRN 201A, current CDL.

ent day by examining the implementation of rules and regulations throughout the time period by various governmental agencies. Provides a fundamental understanding of the Federal Motor Carriers Safety Regulations from both an employee's and employer's perspective. Introduces proper procedures for completing driver's logs.

TRN 231 Transportation Management......4 QH Provides students with an overview to all the aspects of transportation. Discusses the changes that took place with the Deregulation Act of 1980, JIT competition in the market place, and globalization of business. Also discusses how the transportation industry affects the success of corporations and national economic development. Provides an understanding of how transportation effects natural resources including land, water, and air. Course provides an insight into the career paths and the future for both the transportation industry and logistics managers.

TRN 242 Supply Chain Management......4 QH Provides a basic knowledge of the supply chain strategy and concepts and will give students an understanding of the analytical tools necessary to solve supply chain problems. Three key areas and their interrelationships are addressed which include the strategic role of the supply chain, key drivers of supply chain performance, and the analytical tools and techniques for supply chain analysis. Procurement, outsourcing, inventory models, supply chain distribution strate-gies, pricing, and revenue management are some of the key topics addressed. Prerequisite(s): ECN 202.

TRN 251 Logistics Management4 QH Presents an overview of logistics discussing the development and growth in this field. Further addresses the elements of a logistics system examining areas such as order management, customer service, domestic transportation systems, traffic management, inventory management, distribution centers, warehousing, and international logistics. This course concludes with examining the components used in analyzing, designing, and implementing a logistics system.

TRN 262A Career Experience I2 QH Consists of 20 clock hours of experience in a transportation related field environment. Designed to expose students to a multitude of experiences associated with the transportation industry. Students have the opportunity to be exposed to warehousing and logistics, vehicle maintenance, terminal and facilities management, dispatching, human resources, sales, and accounting. *Prerequisite(s): Acceptance in the program.*

TRN 263A Career Experience II2 QH Consists of 20 clock hours of experience in a transportation related field and is a continuation of TRN262A. Students will continue to observe the areas addressed in TRN262A. Additionally, students will cross over into other areas within the transportation network such as air freight and rail freight. A ride out with the Michigan State Police will also be scheduled when available. Prerequisite(s): Acceptance into the program.

TRN 271 Intermodal Transportation......4 QH

Offers an examination of the global market for domestic and international logistics and transportation services. This includes the role of shipping and air transportation in intermodal business logistics and their effect on world trade. Also covered are issues in the management of domestic, international, air, maritime, rail, and truck transportation. Prerequisite(s): TRN 231.

VASCULAR TECHNOLOGY

VAS 101A Peripheral Vascular Procedures4 QH

This course provides students with the fundamentals of noninvasive peripheral vascular testing as well as introduces concepts related to ultrasound devices and how to measure performance, artifacts encountered during testing, and bioeffects related to ultrasound. Emphasis will be on the basic understanding of various testing modalities, techniques, limitations, and interpretative guidelines used in noninvasive peripheral vascular evaluations. This course will prepare students for their first clinical experience.

VAS 106 Introduction to Clinical Practice......1 QH

This course is designed to prepare VAS students for their first clinical rotation by demonstrating competency in completing a basic vascular history, physical examination, and ankle/brachial index (ABI) study. Theory and practice will include history taking, vital signs, and palpating pulses. Students will also be taught to complete a physiologic arterial examination of the lower extremities. Prerequisite(s): Acceptance in the program.

VAS 111 Introduction to Vascular Ultrasound......4 QH

Introduces the role of the vascular technologist as a member of the health care team. Emphasis is placed on professional growth and development as well as ethical and attitudinal qualities of the technologist. Occupational health issues related to diagnostic ultrasound will also be presented. Basic terminology and instrumentation will be introduced.

Prerequisite(s): B- or better in VAS 101A and acceptance in the program. Corequisite(s): VAS 121.

VAS 121 Vascular Physics and Hemodynamics......4 QH Presents basic principles of ultrasound physics, the Doppler effect, and physical principles related to physiologic (non-imaging) studies. This course focuses on arterial and venous hemodynamics and physiologic factors that govern blood flow. Analysis of blood flow characteristics obtained through a variety of imaging and non-imaging studies will provide an assessment of the circulatory system. This course will prepare students for the Vascular Physical Principles and Instrumentation examination administered by the ARDMS.

Prerequisite(s): B- or better in VAS 101A and acceptance in the program. Corequisite(s): VAS 111.

Covers diagnostic testing techniques and interpretative guidelines utilized in the evaluation of peripheral venous disease. This course begins with a review of venous anatomy and pathophysiology and incorporates signs and symptoms, risk factors, mechanisms of disease as well as treatment options. Prerequisite(s): B- or better in VAS 111, B- or better in VAS 121. Corequisite(s): VAS 211.

Provides an understanding of basic diagnostic testing techniques and interpretative guidelines utilized in the evaluation of extracranial cerebrovascular disease. This course begins with a review of arterial anatomy and pathophysiology and incorporates signs and symptoms, risk factors, mechanisms of disease as well as treatment options.

Prerequisite(s): B- or better in VAS 111, B- or better in VAS 121. Corequisite(s): VAS 201.

VAS 221 Arterial Ultrasound I......4 QH

Covers basic diagnostic testing techniques and interpretative guidelines utilized in the evaluation of peripheral arterial disease, i.e. non-imaging/physiologic studies. This course begins with a review of arterial anatomy and pathophysiology and incorporates signs and symptoms, risk factors, mechanisms of disease as well as treatment options.

Prerequisite(s): B- or better in VAS 201, B- or better in VAS 211. Corequisite(s): VAS 222.

VAS 222 Arterial Ultrasound II......4 QH

Covers advanced diagnostic testing techniques and interpretative guidelines utilized in the evaluation of peripheral arterial disease, i.e. imaging studies. This course begins with a review of arterial anatomy and pathophysiology and incorporates signs and symptoms, risk factors, mechanisms of disease, and treatment options.

Prerequisite(s): B- or better in VAS 201, B- or better in VAS 211. Corequisite(s): VAS 221.

VAS 231A Vascular Ultrasound Clinical Experience I6 QH

Provides the opportunity for learning basic skills in performing noninvasive vascular evaluations in the clinical setting. A basic understanding of the operation of a diagnostic facility is also provided. This is the first of three structured clinical courses that directs students through progressive levels of experience: observation, participation under personal supervision, provision of care under direct supervision, and more independent functioning under general supervision. This is a 10 week rotation and includes 160 hours of clinical and 40 hours of lab.

Prerequisite(s): B- or better in VAS 101A, Student background check and acceptance in the program. Corequisite(s): VAS 111, VAS 121.

Provides the opportunity for learning more advanced skills in performing noninvasive vascular evaluations in the clinical setting. A more in-depth understanding of the operation of a diagnostic facility is also provided. This is the second of three structured clinical courses that directs students through progressive levels of experience: observation, participation under personal supervision, provision of care under direct supervision, and more independent functioning under general supervision. This is a 10 week rotation and includes 160 hours of clinical and 40 hours of lab.

Prerequisite(s): B- or better in VAS 231A.

Provides the opportunity for learning more advanced skills in performing noninvasive vascular evaluations in the clinical setting. More in-depth scanning skills of the diagnostic facility is also provided. This is the third of three structured clinical courses that directs students through progressive levels of experience: observation, participation under personal supervision, provision of care under direct supervision, and more independent functioning under general supervision. This is a 10 week rotation and includes 160 hours of clinical and 40 hours of lab.

Prerequisite(s): B- or better in VAS 232A.

VETERINARY TECHNOLOGY

Introduces students to the veterinary technology occupation. Emphasis is placed on regulatory and ethical issues, office procedures, handling and restraint of animals, sanitation, breed identification, and laboratory issues. 40 hours of lecture and 20 hours of lab are required for this course. Prerequisite(s): B- or better in SCI 111.

VET 112 Animal Anatomy and Physiology I......5 QH Introduces students to the fundamentals of chemistry essential for life. Introduces cellular biology and histology. Emphasizes the study of the structure and function of the integumentary system, skeletal system, muscular system, nervous system, and the endocrine system. Medical terminology will be studied throughout this course. Laboratory work may include the use of a microscope, experiments/demonstrations in physiologic principles and the dissection of animal parts. 40 hours of lecture and 20 hours of lab are required. A grade of B- or better is required in this course for application to the professional track of the veterinary technology program. Prerequisite(s): B- or better in SCI 111.

VET 113 Animal Anatomy and Physiology II......5 QH Emphasizes the structure and function of the circulatory, lymphatic, respiratory, urinary, digestive, and reproductive systems. The autonomic and endocrine control of these systems and immunity will also be discussed. Medical terminology and laboratory sessions will be a continuation of Animal Anatomy and Physiology I. 40 hours of lecture and 20 hours of lab are required. A grade of B- or better is required in this course for application to the professional track of the veterinary technology program. Prerequisite(s): B- or better in VET 112.

VET 121 Veterinary Pathology and Diseases......4 QH

Presents a study of veterinary diseases and zoonoses. Emphasis is placed on identification and classification of diseases, diagnosis, methods of transmission, prevention of disease, and treatment modalities. A grade of "C" or better must be maintained to satisfactorily complete this course.

Prerequisite(s): Acceptance in the program. Corequisite(s): VET 131A.

VET 121A Veterinary Pathology......4 QH Presents a study of veterinary diseases and zoonoses. Emphasis is placed on identification and classification of diseases, diagnosis, methods of transmission, prevention of disease, and treatment modalities. A grade of C or better must be maintained to satisfactorily complete this course.

Prerequisite(s): Acceptance in the program. Corequisite(s): VET 131A.

Presents an introduction to the principles and procedures for the veterinary practice laboratory. Emphasis is placed on microscopy, interpretation of microscopic observations, laboratory safety, quality control principles and practices, technical skills in hematology, cytology, clinical chemistry, serology, parasitology, and urinalysis. 40 hours of lecture and 20 hours of lab are required. A grade of C or better must be maintained to satisfactorily complete this course. Prerequisite(s): Acceptance in the program. Corequisite(s): VET 121A.

Provides an orientation to nursing care and surgical procedures in the veterinary practice. Emphasis is placed on the care of the patient and equipment, examination room procedures, pharmacology for animals including drug laws, administration of medications to animals, and surgical procedures including anesthesia. 40 hours of lecture and 40 hours of lab are required. A grade of C or better must be maintained to satisfactorily complete this course. Prerequisite(s): Acceptance in the program.

VET 201 Radiology for Veterinary Technicians......2 QH

Prepares students to safely and effectively produce diagnostic radiographic and non-radiographic images. Emphasis will be placed on decision making abilities such as determining diagnostic quality, exercising professional judgment to minimize personnel radiation exposure, understanding the proper anatomical landmarks for positioning patients for diagnostic images, and equipment maintenance. 10 hours of lecture and 20 hours of lab are required. Prerequisite(s): Acceptance in the program.

Provides advanced study in the principles and procedures for the veterinary practice laboratory. Emphasis is placed on hematology, cytology, parasitology, urinalysis, microbiology, and prosection. 40 hours of lecture and 20 hours of lab are required. A grade of C or better must be maintained to satisfactorily com-

plete this course. Prerequisite(s): C or better in VET 121A, C or better in VET 131A.

Presents nursing procedures on large and small animals to be performed in clinical, laboratory, or farm settings. Emphasis is placed on preparation and assisting of the physical exam, administering medications including injections, venipuncture, catheterization, collection of laboratory specimens, bandaging techniques, and care of the critical patient. 40 hours of lecture and 40 hours of lab are required. A grade of C or better must be maintained to satisfactorily complete this course.

Prerequisite(s): C or better in VET 121A, C or better in VET 131A, C or better in VET 141. Corequisite(s): VET 231.

VET 231 Pharmacology for Veterinary Technicians Provides further study in the area of veterinary drugs and medicines. Emphasis is placed on classification of drugs and medicines, calculating dosages, administering and dispensing drugs and medicines, legal issues, and recordkeeping. A grade of C or better must be maintained to satisfactorily complete this course. Prerequisite(s): C or better in VET 121A, C or better in VET 131A, C or better in VET 141. Corequisite(s): VET 221.

VET 241A Laboratory and Exotic Animals5 QH

Provides an overview of the study of exotic animals and animals used in research. Emphasis is placed on the selection and procurement of animals, safety and health considerations, legal regulations, and policies on the care and use of laboratory animals, husbandry, care, and importance of environment. 40 hours of lecture and 20 hours of lab are required. A grade of C or better must be maintained to satisfactorily complete this course.

Prerequisite(s): C or better in VET 211A, C or better in VET 221, C or better in VET 231.

Provides training in the management of veterinary facilities. Emphasis is placed on client relations, records maintenance, obtaining a patient history, medical emergencies, and bereavement. A grade of C or better must be maintained to satisfactorily complete this course.

Prerequisite(s): C or better in VET 211A, C or better in VET 221, C or better in VET 231.

Provides advanced study and practice in surgical assisting, postoperative care,

anesthesiology, and dentistry. 30 hours of lecture and 60 hours of lab are required. A grade of C or better must be maintained to satisfactorily complete this course.

Prerequisite(s): C or better in VET 211A, C or better in VET 221, C or better in VET 231.

Emphasis will be placed on preparing students for the licensing exam. This class is taken along with the Veterinary Technician Externship course. A grade of C or better must be maintained to satisfactorily complete this course.

Corequisite(s): VET 272A or VET 276A.

VET 272A Veterinary Technician Externship......6 QH Requires students to complete a minimum of 240 hours of unpaid work experience in a veterinary facility under the supervision of a veterinarian. Students will perform administrative and clinical duties that may include but are not limited to: admission and preparation of animals for a veterinary examination, record keeping, administration of medications, performance of routine laboratory procedures, performance of radiologic testing, assisting in surgery, and the maintenance of anesthesia. This occupation-based instruction will be implemented through the use of written individualized training plans, written performance evaluations, and required on-the-job training. A grade of C or better must be maintained to satisfactorily complete this course.

Prerequisite(s): C or better in VET 121A, C or better in VET 131A, C or better in VET 141, C or better in VET 211A, C or better in VET 221, C or better in VET 231, C or better in VET 241A, C or better in VET 251, C or better in VET 261. Corequisite(s): VET 271A.

VET 276A Zoo Externship6 QH

Requires students to complete a minimum of 240 hours of unpaid work experience in a veterinary hospital at the Potter Park Zoo in Lansing, Michigan. Students will then complete the remainder of a six month externship contract with the zoo, providing them with a total of a six month externship. Students are selected for this course through an application process. Students will perform administrative and clinical duties that may include but are not limited to: admission and preparation of animals for veterinary examination, recordkeeping, administration of medications, performance of routine laboratory procedures, performance of radiologic testing, assisting in surgery, and the maintenance of anesthesia. This occupation-based instruction will be implemented through the use of individualized training plans, written performance evaluations, and required on-the-job training. A grade of C or better must be maintained to satisfactorily complete this course.

Prerequisite(s): C or better in VET 121A, C or better in VET 131A, C or better in VET 141, C or better in VET 211A, C or better in VET 221, C or better in VET 231, C or better in VET 241A, C or better in VET 251, C or better in VET 261. Corequisite(s): VET 271A.

WEB DEVELOPMENT

WEB 111A HTML Programming4 QH Teaches students to use the Hypertext Mark-up Language (HTML) to create Web pages and sites. Topics will include: Web page and Web site design; common HTML programming techniques; proper and effective use of space, color and animation in Web pages; and emergent technology in the field. Prerequisite(s): CIS 106A or INF 131.

WEB 121A World Wide Web Design4 QH

Instructs students in the creation of a Web site and in the use of Web page development tools. Students apply their skills in the creation of Web pages using text, graphics, tables, and frames. This course will enable students to create their own Web pages and Web sites for publishing information on the Internet. Emphasis on effective design and layout of Web pages and sites is provided. Prerequisite(s): INF 131 or WEB 111A.

WEB 201 Web Multi-Media......4 QH

Introduces students to Web development tools for animation. Enables students to produce Web sites with interactive objects, graphics, and animation. Prerequisite(s): WEB 111A.

WEB 211 Web Scripting......4 QH

Develops students' skills in utilizing Java-script and HTML. Enables students to integrate Java-script and HTML to create interactive Web sites that include popup windows, pop-up menus, and image rollovers. This course includes working with forms, images, frames, windows and cookies. Prerequisite(s): WEB 111A, CS 111.

Enables students to work with CGI/scripts for creating interactive Web applications. Students will install and modify scripts as part of site development projects. The course also includes Web-database integration. Prerequisite(s): WEB 211.

WEB 222 Internet Commerce......4 QH

Provides students with exposure to how Web sites are used by businesses. Students will develop retail storefronts, marketing and customer service sites, intranets, and extranets to apply the technical learning from the previous classes and to understand how businesses can use these tools. At the end of this course, students will be able to effectively plan how a Web site fits a company's strategy and will have developed a portfolio of Web site designs. Prerequisite(s): WEB 221.

WEB 231 Server-side Programming......4 QH

Introduces students to the fundamentals of using alternative server-side technology such as PHP to produce interactive Web sites, site development, and database integration.

Prerequisite(s): WEB 221.

WEB 241 ActionScript Programming4 QH

Provides experienced Flash designers with the knowledge and hands-on practice they need to create event-driven animation and interactive web elements. Introduction of core ActionScript concepts is also included. Prerequisite(s): WEB 201.

WEB 321 Web Application Development Tools4 QH Instructs students in the use of Individual Development Environments (IDE) to develop Web applications. Students will use development tools to create interfaces to databases.

Prerequisite(s): CIS 351, WEB 121A.

WEB 322 Web Application Development Programming4 QH

Covers the use of programming languages such as Perl, PHP, and Python to interface databases to create interactive Web applications. Students will create interfaces to relational databases such as Oracle and MySOL. Prerequisite(s): WEB 321.

Expands on development of Web applications by introducing J2EE technologies including JavaServer Pages (JSP), Servlets, Enterprise Java Beans (EJB), Java Message Service (JMS) API, and other ancillary technologies like JDBC and JNDI. Students will use these technologies to create interactive, database-driven Web applications. Prerequisite(s): CS 242.

WEB 361 Web Server Administration4 QH

Provides students with the opportunity to administer a Web server. Issues such as selecting server hardware and software will be reviewed. Also, students will learn how to control access to Web sites, setup e-mail aliases and related services. Students will gain experience in working with and analyzing site statistics. The procedures for the online marketing of Web sites will also be covered. This course will prepare students to establish and manage a Web server. Prerequisite(s): Acceptance in the BCS, BTS or BWD program.

Provides students with the understanding of usability design and examines usability issues such as architecture, navigation, graphical presentation, and page structure. Explains the steps relevant to incorporating usability into every stage of the web development process, from requirements to tasks analysis, prototyping and mockups, to user testing, revision, and post launch evaluations. Students will demonstrate these skills in the design and redesign of their own projects.

Prerequisite(s): WEB 222.

Addresses the design, use, and development of Web portals. An enterprise portal is a single Web location from which many services and communicative systems are accessed. Students will work with Web portal technologies to design and implement a Web portal.

Prerequisite(s): WEB 331, WEB 361, WEB 411.

WEB 431 Enterprise Web Applications4 QH

Provides students with a capstone class that focuses on using knowledge gained in previous classes to create an enterprise Web application. Prerequisite(s): WEB 421.

WORD PROCESSING

WPG 098 Keyboarding......4 QH Presents basic keyboarding skills using the touch method and introduces word processing software. Students who complete this course will be able to input alphabetic and numeric information accurately. Students who have had previous typing/keyboarding instruction or experience should take the Keyboarding Placement Exam. Credit earned does not count toward any degree.

WPG 101B Office Grammar Skills4 QH Provides students with the skills necessary to prepare and edit written business communications. Using word processing software and a handbook for office professionals to properly format office documents, this course reviews the following skills: grammar, punctuation, spelling, word use, sentence structure, formatting, proofreading, editing, capitalization, number style, and composition. Prerequisite(s): ENG 091 or placement exam, WPG 098 or high school typing/proficiency.

WPG 122 Introduction to Document Processing4 QH Presents an introduction to document processing for students who know the keyboard by the touch method and has basic word processing skills. Students learn to analyze keying errors and use corrective drills to develop greater keying speed and accuracy. Basic word processing commands related to the formatting of letters, memos, reports, and tables are taught. Students must attain a speed requirement of 25 to 35 wpm and higher on acceptable five-minute timings. Prerequisite(s): C- or better in WPG 098 or high school typing/proficiency.

WPG 123 Intermediate Document Processing......4 QH Continues the development of keying speed and accuracy through drills and corrective practice and builds on document formats and word processing commands learned in WPG122. Formatting business letters, memos, reports, and tables is reviewed and expanded to include mail merge and mathematical calculations in tables. Students create newsletters with graphics and charts and integrate spreadsheet and database software with word processing applications. Final grade criteria are timed production work, text assignments, and speed requirements of 35 to 45 wpm and higher on acceptable five-minute timings. Prerequisite(s): C- or better in WPG 122.

WPG 221A Transcription Applications4 QH Develops the skills to transcribe or produce text from verbal to printed form using recorded media and to input data using voice recognition software. Students will refine their listening abilities by using recorded business scenarios to extract details. Students will transcribe and produce actual business documents incorporating the use of language, formatting, proofreading, and editing skills

Prerequisite(s): C- or better in WPG 101B. Corequisite(s): WPG 123.

WPG 224 Advanced Document Processing......4 QH Covers more advanced formatting skills in word processing documents. Topics include formatting reports with styles, footnotes, endnotes, notes pages, and reference pages, and changing the number format of preliminary and appendix pages. Create indexes, cross references, and tables of contents electronically. Create and edit macros, forms, and custom toolbars/menus. Create and edit master documents and subdocuments and collaborate in a workgroup to track changes in documents by using comments. Students continue to improve keying accuracy and speed. Final grade criteria are timed production work, text assignments, and speed requirements of 45 to 55 wpm and higher on acceptable five-minute timings.

Prerequisite(s): C- or better in WPG 123.

WORK EXPERIENCE

WRK 201 Internship......4 QH

Provides an unpaid, 120-hour, learning experience in a business environment structured to allow students to develop skills and gain training in their major field. Students must complete a minimum of 48 credit hours and 50 percent of major requirements prior to enrolling in the work experience course. In addition, programs may require completion of specific courses.

Prerequisite(s): ENG 102 (Associate Degrees), ENG 101 (Certificates), minimum GPA 2.00.

Students will complete a minimum of 120-hours of paid, work experience. Students usually work part of the day and attend classes part of the day. Students must complete a minimum of 48 credit hours and 50 percent of major requirements prior to enrolling in the work experience course. In addition, programs may require completion of specific courses.

Prerequisite(s): ENG 102 (Associate Degrees), ENG 101 (Certificates), minimum GPA 2.00.

work-related skills and ethics, allowing students to become more familiar with the practical problems and solutions of the work environment. Students will complete a minimum of 120-hours of paid, work experience.

Prerequisite(s): ENG 102, C or better in WRK 211, minimum GPA 2.00.

Requires work assignments related to academic and career goals. Students will complete a minimum of 120 hours (or more) of paid, work experience. This course is intended for formulated alternation between full-time college education and full-time work experience of approximately equal length. Prerequisite(s): ENG 102, C or better in WRK 212, minimum GPA 2.00

bilities. Students will complete a minimum of 120 hours (or more) of paid, work experience.

Prerequisite(s): ENG 102, C or better in WRK 213, minimum GPA 2.00.

WRK 215 Paralegal Work Experience4 QH

Requires students to perform 120 hours of paid/unpaid work experience in a legal setting. General paralegal duties will be performed.

Prerequisite(s): Dean's approval, minimum GPA 2.00, Sophomore status, ENG 102, PAR 101, PAR 113A, PAR 131. Corequisite(s): PAR 299.

WRK 216 Medical Receptionist Externship......4 QH

Requires students to perform 120 hours of paid/unpaid work experience in a medical facility performing receptionist and general office duties. A grade of C or better is required in all core MED classes.

Prerequisite(s): ENG 101, minimum GPA 2.50, Dean's approval. Corequisite(s): MED 207.

WRK 218 Work Experience Project......4 QH

Focuses on development of work related skills and ethics, allowing students to become more familiar with issues in the work environment. Students will complete a major project focusing on their specific career goals. Enrollment allowed by permission of Online Career Services staff.

Prerequisite(s): ENG 102, minimum GPA 2.00.

WRK 219 Medical Administrative Assistant Externship......4 QH

Requires students to perform a minimum of 120 hours of paid/unpaid work experience in a medical facility performing administrative and general office duties. A grade of C or better is required in all core MED classes. Prerequisite(s): ENG 102, MED 207, minimum GPA 2.50 and Dean's approval.

WRK 220 Medical Transcription Externship4 QH

Requires students to perform a minimum of 120 hours of paid/unpaid learning experience in a health care setting under the supervision of experienced medical transcriptionists. Through this work experience, students will develop insight, understanding, and skills in medical transcription.

Prerequisite(s): ENG 101, minimum GPA 2.00, MTH 091 or placement exam. Corequisite(s): MED 223A.

ence in an outpatient medical facility performing clinical and administrative duties. A grade of C or better is required in all core MED classes. Prerequisite(s): ENG 102, minimum GPA 2.50, Dean's approval.

WRK 224 Unit Coordinator Externship.......4 QH

Requires students to perform 120 hours of paid/unpaid work experience in a clinic, hospital, nursing facility, or other inpatient medical facility performing such duties as chart construction, ordering of supplies and equipment, transcription of nursing and physician orders, recordkeeping, and admission and discharge procedures under the supervision of appropriate personnel. Students completing this externship may be eligible to sit for the Certified Health Unit Coordinator (CHUC) examination.

Prerequisite(s): ENG 102, MED 120, minimum GPA 2.50 and Dean's approval.

WRK 225 Phlebotomy Externship......4 QH Requires students to perform 120 hours of paid/unpaid work experience which may combine blood drawing experiences at various sites including hospital inpatient, hospital outpatient, outreach sites and physician offices under supervision of qualified personnel. Students must perform a minimum of 120 successful blood draws.

Prerequisite(s): ENG 101, B- or better in MLT 111, minimum GPA 2.50, Dean's approval, Student background check. Corequisite(s): MED 225A.

WRK 227 Sterile Processing Technician Externship......4 QH

Requires students to perform 160 hours of paid/unpaid work experience. Provides supervised work experience to enable students to apply the skills acquired in SPT188A and SPT192 in a clinical setting. Students will actively participate in the process of decontamination, sterilization, and distribution of sterile instruments and supplies.

Prerequisite(s): ENG 101, SPT 188B, SPT 192, minimum GPA 2.50, Dean's approval, Student background check.

coding and billing practices. Students will apply course room applications relative to reimbursement and coding of inpatient/outpatient records thereby reinforcing and correlating their classroom instruction. Students must complete all MIS and CCP courses prior to externship.

Prerequisite(s): ENG 101, minimum GPA 2.50, Dean's approval.

Requires a minimum of 120 hours of paid/unpaid, supervised work experience in a community or hospital setting designed to provide students with the opportunity to apply the skills acquired in the pharmacy technician program. Students will gain insight from day-to-day pharmacy operations and interaction with patients and practitioners. Students must complete all PHT and MED courses, HSC 104 and SCI 100E with a C or better prior to completing externship.

Prerequisite(s): ENG 102 (Associate Degree), ENG 101 (Certificate), minimum GPA 2.50, Dean's approval, Student background check.

WRK 261 Medical Insurance Specialist Externship4 QH Provides 180 hours of supervised, paid/unpaid work experience. This work experience will acquaint students with outpatient physician billing, outpatient hospital facility billing, durable medical equipment billing, and home health billing and allow students hands-on experience to reinforce their classroom instruction. Students must complete all MIS and MED courses, HSC 104 and SCI 100E with a C or better prior to completing externship.

Prerequisite(s): ENG 102 (Associate Degree), ENG 101 (Certificate), minimum GPA 2.50, Dean's approval. Corequisite(s): MIS 231, MIS 291.

WRK 265 Kitchen and Bath Design Work Experience Requires students to perform a minimum of 160 hours of paid/unpaid, work experience at a kitchen and bath design studio that is a member of the National Kitchen and Bath Association.

Prerequisite(s): Dean's approval, ENG 101.

WRK 271A Automotive Work Experience......4 QH Consists of a 140-hour minimum paid/unpaid, hands-on experience, working in an automotive repair facility. This work experience will focus on the State of Michigan certification areas and is intended to supplement the hours spent in courses on campus for the purpose of attaining at least minimum competency. Prerequisite(s): ENG 102 (Associate Degree), ENG 101 (Certificate) Dean's approval.

WRK 275 Diesel Work Experience4 QH Consists of a 140-hour minimum paid/unpaid, hands-on experience, working in a diesel repair facility. This work experience will focus on the State of Michigan certification areas and is intended to supplement the hours spent in courses on campus for the purpose of attaining at least minimum competency.

Prerequisite(s): Associate Degree students: ENG 102. Certificate students: ENG 101, minimum GPA 2.50, Dean's approval.

WRK 280 9-1-1 Fieldwork1 QH

Provides students with an opportunity to observe 9-1-1 dispatch operations for 30 hours as a way to begin integrating the academic experience into practice. Prerequisite(s): ENG 102, CRJ 101, CRJ 111, minimum GPA 2.50, Student background check. Corequisite(s): CRJ 112, WRK 291B.

WRK 281 Criminal Justice Internship I......4 QH

Requires students to perform a minimum of 120 hours of paid/unpaid work experience in a criminal justice agency under the supervision of appropriate personnel to allow students to develop skills and gain training in their major field.

Prerequisite(s): ENG 102, CRJ 106, CRJ 121, CRJ 131, CRJ 141, CRJ 151, minimum GPA 2.50, Student background check. Corequisite(s): CRJ 281, WRK 291B

Requires students to perform 400 hours of unpaid supervised work experience in The Culinary Institute of Michigan's fine dining restaurant, Courses. Students attend on-campus weekly seminars; demonstrate competencies in required skills including guest-relations, marketing, food service accounting, cost control, planning, multi-tasking and front-of-the-house management. Students will have to maintain a detailed journal logging hours in specific competencies. This course is taken during the final quarter of a student's program after completion of prior program requirements.

Prerequisite(s): ENG 102, minimum GPA 2.00, Dean's approval.

WRK 287 Culinary Arts Internship6 QH Requires students to perform 400 hours of unpaid supervised kitchen work experience in The Culinary Institute of Michigan's fine dining restaurant, Courses. Students attend on-campus weekly seminars, demonstrate competencies in required skills including menu development, mise en place, production, requisitioning products, food safety, multi-tasking, and entry-level management tasks. Students will have to maintain a detailed journal logging hours in specific competencies. This course is taken during the final quarter of a student's program after completion of prior program requirements.

Prerequisite(s): ENG 102, minimum GPA 2.00, Dean's approval.

Requires students to perform 400 hours combined unpaid supervised work experience in The Culinary Institute of Michigan's fine dining restaurant, Courses and The Sweet Spot. Students attend on-campus weekly seminars; demonstrate competencies in required skills including bread and pastry production, mise en place, requisitioning products, food safety, guest relations, cost control multitasking, and entry-level management tasks. Students will have to maintain a detailed journal logging hours in specific competencies. This course is taken during the final quarter of a student's program after completion of prior program requirements.

Prerequisite(s): ENG 102, minimum GPA 2.00, Dean's approval.

WRK 291B Professional Career Strategies......1 QH

Covers all phases of securing employment in a required seminar. Major topics include resume preparation, interview strategy, job application, job search action planning, personal appearance, and coordination of the graduate's employment search activity with the College Career Services Office. Students on degree programs may complete the seminar requirement any time during their final two quarters. Certificate students should attend in their last quarter. It is offered on a pass/fail basis.

Prerequisite(s): Sophomore status.

WRK 301 Internship......4 QH

Provides an unpaid, 120-hour, bachelor's level, learning experience in a business or technical environment structured to allow students to further develop skills and gain training in their major field.

Prerequisite(s): WRK 201 or WRK 211, Dean's approval.

WRK 411 Graphic Communications Field Experience.......4 QH

Provides a senior level paid/unpaid, work experience (minimum of 120 hours) designed to provide students the opportunity to apply the skills acquired in the graphic communications major.

Prerequisite(s): ENG 102, GRC 401, minimum GPA 2.00.

Provides students with work experience as interns under the supervision of construction professionals, minimum of 120 hours. Students will become familiar with many phases of construction under actual job conditions which may include; estimating, field engineering, inspecting, scheduling and supervision. Students with verifiable construction experience of three (3) years or more may receive credit under this course listing. Verification will be through letters of recommendation from employer(s) on company letterhead and documented payroll receipts.

Prerequisite(s): ENG 102, minimum GPA 2.00, Senior status, Dean's approval.

WRK 441 Health Services Administration Externship4 QH Provides 120 hours of paid/unpaid experience in a health or health related setting. The primary focus is to provide an opportunity for students to develop/experience activities of planning, directing, coordinating, budget related activities.

Prerequisite(s): ENG 102, minimum GPA 2.50, Dean's approval. Corequisite(s): HSC 411.

WRK 481 Criminal Justice Internship II......4 QH

Requires students to perform a minimum of 120 hours of paid/unpaid work experience in a criminal justice agency under the supervision of appropriate personnel to allow students to develop skills and gain training in their major field.

Prerequisite(s): ENG 102, WRK 281, minimum GPA 2.50, Senior status, Student background check. Corequisite(s): CRJ 481.

WRK 486 Food and Beverage Management Externship6 QH Students will perform a requirement of 400 hours paid or unpaid work experience in an approved off site food service operation. Provides supervised work experience to enable students to apply skills acquired through the food and beverage program. Students will actively participate in management and operation of a food service operation. Students will maintain a detailed journal logging hours in specific competencies. This course is taken during the final quarter of a student's program after completion of prior program requirements. Prerequisite(s): ENG 102, minimum GPA 2.00, Dean's approval.

WRK 495 Accounting Work Experience4 QH Requires students to perform a minimum of 120 hours of paid/unpaid, hands-

on and supervised work experience in the accounting field. Students may secure work experiences with a CPA firm, within the accounting department of various local businesses (private or public sector), or with accounting services or tax preparation organizations as well as with other approved sites. Prerequisite(s): ACC 302, WRI 115, minimum GPA 2.00.

WRITING

WRI 115 Workplace Communication4 QH Prepares students to be effective communicators in the workplace. This course includes fundamental techniques and formats used in business and technical communication. Clear, concise, factual communication is stressed through a variety of applications including letters, memoranda, business and technical proposals, manuals, and research writing. Preparation of a resume and associated job-search documents is included. Prerequisite(s): ENG 102.

WRI 301A Report Writing4 QH

Improves the student's ability to write for business and technical purposes. Emphasis is on writing formal reports including research of published technical information and presentation of a formal paper based on the student's major field. In addition, less formal aspects of business and technical communications are studied. Instruction, practice, and development of these skills may be implemented as work products of a Service Learning Project. Prerequisite(s): WRI 115.

WRI 312R Research Writing6 QH Requires students to design and compose a formal research paper that focuses on the structure, format, and process for writing following APA guidelines and applying research. This course is exclusive to the Accelerated Bachelor Degree program. Hybrid delivery is required for this course.

Prerequisite(s): Acceptance in the program. Corequisite(s): BUS 301.

Graduate Programs

GRADUATE DEGREES

Master of Business Administration Accounting

Finance General Business Health Care Management Human Resource Management Leadership Studies Marketing **Master of Occupational Therapy**

Master of Science in Information Systems Management Information Systems Doctor of Business Administration

Purpose

The Center for Graduate Studies offers graduate programs providing advanced preparation in the fields of Business, Information Systems, and Occupational Therapy. These graduate programs are designed to build upon a wellbalanced undergraduate education. Students are expected to develop a thorough understanding of their chosen academic discipline. Graduate education provides students with the opportunity to increase knowledge, broaden understanding, and develop specialized skills beyond the baccalaureate degree.

Administrative Leadership

The Center for Graduate Studies' Administrative Offices are located on the Flint campus. These administrative offices are the headquarters for the graduate programs offered at various Baker campus locations, corporate sites throughout Michigan, and online. Leadership and administration of graduate programs are provided by the President of the Center for Graduate Studies and the Graduate Faculty Council.

Graduate Faculty Council

The Faculty Council, comprised of graduate faculty, is the primary channel of communication between the graduate faculty and the President. The Faculty Council is responsible for establishing the academic policies and standards regarding graduate programs, assessment of graduate programs, and other academic issues relating to graduate education. Additionally, the Faculty Council is the main forum for discussion of research and scholarly activity for graduate-level students and faculty.

Academic Outcomes Assessment

Graduate students may be required to take standardized entrance, progress, or exit examinations. Students progressing through the program will be assessed by a variety of methods as established by course instructors and the Center for Graduate Studies. The College agrees not to violate student privacy as it uses this information to improve the program for future students and to evaluate the effectiveness of delivery.

Accreditations

The graduate programs are accredited through The Higher Learning Commission of the North Central Association of Colleges and Schools. The MBA program also has international accreditation through the International Assembly for Collegiate Business Education (IACBE). The Occupational Therapy program has additional accreditation through The Accreditation Council for Occupational Therapy Education (ACOTE).

Acceptance of Transfer Credit

The Center for Graduate Studies welcomes transfer students into our graduate programs. Because Baker College recognizes the expediency of understandable and universally accepted standards related to transfer of academic credit, the following policies are established for transfer credit:

- 1. Baker College will accept no more than 16 quarter hours (12 semester hours) of transfer credit into graduate programs.
- 2. Only classes with a B (3.00) grade or higher will be eligible for transfer consideration.

- 3. To transfer successfully, classes must equate to and be compatible with courses offered by the Center for Graduate Studies.
- 4. Transfer of college credit will not be considered if the work was completed more than five years preceding matriculation.
- 5. To obtain transfer credit, students are required to request that all previous colleges attended forward official transcripts to Baker College Center for Graduate Studies.
- 6. Students wishing to receive transfer credit from a foreign/international college or university must submit an official evaluation from a U.S. evaluation company. The evaluation must include the grade and U.S. course equivalency to be considered for transfer credit.

International Applicants

International applicants must possess competence in the English language; both written and oral. English competency is determined by one of the following:

- 1. A score of 550 or higher on the paper version of the Test of English as a Foreign Language (TOEFL).
- 2. A score of 79 or higher on the Internet version of the TOEFL.
- 3. A median score on the Comprehensive English Language Test (CELT).
- 4. DBA students must have a score of 575 or higher on the paper version TOEFL.

Applicants who completed their undergraduate degree at an institution outside of the U.S. must have their transcript/degree evaluated by a company in the United States, such as Educational Credential Evaluators, Inc. or the National Association of Credential Evaluation Services (NACES). The results of the evaluation must be sent from the evaluation company directly to the Center for Graduate Studies. Official evaluations must include U.S. degree equivalency, course grades, and overall GPA.

Applicants wishing to study in the U.S. must fulfill student visa requirements and make an advanced tuition deposit (see page 229 for details).

Graduation Requirements

Students who have successfully fulfilled the following requirements are eligible to graduate from their program of study:

- 1. Completion of all courses required by the program of study with a grade of C or better.
- 2. Completion of a minimum of 34 quarter hours at Baker College Center for Graduate Studies.
- 3. Achievement of a cumulative grade point average (GPA) of 3.00 or better.
- 4. Submission of an "Application for Graduation Form" one quarter prior to expected graduation.
- 5. Completion of all program requirements within seven years.
Master of Business Administration

MBA Program

The MBA program at Baker College combines the best of conventional academic training with the best of field-based learning. The typical business disciplines are represented in the curriculum to ensure that graduates have the necessary business background to be conversant with various aspects of running organizations and companies. Graduates will possess the ability to implement theory into practice, conduct and interpret research, and will be both capable and confident to significantly contribute to long-term corporate success.

MBA Admission Information

Admission to the MBA program as a degree candidate is classified as either full or conditional status. Conditional status is an enrollment status applicable to students who may be deficient in one of the requirements or standards for matriculation such as: undergraduate GPA, letter of recommendation, or another credential required by the program. For applicants admitted on conditional status, the Center for Graduate Studies will specify the conditions for admissions. If the conditions are not met, the student will be dismissed from the program.

Application forms and detailed directions are available in the Center for Graduate Studies' Administrative Offices and on the Internet at **www.baker.edu**. Students are admitted on a rolling admission basis and acceptance decisions are determined by the Admission Committee.

Candidates applying for matriculation into the MBA program must submit the following materials:

- 1. The Graduate College Application (completed).
- 2. Non-refundable application fee of \$25.00.
- 3. A typed essay (500-1000 words) addressing the candidate's reasons for entering the program.
- 4. Official college transcripts indicating an undergraduate degree with a GPA of 2.5 or better (4.0 scale) from a regionally accredited college or university. Official college transcripts must be mailed from the institution granting the degree directly to the Center for Graduate Studies.
- 5. Three letters of recommendation from professional or academic references.
- 6. A current resume indicating a minimum of three years of full-time, professional work experience.
- 7. GMAT or GRE scores may be submitted if the candidate wants the scores considered in the admission decision.

Master of Occupational Therapy

Master of Occupational Therapy (MOT)

The delivery of the Occupational Therapy Program at the graduate level revolves around instructors facilitating learning through problem-based case management. Students in the MOT program will be required to utilize theory, logic, clinical reasoning, and pragmatic skills in an interactive learning environment. It is expected that students will participate in discussion, debate, and develop treatment choices based on sound research and theoretical assumptions. Students will demonstrate clinical skills as well as the ability to provide a rationale for treatment and expected outcomes. Students will not only display advanced clinical skills in laboratory settings, but they will also reflect advanced knowledge through scholarly writing by completing a research project under the supervision of a faculty member.

The MOT curriculum emphasizes mastery of skills required for entry-level practice. The curriculum is designed so that graduates can review, understand, conduct, and interpret research activities. Evidence-based practice initiatives make it essential that practitioner research skills are well developed.

This program is specifically designed as a continuation of the Bachelor of Health Science Program (Pre-Occupational Therapy) (see page 75). Transfer students may be considered for admission after analysis of undergraduate prerequisite courses.

The six month fieldwork requirement must be met no later than one year after all academic coursework is completed. Upon graduation the student will be qualified to take the national certification examination.

A criminal conviction may prevent eligibility to sit for the national certification examination, qualification for state licensure, specific employment opportunities, and placement at Level I and Level II clinical sites.

ACOTE Accreditation

The MOT curriculum meets the current standards mandated by the Accreditation Council for Occupational Therapy Education (ACOTE). The MOT program is fully accredited by ACOTE, a division of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, PO Box 31220, Bethesda, Maryland, 20824-1220. The phone number is 301-652-AOTA.

MOT Admission Information

Admission to a graduate degree program as a degree candidate is classified as either full or conditional status. Conditional status is an enrollment status applicable to students who may be deficient in one of the requirements or standards for matriculation such as: pending completion of their bachelor's degree, letter of recommendation, or another credential required by the program. For applicants admitted on conditional status, the Center for Graduate Studies will specify the conditions for admissions. If the conditions are not met, the student will be dismissed from the program.

Graduate school application forms and detailed directions are available from the administrative offices. Applications and required credentials must be received prior to the deadline to be considered for matriculation. Acceptance decisions are determined by the Admission Committee. Students applying for matriculation into the MOT program must submit the following materials:

- 1. The Graduate College Application (completed).
- 2. Non-refundable application fee of \$25.00.
- 3. A typed essay (500-1000 words) addressing the student's reasons for entering the program.
- 4. Official college transcripts indicating an undergraduate degree in a health related discipline containing specific pre-OT courses. A cumulative GPA of at least a 2.5 on a 4.0 scale. The applicant's undergraduate degree must be from a regionally accredited college or university. Official college transcripts must be mailed from the institution granting the degree directly to the Center for Graduate Studies.
- 5. Three letters of recommendation from professional or academic references.
- 6. GRE scores may be submitted if the student wants the scores considered in the admissions decision.

Master of Science in Information Systems

MSIS Program

Professional information technology management is a complex field requiring a strong, inter-related combination of management and technical skills. Thus, the mission of the MSIS program is to ensure that graduates are properly educated in information systems and management theory and equipped with the skills needed to become effective, responsible, technically competent, and ethical information systems leaders and managers upon graduation. The program is offered completely online, and is tailored to those who are already working in information systems, computer science, or software engineering fields, and who have an undergraduate degree in a related technical area.

MSIS Admission Information

The ideal candidate for the Baker College MSIS Program will have a Bachelor's degree in information systems, computer science, software engineering or information technology and a minimum of 3 years work experience in the IT field. Applications for Provisional Admission are accepted from candidates without a technical undergraduate degree, but who have extensive handson work experience in IT. Applications for Provisional Admission are also accepted from candidates without IT work experience, but with a technical undergraduate degree from an accredited institution. With these more restrictive admission standards, we strive to maintain a higher-level of education and subject discourse, with students contributing greatly to the intellectual (and practical) depth of the program. Students who are provisionally admitted to the MSIS program must maintain a 3.0 average in all courses for the first quarter of the program.

Candidates applying for matriculation in to the MSIS program must submit the following materials:

- 1. The Graduate College Application (completed).
- 2. Nonrefundable application fee of \$25.
- 3. A typed essay (500-1000 words) addressing the candidate's reasons for applying to the program.
- 4. Official college transcripts indicating an undergraduate degree, with a GPA of at least a 2.5 on a 4.0 scale. This must be from a regionally accredited college or university. Official college transcripts must be mailed from the institution granting the degree directly to the Center for Graduate Studies. If the undergraduate degree is not in a technical/IT discipline, the application will be for Provisional Admission.
- 5. Three letters of recommendation from professional or academic references. At least 2 of the references must be from those who are in a position to assess your potential for success in the MSIS program.

- 6. A current resume indicating a minimum of three years of full-time, professional work experience in information technology. If the resume does not show 3 years of IT-related work experience, the application will automatically be for Provisional Admission.
- 7. GRE scores may be submitted if the candidate wants the scores considered in the admission decision, and are recommended for those applying for Provisional Admission.

Doctor of Business Administration

DBA Program

The Doctor of Business Administration (DBA) program serves the needs of working adults, helping them to advance in their careers through quality graduate education. The program is designed to graduate scholar practitioners who will set the standard for best practice and contribute to the solution of critical business and management problems through research, teaching, and consulting.

Specifically, the purposes of the doctorate in Business Administration at Baker College are to graduate managers, business leaders, executives, and scholar practitioners able to:

Contribute to a deeper understanding of business and management processes in an increasingly complex world through applied research, teaching, and scholarship; improve their performance and the quality of their business decisions through reflective practice and lifelong learning; help companies and organizations solve critical problems and foster an environment of performance excellence; make a difference in the life of their organizations, professions, and the larger world-wide community through service to social and professional organizations by conducting themselves in accordance with the highest ethical standards.

The program builds on an effective combination of courses, seminars, professional residencies, research papers, and a final dissertation. Working with faculty members, who have extensive academic and practical experiences, students gain a comprehensive understanding of critical foundation theories and the ability to immediately apply creative solutions to existing problems.

DBA Admission Information

To be admitted into the program, an MBA degree or equivalent and a minimum of 5 years professional experience in business or management is required. Candidates applying for matriculation into the DBA program must submit the following materials:

- 1. Completed Graduate College Application form submitted electronically.
- 2. Nonrefundable \$25.00 application fee.
- 3. Official transcripts indicating an MBA or related master's degree from a U.S. school accredited by one of the regional accrediting associations, or from a non-U.S. institution with comparable accreditation. Educational Credential Evaluators, Inc. (ECE) must evaluate a degree awarded from a non-U.S. institution as equivalent to a master's degree awarded by a U.S. institution. A minimum grade point average of 3.25 on a 4.0 scale in their master's course work is required.
- 4. A current resume indicating a minimum of five years of professional experience in business, management or administration.
- 5. Three professional references.
- 6. A 500 1000 word essay on your motivation for doctoral study. Essay must be submitted electronically.

Quarter Hours

Accounting

Master of Business Administration

The accounting major is a program of advanced accounting classes for managers that have undergraduate degrees in accounting and want to take additional classes in subjects that are critical in their work situations. The accounting major is designed to provide a balanced broad education and an indepth understanding of the theoretical and practical concepts of accounting. Students enrolling in this major must have a minimum of 16 quarter hours of undergraduate accounting. This should include at least eight quarter hours of principles of accounting and at least four hours of intermediate accounting.

General Business

Master of Business Administration

This program seeks to combine the best of conventional academic training with the best of applied learning. The significant difference between this degree option and others mentioned in this catalog is that there is no need to declare a major. Students electing this "general" approach to the degree complete the core MBA courses and then select three other courses offered in the graduate school. This allows the most flexibility and is designed for students who do not have a specific need for a major to select from a variety of interesting classes.

Health Care Management

Master of Business Administration

Health care management has become a vital function in today's economy. With the emphasis on cost, service, and quality of care, the health care manager is faced with a significant number of issues and problems. This program seeks to combine the best of academic training with the best of field based learning and an emphasis on the allied health field. Most typical business disciplines are represented in the curriculum because a successful manager must be conversant with different aspects of running organizations or companies.

Occupational Therapy

Master of Occupational Therapy

The delivery of the Occupational Therapy program at the graduate level revolves around instructors facilitating learning through problem based case management. Students in the MOT program will be required to utilize theory, logic, clinical reasoning, and pragmatic skills in an interactive learning environment. It is expected that stu55

04

55

dents will participate in discussion, debate, and develop treatment choices based on sound research and theoretical assumptions. The Master of Occupational Therapy curriculum emphasizes mastery of skills required for entry level practice. The curriculum is designed so that graduates can review, understand, conduct, and interpret research activities. Evidence based practice initiatives make it essential that practitioner's research skills are well developed.

This program is offered at the following Baker College campus: Center for Graduate Studies.

Business Administration

Doctor of Business Administration

Structured as a three year, 90 quarter credit program, the DBA curriculum blends taught interdisciplinary content and research seminars with assessed scholarly and professional development activities organized around two portfolios, the Scholarly Activities Portfolio and

the Professional Activities Portfolio. The program culminates in a research based dissertation focused on a real problem facing today's business leaders and managers. Over the course of the program, students develop the capacity to work independently and in more depth, moving from prescribed content in the first year of the program, to supervised scholarly activities in the second year, to independent research focused on his or her area of interest in the third year. Students may choose from five areas of specialization or design their own specialized field of study.

QUARTER HOURS REQUIRED FOR GRADUATION

This program is offered at the following Baker College campus: Center for Graduate Studies.

BUSINESS

Focuses on the investigation, analysis, design, and implementation of new information systems or changes to existing information systems from the viewpoint of enduser management. This course emphasizes the cooperation necessary between technical information systems staff, end users, and management for implementation of a successful information system. The applications of new technologies to the improvement of ebusiness and ecommerce are also included in this course.

Prerequisite(s): C or better in BUS 675.

Examines techniques for determining database requirements and managing organizational data resources. This course will evaluate the different data structures typically used for managing data and the different strategies for designing and creating database systems that are effective and efficient. Prior database experience is strongly recommended.

Prerequisite(s): C or better in BUS 675.

Provides an understanding of the technical features of the different types of networks including Local Area networks (LAN), Wide Area Networks (WAN), and the internet. This course also examines recent advances and new applications in the expanding field of telecommunications and computer networks and the affects they will have on business.

Prerequisite(s): C or better in BUS 675.

BUS 566 Project Management......4 QH

Explores the tools, techniques, processes, and strategies for managing projects to successful completion. Special emphasis will be placed on tracking and monitoring project progress in order to identify and resolve difficulties as soon as possible. Included will be discussions of common problem areas and how to deal with them.

Prerequisite(s): C or better in BUS 675.

Examines financial rewards in organizations. Students will examine compensation, surveys, reward and incentive systems, pay equity, benefits, legal issues, and the strategic planning of compensation and reward systems in organizations. Prerequisite(s): C or better in BUS 572.

Evaluates a variety of human resource issues facing corporations and businesses today. These include employee development, performance appraisal systems, job design, hiring and dismissal processes, career management strategies, legal issues, morale monitoring, domestic and global labor market problems, as well as how cultural and economic factors influence the effectiveness of human resource management.

Prerequisite(s): C or better in BUS 678.

BUS 573A Labor Relations and Conflict Resolution4 QH

Provides students the opportunity to analyze industrial relations by examining the role of labor unions in American life and worldwide. The course will address the legal and business environment for collective bargaining and conflict resolution among both union and atwill employees. It will also address the impact of globalization and international trade agreements on the future growth of organized labor.

Prerequisite(s): C or better in BUS 572.

BUS 574A Strategic Organizational Development4 QH

This course will examine the role and purpose that organizational development plays in creating and supporting business strategy, including change, culture, values, and environment. Evaluation of the results from organizational development initiatives will be discussed to determine contributions made and lessons learned. This course is designed to improve the knowledge and skills of persons involved in the process of business change. Prerequisite(s): C or better in BUS 572.

BUS 576A Employee Staffing and Development......4 QH

Focuses on determining an organization's training needs. Emphasis will be placed on training needs analysis techniques, designing training programs, implementation of training programs, evaluation of training programs, and the cost effectiveness of training programs.

Prerequisite(s): C or better in BUS 572.

This course orients students into the Baker College MBA program. Topics covered include the following: APA writing style, research expectations, Baker College policies, library resources, and Baker College procedures. All students entering the MBA program must successfully complete this course prior to enrolling in subsequent MBA courses.

This course provides students with an understanding of individuals, groups, and organizations as a whole. This course considers such topics as alignment of people within an organization, as well as techniques for these individuals to manage and lead more effectively. This course will also discuss how technology, the Internet, globalism, and virtual teaming are impacting the work environment today.

Prerequisite(s): C or better in BUS 678.

This course focuses on the use of financial and managerial accounting information for decision making purposes. Topics include accounting concepts, accounting systems, preparing financial statements, product costing and overhead allocation, variance analysis, budgeting, and responsibility accounting. How these topics should be applied in information based decision making is emphasized. Case analysis is used to enhance student learning of key accounting concepts.

Prerequisite(s): C or better in BUS 678.

Focuses on special studies related to tax problems of individuals, partnerships, fiduciaries, and corporations. Emphasis is on federal taxation of corporations, trusts, and estates. Specific use of the Tax Code and the Internal Revenue Service Regulations will be an integral part of this course.

Prerequisite(s): C or better in BUS 630 and 16 hours of undergraduate accounting.

BUS 634 NonProfit Accounting......4 QH

This course is a comprehensive study of the recording of transactions by government units and the preparation of financial statements by notforprofit entities. City government is the basic unit of study; however, school districts, universities, and hospitals are covered to illustrate the similarity in accounting for all notforprofit entities. The topics of the classifications of audits, auditing standards, audit procedures, the audit report, the Single Audit Act, fraud examination, and forensic accounting are also covered.

Prerequisite(s): C or better in BUS 630 and 16 hours of undergraduate accounting.

BUS 635 Global Accounting......4 QH

Explores the impact of the cultural, social, legal, political, and economic conditions that shape the national accounting standard-setting process of the different countries with a focus on accounting practices of vital countries with diverse cultures and legal environments. The purposes of and attempts at classification of countries by their accounting characteristics are examined. The purposes and progress of regional and international harmonization programs are discussed with a focus on the international accounting standards and their impact on the economic consequences of multinational corporations. Attention is given to the accounting problems facing multinational corporations using case studies. These include foreign currency translation, auditing in the international environment, transfer pricing, international taxation, global managerial planning and control and analyzing foreign financial statements.

Prerequisite(s): C or better in BUS 630 and 16 hours of undergraduate accounting.

BUS 640 The Financial Environment4 QH

Provides an understanding of corporate financial management including the introduction of key concepts in the field of finance and the environment in which they are applied. Students learn how to gauge the financial health of their company and to measure and understand the financial return in relation to risk. Capital budgeting and management of working capital are also discussed. This course emphasizes teaching students to improve their business financial decision making.

Prerequisite(s): C or better in BUS 678.

BUS 641 Money and Banking......4 QH

Provides students the opportunity to learn and discuss the topics of money, money markets, money market participants, monetary policies and its effects, and regulation of money markets, in addition to examining banks, banking services, and the banking industry. The dynamic nature of the banking industry will be examined, highlighting recent changes and expected future developments. Students will also learn to identify and manage financial risks. Students will write a project report on how to improve some banking practices or business practices related to banking or money management. Prerequisite(s): C or better in BUS 640.

BUS 642 Financial Accounting......4 QH

Emphasis is on understanding and preparing financial accounting statements on past performance and projected future performance of organizations. Students will also learn to evaluate and efficiently use financial accounting statements to identify business problems and profit from business strengths. Topics include FASB's conceptual framework, GAAP, measuring income, recording transactions, accounting for sales, inventories and cost of goods sold, longlived assets and depreciation, liabilities and interest, valuation and accounting for bonds and leases, stockholder's equity, statement of cash flows, accounting differences, and the International Accounting Standards.

Prerequisite(s): C or better in BUS 630 or C or better in BUS 640, 16 Hours of undergraduate accounting.

Introduces students international financial capital flows in the global economy, focusing on how firms can borrow from, lend to, and invest in foreign countries. The costs and benefits of international business financing are analyzed, from both shortterm and longterm perspectives, considering both direct and indirect effects. Business strategies for managing financial risks are examined, including foreign exchange risk, interest rate risk, and default risk. Students will complete a project report on how his or her firm can profitably borrow from, lend to, or invest in a particular foreign country, using the international money market and international capital market.

Prerequisite(s): C or better in BUS 640.

Helps students to understand and undertake responsible budgeting practices at various levels of government local, state, and national. Students will learn to read and develop a budget of tax revenue income, expenditures, and transfers to achieve policy makers' financial objectives for their constituents. This course explores the issues of tax policy, fiscal policy, transfer programs, budget deficits, public debt, and budget planning. Students will prepare a project report using the principles of public finance to improve a government practice. Prerequisite(s): C or better in BUS 640.

BUS 650 The Economic Environment.......4 QH

Provides students with an integrated understanding of the concepts of economics. The emphasis is on the application of economics and uses actual economic events to encourage the study of the principles of economics and to show how these concepts can help students understand the complex and dynamic American economy.

Prerequisite(s): C or better in BUS 678.

BUS 660 The Marketing Environment......4 QH

Concentrates on the marketing concept and its impact on the strategic decisionmaking process of the firm. This course emphasizes planning and managing marketing activities of multiproduct firms and provides an understanding of the fundamental issues which influence marketing decisions. The specifics of implementing a marketing plan are discussed. In addition, the effects of the global marketplace and sources of marketing research are discussed. Prerequisite(s): C or better in BUS 678.

BUS 664 International Marketing......4 QH

Gives an overview and provides an understanding of international marketing as a managerial challenge. The emphasis is on international environmental analy-sis, international marketing strategies and current international market issues and their implications. It is an integrative learning experience bringing in all the many facets of business management to bear on the central concern of most organizations today how to grow and prosper in a global marketplace. Challenges in global market integration, global trade and global investments are also explored and examined.

Prerequisite(s): C or better in BUS 660.

for marketing decisions. This course concentrates on the generation of research information necessary for decision making in all aspects of marketing functions. Prerequisite(s): C or better in BUS 660.

Studies conceiving, executing, and administering all aspects of the promotional mix. The above analysis includes the processes for implementation and evaluation of a promotional strategic plan specific to product(s) being marketed. Topics include: formulation of a promotional budget, selecting media sources, determining promotional objectives, and evaluating the effectiveness of the plan. Prerequisite(s): C or better in BUS 660.

BUS 668 Distribution Management4 QH Provides an indepth study of variables that influence all the logistic elements for determination of the places where products are being sold. Topics include government regulations, distribution, transportation, organizational structure, competition, and buyer behavior. A logistics model/plan is required for this course. Prerequisite(s): C or better in BUS 660.

Presents information systems from a business and managerial perspective. This course examines ways to utilize information technology theories and concepts to support business strategies and improve management decisionmaking. Short case studies are used to develop managerial skills by applying the principles of information technology to typical realworld situations. Students will also learn to appraise the possible effects of changes, trends, and emerging technologies on business.

Prerequisite(s): C or better in BUS 678.

BUS 678 Research and Statistics for Managers4 QH

This course emphasizes the use of data collection and analysis in business environments to facilitate decision making. Research designs will be addressed so that students can ask and answer specific questions. Students will learn to properly use basic descriptive and inferential statistics. This course will offer an applications-oriented perspective to conducting and critically evaluating primary research.

Prerequisite(s): C or better in BUS 609 or C or better in MIS 501.

BUS 685 Dynamics of Leadership4 QH

Examines issues within the leadership area including the following: managing cultural diversity, team building, project management, roles and responsibilities of the leader, leadership theories, the leadership/follower relationship, supervisory techniques, stress management, problem solving, and various concepts related to human behavior. This course also examines the evolution of leadership thought, the various methods for improving the worker performance through analytical decision making, and current issues in leadership Prerequisite(s): C or better in BUS 615.

BUS 686 Leadership Theory and Practice4 QH

Provides an applied and comprehensive view of the leadership experience in today's world. This course integrates recent ideas and applications with established scholarly research. The implications and demands on leaders due to ethical scandals, global crises, emergence of ecommerce, learning organizations, virtual teams, and globalization are examined. Prerequisite(s): C or better in BUS 615.

BUS 688 Profiles in Leadership4 QH This course explores leadership styles through leader biographies covering several management eras. Both domestic and global views of leadership are considered. Leadership practices and philosophies of both past and present leaders are examined and critiqued.

Prerequisite(s): C or better in BUS 615.

BUS 689 Team Leadership and Group Dynamics......4 QH

The focus of this course is to improve small group performance through assessment and outcome-based goal setting techniques. Students examine organizational teams and learn teambuilding skills while being members of virtual teams. Students also learn to productively function in a group environment. Team performance is considered, and various reasons for team failure are explored. Team leadership is stressed throughout the course, and problems that may occur within teams are addressed. Effective teams are critical for many organizations to move forward, and this course helps students enhance their team building skills. Prerequisite(s): C or better in BUS 615.

BUS 690 Strategy in a Global Environment4 QH

This course integrates the theories and skills required for ethical and strategic decision making. Students will analyze the decision making process and examine the strategies of public corporations. Students will draw upon knowledge gained from previous courses to apply the strategies and techniques necessary to formulate, implement, and evaluate a global strategic plan. This is the capstone course of the Baker College MBA program.

Prerequisite(s): C or better in BUS 678. Corequisite(s): BUS 572, BUS 615, BUS 630, BUS 640, BUS 650, BUS 660, BUS 675.

A comprehensive study of managerial problem solving and decision making techniques, organizational design, human resources management, the health care system, quality improvement, organizational change and strategic planning. Prerequisite(s): C or better in BUS 678.

BUS 754A Health and Wellness Program Management4 QH

Provides an indepth study of the management of programs designed to promote a wellness lifestyle. Topics include facility and personnel management, program development and marketing, public relations techniques, project management and program evaluation.

Prerequisite(s): C or better in BUS 678.

Analyzes current topics in health care with an emphasis on recent developments and trends in the field and their practical applications to the health care industrv

Prerequisite(s): C or better in BUS 678.

Explores various legal and ethical issues relevant to the health care field. Topics include medical malpractice, informed consent, professional liability, patients' rights, employee rights and responsibilities, and medical ethics. Prerequisite(s): C or better in BUS 678.

Designed to provide a deeper understanding of financial concepts applied to the health care field. Topics include financial statement analysis, principles of reimbursement, cost concepts and decision making, financial forecasting, budgeting techniques, capital project analysis, and strategic financial planning within the health care industry.

Prerequisite(s): C or better in BUS 678.

Being a doctoral student requires proficiency at identifying the need for information, finding it, and evaluating its accuracy, significance, and relevance to your research. In this course, you will be introduced to the information resources available to you as a doctoral student at Baker College and will develop proficiency at using them. Library services such as remote access to resources, supply materials, and search strategies are explored. You will also become familiar with the My eLibrary module available in each doctoral seminar.

A deep connection exists between your role as a learner and your role as a practitioner. At the heart of the DBA program is the belief that ideas will improve your professional practice and reflection on your professional practice will create new ideas. These relationships are explored in the course. You will use readings, assessment tools, experiential exercises, and reflection on your past and current experiences to develop a deeper understanding of the extent of your knowledge of business and management, your learning styles and skills, and your professional strengths and weaknesses. You will also explore the nature of scholarly inquiry and scientific method. You will explore connections between theory and practice and the importance of these considerations in doing applied research. The course also provides practical guidance on how to critically read scholarly articles, how to formulate researchable questions, and how to ensure scholarly integrity and avoid plagiarism.

Leading in today's complex, worldwide environment necessitates teamwork and collaboration to sustain a competitive advantage. You will examine practices required to lead organizations with highly diverse workforces distributed across international, cultural, and regional boundaries. You will systematically investigate the latest ideas emerging from both the world of practice and leadership research to identify "best practices" in the ever changing and dynamic workplace of the 21st Century.

Whether you work in a large or small company, a governmental agency, a nonprofit or community-based organization, or run your own small business, you must function in a new and highly interconnected worldwide context. This course explores this new environment from multiple perspectives. You will examine cultural, environmental, ethical, political, and legal differences across different regions of the world. Attention is focused on how to manage and lead across boundaries to meet the challenges of this new context. Theories of international management, international human resource management, and international finance and accounting are considered as is the role of information technology in creating greater access to the worldwide economy.

The digital age has created new opportunities and new challenges for the business enterprise. In this course, you will explore the strategic impact information technology is having on businesses and the various approaches firms are taking to gain economic benefit from the technology. You will examine the emerging field of knowledge management and how it addresses the demands of global competition and the needs of 21st century organizations. You will learn how knowledge is developed, collected, organized, stored, retrieved, disseminated, and applied across organizations; and how technology is used to make evidence-based decisions. You will examine theories and research drawn from organizational behavior, information sciences, and management to create an interdisciplinary perspective on these critical organizational processes.

Planned change without clear standards and outcome measures makes little sense. In this course, you will examine total quality, ISO 9000, Malcolm Baldrige, process reengineering, benchmarking, Six Sigma, lean development, and other techniques for quality improvement, and will examine these initiatives in the broader framework of organizational change.

BUS 814 Corporate and Personal Ethics4 QH

Socially responsible and innovative corporate governance is required to meet the challenges of global warming, the stewardship of scarce resources, and the distribution of income among various stakeholders. You will examine how ethical principles can be integrated into corporate strategies. The responsibility to a wide array of stakeholders is examined as well as factors that should be considered in guiding a company's philanthropic, community development and sustainable business practices. You will also focus on individual ethics and how managers and leaders can build congruency between their values and actions. Finally, you will examine best practices in corporate social innovation by such firms as Ben & Jerry's, KLD, Plug Power, PwC, UN Global Compact, and Schlumberger SEED.

The focus of this course is concepts of statistical analysis with application to the functional areas of business. It is rich in applications from accounting, finance, marketing, management, and economics. It will also serve as a refresher for you on the basic concepts and statistical techniques used in business and prepare you for more advanced quantitative methods introduced later in the program, laying a foundation for analytic literacy.

BUS 841 Introduction to Research Design4 QH

In this course, you will learn the purpose and rationale for conducting scientific research, critical technology used in research, and the basic elements of research design. Elements covered include measurement, sampling, variables, validity, reliability, and causation. Different research designs will be covered including experimental and quasiexperimental, survey, field, designs utilizing existing data, and evaluation research. Ethics involved in research are covered including the protection of human subjects as required by the Baker College Institutional Review Board (IRB). It is recommended that the course be taken before or concurrently with BUS 844.

BUS 842 Designing a Qualitative Dissertation Study......4 QH In this course, you will explore in greater depth the theory behind and the exe-

cution of qualitative research studies. You will formulate qualitative research questions related to a research problem, identify applicable qualitative approaches, and participant selection strategies. You will develop protocols for interviews, observations, and document analysis. You will learn to organize and analyze data through classification and coding. You will examine specific methodological and ethical issues associated with qualitative research. The important outcome is that you will have the research design for your dissertations based on a survey of the research design literature appropriate for your study.

BUS 843 Designing a Quantitative Dissertation Study In this course, you will develop an indepth understanding and working knowledge of quantitative research design. You build on statistical techniques (descriptive and inferential) learned in BUS 840, learning to design studies in such a way as to maximize the validity and reliability of the outcome. This course approaches quantitative research design from a problem-solving perspective with emphasis placed on selecting appropriate research designs and on interpreting and reporting data analyses results. Design of experiments is a primary focus of the course, to enhance the use and interpretation of statistics in research. The important outcome is that you will have the research design for your dissertations based on survey of the research design literature appropriate for your study.

BUS 844 Defining the Dissertation Research Problem and Research Question4 QH

In this course, you define the purpose of your dissertation studies; produce a clear statement of the research problem based on a detailed review of the literature, and produce research questions to be answered or hypotheses to be tested. You include these in a dissertation prospectus, which can be used to select members for your dissertation committee.

BUS 861 Doctoral Seminar in Finance I4 QH In this doctoral seminar, you will investigate a research topic of your choice within Finance. Building on this research problem or application, you will compare and contrast major theories relevant to your topic from primary sources and synthesize these concepts to form a theoretical basis for your research. The seminar will include a bibliography of major theorists in the field of study to provide a starting point. You will go beyond this initial set of references as you develop your theoretical foundation. The initial portions of your Qualifying Paper are developed in this seminar. The seminar is normally taken concurrently with either the qualitative or quantitative design research course.

BUS 862 Doctoral Seminar in Marketing I......4 QH

In this doctoral seminar, you will investigate a research topic of your choice within Marketing. Building on this research problem or application, you will compare and contrast major theories relevant to your topic from primary sources and synthesize these concepts to form a theoretical basis for your research. The seminar will include a bibliography of major theorists in the field of study to provide a starting point. You will go beyond this initial set of references as you develop your theoretical foundation. The initial portions of your Qualifying Paper are developed in this seminar. The seminar is normally taken concurrently with either the qualitative or quantitative design research course.

BUS 863 Doctoral Seminar in Management Information Systems I4 QH

In this doctoral seminar, you will investigate a research topic of your choice within Management Information Systems. Building on this research problem or application, you will compare and contrast major theories relevant to your topic from primary sources and synthesize these concepts to form a theoretical basis for your research. The seminar will include a bibliography of major theorists in the field of study to provide a starting point. You will go beyond this initial set of references as you develop your theoretical foundation. The initial portions of your Qualifying Paper are developed in this seminar. The seminar is normally taken concurrently with either the qualitative or quantitative design research course

In this doctoral seminar, you will investigate a research topic of your choice within Human Resource Management. Building on this research problem or application, you will compare and contrast major theories relevant to your topic from primary sources and synthesize these concepts to form a theoretical basis for your research. The seminar will include a bibliography of major theorists in the field of study to provide a starting point. You will go beyond this initial set of references as you develop your theoretical foundation. The initial portions of your Qualifying Paper are developed in this seminar. The seminar is normally taken concurrently with either the qualitative or quantitative design research course.

BUS 865 Doctoral Seminar in Leadership I......4 QH

In this doctoral seminar, you will investigate a research topic of your choice within Leadership. Building on this research problem or application, you will compare and contrast major theories relevant to your topic from primary sources and synthesize these concepts to form a theoretical basis for your research. The seminar will include a bibliography of major theorists in the field of study to provide a starting point. You will go beyond this initial set of references as you develop your theoretical foundation. The initial portions of your Qualifying Paper are developed in this seminar. The seminar is normally taken concurrently with either the qualitative or quantitative design research course.

BUS 866 Doctoral Seminar Self Designed I......4 QH

nar

In this doctoral seminar, you will investigate a research topic of your choice within your Self Designed field of study. Building on this research problem or application, you will compare and contrast major theories relevant to your topic from primary sources and synthesize these concepts to form a theoretical basis for your research. The seminar will include a bibliography of major theorists in the field of study to provide a starting point. You will go beyond this initial set of references as you develop your theoretical foundation. The initial portions of your Qualifying Paper are developed in this seminar. The seminar is normally taken concurrently with either the qualitative or quantitative design research course.

In this doctoral seminar, you will investigate a research topic of your choice within Public and Nonprofit Management. Building on this research problem or application, you will compare and contrast major theories relevant to your topic from primary sources and synthesize these concepts to form a theoretical basis for your research. The seminar will include a bibliography of major theorists in the field of study to provide a starting point. You will go beyond this initial set of references as you develop your theoretical foundation. The initial portions of your Qualifying Paper are developed in this seminar. The seminar is normally taken concurrently with either the qualitative or quantitative design research course

BUS 871 Doctoral Seminar in Finance II4 QH In this doctoral seminar, you will continue to investigate a research topic of your choice within Finance. You will analyze, compare, and contrast related concepts from current research literature. You will then apply these results to your application. This includes identifying the significance and benefits of this research. Your final Qualifying Paper is developed in this seminar.

BUS 872 Doctoral Seminar in Marketing II......4 QH

In this doctoral seminar, you will continue to investigate a research topic of your choice within Marketing. You will analyze, compare, and contrast related concepts from current research literature. You will then apply these results to your application. This includes identifying the significance and benefits of this research. Your final Qualifying Paper is developed in this seminar.

In this doctoral seminar, you will continue to investigate a research topic of your choice within Management Information Systems. You will analyze, compare, and contrast related concepts from current research literature. You will then apply these results to your application. This includes identifying the significance and benefits of this research. Your final Qualifying Paper is developed in this seminar

BUS 874 Doctoral Seminar in Human Resource Management II......4 QH In this doctoral seminar, you will continue to investigate a research topic of your choice within Human Resource Development. You will analyze, compare, and contrast related concepts from current research literature. You will then apply these results to your application. This includes identifying the significance and benefits of this research. Your final Qualifying Paper is developed in this seminar.

BUS 875 Doctoral Seminar in Leadership II4 QH In this doctoral seminar, you will continue to investigate a research topic of your choice within Leadership. You will analyze, compare, and contrast related concepts from current research literature. You will then apply these results to your application. This includes identifying the significance and benefits of this research. Your final Qualifying Paper is developed in this seminar.

BUS 876 Doctoral Seminar Self Designed II......4 QH In this doctoral seminar, you will continue to investigate a research topic of your choice within your Self Designed field of study. You will analyze, compare, and contrast related concepts from current research literature. You will then apply these results to your application. This includes identifying the significance and benefits of this research. Your final Qualifying Paper is developed in this seminar

BUS 877 Doctoral Seminar Public and Nonprofit Management II......4 QH In this doctoral seminar, you will continue to investigate a research topic of your choice within Public and Nonprofit Management. You will analyze, compare, and contrast related concepts from current research literature. You will then apply these results to your application. This includes identifying the significance and benefits of this research. Your final Qualifying Paper is developed in this semi-

BUS 880 First Year Professional Residency2 QH You will attend at least one professional conference in the first year. The Academy of Management annual meeting is an example. Approved conferences will be identified and program faculty will also attend. The DBA program will host a seminar at these events. A list of approved conferences will be developed by the faculty each year. You will be required to document your attendance and

to write a short paper describing what you learned at the conference.

You will attend at least one professional conference in the second year. The Academy of Management annual meeting is an example. Approved conferences will be identified and program faculty will also attend. The DBA program will host a seminar at these events. A list of approved conferences will be developed by the faculty each year. You will be required to document your attendance and to write a short paper describing what you learned at the conference.

BUS 890 Portfolio Development I......2 QH

In preparation for the Comprehensive Essay and the first year assessment, you will develop and maintain two portfolios, one documenting your scholarly activities and the other your professional accomplishments. You will create these in BUS 801, The Scholar Practitioner, and maintain them throughout the program.

BUS 891 Portfolio Development II......2 QH

In preparation for the Comprehensive Essay and the first year assessment, you will develop and maintain two portfolios, one documenting your scholarly activities and the other your professional accomplishments. You will create these in BUS 801, The Scholar Practitioner, and maintain them throughout the program.

BUS 892 Comprehensive Essay......2 QH The Comprehensive Essay is due at the end of the first year after the completion of BUS 801, BUS 810, BUS811, BUS813, BUS890, and BUS891. It provides evidence that you have mastered foundational theories and concepts in the field of business administration, have an interdisciplinary understanding of the complex nature of business problems, and are able to synthesize and analyze scholarly research publications. The essay requires you to summarize the annotations you have collected in your Reading Asset Library. The annotations are submitted with the essay.

BUS 893 Qualifying Paper2 QH

In order to qualify for the dissertation phase of the DBA program, you must prepare a scholarly paper suitable for publication. Normally this occurs at the end of the second year after all your course work in the program has been completed except for BUS 814 Corporate and Personal Ethics and all that remains is the dissertation. The purpose of the paper is to demonstrate your mastery of scholarly writing, research methodology, and a depth of knowledge in a field covered by the program. It will provide evidence that you will be able to plan, execute, and apply scholarly research, and be able to communicate management and business theories, research findings, and best practices through scholarly publication.

BUS 896 Dissertation Proposal4 QH

The final dissertation is composed of five chapters (Chapter I Introduction and Statement of the Problem; Chapter II Literature Review; Chapter III Methodology; Chapter IV Results; Chapter V Conclusions and Recommendations). The proposal is composed of the first three chapters of the dissertation written in the future tense, since the study is yet to be completed.

BUS 897 Conducting the Dissertation Research I8 QH

A successfully completed dissertation provides evidence that you have the ability to plan, execute, and apply scholarly research, have mastered foundational theories and concepts, and have an indepth knowledge of theory and practice in one area of specialization. It is also evidence that you are able to conceptualize and carry out research and to communicate the results of that research in a coherent document, which addresses an important problem and makes a significant contribution to the profession's theory or practice.

BUS 898 Conducting the Dissertation Research II8 QH

A successfully completed dissertation provides evidence that you have the ability to plan, execute, and apply scholarly research, have mastered foundational theories and concepts, and have an indepth knowledge of theory and practice in on e area of specialization. It is also evidence that you are able to conceptualize and carry out research and to communicate the results of that research in a coherent document, which addresses an important problem and makes a significant contribution to the profession's theory or practice.

BUS 899 Completing the Dissertation Research8 QH

A successfully completed dissertation provides evidence that you have the ability to plan, execute, and apply scholarly research, have mastered foundational theories and concepts, and have an indepth knowledge of theory and practice in one area of specialization. It is also evidence that you are able to conceptualize and carry out research and to communicate the results of that research in a coherent document, which addresses an important problem and makes a significant contribution to the profession's theory or practice.

MANAGEMENT INFORMATION SYSTEMS

MIS 501 Management Information Systems Seminar

This course is a short introduction to online learning, including writing and publication standards, the Blackboard user interface and toolset, submitting assignments, and Baker MSIS program software coding standards. Prerequisite(s): Acceptance in the program.

MIS 511 Management Information Systems.......4 QH

This course gives a broad overview of IS concepts, including past and current trends in IS. Students will gain the foundational knowledge necessary for success in the other courses that are in the MSIS program. Prerequisite(s): Acceptance in the program.

This course provides the tools, skills, and knowledge for successful planning, organization, and implementation of information systems and emphasizes the use of realworld examples and applications. Common mistakes and pitfalls in project management when used in designing information systems will be discussed. Topics covered include project scoping, estimating, budgeting, scheduling, tracking, and controlling. Project management software will be used in this course.

Prerequisite(s): Acceptance in the program.

MIS 531 Database Design and Management4 QH This course addresses the theories, concepts, and application issues associated with database management systems. For new or upgraded systems, topics include requirements analysis, user specifications, design strategies, implementation, and testing. For existing systems, issues related to growth, maturity, and obsolescence will be covered. Other topics include relational and distributed databases plus data integrity and security.

Prerequisite(s): Acceptance in the program.

MIS 541 Data Communications and Networking4 QH

This course examines current theories, concepts, and protocols regarding the design of telecommunications and digital networks. This course emphasizes current research and literature in both theoretical and systems oriented concepts rather than specific hardware or software implementations. Primary theories and concepts regarding enterprisewide telecommunications and networking are evaluated and critiqued in relation to an organization's overall strategic plan. *Prerequisite(s): Acceptance in the program.*

MIS 601 Information Security4 QH Focuses on the tools necessary for quantifying risk as well as costs and benefits of mitigation methods and technologies. Topics covered include software, access control systems and methodology, business continuity and disaster recovery planning, legal issues in information system security, ethics, computer operations security, physical security, and security architecture. This course seeks to provide a balance between the managerial role and the technical role. Prerequisite(s): Acceptance in the program.

This course emphasizes the strategies and concepts of systems analysis and design for dealing with the complexity in the design and subsequent implementation of information systems. Formal, systematic, multiphased analysis, and design processes spanning the entire information lifecycle will be emphasized. *Prerequisite(s): Acceptance in the program.*

MIS 621 Systems Architectures......4 QH

This course addresses the relationships and tradeoffs associated with computer hardware and software. Emphasis will be placed on system architecture including data and file structures, data storage, data communications, systems analysis and design, the operator machine interface, input/output devices, and operating systems. Other topics include system architectures for singleuser, centralized, and networked computing systems and singleuser and multiuser operating systems

Prerequisite(s): Acceptance in the program.

MIS 631 Information Systems Integration Project I

This course will focus on students undertaking a planning exercise during which they will identify, plan, cost, and develop a preliminary requirements specification for a system that they will develop in MIS632. The project is considered to be successfully completed when the system meets the requirements as specified and the project sponsor is satisfied with the results.

Prerequisite(s): C or better in MIS 501, C or better in MIS 511, C or better in MIS 521, C or better in MIS 611. Corequisite(s): BUS 510, BUS 530, BUS 540, BUS 578, MIS 531, MIS 541.

In this second course, students will finish the analysis, design, implementation, and documentation of the system they began in MIS631. It will be followed by a presentation to their industry sponsor and the graduate faculty at Baker. The project is considered to be successfully completed when the system meets the requirements as specified and the project sponsor is satisfied with the results. This presentation can be done online or via a virtual teleconference if necessary. This course can be repeated up to three times until project completion. Prerequisite(s): C or better in MIS 631. Corequisite(s): MIS 601, MIS 621

OCCUPATIONAL THERAPY

OCC 501 Program Planning/Intervention (Childhood)5 QH

Covers assessment and the development of treatment strategies using current frames of reference in detail. Students are prepared to apply theoretical concepts in practice settings serving children.

OCC 505 Assessment and Treatment Interventions for Mental Health Practice4 QH

Covers mental health assessment and treatment strategies using psychosocial frames of reference and evidence based research. Therapeutic use of self, occupation, and group processes are emphasized.

Provides students with skills in utilizing methodologies of research by applying them to occupational therapy practices. Students will analyze research literature and learn how to prepare research proposals.

OCC 512 Qualitative and Quantitative Research Techniques4 QH Focuses on participation in data collection, analysis, and interpretation for both qualitative and quantitative research methodologies. A research proposal will be completed at the end of the course and submitted for approval which will allow students to conduct a final research project.

Allows students the opportunity to design, develop, and implement a research project utilizing skills from occupational therapy experiences and the statistical course sequence.

OCC 521 Upper Extremity Anatomy4 QH

Builds on knowledge gained in clinical kinesiology. Students will learn upper extremity anatomy in detail through lecture and clinical application. Emphasis will be on using knowledge of the upper extremity to develop clinical reasoning skills for the rehabilitation of upper extremity dysfunction.

OCC 522 Splinting and Related Hand Therapy Topics......4 QH

Focuses on the selection, fit, and fabrication of splints. This course includes related topics of hand therapy assessment and treatment, modalities, and wound care.

Utilizing a problem based approach; students are guided through the process of applying clinical reasoning principles to a variety of cases. Clinical observations and case assignments will be utilized to reflect on and process experiences. Ethical issues related to treatment and service provision will be discussed.

Focuses on the examination of the national and state health care policy as it relates to the provision of occupational therapy. Students will study trends in reimbursement, professional credentialing, and quality improvement.

OCC 551 Seminar in Natural Domains......4 QH

Explores and develops the roles for the occupational therapist in nontraditional service settings and models. With guidance of a faculty member, students will develop a needs assessment, business plan, or a position justification statement.

Provides a fulltime, three month clinical affiliation in a setting which provides students with experience in an occupational therapy practice. Students must complete all OT major coursework and gain approval by the program director of the Occupational Therapy program before enrolling in this course. *Prerequisite(s): Student background check.*

Provides a fulltime, three month clinical affiliation in a setting which provides students with experience in an occupational therapy practice. Students must complete all OT major coursework and gain approval by the program director of the Occupational Therapy program before enrolling in this course. *Prerequisite(s): Student background check.*

Financial Information Effective Fall 2009

Tuition Charges

The tuition charge per quarter hour of credit will be based on the following schedule. Tuition is subject to change at the beginning of any quarter and includes most fees

at the beginning of any quarter and menudes most rees.	
 Most undergraduate courses 	\$195
 Autobody Technology (ABT) courses 	\$235
Automotive Service Technician (AST) courses	\$205
• Dental Hygienist professional track (DHY) courses	\$255
Culinary Arts courses	\$335
(CUL111C, 112, 201, 211A, 222A, 232A, 242A, 251,	
351, 451; and FBM281)	
• Diesel Technology (DSL) courses	\$220
Nursing (NUR) courses	\$220
Truck Driving/Transportation Management	
(TRN101A, 111, 122, 151, 161, 201A)	\$285
(TRN208)	\$50
Graduate Center Master's	\$345
Graduate Center Doctorate	\$470
Fees	
COL111A College Success Strategies	\$60
Undergraduate Application Fee –	
payable with application	\$20
• Graduate Application Fee – <i>payable with application</i>	\$25
Undergraduate and Graduate Finance Charge	\$30
Any balance not paid by Friday of the sixth week	
of classes is subject to a finance charge.	
• Undergraduate and Graduate NSF Return Fee	\$25

-	Charles and Chaddate 101 Tetain 100	φ ₂₀
	Per item returned by the bank	
•	Undergraduate Graduation Processing Fee	\$50

Graduate Graduation Processing Fee \$75 •

Tuition Payments

Tuition may be paid at registration or in installments. If paid in installments, at least one half of the tuition plus fees should be paid by the Friday before classes start. The remaining balance must be paid by end of the sixth week of the guarter to avoid finance charges. Absenteeism and withdrawals may not reduce a student's financial obligation (see Refund Policy).

Past Due Balances

Students with outstanding balances may not be allowed to re-enroll for any quarter; to receive official transcripts of credit, letters of recommendation, diplomas; to participate in commencements ceremonies; or to use any Baker College service until all his/her Baker College accounts are settled at all campuses. Also, any student with an unpaid balance at the end of the quarter may not be allowed to take final examinations.

Employer Paid Tuition

Due to the vast number of tuition arrangements, contact the campus Business Office for additional information and required documentation.

Deferred Payment Plan

The Business Office on each campus is prepared to work out flexible payment arrangements with students and/or parents. A mutually agreeable payment schedule will be set up and a contract signed. Full payment of tuition and fees must be completed by the end of the ninth week of the quarter or the student may not be permitted to take final examinations in Week 10. If the contract is not completed as agreed, any outstanding balance will be treated as a past due balance (see Past Due Balances above).

Aviation Program Flight Instruction Fees

Baker College of Muskegon may contract with a licensed, fixed-base flight instruction operator to provide flight-training services. The Admissions Office can provide a schedule of fees for each course that includes flight instruction.

Entering students should be aware that the flight instruction fees will be charged in addition to regular Baker College tuition, and that the examples of average estimated costs per quarter or per school year given in this Catalog (see page 239) do not include flight instruction fees.

Charges for Non-Traditional Credit

- Advanced Placement Credit \$0 or \$50 Charge is dependent upon examination. No additional charges for credits earned.
- Articulation Credit No Charge
- Experiential Credit \$195 (non-refundable) assessment fee Tuition for credit earned is \$49 per credit hour. Assessment fee will be applied toward credit earned if applicable.
- Assessment fee is included in tuition charge for COL301A.
- Independent Study Credit **Regular** Tuition
- PROMOTE Classes **Regular** Tuition \$72
- CLEP Test Credit

Student Housing Costs

A room reservation/damage deposit of \$50 is due when an application for college-sponsored housing is submitted. The deposit will be refunded if written notice of cancellation is given according to the following schedule:

For the Fall Quarter	Prior to September 1
For the Winter Quarter	Prior to December 1
For the Spring Quarter	Prior to March 1
For the Summer Quarter	Prior to June 1
Room rates on each of our thre	e residential campuses are

listed below. (Estimated food costs are an additional \$300 per quarter.) If for any reason a student leaves during a quarter, there will be no refund of room fees for that quarter and no deposit refund.

Flint

Residence Hall:	
Baker Hall East:	\$825/person/quarter
	(4 students in apartment)
Baker Hall West:	\$875/person/quarter
Living Center:	\$750/person/quarter
	(double occupancy)
Adiustments will be ma	de if increased occupancy remains

past the third week of the quarter.

Muskegon

Baker Townhouses:	\$975/person/quarter
On-Campus Halls/Apartments:	\$875/person/quarter
-	

Owosso Residence Hall:

\$880/person/quarter

The deposit and quarterly room charge will be forfeited if the student is dismissed from the residence hall during a quarter. Any damages to the room, its contents, or residence hall commons area will be charged to the student's account or withheld from the \$50 room deposit, upon termination of residence

Special reduced-occupancy rooms may be available at higher rates. Contact the Campus Housing Office for more information.

Tuition Deposit - International Students

International students must deposit in advance an amount equal to the normal tuition, fees, and books for one academic year. The deposit must be renewed prior to registering for the fall quarter of each succeeding year. Any unused funds on deposit at the time the student graduates or withdraws will be refunded to the original depositor. Exception: Groups of international students enrolled by prior arrangement may be exempted from this requirement by the President of the Center for Graduate Studies.

International students must also fulfill requirements for a student visa. Information about the student visa process is available at any Baker College Admissions Office. Graduate students should contact the Center for Graduate Studies directly for assistance.

These regulations do not apply to Canadian students who commute from Canada to classes.

Refund Policy

A student who officially withdraws during the quarter will be granted a refund according to the scale below. There are no refunds of application fees. NOTE: ABSENTEEISM DOES NOT REDUCE A STUDENT'S FINANCIAL OBLIGA-TION

A student who officially withdraws is granted a refund BASED ON TOTAL TUITION CHARGES according to the following schedule:

On-Ground Ten-Week Courses:

- 100% If official withdrawal is on or before the first day of classes.
- 80% If date of official withdrawal is within the first week of classes
- 60% If date of official withdrawal is within the second week of classes.
- 20% If date of official withdrawal is within the third week of classes
- NO REFUND If official withdrawal is after the third week of classes

On-Ground Five-Week Courses:

\$ 25

\$

2,760

\$3,185

400

25

- 100% If official withdrawal is on or before the first day of classes.
- 80% If date of official withdrawal is within the first week of classes
- 50% If date of official withdrawal is within the second week of classes.
- NO REFUND If official withdrawal is after the second week of classes

Online Courses:

- 100% If official withdrawal is on or before the first day of classes.
- 100% If date of official withdrawal is within the first seven days of classes.
- 50% If date of official withdrawal is after the first seven days of classes and before fourteenth day of classes.
- NO REFUND If official withdrawal is after the fourteenth day of classes.

For academic offerings that are not consistent with the College's traditional calendar, the following percentages for refunds shall apply:

- 100% If official withdrawal is on or before the first day of classes.
- 80% If date of official withdrawal is within the first 10% of the total time period of the class.
- 60% If date of official withdrawal is within the first 10% to 20% of the total time period of the class.
- 20% If date of official withdrawal is within the first 20% to 30% of the total time period of the class.
- NO REFUND If official withdrawal is after 30% of the total time period of the class has elapsed.

The College shall use objective criteria to establish the periods.

Graduate Traditional Courses - Ten Week Classes:

100% –If official withdrawal is within the first seven days of classes.

- 50% If date of official withdrawal is after the first seven days of classes and before the fourteenth day of classes.
- NO REFUND If official withdrawal after the fourteenth day of classes.

Graduate Online Courses:

- 100% If official withdrawal is on or before the first day of classes.
- 100% If official withdrawal is within the first seven days of classes.
- 50% If date of official withdrawal is after the first seven days of classes and before the fourteenth day of classes.
- NO REFUND If official withdrawal is after the fourteenth day of classes.

Graduate Weekend Courses:

100% – If official withdrawal is within the first seven days of classes.

- 50% If date of official withdrawal is after the first seven days of classes, but before the fourteenth day of classes.
- NO REFUND If official withdrawal is after the fourteenth day of classes.

Official Withdrawal Date

The official withdrawal date is the date the withdrawal form is turned in to the Academic/Administrative Office, the postmarked date of the letter sent to the Academic/Administrative Office, the date the fax was sent, or the date of notice of withdrawal by the College. Refunds will be based on the date of official withdrawal (see Withdrawal from a Course, page 247).

Refunds on Residence Hall Charges

There is no refund on quarterly room charges for students who are expelled, dismissed, or move out voluntarily during the quarter *(see Student Housing)*.

Refunds

Information regarding the timetable for refunds is available in the Business Office of each campus.

Financial Aid

The Financial Aid staff is available to advise and assist students with obtaining funds to attend Baker College. All students attending Baker College are advised to apply for financial aid.

Definition of Financial Aid

Financial aid is any money that helps students attend college. It may include grants, scholarships, loans, savings, job earnings, or help from parents or a spouse.

Qualifications

Eligibility for need-based financial aid programs is determined by the cost of attending a college of the student's choice, minus the amount that the student and his/her family can reasonably afford.

- College Costs
- Expected Family Contribution
- = Financial Aid Eligibility (or "Need")

College Costs include tuition, fees, books, travel, and estimated living expenses while at the college.

Expected Family Contribution is determined from the income, assets, and other information that the student and his/her family report on the application for federal student aid. The federal methodology formula is used to determine the amount that the student and his/her family will be expected to pay.

Financial Aid Eligibility (or "Need") represents the amount of financial aid that the student is eligible to receive from federal, state, and college programs.

Types of Financial Aid

Once eligibility for financial assistance has been determined, students may be offered one or more types of aid in what is called a "package." The package may include the following:

Scholarship Aid: Awards usually based on academic excellence and not necessarily on financial need.

Grant Aid: Awards based solely on financial need.

Loan Aid: Awards offered at a low interest rate, which must be repaid after the student leaves college or drops below half-time enrollment.

Work Aid: An award of a part-time job from which earnings are used toward college expenses.

Additional information about each of these programs is listed on the following pages.

How to Apply (The Process)

All students who wish to apply for financial aid (grants, scholarships, loans, or work aid) should complete the FAFSA. Students can apply online at www.fafsa.ed.gov. Students may contact the Baker College Financial Aid Office for assistance with this application process. Once the application has been processed, the student will receive either a Student Aid Report (if mailed) or a Student Aid Acknowledgement Information Report (if submitted electronically). This report should be submitted to the Financial Aid Office only if Baker College is not listed as one of the college choices.

Once the Financial Aid Office receives the results of the FAFSA, these results will be reviewed. Some students' applications will be selected for verification; these students will be requested to submit additional documentation before their financial aid process can be completed.

Once all necessary documentation is received, the student will be sent an award package. If the award package includes a recommended loan, the student will need to complete a Loan Request. Instructions for completing the Loan Request will be included with the award package.

Financial aid funds (including student loans) cannot be applied to a student's account until 10 days prior to the start of his/her classes. All new students who are first-time borrowers must attend classes for 30 days before receiving any loan proceeds. Students will be notified when their financial aid funds (including loans) are disbursed, and (if applicable) when a refund of excess funds is available.

Scholarship Aid

Various major scholarship programs, including agencies and clubs (Lions Club, Kiwanis, American Business Women's Association, etc.), offer scholarships for outstanding achievement.

Information about scholarships is available in the Admissions Office for new students and in the Academic/ Administrative Office for returning students. Graduate and online students should contact the Financial Aid Office at the Center for Graduate Studies.

Scholastic achievement, extracurricular accomplishments, financial need, and career objectives are usually all taken into consideration in the scholarship award process. The amount of an award is determined annually.

Grant Aid

Several grant programs are available for eligible Baker College students. Grants need not be repaid.

Jewell Educational Fund

The Jewell Educational Fund, an institutional grant provided by the Baker College System, will be awarded to undergraduate students who demonstrate financial need by completing the FAFSA. The amount a student may receive will be determined on a case-by-case basis.

Federal Pell Grant Undergraduate

The amount of a Federal Pell Grant is based on the family's financial need and the cost of education at the college the student will attend. To apply for a Federal Pell Grant, the student must fill out the FAFSA. A Federal Pell Grant may range from \$609 to \$5,350.

Federal Supplemental Educational Opportunity Grant *Undergraduate*

The federally-funded Supplemental Educational Opportunity Grants (SEOG) may be awarded by colleges to undergraduate students whose financial aid applications demonstrate need. The maximum grant allowed for a student is \$4,000 per year.

Michigan Tuition Grant

Michigan Residents

Students attending at least half-time may be eligible to receive a grant from the State of Michigan. Eligibility for this grant is based on financial need, as demonstrated by completion of the FAFSA. Students must complete the State of Michigan questions on the FAFSA to receive grant consideration. The Michigan Tuition Grant applies only to independent colleges, such as Baker College. The amount of funds available is announced annually by the State.

Michigan Adult Part-Time Grant

Undergraduate - Michigan Residents

The Michigan Adult Part-Time (MAPT) grant is designed to provide assistance for adults who enroll at approved public or private degree-granting Michigan colleges on a part-time basis. Grants up to \$600 per year are available for not more than two years of study.

Loan Aid

Federal loans are available to all students, regardless of financial need. Students must attend college at least half time to be eligible for any type of loan. Remember, these loans must be repaid. There are two types of federal loans available: Federal Stafford loans and Federal PLUS loans. Additional information about our federal loan programs is available at **www.baker.edu/loans**.

Federal Stafford Loans:

Federal Stafford Loans are available to student borrowers at a low, fixed interest rate. Fees of up to 1.5 percent will be taken from each loan disbursement. There are two types of Federal Stafford Loans:

Subsidized Stafford Loan eligibility is based on financial need. Under this loan program, the student is not required to make payments while he/she is in school at least half-time, and no interest will accumulate during this time.

Unsubsidized Stafford Loan eligibility is not based on financial need. Under this loan program, the student is not required to make payments while he/she is in school; however, interest will accumulate if not paid by the borrower.

Students cannot take out Stafford Loans which exceed their cost of education less financial aid received. Listed below are the maximum Stafford Loan amounts students may borrow, based on grade level:

Grade Level 1	\$5,500
Grade Level 2	\$6,500
Grade Level 3 or 4	\$7,500
Graduate/Professional	\$8,500

The maximum aggregate loan limit for Stafford Loans is \$23,000 for undergraduate students and \$65,500 for graduate and professional students.

Independent, graduate and professional students, and dependent students whose parents were denied a parent PLUS loan may be eligible for additional loan amounts in the Unsubsidized Stafford Loan program. Listed below are the maximum additional Unsubsidized Stafford Loan amounts students may borrow, based on grade level:

	0	
Grade Level 1 or 2		\$6,000
Grade Level 3 or 4		\$7,000
Graduate/Professional		\$12,000

The maximum aggregate additional Stafford Loan limit is \$34,500 for undergraduate students and \$73,000 for graduate or professional students.

Federal PLUS Loans:

Federal PLUS Loans are available for parents of eligible dependent students at a fixed interest rate. Fees of up to four percent will be taken from each loan disbursement.

Under the Federal PLUS loan program students are eligible for their cost of education, minus any financial aid they will receive.

Students who request a loan will be required to complete Entrance Loan Counseling before the release of their first student loan at Baker College. In addition, student loan borrowers are also required to complete Exit Loan Counseling when they withdraw, drop below half-time enrollment, or graduate. This loan counseling is designed to provide information about student loans (i.e. repayment, deferment, forbearance, disbursement, and debt management strategies). This counseling can be completed online at **www.baker.edu/loans**.

Regulations require schools to establish a Code of Conduct Policy. You can access our Code of Conduct Policy at **www.baker.edu**.

Work Aid

Undergraduate students may be offered the opportunity to work part-time to earn funds for college expenses. This may reduce loan obligation and may be combined with other types of aid, such as grants and scholarships. Work-study aid is based on financial need; however, all Baker College students are welcome to register with the Baker College Career Services Office for regular part-time employment.

Federal/Michigan Work-Study Programs

Work-study provides jobs for students with financial need, as demonstrated on the FAFSA. Baker College offers work-study jobs off campus and at the College in its own work-study program. Students usually work 12 to 20 hours a week and must be enrolled at least half-time at Baker College. Selection of work-study students will be made by the Financial Aid Office based on financial need, class schedule, and academic progress of the student.

Rights and Responsibilities

Students have the right to accept or refuse any part of their financial aid package. If the student rejects any part of his/her financial aid package, it may affect other aid offered.

Students may not receive financial aid from more than one school while enrolled at two or more schools for the same time period. Classes the students take outside their declared program do not qualify for most forms of financial aid. In addition, Corporate Services classes are not eligible for financial aid.

Students must attend college at least half-time (six undergraduate credit hours or four graduate credit hours) in order to be considered for most financial aid.

It is the student's responsibility to inform the Financial Aid Office of any changes to information provided on the financial aid application.

Financial aid offered to the student is dependent upon the availability of funds. Any change in the availability of funds or a student's academic performance may change the award package.

If a student's financial aid application is estimated or incomplete, the student will be responsible for any charges that may occur if the estimated financial aid indicated is incorrect or the application remains incomplete.

Students receiving state and/or federal aid are required to maintain satisfactory academic progress as detailed below.

Satisfactory Academic Progress Rules

Introduction

In order for students to receive federal, state, or institutional aid, regulations require that students maintain satisfactory academic progress toward completion of their current academic program. All students will have their progress reviewed, whether or not they are receiving financial aid, since these rules decide eligibility for future quarters.

There are two academic standards that all students are required to maintain in order to be eligible for future financial aid assistance. These standards include a qualitative measurement based on grade point average and a quantitative measurement based on progress toward graduation. In addition, students must be accepted for continued enrollment under the policies defined in the Baker College catalog.

Undergraduate

Rule 1: Qualitative Measurement

Students must have a minimum 2.0 cumulative grade point average at the end of their second yearly review and every yearly review thereafter. Yearly reviews are conducted at the end of spring quarter.

Rule 2: Quantitative Measurement

Students must complete their current academic program within a 150% time frame of the current program length. Baker College uses two methods to measure this rule:

- A. Baker College will monitor to ensure that students successfully complete two-thirds of their cumulative hours attempted. Students will be considered to be in violation if they do not meet this requirement. Students will be evaluated yearly at the end of spring quarter.
- B. Baker College will monitor students' progress by comparing the required hours for program completion to the cumulative hours attempted, which will be reviewed at the end of each quarter. Students will be considered to be in violation when it becomes mathematically impossible for them to graduate within the 150% time frame.

Definitions:

- Time Frame: Published program hours, minus transfer hours from another institution which apply to the student's current program, multiplied by 150%.
- Cumulative Hours Attempted: Cumulative hours attempted at Baker College, minus up to 28 developmental hours (if any) plus adjusted hours for the current program based on a prior accepted appeal (if any).

Please Note:

- Withdrawal grades and repeat classes are counted as hours attempted.
- Incomplete/Progress grades are not counted until they are converted to an actual grade.
- Only transfer credits from another institution which apply toward the student's current program are applied to the 150% timeframe requirement.
- Students on a certificate or diploma program will be evaluated quarterly once they have met or exceeded the halfway point in their program.

Conditional Eligibility:

At the time of their first review, students who attempt credits in only one quarter and have not successfully completed two-thirds of their cumulative hours will be granted Conditional Eligibility. This allows students to continue receiving financial aid until their next review of the two-thirds calculation. The two-thirds calculation is generally reviewed yearly at the end of spring quarter.

Graduate

Rule 1: Qualitative Measurement

Students must have a minimum 3.0 cumulative grade point average at the end of their second yearly review and every yearly review thereafter. Yearly reviews are conducted at the end of spring quarter.

Rule 2: Quantitative Measurement

Baker College will monitor to ensure that students successfully complete 80% of their cumulative hours attempted. Students will be considered to be in violation if they do not meet this requirement. Students will be evaluated yearly at the end of spring quarter.

Note: Incomplete/Progress grades are not counted until they are converted to an actual grade. Withdrawal grades and repeat classes are considered as hours attempted.

Please Note:

- Withdrawal grades and repeat classes are counted as hours attempted.
- Incomplete/Progress grades are not counted until they are converted to an actual grade.

Conditional Eligibility

At the time of their first review, students who attempt credits in only one quarter and have not successfully completed 80% of their cumulative hours will be granted Conditional Eligibility. This allows these students to continue receiving financial aid until their next review of the 80% calculation. The 80% calculation is generally reviewed at the end of spring quarter.

Reinstatement of Eligibility

Students may reinstate their eligibility in the following ways: complete the number of hours required or raise their cumulative grade point average to re-establish good standing without the assistance of federal or state aid or submit an appeal with proper documentation based on mitigating circumstances to the Financial Aid Office at Baker College for consideration of reinstatement. Examples of mitigating circumstances include illness, change of academic program, unexpected hardships, death in the immediate family, etc. Appeals must be submitted in writing to the Financial Aid Office no later than seven days prior to the traditional start date of fall quarter or up to the last business day before the traditional start dates of winter, spring, and summer quarters.

An appeal committee will review appeals to determine the appropriate action. Actions could consist of a returned appeal for additional documentation, an accepted appeal, an accepted appeal with specific conditions, or a rejected appeal.

Academic Considerations

The Financial Aid Satisfactory Academic Progress Rules measure students' eligibility for financial aid and are separate from the academic policies, which students must maintain for continued enrollment.

- Academic Appeals: The academic appeals are completed separately from the financial aid appeals, and students may be required to complete both.
- Academic Amnesty: The Fresh Start Program will not supersede the Baker College Financial Aid Standards of Academic Progress Rules.

Academic Amnesty: Title IV Refund and Allocation Policy

Refund and Allocation Policy

- 1. Never return more to the Title IVE fund than was paid to the student from that fund.
- 2. In some instances, Title IVE refunds will be based upon last recorded date of attendance.
- 3. A student's Title IVE award will be determined by the number of classes attended.
- 4. Copies of examples of Title IVE refund calculations are available at your campus Business Office.
- 5. The College allocates refunds and any overpayment collected from the student by eliminating outstanding balances on the funding source received by the student for the period of enrollment for which he/she was charged in the following order:
 - a. Unsubsidized Federal Stafford loans.
 - b. Subsidized Federal Stafford loans.
 - c. Federal PLUS loans.
 - d. Federal PELL grant.
 - e. Federal Academic Competitive Grant (ACG).
 - f. Federal National Science and Math Grant (SMART).
 - g. Federal Supplemental Educational Opportunity Grant (SEOG).
 - h. Other assistance authorized by Title IVE.
 - i. Other federal, state, private, or institutional student financial assistance.
 - j. The student.

- 6. Appropriate funds will be returned within federal guidelines.
- 7. If the student is a complete withdrawal and additional Title IVE funds remain on the student's account after applying the refund and redistribution formulas, all remaining Title IVE funds will be returned to the Title IVE programs.

The Academic Year

Undergraduate

The school year at Baker College consists of four quarters. Fall, winter, and spring quarters are ten-week sessions; summer quarter is nine weeks long. Students may enroll in most academic programs at the beginning of any quarter. For some programs, however, students may enroll only at the beginning of the fall quarter in order to register for a full-time course load.

1-3 quarter hours

Because program rotation schedules are designed to begin in the fall, new students enrolling in winter, spring, or summer may find their program will take longer than the estimated time to complete, as some courses are scheduled only once per academic year.

Online

Programs are offered year-round. Students may enter at the beginning or midpoint of any quarter. The school year consists of four quarters: fall, winter, spring, and summer. All quarters are 12 weeks long.

Graduate

The school year consists of four quarters: fall, winter, spring, and summer. All quarters are 12 weeks long. Students may enroll at the beginning or midpoint of any quarter.

Availability of Classes and Programs

In an effort to meet current job demands, the programs of Baker College are in a constant process of assessment and revision. A high demand for classes and limited resources may require some students to take more than the estimated minimum time to complete a program. Students may also be required to present special qualifications such as prerequisite courses, work experience, knowledge, or a particular grade point average in order to be authorized to take certain courses. For these reasons, students are urged to discuss such matters periodically with an Academic Advisor and/or instructors. Programs are subject to change without notice.

Required Entrance Documents

Undergraduate

Each student must have on file, as a part of his/her Baker College record: (1) a completed and signed application form; (2) self-certification of high school graduation or GED test scores, or COMPASS test scores that demonstrate ability-tobenefit; (3) an official high school transcript and/or Educational Development Plan (EDP), if requested by the College; and (4) for a transfer student, an official transcript and/or a record of financial aid from his/her previous college or university, if requested by the College. A student must provide an official transcript to the College upon completion of two academic quarters or future registration may be prohibited.

Graduate

Each student must have on file, as a permanent part of his/her Baker College record: (1) a completed and signed application form, and (2) an official transcript of credits from his/her baccalaureate institution showing the date of graduation. A transfer student must also provide a transcript of grades and a record of financial aid from his/her previous institution.

••• About the Process of Becoming a Student

Admission Procedures / Requirements

Undergraduate

(See the graduate section for graduate program admission procedures.)

Admission Policy Statement

Baker College has a "Right-to-Try" admission policy, which means:

- 1. All students who have earned a high school diploma or its equivalent, such as a General Educational Development (GED) certificates are accepted.
- 2. Students who have not earned a high school diploma or GED may be admitted on the basis of test results.
- 3. Baker College admits students without regard to race, religion, sex, national origin, or disability.
- 4. As a "Right-to-Try" institution, Baker College does not require either the ACT or SAT as a condition of admission. However, if a student chooses to take either or both tests, we encourage him/her to request that the test results be sent to the Baker College campus of his/her choice.
- 5. Students whose native language is not English are strongly encouraged to demonstrate competency in the English language by submitting official documentation such as the Test of English as a Foreign Language (TOEFL) score.
- 6. Baker College reserves the right to deny admission to any potential student who may be disruptive to the educational environment of the College.

Ability to Benefit

Students who have not earned a high school diploma or GED certificate are admitted on the following basis:

- 1. Students must take the ASSET or COMPASS test and score at approved levels.
- 2. The ASSET and COMPASS tests measure reading, writing, and numerical skills.
- 3. To be eligible for ability to benefit status, a student must achieve or exceed the minimum scores on each subset of ASSET or COMPASS in a single testing experience. A student may retest one time only. To be eligible to retest, a student must have the approval of the advising staff. Approval is based on the assumption that a meaningful change has occurred in the student's knowledge and skills in the areas assessed. Baker College recommends that people who have not achieved the minimum scores on the ASSET or COMPASS test pursue the completion of their GED through their local adult education program.

Applications for Acceptance to Baker College are Available:

- 1. Through high school counseling departments. Baker College works closely with high school counselors by supplying them with catalogs and applications. The admissions advisors at Baker College also make periodic visits to area high schools to furnish them with new information concerning Baker College programs. It is highly recommended that students take advantage of their high school counselors' expertise and assistance in completing the forms for admission, financial aid, and scholarships.
- 2. On Campus. Students are encouraged to make an appointment to talk with one of the College's admissions advisors. Applications may then be completed and application fees paid. Students will be tentatively accepted, pending proof of high school graduation (usually a high school transcript or copy of a GED with acceptable scores). Students taking the Ability to Benefit test must complete either the COMPASS or ASSET test with appropriate scores prior to submitting an application to the College.
- 3. By Mail. Applications are included with a current catalog of courses. Completed applications may be forwarded to the College, along with the application fee, and a copy of the student's high school transcript or GED. It is very important that students visit the College, even when they apply by mail.
- 4. Online. Visit www.baker.edu.

How to Apply for Undergraduate Program Admission

- 1. The prospective student must fill out the application as completely as possible. For an online application visit **www.baker.edu**.
- 2. The prospective student must return the application along with the \$20 application fee to the Baker College campus the student wishes to attend. If the prospective student is not accepted, the \$20 application fee will be refunded. If the student is accepted, the fee is nonrefundable.
- 3. Whenever possible, a copy of the prospective student's final high school transcript or GED should accompany the application.
- 4. The prospective student will be contacted by the Admissions Office as soon as the application is received.

Admission for Articulation Students

Prospective students who wish to apply for articulated credit for coursework taken in high school should see their high school counselor for assistance. An explanation of the articulation process and the necessary paperwork are available in the Become a Student, Articulation pages on the Baker College Web site. A listing of high schools and other educational institutions with Baker College articulation agreements can be found at **www.baker.edu**.

Aviation Program Admission Requirement

Upon admission to the aviation program, a Class III medical examination with student pilot certificate must be submitted to the College (via the Department Chair for Aviation). This is required for solo flight during the first flight course, Private Pilot Flight. It is suggested that all aviation majors who desire to become commercial pilots complete a Class I medical instead of the Class III since the Class I is required of most professional pilots. The examination must be administered by an approved FAA Airmen Medical Examiner. Contact the Baker College Admissions Office for a list of approved physicians.

The United States Department of Homeland Security, Transport Security Administration requires each person seeking admission into any aviation program to submit proof of citizenship in the form of either a birth certificate or a US Passport. Copies of these documents shall be maintained by the Department Chair of Aviation for five years after training is completed.

Baker College requires each aviation student to read and sign a copy of the Baker College Flight Training Policy upon admission into the aviation program. This policy explains that students will be expected to fly exclusively with the Baker College flight carrier throughout the duration of their enrollment in this program. Once a student is enrolled with the College, flight instruction from a non-Baker College carrier will not be considered as fulfillment of course requirements in the aviation program.

Baker College requires a minimum age of 17 years for all aviation students since completion of the first flight class has a minimum FAA licensing age of 17.

Baker College recommends that persons interested in this program arrange to take a "Discovery Flight" prior to enrolling for flight classes. Arrangements can be made through the Admissions Office.

Baker College does not accept international students in the Aviation Program.

Bachelor of Business Administration Accelerated Program Admission Requirements

- 1. Applicants with an associate degree from a regionally accredited institution of higher learning in business or with a business related concentration/major with an overall GPA of 2.0/4.0 meet all coursework requirements for entrance into the program. Applicants with an associate degree from a regionally accredited institution of higher learning not in business with an overall GPA of 2.0/4.0 meet all general education coursework requirements for entrance into the program. To validate appropriate coursework, transcripts will be reviewed for applicants with associate degrees from nationally accredited institutions or those wishing to use the equivalent of 90 quarter hours of transferable credit.
- 2. Applicants to the program will be required to perform a monitored, written essay.
- 3. Applicants to the program will be required to meet all Baker College general education requirements. (See page 21.)
- 4. Applicants must be currently or recently employed with suitable work experience of at least two years.

Bachelor of Business Leadership Admission Requirements

- 1. Applicants with an associate degree from a regionally accredited institution of higher learning with an overall GPA of 2.0/4.0 meet all coursework requirements for entrance into the program. To validate appropriate coursework, transcripts will be reviewed for applicants with associate degrees from nationally accredited institutions or those wishing to use the equivalent of 90 quarter hours of transferable credit.
- 2. Applicants will be required to have two years of full-time work experience or the equivalent prior to entering the program.
- 3. Applicants to the program will be required to perform a monitored, written essay.
- 4. Applicants to the program will be expected to meet all of Baker College's general education requirements. (See page 21.)

Conditional Acceptance in Bachelor's Degrees Requiring an Associate's Degree or 90 Quarter Hours

Under specific circumstances, students will be conditionally accepted into bachelor's degree programs requiring an associate's degree or 90 quarter hours. Students who need 16 credits or fewer to meet the program's admission requirement of 90 quarter hours will be allowed into the program conditionally. Students who are conditionally accepted into a program because they have 16 or fewer credit hours to complete toward the program's admission requirement will be allowed 12 months to complete those requirements. After 12 months, students who do not complete the required hours for full acceptance will be blocked from registration and will need to select another program. Students missing official transcripts will also be granted "Conditional Acceptance." Students may remain on "Conditional Acceptance" because of missing transcripts for a maximum of two quarters of coursework. If after two guarters of coursework, official transcripts have not been received, the College will remove those students from the programs until the official transcripts are received. Upon receipt of the official transcripts by the College, students may reenter the program in which they were originally admitted, but may not be able to start classes immediately because of rotation schedules and pre-requisite requirements.

Program Admission Requirements (Special)

Some programs require that you maintain higher than a C (2.0) GPA. It is required that prospective students for the Truck Driving Certificate successfully pass a USDOT Medical Examination and Drug Test. It is important that prospective students thoroughly read and understand the program requirements.

International Student Special Requirements

International students (except commuting Canadians) must fulfill student visa requirements and make an advance tuition deposit. See Tuition Deposit-International Students on page 243. International students are required to take the TOEFL (Test of English as a Foreign Language) examination. A minimum score of 500 (173 Internet-based) on the TOEFL exam is required for admission. This requirement may be waived by the president on a case-by-case basis. Canadian students commuting from Canada are only required to complete an I-20.

Applicants who would like to transfer credits from an institution outside of the U.S. must have their transcript/degree evaluated by a company in the United States, such as Educational Credential Evaluation Services, Inc. or the National Association of Credential Evaluation Services (NACES). The results of the evaluation must be sent from the evaluation company directly to the Registrar's Office. Official evaluations must include U.S. degree equivalency (if a degree is being transferred), course grades, and overall GPA.

Special Health Sciences, Education, and Human Service Program Admission Requirements

Special admission and advancement requirements for individual Health Sciences, Education, and Human Service programs are detailed on the Baker College Web site at **www.baker.edu** or from admissions advisors or Academic/Administrative Offices. A signed Health Sciences, Education, or Human Service Waiver Form must be on file in order for a student to start classes.

Orientation, Placement Testing, and Registration

Orientation

An orientation program is conducted for all new students prior to the start of each quarter. The program is designed to explain the College's policies and procedures, and to provide an opportunity for students to ask questions and become familiar with campus facilities and resources. Online and graduate students accomplish this orientation online and may be assessed via a proctor system.

Placement Testing

Along with the orientation program, incoming undergraduate students will take tests relating to aptitude and achievement in areas that are basic to success in college coursework. These include mathematic skills, reading skills, writing skills, and others as required by specific programs. The test results determine course placement and academic advising decisions, and may reveal a need for developmental courses or advanced placement testing.

Registration

New students will register for classes during the orientation process. Returning students may register during the seventh week of the previous quarter. Returning students may register online via the Baker College Web site at **www.baker.edu**. Late registration is available in the Academic/ Administrative Office up to one week after classes begin. All graduate and full-time, online students register online.

A student may add an on-ground, ten-week course to his/her schedule up to the date and time when the student would miss any part of the Week 2 session(s) of that course. Students must attend the second week session(s) for the course. A student may not add a course of fewer than 10weeks duration after the first session for that course has met. A student is not allowed to add an online course once that course has started. An on-ground campus student cannot register for a second six-week-session online course after the beginning of Week 2 of the on-ground schedule.

In order for a student to register for more than 17 credits in one quarter, the student must have a cumulative GPA of 3.0 or higher and have written approval from the divisional dean for the student's program.

••• To Help You Be Successful

Developmental Courses

Baker College supports its Right-to-Try Admissions Policy with several educational services. Many students who enter Baker College require assistance to meet the pressures of an academic community. Because of this, Baker College provides these students with special assistance which will enable them to achieve success in college and their future careers.

- 1. Students with marginal English skills, as determined by the results of a placement test, are required to enroll in English Review (ENG091).
- 2. Students with marginal math skills, as determined by the results of a placement test, are required to enroll in Essential Math Concepts (MTH091) and/or Pre-Algebra (MTH099E).
- 3. Students with marginal reading skills, as determined by the results of a placement test, are required to enroll in College Reading (ENG098B).
- 4. Students who place into all three developmental education areas (reading, writing, and math) are required to take those courses the first quarter. Students who place into one or two developmental areas, depending on the number of courses and the program, will be required to take their developmental course within the first academic year.
- 5. Students must successfully complete all required developmental education courses. Successful completion of each of the developmental courses noted above requires passing a standardized exit assessment that demonstrates a minimum standard of competency in order to enroll in the subsequent college level courses. Students unable to

successfully complete (pass) any one or more of the developmental education courses (ENG 091, ENG 098B, MTH 091, MTH 099E) within three attempts, including withdrawals, will face final academic dismissal from the College and be unable to attend in future quarters. For both the second and third attempts, students will be placed on a Student Learning Contract. (A second attempt contract will serve as a warning, and a third attempt contract will serve as notice of the student facing final academic dismissal.)

College Success Strategies

College Success Strategies (COL111A) or College Success Online (COL112) is required for all first-time freshmen and all online students enrolled in a certificate or degree program. This course will inform students of campus services, policies and procedures, and address learning styles and study strategies.

••• About Credit for Special Experiences

Non-Traditional Credit

Baker College offers many non-traditional credit options for students with varied academic and professional backgrounds. It is a policy of Baker College to award credit to those with the appropriate experience. Types of non-traditional credit currently offered by the College are described on the following pages.

Guidelines for Non-Traditional Credit

Associate's Degree and Undergraduate Certificates

A student may apply non-traditional credit to meet the requirements for an associate's degree or undergraduate certificate. This includes transfer credit from accredited collegiate institutions, articulation credit, CLEP examinations, experiential credit, and advanced placement credit. Thirty-six of the required credit hours in the program must be completed in actual class time with Baker College for associate's degree programs, and one-half of the required credit hours in the program must be completed in actual class time with Baker College for undergraduate certificates. A minimum of 12 credit hours must be completed in traditional Baker College courses in the major discipline of study.

Bachelor's Degree

A student may apply non-traditional credit to meet the requirements for a bachelor's degree. This includes transfer credit from accredited collegiate institutions, articulation credit, CLEP examinations, experiential credit, and advanced placement credit. Forty-eight of the required credit hours in the program must be completed in actual class time with Baker College. A minimum of 12 credit hours must be completed in traditional Baker College courses in the major discipline of study at the 300 and 400 levels. Different requirements may exist for the accelerated programs (see Admission Procedures / Requirements, page 236).

Post Baccalaureate Certificate

The policy for non-traditional credit varies depending on the certificate.

Graduate Degree

Transfer credit from accredited collegiate institutions is the only form of non-traditional credit that may be applied to meet the requirements for a graduate degree.

Transfer Credit Undergraduate

Baker College welcomes transfer students into many degree programs at either the associate's or bachelor's level. Students with an associate's degree will be given every consideration to transfer in their full associate's degree (two years of credit) into one of Baker College's Smart Degree programs. However, transfer students are responsible for the prerequisite knowledge necessary for subsequent courses. With our many bachelor's and accelerated bachelor's programs, students are able to enter a bachelor's degree program with the same major as their associate's degree or begin a different major and have transfer credits apply to their program (see Program Selector Guide, page 24). Transfer credit is a form of non-traditional credit. See Guidelines above for how much Non-Traditional Credit a student can bring into the College.

A transfer student could receive freshman, sophomore, junior, or senior status, although more than one or two academic years may be necessary to complete all requirements of the degree. Classes with a grade of C (2.0) or higher will be eligible for transfer credit with the exception of program standards. Refer to individual program requirements. Length of time since the course was taken may also be a factor in transferability. Classes with a D- (0.7) grade will be considered if the D- grade falls in a course sequence where the last grade in the sequence was a grade of a C or better.

The College will accept credit from baccalaureate institutions, special purpose institutions, community/junior colleges, technical or vocational institutions, proprietary institutions, and the United States Armed Services. Credit will be accepted from institutions having either regional or national accreditation.

To transfer a course, the course must equate in content and credit hours to a Baker College course. The basis for credit awarded will include traditional classroom instruction, credit by examination, independent study, and articulation agreement credit. Media courses will transfer if they meet traditional requirements. Credit for armed forces training must be equated to Baker College courses and documented by the American Council on Education (ACE). Credit from business and industry training will be evaluated with waiver testing. Transfer credit accepted must be at the college level.

To obtain transfer credit, students must request that previous colleges attended forward official transcripts to the Baker College Office of the Registrar. Official transcripts will be accepted through the U.S. mail only. In some circumstances, the student will be responsible for producing documentation including, but not limited to, catalogs, course descriptions, and syllabi.

Baker College adheres to the Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) official transcript policy. The MACRAO policy is one in which all Michigan colleges agree not to issue an official transcript directly to a student. Official transcripts must be mailed directly to the intended institution.

In addition to the Baker College transfer credit/residency policies above, the following transfer credit restrictions (1-4) apply to the Paralegal/Legal Studies program:

1) Legal specialty coursework that is being transferred in, must have been completed at a nationally or regionally accredited institution of higher learning and meet with the approval of the program coordinator/director/or other appointee to ensure that the credit being awarded is appropriate to meet the criteria for legal specialty coursework within the program.

- 2) A minimum of 20 quarter hours of the PAR courses must be completed in the traditional format at the campus from which the student plans to graduate.
- No transfer credit will be granted for PAR113A: Legal Research, Writing, and Analysis III; PAR291: Civil Litigation, or PAR491: Evidence (Litigation II).
- 4) No experiential credit or credit by examination is offered for legal specialty coursework credit.

Graduate

Because Baker College recognizes the expediency of understandable and universally accepted standards related to transfer of academic credit, the following policies are established for transfer credit.

Baker College will accept no more than 16 quarter hours (12 semester hours) of transfer credit for graduate programs. Classes with a B (3.00) grade or higher will be eligible for transfer consideration.

To transfer a course, the course must equate in content and credit hours to a Baker College course. Transfer of college credit will not be considered if the credit was completed more than five years preceding matriculation.

To obtain transfer credit, students should request that all previous colleges attended forward official transcripts to the Baker College Center for Graduate Studies. Official transcripts will be accepted through the U.S. mail only.

Baker College adheres to the Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) Official Transcript Policy. The MACRAO policy is one in which all Michigan colleges agree not to issue an official transcript directly to a student. Official transcripts must be mailed directly to the intended institution.

Articulation Credit

Articulation credit is a process whereby students can earn Baker College credit toward their degree or certificate for demonstrating skills and competencies developed in high school or in adult education settings. There is no charge for articulation credit.

Baker College offers articulated credit to those students whose teachers and counselors participate in the process by completing the Articulation Competency records. More information on articulation credit and a list of participating high schools/educational institutions are available through the Academic/Administrative Office or the Baker College Web site at **www.baker.edu**.

CLEP (College-Level Examination Programs), DANTES Credit by Examination Program

These national credit-by-examination programs offer students the opportunity to demonstrate their academic proficiency in various general education and specific subject areas. Such proficiency may have been developed by the student outside of a traditional classroom through such means as personal reading, adult education courses, job experiences, etc. The Academic/ Administrative Office has available a listing of recognized tests and the minimum scores necessary to be granted credit.

Experiential Credit

Experiential credit is available for students who have proven skills gained through employment, volunteer, and/or military experiences that directly correlate to skills taught through traditional Baker College courses. Not all courses are eligible for experiential credit nor do all programs accept experiential credit. Students submit a portfolio documenting work and life experiences. The portfolio is evaluated and, if the skills and learning documented match the required student learning outcomes of a given course, experiential credit will be granted for that course. By earning credit for valuable skills and prior learning, students at Baker College have the opportunity to get a head start on a degree!

Students may prepare the portfolio independently or enroll in a two-credit hour class (COL301A Life and Learning) to aid in preparing the portfolio and to assist with meeting the College's portfolio guidelines. The two credits earned for COL301A do not count toward general education requirements. COL301A, taught using the PROMOTE format, is designed to help students determine the major course of study that will maximize their work experience and lead to the preparation of a portfolio which will document experiential learning. Students enrolled in COL301A have an opportunity, in courses where credit-by-examination is available, to earn that credit at no additional cost.

Licenses and Certificates

Credit is awarded for certain professional licenses and certificates. The Office of the Registrar maintains information about this form of non-traditional credit.

Advanced Placement Credit

Advanced placement credit may be earned for skills already developed. This credit is awarded based on an examination developed by Baker College in the subject area. Passing the examination for a course does not automatically result in the student waiving all the prerequisites to the course. All advanced placement examinations must be taken by the student prior to the beginning of the course. Once a student begins a course, he/she is not eligible to take an advanced placement examination. The advanced placement examination for a course may be taken only once. Following is a list of courses with advanced placement examinations and the charge for the examination, if applicable.

Self-Study Delivery/Opportunities

Self-Directed Study in General Education

Students with either junior or senior standing who wish to do research and/or readings in a general education discipline on a specific topic may be able to do so through selfdirected study. Up to four credit hours may be earned in this manner. A self-directed study class in general education may be used as general education elective/requirement.

Self-directed study must be initiated by the student, and the student must gain the approval of the Dean of General Education. Students are first to select a topic and develop an abbreviated bibliography. An appropriate faculty member will then be chosen by the student and dean. This faculty member will help the student develop learning objectives and will facilitate the self-directed study course. Only students who are highly motivated and who work well independently should pursue this option.

Independent Study

Independent study is defined as credit earned by students who complete coursework independently with direction from an instructor. Regular tuition will apply to courses taken in this format. Attendance is based on required contact with the instructor each week; this contact could be a physical meeting, or by phone, email or BlackBoard. Independent studies are offered at the discretion of the College.

To be considered for an independent study a student must have completed at least 12 credits of college-level coursework at Baker College and have a minimum cumulative GPA of 2.0 (3.0 for graduate students). Students who fail an independent study course will not be allowed to repeat the course in an independent study format. The student will have the responsibility to contact the dean and to complete the Baker College Application for Independent Study. See the Baker College Independent Study Guidelines for more information. The dean and the campus Chief Academic Officer have the right to refuse an independent study request.

PROMOTE Classes

Baker College PROMOTE courses are college-level courses employing a specifically designed combination of self-study and classroom instruction. The self-study portion may combine a variety of learning activities such as required readings, written papers, text assignments, programmed learning, research projects, self-assessments, workbook assignments, and proctored exams. When practical, the selfstudy portion is designed to incorporate the student's occupational interests, in order to make the required assignments more meaningful.

Veterans' Benefits

United States Armed Services Veterans' benefits are available upon admission to eligible students. Such students must complete the necessary paperwork in the Admissions or Academic Office.

Baker College is approved to train eligible veterans and their dependents under Chapters 10, 30, 31, 32, 33, 34, 35, 36, 1606, 1607, and certain other types of veteran benefits. Starting in the 2009 Fall Quarter, the Post 911 GI Bill (Chapter 33) will be available to veterans who attend Baker College. If you are a veteran and would like more information on the Post 911 GI Bill and other veteran benefits go to www.gibill.va.gov. Baker College is also approved for the Reserve Educational Assistance Program as well as the Restored Entitlement Program for Survivors. Prospective students should contact the College Veteran Advisor as far in advance of starting school as possible. The advisor will help initiate the paperwork so that it may be completed accurately. Veterans and dependents of veterans should always apply for other financial aid by completing the Free Application for Federal Student Aid (FAFSA). To complete your financial aid application go to www.fafsa.ed.gov. The U.S. Department of Veterans Affairs can pay directly to the student or to the Baker College Business Office. This is determined by what chapter of benefits the student is receiving. The student then pays the balance owed to the College from these payments.

Students receiving veterans' benefits must continuously be in good academic standing (see Academic Standing, page 244). Students failing to remain in good academic standing will be placed on probation. Students are allowed only two consecutive quarters of probation. Veteran students who are not removed from probationary status after two consecutive quarters will not be recertified for veterans' benefits until they are removed from academic probation. The U.S. Department of Veterans Affairs will be informed if a student fails to come off probation at the end of two consecutive quarters.

In order to be certified for full-time status, the veteran must be enrolled in twelve undergraduate quarter hours or eight graduate quarter hours. Baker College is required to notify the U.S. Department of Veterans Affairs when a student ceases to enroll at Baker College.

Veteran students will be informed, in writing, of credit granted for previous training. Students will also be informed of the remaining number of credits necessary to complete the program for which they are enrolled. The College will then notify the U.S. Department of Veterans Affairs of the credit granted and the reduction of training time.

••• A Special Place to Live and Learn

Residence Halls

Residence hall accommodations are offered on the Flint, Muskegon, and Owosso campuses. Baker College provides modern, convenient residence halls, with a variety of living options on each campus. The residence hall living environment supports students' academic efforts and helps in the adjustment to college life.

Students interested in on-campus housing should become familiar with the Residence Hall Agreement and Residence Hall Guidelines. Resident students must maintain full-time academic status (12 credit hours or more) to remain eligible for college housing. Note: Students whose homes are in Genesee, Muskegon, or Shiawassee counties are eligible to live in residence halls only with the College's permission, and only if space permits.

A full-time hall coordinator and student resident assistants create and promote opportunities for students to develop interpersonal relationships, leadership and decisionmaking skills, and an awareness of individual responsibilities and rights. At Baker College, the residence halls are more than just places for sleeping and eating. Residence hall life supports the College's academic process and is an integral part of the living-learning experience.

All rooms in the residence halls are partially furnished. They provide access to kitchen appliances so that students may buy and prepare their own meals. Lobby areas offer television, recreational games, and conversation areas. Study rooms, food vending machines, and coin-operated laundry facilities are also located in most residence halls. Residence hall agreements vary by campus; check with the Residence Life staff on each campus for more specific information.

••• Opportunity to Learn While Doing

Work Experience Programs

Undergraduate

Baker College work experience programs provide students with opportunities to earn academic credit while gaining professionally supervised, paid or unpaid work experience in business, industry, government, and other agencies/organizations. The work experience must be career oriented and program related. Qualified students in associate's and bachelor's degree programs are required to participate in cooperative education, an affiliation/internship, or an externship. The objectives of the work experience programs are to prepare students for the transition from classroom to employment and to provide students with a better understanding of the fields which they have chosen to enter. These programs also provide valuable experiences necessary for students to obtain related employment. These work experiences may develop into part-time or full-time positions.

Work Experience Statement on Health Insurance Coverage

Students are required to cover the cost of any medical care they may need during their work experience. Students are encouraged to have health insurance at all times. Some work experience sites will not accept students who do not have health insurance coverage.

Cooperative Education is:

- On-the-job experience extending from a few months to one year.
- Career and program related.
- Credit generating.
- Professionally supervised.
- Paid work experience.
- Externship/Affiliation is:
- Work experience of 120 hours or more, depending on the Health Sciences Program.
- Career and program related.
- Credit generating.
- Professionally supervised in a variety of health care delivery settings.
- Paid/unpaid work experience, depending on the program requirements.

Internship is:

- Work experience of a minimum of 120 hours.
- Career and program related.
- Credit generating.
- Professionally supervised.
- Unpaid work experience.

••• When You Need a Little Help with Your Studies ... or Your Life

Advising

Baker College provides advising and student assistance in the categories listed below. Students will be referred to community resources if counseling is requested.

1. Admissions. Baker College seeks to enroll students whose objectives can be served by its programs. Those whose qualifications show promise that their education and training here will be a mutually rewarding experience will be encouraged to enroll. Baker College follows a strict nondiscrimination policy in the admission of students.

- 2. Financial Aid. Students attending Baker College should apply for financial assistance. Officers are available for individual advising and assistance in such areas as grants, scholarships, loans, and work assistance. Students who believe their resources are inadequate to meet their expenses at Baker College should see a Financial Aid Officer.
- 3. Academic. Individual advising is provided for students with academic concerns. Its purpose is to provide appropriate information and resources toward achieving educational objectives.
- 4. **Special Needs.** Baker College provides students support systems to allow them opportunity for access. Special Needs/Disability Services is one of many programs provided through the Academic Advising Department to support persons with disabilities. Students must provide the College with documentation in order to receive Special Needs/Disability Services.
- 5. Career. Career assessment inventories are available to assist students with evaluation of work-related interests, skills, and abilities.
- 6. **Personal**. Individual assistance and/or referral to outside agencies are provided for students with personal concerns. Appointments can be made by contacting the Academic Advising Department. Referrals will be confidential.
- 7. Substance Abuse. Assistance is available for students with drug and alcohol related problems through referrals to outside agencies. Appointments can be made by contacting the Academic Advising Department. Referrals will be confidential.
- 8. **Employment.** Considerable effort is provided to assist graduates with job searches. Graduates receive individual assistance with skills assessment, resume critiques, job referrals, and other related services.

••• Special Services Available to All Students

Laboratories

Baker College makes computer, technical, and health science equipment available to students through the Learning Support Center and/or open lab times, enabling students to complete course projects and to gain proficiency on the equipment. The schedule of open lab times can be obtained from the course syllabus, the instructor, or the Academic/ Administrative Office. These labs may be limited to students registered in courses requiring lab time. Student IDs will be checked periodically during open lab periods. Lab schedules may change from quarter to quarter.

Tutorial/Learning Support Services

A variety of options are available to support optimal learning on Baker College campuses. Services are available to all registered students, whether a student is struggling with a course or is doing well, but wants to do better. Online tutoring is offered for some courses, and both peer and professional tutoring may be available. Peer tutors are students who have done well in the course and have been trained in tutoring techniques. Professional tutors may be classroom instructors or instructors hired specifically to tutor. The Learning Support Services may also offer video, computer, and audiotape tutorial support and enrichment opportunities. Learning Support Services are free to Baker students. To obtain current information on services available, check with the Learning Center on each campus.

••• Grading Information and Policies

Grades

Grades are computed at the end of each course and are available via the Internet at **https://carina.baker.edu/solar**. Grade reports list the courses, the grade for each course, the GPA for that quarter, and the student's cumulative GPA.

Grading System

Grad	des		Grade Point Value
Lett	ers and Mean	ning	Per Quarter Credit
А	=		4.0 points
A–	=		3.7 points
В+	=		3.3 points
В	=		3.0 points
B-	=		2.7 points
С+	=		2.3 points
С	=		2.0 points
C-	=		1.7 points
D +	=		1.3 points
D	=		1.0 points
D-	=		0.7 points
F	=	Failure	0.0 points
Р	=	Passed	4.0 points

GPA not computed for the following grades:

CR	=	Credit (Undergraduate = C or better)	
		(Graduate = B or better)	
\mathbf{EL}	=	Non-traditional Credit	
R	=	Articulation Credit	
S	=	Satisfactory	
Т	=	Test Credit	
U	=	Unsatisfactory	
Ηοι	irs and GPA	are not computed for the following	

Hours and GPA are not computed for the following grades:

AU	=	Audit (Must be established at registration)
Ι	=	Incomplete
NC	=	No Credit
PR	=	Progress (coursework extends beyond the
		end of the quarter)
W	=	Withdrawal

To compute the Baker College cumulative GPA, first calculate the honor points for each course completed (grade points multiplied by credit hours; an A or 4.0 grade in a fourcredit-hour class yields 16 honor points). Then add all honor points earned at Baker and divide by the total credit hours attempted for all quarters at Baker.

Incomplete Grade Policy

An instructor may agree to issue an Incomplete (I) grade for a course if all of the following conditions are met:

- 1. The student requests the Incomplete (I) grade before the end of the course.
- 2. The student has completed 80% of the total coursework and has a chance at a passing grade in the course.
- 3. The student is unable to complete the course requirements within the regular time frame due to significant, extenuating circumstances. Documentation may be required.

4. The student and instructor have signed a "contract" which clearly states the requirements to be completed and the due date for the completion of each requirement. The due date may not exceed the last day of the following quarter.

If the coursework is not completed by the agreed upon due date, the final course grade will be based on the work that was completed by the end of the quarter in which the course was taken.

Grade Changes

A student who believes that an error has been made in the assignment of a grade may initiate the Academic Appeal Process (see page 244). Not acting within the appropriate time period will disqualify the student from further consideration of the matter.

Honors

Undergraduate Certificates and Degrees and Postbaccalaureate Certificates:

The President's List

Students who earn a 4.0 GPA during a quarter in which 12 credit hours or more were completed will be placed on the President's List for publication the following quarter. These students may also be invited to attend a President's Luncheon/Dinner held in their honor.

The Full-Time Student Deans' List

Students who earn a 3.5 to 3.99 GPA during a quarter in which 12 credit hours or more were completed will be placed on the Full-Time Student Deans' List for publication the following quarter.

The Part-Time Student Deans' List

Students who earn a 3.5 to 4.0 GPA during a quarter in which 4 to 11 credit hours were completed will be placed on the Part-Time Student Deans' List for publication the following quarter.

Undergraduate Certificates and Degrees:

Honor Graduates

Graduates who achieve a 3.5 cumulative GPA or higher are awarded a special distinction at graduation; 3.9 - 4.0Summa Cum Laude; 3.7 - 3.899 Magna Cum Laude; and 3.5 - 3.699 Cum Laude. Unofficial honor status for undergraduates for the spring graduation ceremony will be based on the student's GPA at the time graduation materials are prepared. If a graduate's status changes after the final audit, the graduate may obtain the appropriate honor cord. In addition, faculty on each campus may select an Honor Graduate (a student who has demonstrated the greatest potential for success in his/her field of study) in each of the degree disciplines.

- Postbaccalaureate certificates do not qualify as "Honor Graduates." Postbaccalaureate certificates do not qualify for Summa Cum Laude or Magna Cum Laude. However, these students may qualify for quarterly honors such as the President's List and the Deans' List.
- Academic Honors #1 (President's List, Deans' List, Honor Graduates) - Students with an "Incomplete" grade are ineligible for academic honors for that quarter until the final course grade is transcripted.
- Academic Honors #2 (President's List, Deans' List, Honor Graduates) - Developmental education courses are not calculated in the determination of earning Academic Honors.

Class Status

Undergraduate

The following schedule defines the number of credit hours which must be completed to qualify for class designations.

Class	Credit Hours Completed
Freshman	less than 45
Sophomore	45 to 89
Junior*	90 to 135
Senior	136 or more

*In addition to the number of credit hours, the student must be currently enrolled in a program that constitutes the appropriate class level. For example, to be considered a junior, the student must be enrolled in a bachelor's degree program and have already completed an associate's degree or its equivalent.

Academic Standing

Undergraduate

Students must have a cumulative GPA of at least 2.0 to graduate from any program. For students to stay off academic probation, the following GPAs must be earned.

Hours Attempted	Minimum	GPA
-----------------	---------	-----

-	
1 - 16	1.50
17 - 32	1.65
33 - 48	1.80
49 - 64	1.90
65 and above	2.00
NT (1)	

Note: The graduation requirement of a 2.0 supersedes the academic standing requirements.

Graduate

Students must have a cumulative GPA of at least 3.0 to graduate. A grade of C or better is required in all classes used to calculate hours for graduation. For students to stay off academic probation, the following GPAs must be earned.

Hours Attempted	Minimum GPA
1 - 12	2.75
13 - 24	2.87
25 - graduation	3.00

Academic Probation

If the student's cumulative GPA falls below the appropriate minimum GPA on the step scale illustrated, the student will be placed on academic probation for the following quarter. The student will be advised to restrict his/her course load and curtail extracurricular activities and work schedules. If the student attains a satisfactory GPA according to the step scale in the probationary quarter, but his/her cumulative GPA is still below the step scale, the student will be continued on probation for the next quarter.

Removal from Academic Probation

The student will be removed from academic probation at the end of the quarter in which his/her cumulative GPA meets the requirements of the step scale above.

Academic Dismissal

The College reserves the right to require at any time the dismissal of a student whose health, conduct, or level of achievement makes it inadvisable for the student to remain in school.

If a student is on academic probation and his/her GPA during the probationary period is lower than that called for by the step scale, or the student receives all failures the first quarter he/she takes courses, the student will be dismissed.

Dismissed students are eligible for re-enrollment in classes after one quarter on their rotation schedule has elapsed. Graduate students must meet with the Dean of the Center for Graduate Studies to be reinstated. Undergraduate students must sign and agree to a reinstatement contract upon meeting with an Academic Advisor.

Students who were living in Baker College housing at the time of academic dismissal must reapply in order to be readmitted to college housing.

Developmental Education - Academic Dismissal

Students unable to successfully complete (pass) developmental education courses within three attempts (including withdrawals) will be academically dismissed from the College and unable to attend in future quarters. However, readmission may be considered if the student produces documentation of transferable college-level math and English courses which were completed following dismissal from Baker College. If a student requests Amnesty after four years and retakes COMPASS, he/she may be readmitted if COMPASS scores indicate that no developmental courses are needed.

Final Academic Dismissal

Students who are academically dismissed a second time receive a final academic dismissal and may not attend classes in any future quarter, unless they apply for and receive Academic Amnesty. Students can receive Academic Amnesty only one time (see Academic Amnesty, page 245).

Academic Appeal Process

Baker College has established appeal procedures for students who have concerns regarding grades and the consistent application of both class requirements and policies, as it pertains to grades.

Step 1:

The student must first discuss the concern in dispute with the instructor. The only concerns that are appealable are grades and the consistent application of both class requirements and policies, as it pertains to grades.

Step 2:

If the concern is not resolved in Step 1 and the student wishes to pursue the issue, the student must communicate with an Academic Advisor. This step must take place within 90 days of the end of the quarter in which the concern occurred. The Academic Advisor will give the student an appeal form which the student will complete and return to the Academic Advisor within seven business days. Upon receipt of the form, the Academic Advisor will immediately send the form to the instructor.

The instructor will read the appeal form and provide input on the student's concern. The instructor will return the form within five business days of receipt to the Academic Advisor.* The Academic Advisor will share with the student the instructor's written response.

If the concern is still not resolved, and the student wishes to pursue the appeal, the Academic Advisor will arrange a meeting with the student and instructor within seven business days. The meeting could be in person or via conference call or live chat session. The purpose of the meeting is to resolve the concern.

Step 3:

If the concern is not resolved in Step 2, and the student indicates in writing on the appeal form that he/she wishes to pursue the appeal, the Academic Advisor will ask the student to submit a comprehensive written document which represents all facts and data from the student's point of view. The student must provide this written document to the Advisor within five business days of indicating on the Student Concern form that he/she wishes to continue the appeal. The Academic Advisor will then send the appeal form and written document to the Dean of the division wherein the concern originated or to the Chief Academic Officer/Vice President for Academics if the Dean is not available to render a decision. The Dean/Chief Academic Officer/Vice President for Academics will have three business days to render a decision and return the completed form to the Academic Advisor. The Dean/Chief Academic Officer/Vice President for Academics will meet in person with the student if the student so desires.

The Academic Advisor will immediately inform the student and the instructor of the Dean's/Chief Academic Officer's/Vice President's for Academics decision. The student must indicate, in writing on the appeal form, his/her decision to accept the Dean's/Chief Academic Officer's/Vice President's for Academics decision or to pursue the appeal to the next level.

Step 4:

If the student chooses to pursue the concern further, the Academic Advisor will immediately contact the Chair of the Judiciary Council and will forward all documentation to the Chair. The Judiciary Council will be convened within seven business days to resolve the concern. Both the student and the instructor may appear before the Judiciary Council although no new documentation can be presented at this time. A written report of the Council's decision will be completed by the Chair and will be placed in the student's file. A copy of the report will be sent by the Chair to the student and the instructor within 10 business days.

The Judiciary Council will be formed and chaired by a director of a student services department; the Chair will be a non-voting member of the Council. The Council shall be composed of two students, two faculty members who teach in a program other than the student's program, and a dean or associate dean from a division other than the division that is responsible for the course involved in the appeal.

The decision of the Judiciary Council will be final. No further appeal will be permitted. The student and the instructor may respond in writing to the Council's action, and these responses will be placed in the student's file.

The appeal process stops if the student misses an appointment or fails to meet timelines unless there are documented, extenuating circumstances.

*If the instructor does not respond in a timely manner, the Academic Advisor and/or student has the option to go directly to Step 3 of the Academic Appeal Process.

Academic Amnesty: Fresh Start Program

The Fresh Start Program, which is for undergraduate students only, allows students with poor academic records, including academic dismissal, who have not attended Baker College for at least four years to resume their college education with a clean slate. A student with a poor academic record is defined as a student who is not in good academic standing (see Academic Standing, page 244). If a student is approved for the Fresh Start Program, all previous grades and courses will be excluded from computation of the student's GPA. Courses passed with a C or better can count as a credit grade for program requirements and graduation. All courses and grades will remain on the student's transcript with a notation of Fresh Start on the transcript. The Fresh Start Program can be used only once by a student. Requests should be made in the Registrar's Office, with final approval from the Chief Academic Officer/Vice President for Academics. Approval for academic amnesty must be received prior to the end of the

quarter in which the student returns. Once a student is granted academic amnesty, the student's permanent record cannot be changed.

The Fresh Start Program will not supersede the Baker College Satisfactory Academic Progress Rules for receiving federal and state financial aid funds, which are based on cumulative grades, hours attempted, and hours completed. If a Fresh Start student is in violation of the financial aid Satisfactory Academic Progress Rules and wishes to establish eligibility for those funds, an appeal for reinstatement must be submitted to the Financial Aid Office.

Veterans

Students receiving veterans' benefits must be in good academic standing at all times (see Veterans' Benefits, page 241).

Official College Transcripts

Transcripts of the student's academic record are available from the Registrar's Office at a cost of \$2 per copy. Official transcripts are only mailed directly to the institution or business designated in writing by the student. An official transcript will be noted as "Official Transcript" and a student copy will be noted as "Student Copy." Each will have the print date and the registrar's name noted. Official transcripts cannot be hand-delivered.

Student copies are released directly to the student upon written request. Request forms are available in the Academic/ Administrative Office and online at **www.baker.edu**. Student copies are also available by accessing the Baker College Web site at **www.baker.edu**.

College transcripts and/or grades may be withheld if the student's file is incomplete or lacking: (1) a high school transcript showing graduation or GED, if requested by the College, or (2) if the student has overdue financial obligations to Baker College. Transcripts may also be withheld until student loan borrowers complete an exit interview through the Financial Aid Office or online at **www.baker.edu**.

Official transcripts from other institutions are not reissued or copied for distribution. If needed, they must be obtained directly from the issuing institution.

Official Records

Access to Official Records

The Baker College policy concerning the privacy rights of students and the practices in place to maintain the confidentiality and integrity of student educational records are as follows:

Rights Under the Family Educational Rights and Privacy Act

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

- 1. The right to inspect and review the student's educational records within 45 days of the day the College receives a request for access.
- 2. The right to request the amendment of the student's educational records that the student believes to be inaccurate.
- 3. The right to consent to disclosures of personally identifiable information contained in the student's educational records, except to the extent that FERPA authorizes disclosure without consent.
- 4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the College to comply with the requirements of FERPA. The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-4605.

Definitions

A "student" is any person who attends or has attended Baker College. An "educational record" is any record in handwriting, print, tape, microfilm, or other medium maintained by Baker College which directly relates to a student. The following exceptions are not part of the educational record and are not subject to this Act:

- 1. A personal record kept by an instructor or staff member if it is kept in the sole possession of that person and is not accessible or revealed to any other person (e.g., a teacher's grade book).
- 2. The employment record of an individual whose employment is not contingent on being a student (e.g., the employment records maintained by the Human Resources Office).
- 3. The records of the Baker College Campus Safety which are maintained separately solely for law enforcement.
- 4. Alumni records which contain information about a student after the student is no longer in attendance at the College.

Disclosure of Educational Records

Baker College accords all rights under the Act to each student. No one outside the College will have access to, nor will the College disclose any information from, a student's educational record without the consent of the student.

Within the Baker College community, only those members who are acting in the educational interest of a student are allowed access to a student's educational record. These College members include faculty, administration, clerical, professional employees, campus safety, and other persons who manage student records (e.g., Office of the Registrar, Business Office, Financial Aid, and the Admissions Office).

Exceptions to the disclosure policy will be made under the following specific FERPA provisions regarding release of information:

- 1. To College officials as described in the above paragraph.
- 2. To federal and state educational officials in connection with operating their programs.
- 3. In connection with financial aid for which the student has applied.
- 4. To organizations conducting studies on behalf of the College.
- 5. To accrediting organizations to carry out their functions.
- 6. To the parents of a dependent student.
- 7. To comply with a lawful judicial order or subpoena.
- 8. To appropriate parties in a health or safety emergency.
- 9. Designated as "Directory Information."

Annual Notification

Baker College publishes this institutional policy yearly in the Baker College Catalog, in the Student Handbook, and on the Baker College Web site.

Fees for Copies of Records

The fee for copies is \$1 per page or \$6 for an entire file.

Types and Locations of Educational Records

The record custodian for Baker College is the Registrar.

	9
Type of Record	Office Location
Admissions Records	Admissions
Academic Transcript	Academic/Administrative
Cumulative Academic Records	Academic/Administrative
Disciplinary Record	Academic/Administrative
Disciplinary Records (Housing)	Student Life/Services
Financial Aid Records	Financial Aid
Financial Records	Business
Placement Records	Career Services

Directory Information

Baker College designates the following items as directory information: student name, address, phone number, e-mail address, date of birth, major field of study, dates of attendance, degrees received, and academic honors. While the College does not publish a directory, the College may disclose directory information without prior written consent, unless otherwise notified by the student in writing to the contrary.

Record of Disclosures

Disclosure of any information from the educational record, other than by the student's written permission or Directory Information releases, will be recorded in a disclosure log that will be maintained in the student's file.

Procedure to Inspect Educational Records

Students may inspect and review their education records upon request in the Academic/Administrative Office. The Academic/Administrative Office will inform the Record Custodian of the student's request and will make the needed arrangements for access as promptly as possible. Access must be given within 45 days. Many student concerns can be handled on a daily basis without requiring this procedure.

When a record contains information about more than one student, a student may inspect and review only the portion of the record which relates to him/her. Students also may not inspect those records which are excluded under the FERPA definition of "educational record" (see Definitions).

Amendment of Education Records

Students have the right to have educational records amended that they believe are inaccurate, misleading, or in violation of their privacy rights. Following are the procedures for the amendment of a record:

- 1. A student must ask the Record Custodian of Baker College to amend a record. In so doing, the student will identify the part of the record that is to be changed and specify why it is believed to be inaccurate, misleading, or in violation of the student's privacy or other rights.
- 2. Baker College may comply with the request or may determine that it is not appropriate to comply. If it is determined that the record will not be changed, Baker College will notify the student of the decision and advise him/her of his/her right to a hearing to challenge the information believed to be inaccurate, misleading, or in violation of the student's rights.
- 3. Upon request, Baker College will arrange for a hearing and notify the student, reasonably in advance, of the date, place, and time of the hearing.
- 4. The hearing will be conducted by an objective hearing officer who may be an official of the institution. The student shall be afforded a full and fair opportunity to present evidence relevant to the issues raised in the original request to amend the student's educational record. The student may be assisted by one or more individuals, including an attorney. The cost will be paid by the student.
- 5. Baker College will prepare a written decision based solely on the evidence presented at the hearing. The decision will include a summary of the evidence and the reasons for the decision.
- 6. If Baker College determines that the challenged information is not inaccurate, misleading, or in violation of the student's right to privacy, it will notify the student that he/she has a right to place in the record a statement commenting on the challenged information and/or a statement setting forth reasons for disagreeing with the decision.

- 7. The statement will be maintained as part of the student's educational record as long as the contested portion is maintained. If Baker College discloses the contested portion of the record, it must also disclose the statement.
- 8. If Baker College determines that the information is inaccurate, misleading, or in violation of the student's right of privacy, it will amend the record and notify the student, in writing, that the record has been amended.

Re-Admission and Re-Entry

Students who leave Baker College for reasons such as illness, work, or family matters, who submit the official Withdrawal Form before leaving, can be readmitted at the beginning of any subsequent quarter. Undergraduate students re-enrolling after interruption of at least one quarter (summer quarter excluded except when summer quarter is part of the program rotation schedule) must complete a Student Information Change form found in the Academic/ Administrative Office. Students who have been out for more than five years must also complete a new application. They will not, however, be charged an application fee. Failure to complete these forms before registration may result in the student's registration being delayed.

Re-entering students will be required to complete the current requirements of their chosen program if the program is still offered. These requirements may have changed from the program in which they originally enrolled. Students may need to choose a new program if the program is no longer offered. All courses and grades earned during previous attendance at Baker College remain on the transcript and are part of the cumulative GPA for re-entering students.

••• Policies Regarding Courses

Withdrawal from a Course

Student Initiated Withdrawal from a Course:

A student may withdraw from a course up to the end of the week which precedes the final week of the course. The student is required to submit a notice of withdrawal by one of the following methods:

- 1. Completing a Withdrawal Form (available in the Academic/Administrative Office).
- 2. Mailing, faxing, e-mailing (Baker e-mail account preferred) a letter requesting withdrawal and explaining the reason for withdrawal.

The official withdrawal date is 1) the date the Withdrawal form is submitted, 2) the postmarked date of the letter mailed, 3) the date the fax was received, or 4) the date the e-mail was received. Tuition refunds are based on the official withdrawal date (see Refund Policy).

College Initiated Withdrawal from a Course:

A student will be administratively withdrawn from a course for any of the following reasons:

- 1. Excessive absenteeism as defined in the attendance policy (see Attendance).
- 2. Violation of the Basic Principles of Student Responsibility Policy (see section with the same title).

The official withdrawal date for college initiated withdrawals is the date of processing.

Note: Student initiated or college initiated withdrawals do not reduce the student's financial obligation.

Courses Repeated by Students

Students may repeat courses to improve their grades. Title IV Aid may be used to pay for a repeated course only if the student's existing grade in the course is: 1) F or W; 2) below the minimum required for a prerequisite to another course; or 3) below the minimum grade required for his/her program.

If a student repeats a course, the higher or highest of the grades will be used in computing the student's GPA. However, all grades will remain on the student's official transcript. A course may not be taken a third time without written authorization of the program dean or general education dean depending on the course discipline.

Auditing a Course

An audit grade is given when a student enrolls in a course for which neither grade nor credit will be awarded. The student is permitted to attend the class but is not required to submit assignments or take examinations. The tuition for auditing is the same as that for registering in the course for credit. Audit status must be declared at the time of registration and to the instructor on the first day of class.

Course Cancellation Policy

The College reserves the right to cancel any course at any time. If the College cancels a course, students will be notified promptly and be given an opportunity to enroll in another course, if possible.

Recording a Course Session

Students have the right to audio record for personal use a lecture or mini-lecture within a course session but must inform the instructor. Students are required to gain authorization from the instructor and dean to video record a course session for personal use.

•••Curriculum Information

Curriculum Update with Re-Enrollment

Any student whose education has been interrupted will have to meet the requirements of the curriculum in effect at the time of his/her return, rather than the requirements in effect when the student originally began the program. Graduate students re-enrolling after a three year absence must submit a new application.

Program Name Change/Curriculum Update

When Baker College makes a change in the official name of a program, with no curriculum or content change, all students will be switched to the new program name. Occasionally, students who attend continually may need to change to a new year and/or version of their program rotation schedule.

••• Personal and Professional Conduct

Basic Principles of Student Responsibility

Each person has a right to study, learn, and live in a quiet, comfortable environment without fear, without humiliation, and without destruction of self-esteem. Baker College expects student awareness and concern for all aspects of classroom, residential, and extracurricular life, and strives to promote a cohesive and equitable environment, where cultural and ethnic differences are respected. Institutional expectations, regulations, policies, and practices are established to reflect the values to which the College subscribes. These expectations, regulations, policies, and practices promote:

- 1. The mission of the College.
- 2. Opportunities and settings that facilitate the interaction of persons of different cultures, backgrounds, and persuasions.
- 3. Respect for the rights of others.

It is important to formally note the following policies with regard to student responsibility and respect:

- Enrollment at Baker College is a privilege, and it is expected that students will conduct themselves in a manner that reflects the ideals, values, and educational aims of the College. Students will respect the rights and property of others and will treat fellow students, faculty, and staff with good manners and respect. Students will use care in keeping facilities and equipment clean and orderly. Food and beverages should not be eaten in hallways or classrooms. Students will behave in such a way as to promote a positive learning environment. This includes having pagers and cell phones turned off during class. When a student's actions do not reflect these expectations, the College will take disciplinary measures, which may include suspension or dismissal from the College and/or student housing, and/or criminal prosecution.
- It is the responsibility of the student to give honest and complete replies to all questions included in application forms and other documents required by the College.
- Baker College does not consider the use of alcoholic beverages or drugs as necessary or conducive to the process of higher education.
- Baker College students are expected to abide by federal, state, and local laws.
- Any illegal possession, sale, or use of illegal or over-thecounter drugs will result in penalties including immediate expulsion and/or criminal prosecution.
- Student instigation or participation in activities which develop to a degree that elicits panic or alarm, disturbs the peace, endangers personal well-being, or harms public or private property is prohibited. Furthermore, students who impede or threaten to obstruct the free and uninterrupted passage of individuals or vehicles, or prevent or obstruct the normal operations of the College, will be subject to disciplinary action which may result in suspension or dismissal from the College, and/or criminal prosecution.
- Students are expected to use language that promotes a comfortable environment. Use of language or gestures that are abusive or offensive in nature will result in disciplinary action, suspension, or dismissal.
- Students are asked to dress in conventional attire that exhibits good taste. In instances of unsuitable dress, faculty or staff may request that the student leave the classroom or facility.
- A special word about college-owned equipment: Computers, printers, office machines, medical and electronic equipment, and other equipment are placed in locations that will facilitate the best possible benefit to students. Any student who removes or tampers with this equipment is subject to dismissal and payment of any costs resulting from damage or loss of equipment. Students should immediately report equipment in need of repair to an instructor.
- Operating a business on Baker College property or with the use of College equipment is prohibited. The use of the

Baker College name on any advertising by a student for business purposes is not allowed.

— Students shall comply with all reasonable and lawful requests and instructions as well as disciplinary conditions imposed upon them by those in authority, including the College administrators, faculty, housing staff, campus safety officers, or other employees acting in the performance of their official duties. Failure to do so could result in disciplinary action, suspension, or expulsion.

Academic Honor Code

Academic honesty, integrity, and ethics are required of all members of the Baker College community. Academic integrity and acting honorably are essential parts of professionalism that continue well beyond courses at Baker College. They are the foundation for ethical behavior in the workplace. Attending Baker College is a privilege, and students are expected to conduct themselves in a manner reflecting the ideals, values, and educational aims of the College.

Academic integrity requires that work for which students receive credit be entirely the result of their own effort. Acting honorably in an academic setting requires more than simple honesty. Academic dishonesty takes place whenever students undermine the academic integrity of the institution or attempt to gain an unfair advantage over others. Ignorance of the College's honor code is not accepted as a valid excuse for prohibited conduct. The following lists include some examples of honor code violations; they are not intended to be exhaustive.

1. Cheating

- a. Using unauthorized materials such as books, notes, or crib sheets to answer examination questions.
- b. Taking advantage of information considered unauthorized by one's instructor regarding examination questions.
- c. Copying another student's homework, written assignments, examination answers, electronic media, or other data.
- d. Assisting or allowing someone else to cheat.

2. Plagiarism

- a. Representing the ideas, expressions, or materials of another without due credit.
- b. Paraphrasing or condensing ideas from another person's work without proper citation.
- c. Failing to document direct quotations and paraphrases with proper citation.
- 3. Other forms of academic dishonesty
 - a. Fraud, deception, and the alteration of grades or official records.
 - b. Changing examination solutions after the fact, inventing, changing, or falsifying laboratory data or research.
 - c. Purchasing and submitting written assignments, homework, or examinations.
 - d. Reproducing or duplicating images, designs, or Web pages without giving credit to the developer, artist, or designer.
 - e. Submitting work created for another course without instructor approval.
 - f. Misrepresenting oneself or one's circumstance to gain an unfair advantage.
 - g. Collaborating with another person(s) without instructor approval.
 - h. Selling or providing term papers, coursework, or assignments to other students.

There are four possible consequences for violating Baker College's Honor Code:

- 1. Failure of the assignment.
- 2. Failure of the course.*
- 3. Expulsion from the College.
- 4. Rescinding a certificate or degree.

In cases involving violation of the honor code, determination of the grade and the student's status in the course are left solely to the discretion of the instructor. The faculty may seek guidance from administrators. The instructor will report the incident to the College's administration to establish, investigate, or determine potential patterns of dishonesty.

*A student is prohibited from withdrawing from a course in which an F grade is received due to a violation of the honor code.

Infractions Causing Immediate Disciplinary Action

On Baker College premises, any of the following will be cause for immediate expulsion from all campuses:

- 1. Possessing, carrying, displaying, or using firearms, weapons, explosives, explosive ingredients or mechanisms, or hazardous chemicals.
- 2. Assaulting or making a threat.
- 3. Disabling of safety or security equipment.
- 4. Theft or vandalism.
- 5. Distributing, possessing, carrying, using, or being under the influence of illegal drugs.
- 6. Arrest for a felony, pending outcome of the charges.

On Baker College premises, any of the following will be cause for disciplinary action up to and including expulsion from all campuses:

- 1. Possessing, carrying, using, or being under the influence of alcohol.
- 2. Improper use of or tampering with safety or security equipment.
- 3. Interfering with a campus safety officer in the performance of his/her duties.
- 4. Cheating or plagiarizing.

These matters are taken directly to the college official in charge of discipline for immediate action. During an investigation, students may be suspended from the College and/or Residence Halls.

Expelled or suspended students found on any Baker College premises will be considered trespassing and treated as such. Expelled or suspended individuals may make appointments by phone during regular business hours with appropriate college administrators, if necessary. All tuition, housing fees, and deposits will be forfeited.

In compliance with housing policy, students dismissed from housing for disciplinary reasons must vacate the housing facility within 24 hours of notification of the infraction. In addition, all visitation rights to any Baker College residence facilities are revoked.

Although most student infractions are dealt with on a one-to-one basis, there is a provision for a formal disciplinary appeal process. Baker College has established the Baker College Disciplinary Appeal Process for students who find themselves in conflict with Baker College standards. The Baker College Disciplinary Appeal Process is described in the Disciplinary Appeal Process section. Please note: Original discipline decision will remain in effect until the appeal has been completed and a final decision has been issued.

A student who is placed on suspension must leave campus while the College completely investigates the inci-

dent which caused the disciplinary action. The student will be notified when the investigation is complete and may be reinstated, placed on probation, or expelled.

•••Before and After Graduation

Standard Graduation Requirements

Certificate Program Graduation Requirements

Students are eligible to graduate if the following criteria have been met:

- 1. All requirements for the selected certificate program are satisfied.
- 2. A minimum of one-half of the quarter hours required for the certificate program are completed through Baker College. Courses below the 100 level do not apply to this requirement.
- 3. A minimum of 12 quarter hours completed through Baker College are within the program's discipline.
- 4. Basic competencies in reading, writing, and math are demonstrated.
- 5. A minimum cumulative grade point average of 2.0 is achieved.
- 6. A graduation application is completed and submitted.

Associate's Degree Graduation Requirements

Students are eligible to graduate if the following criteria have been met:

- 1. All requirements for the selected associate's degree are satisfied.
- 2. A minimum of 36 quarter hours required for the associate's degree are completed through Baker College. Courses below the 100 level do not apply to this requirement.
- 3. A minimum of 12 quarter hours completed through Baker College are within the degree's discipline.
- 4. A minimum cumulative grade point average of 2.0 is achieved.
- 5. A graduation application is completed and submitted.

Bachelor's Degree Graduation Requirements

Students are eligible to graduate if the following criteria have been met:

- 1. All requirements for the selected bachelor's degree are satisfied.
- 2. A minimum of 48 quarter hours required for the bachelor's degree are completed through Baker College. Courses below the 100 level do not apply to this requirement.
- 3. A minimum of 12 quarter hours completed through Baker College are within the degree's discipline and are at the 300 or 400 level.
- 4. A minimum cumulative grade point average of 2.0 is achieved.
- 5. A graduation application is completed and submitted.

Postbaccalaureate Certificate Graduation Requirements

Students are eligible to graduate if the following criteria have been met:

- 1. All requirements for the selected postbaccalaureate certificate are satisfied.
- 2. A minimum of 18 quarter hours required for the postbaccalaureate certificate are completed through Baker College. Courses below the 100 level do not apply to this requirement.
- 3. A minimum cumulative grade point average of 2.0 is achieved.
- 4. A graduation application is completed and submitted.

Requirements for Earning Additional Majors

Associate's Degree-Additional Majors

Students are eligible for an additional major within the same associate's degree if the following criteria are met:

- 1. All requirements for the additional major are satisfied.
- 2. A minimum of 24 quarter hours required for the additional major are completed through Baker College.
- 3. A minimum cumulative grade point average of 2.0 is achieved.
- 4. A graduation application is completed and submitted.

Bachelor's Degree-Additional Majors

Students are eligible for an additional major within the same bachelor's degree if the following criteria are met:

- 1. All requirements for the additional major are satisfied.
- 2. The additional major is offered within the same bachelor's degree.
- 3. A minimum of 28 quarter hours required for the additional major are completed through Baker College.
- 4. A minimum cumulative grade point average of 2.0 is achieved.
- 5. A graduation application is completed and submitted.

Requirements for Earning Additional Degrees— Baker College Graduates

Associate's Degree-Additional Degrees

Students are eligible to graduate with an additional Baker College associate's degree if the following criteria are met:

- 1. The additional degree is different.
- 2. All requirements for the selected additional associate's degree are satisfied.
- 3. A minimum of 24 quarter hours required for the additional associate's degree are completed through Baker College. Courses below the 100 level do not apply to this requirement.
- 4. A minimum cumulative grade point average of 2.0 is achieved.
- 5. A graduation application is completed and submitted.

Bachelor's Degree-Additional Degrees

Students are eligible to graduate with an additional Baker College bachelor's degree if the following criteria are met:

- 1. The additional degree is different.
- 2. All requirements for the selected additional bachelor's degree are satisfied.
- 3. A minimum of 48 quarter hours required for the additional bachelor's degree are completed through Baker College. Courses below the 100 level do not apply to this requirement.
- 4. A minimum of 28 quarter hours completed through Baker College are within the additional degree's discipline and are at the 300 or 400 level.
- 5. A minimum cumulative grade point average of 2.0 is achieved.
- 6. A graduation application is completed and submitted.

Requirements for Earning Additional Degrees— Non-Baker College Graduates

Associate's Degree-Additional Degrees

Students are eligible to graduate with an associate's degree if the following criteria are met:

- 1. All requirements for the selected associate's degree are satisfied. If the previously earned associate's or bachelor's degree is from a regionally accredited institution, the "Course Requirements for General Education Core in Associate's Degrees" are considered satisfied.*
- 2. A minimum of 36 quarter hours required for the associate degree are completed through Baker College. Courses

below the 100 level do not apply to this requirement.

- 3. A minimum of 24 quarter hours completed though Baker College are within the degree's discipline.
- 4. A minimum cumulative grade point average of 2.0 is achieved.
- 5. A graduation application is completed and submitted.

Bachelor's Degree-Additional Degrees

Students are eligible to graduate with a bachelor's degree if the following criteria are met:

- 1. All requirements for the selected bachelor's degree are satisfied*.. If the previously earned degree is an associate's degree from a regionally accredited institution, the "Course Requirements for General Education Core in Associate's Degrees" are considered satisfied.* If the previously earned degree is a bachelor's degree from a regionally accredited institution, the "Course Requirements for General Education Core in Bachelor's Degrees" are considered satisfied.*
- 2. A minimum of 48 quarter hours required for the bachelor's degree are completed through Baker College. Courses below the 100 level do not apply to this requirement.
- 3. A minimum of 28 quarter hours completed through Baker College are within the degree's discipline and are at the 300 or 400 level.
- 4. A minimum cumulative grade point average of 2.0 is achieved.
- 5. A graduation application is completed and submitted.

*Specific program requirements and/or program accreditation standards may impose limitations or additional requirements.

Undergraduate and Postbaccalaureate Certificates

Multiple certificates may be earned from Baker College.

Application for Graduation Form

All students who anticipate successful completion of their program course requirements for a degree or certificate must complete a graduation packet by October 10 for fall quarter graduation, February 6 for winter quarter graduation, April 7 for spring quarter graduation, and July 10 for summer quarter graduation.

Graduation Ceremony

The College conducts one formal graduation ceremony per campus each year. It is held at the conclusion of the spring quarter and includes all students who have completed a degree or certificate program during the current academic year. Students receiving special honors are recognized at this occasion (see Honor Graduates, page 243). To participate in the formal graduation ceremony, students must complete the Graduation Packet by the deadline.

Student Right-To-Know Graduation Rate

The following statistics apply to first-time, full-time students who began a certificate, associate's degree, or bachelor's degree at Baker College in Fall, 2002. First-time, full-time students, who are students that have never enrolled in college before and are taking 12 or more credit hours, comprised 46.7% of the new students at Baker College in Fall, 2002.

- 24.3% completed their programs in six years.
- 17.2% completed within 150% of the "normal" time for completion.
- 3.1% were still enrolled after six years.
- 2.3% transferred to another institution of higher learning.
- 19.5% were academically dismissed.
- The remainder withdrew from the College for various reasons during the six years.
These statistics are representative of only part of the student body. Many Baker College students transfer from other colleges and universities. A large percentage of Baker students are part-time rather than full-time students. Length of time to graduation and withdrawals are influenced by a variety of factors. Some students who begin their college career as full-time students drop to part-time status as they balance college, family, and work. Many students "stop out" of college for a quarter or two. This extends the time for completion of their programs. Some students, particularly older, working students, withdraw from college once their career objectives have been met. Baker College measures not only its graduation rate, but also its employment rate. The 2007 Graduate Employment Rate was 98 percent.

••• Student Services and General Policies/Information

Assessment at Baker College

Baker College gathers assessment data for program planning and accountability. A variety of data is collected at the course, program, and institution level. This data includes direct measures of student learning, course evaluations, instructor evaluations, employer evaluations, and various surveys of stakeholder satisfaction. Students may be asked to complete projects with rubrics, take standardized exams, complete surveys, and/or participate in other assessments. Baker College is committed to using the assessment data collected to continuously improve teaching and learning and to enrich the student's college experience.

Attendance

Since attendance has a direct bearing on a student's future employability, financial aid, and academic performance, students are expected to attend every class session for each course in which they are registered, except in case of illness or emergency.

On-ground

It is the responsibility of the classroom instructor to record and submit a record of attendance. When a student finds it necessary to be absent for an extended period, an explanation must be made to the instructor. The student will be administratively withdrawn for excessive absenteeism if any of the following criteria are met:

- 1. The student is absent for the first week of the course.
- 2. The student is absent for two consecutive weeks.
- 3. The student is absent for more than 40% of the course.

Additionally, if an instructor thinks that a student's absences have been excessive and unjustified, the instructor may request that the student be withdrawn from the course. Online Online

Attendance is reported on a weekly basis. Attendance is defined as submission of any assignment or discussion board posting. A student is considered absent for the week if he/she does not attend within the first five days of the week. The student will be administratively withdrawn for excessive absenteeism if any of the following criteria are met:

- 1. The student is absent for the first week of the course.
- 2. The student is absent for two consecutive weeks.
- 3. The student is absent for more than 33% of the course.

Additionally, if an instructor thinks that a student's absences have been excessive and unjustified, the instructor may request that the student be withdrawn from the course.

Bookstore

Bookstore hours may vary, but there will be ample opportunity for students to purchase books, supplies, and a variety of Baker College spirit sportswear.

Bookstore Return Policy

Payment Method:

Processing of a return will be completed according to the original sales tender as follows:

Cash: Refund will be paid in cash to the customer.

- Credit Card: Refund will be credited to the original credit card.
- Check: Refund will be posted to the student's account by the bookstore. The Business Office will verify that the check has cleared the bank after the 7-10 day waiting period and then issue a refund to the student.
- Gift Card: Refund will be credited to the gift card; if the original card is no longer available, a new gift card will be issued.

Books:

- Textbooks are available for full refund through the 3rd week of class if returned in the original condition.
- Books purchased for a 2nd 5-week course may be retuned within one week with the same stipulations as the rest of the return policy.
- Books purchased new but returned in used condition writing, highlighting, broken plastic shrink wrap or other minimal damage—may be refunded up to the used value during the refund period.
- All textbooks sold with components must be returned with components.
- Used books may be exchanged for new books; students will pay the price difference.
- Required workbooks/study guides/lab and student manuals may be returned through week 1 as long as the item is in new condition.

Non-Textbook Items:

- All non-textbook items, including reference books (unless marked non-refundable) are returnable within 10 days from date of purchase and must be in the same condition as when sold.
- Custom kits (art drafting, interior design, etc.) are non-returnable.
- Software is returnable up to 10 days from the date of purchase if it is unopened.
- Clothing/uniforms/shoes, unless otherwise indicated, is returnable up to 10 days from the date of purchase. Clothing must have all tags still attached and be in the same condition as purchased (no damage, stains, or odors).
- Electronic items are returnable up to 10 days from the date of purchase if unopened.

Other:

- No returns or exchanges on sale/clearance/special order items or shoes.
- Items with manufacturer defects will be exchanged within 10 days from the date of purchase for exact replacement if available.
- Other return policies or restrictions may apply.
- Some used textbooks are bought back at the end of each quarter by secondhand book companies. Not all books will be re-purchased each quarter.

Textbook Ordering/Purchases:

Students should purchase books at the campus they attend, using their required student identification card.

Students in the Online College, Corporate Services Division, and Graduate School must order their textbooks from the Online Bookstore. Purchases can be made by going to our Web site at: **www.baker.edu**, clicking on **STUDENT**, clicking on **SOLAR** system, choosing **STAR** system, and choosing **BOOKSTORES**.

Alternative methods to order textbooks include ordering by telephone: 1-800-339-9879, by e-mail: bookstore@baker.edu, or by fax: 1-810-766-4121. Books will be shipped directly to the student's home address.

Some students will be able to use financial aid to purchase textbooks. If the student drops/withdraws from all or part of his/her classes, his/her financial aid may be reduced. The student will owe the College for the book charges unless the books are returned for full credit to the bookstore (see campus bookstore for return policy).

Campus Safety

It is the mission of the Campus Safety Department to preserve, protect, and defend people and property, while respecting the rights of all persons on the Baker College campuses.

At every Baker College campus, it is both policy and practice to attempt to maintain a safe and secure environment for students, employees, and guests. Campus officials maintain a close working relationship with local law enforcement agencies. The College encourages and enforces adherence to all College, local, state, and federal laws and rules of conduct. This includes the prohibition of drugs, alcohol, and other controlled substances; firearms and other weapons; personal displays of violence; threatening behavior, vandalism, or being under the influence of drugs or alcohol.

Baker College institutionally supports and complies with all of the policies and regulations mandated in the 1990, Crime Awareness and Campus Security Act. In 1998, this Act was renamed as the "Jeanne Clery Act," and it requires higher education institutions to give timely warnings of crimes that represent a threat to the safety of students or employees, and to make public their campus security policies. It also requires the submission of the crime data to the United States Department of Education.

The Campus Safety Department prepares an Annual Security Report which is available at

www.baker.edu/safety. This report includes:

- 1. campus safety policies and procedures, including the procedures for reporting crimes and other emergencies on campus,
- 2. campus safety authority and jurisdiction,
- 3. security and facilities access,
- 4. security awareness programs,
- 5. sexual assault reporting procedures and preventative programs,
- 6. the Baker College alcohol and drug policy,
- 7. crime statistics including murder, forcible and non-forcible sex offenses, robbery, aggravated assault, burglary, and auto theft, and
- 8. arrests and disciplinary action statistics for alcohol, drug and/or weapons violations.
- 9. Fire Safety Standards and Measures (residence hall campuses only).

In addition to being available online, a paper copy of this report can be obtained through the Campus Safety Office at all Baker College campuses.

Career Services

Professional Career Strategies

Successful completion of the Professional Career Strategies course (WRK291B) initiates students into the job search process. In this course, students will demonstrate an understanding of employment demands, techniques in applying for jobs, and the system of direct communication with Career Services staff and potential employers. Students in associate's degree programs can complete the seminar requirement after completing 48 credit hours, and students in certificate programs can complete the seminar after completing 24 credit hours.

Full-Time Employment Assistance

A successfully employed graduate is the result of the College's continuous contact with hundreds of employers throughout the year and collaboration between Career Services staff and the individual who is actively seeking employment. The employment service of the College is a life-time benefit. Anytime graduates would like help in a job search, Baker College is willing and prepared to give assistance. Graduates are asked to notify the College with name and address changes so they may be kept aware of additional services provided by the College. While the Career Services Offices for all of the Baker College campuses have enjoyed substantial and consistent success in the employment of available graduates over an extended period of years, it is important to note that Baker College does not guarantee employment.

Part-Time Employment Assistance

Baker College students have held a wide variety of parttime jobs. If a student decides to seek part-time employment and has begun attending classes at Baker, the student may visit the Career Services Office for job postings.

Employment Statistics

The following chart details full-time employment statistics for Baker College for the past five years.

Percentage of Availal	le Graduates Employed
-----------------------	-----------------------

0			1 U		
	2004	2005	2006	2007	2008
Allen Park		100%	99%	99.2%	98.2%
Auburn Hills	100%	100%	99.5%	99.2%	99.5%
Cadillac	98%	97.8%	98%	98.9%	98.4%
Clinton Twp	99.4%	100%	99%	97.6%	98.1%
Flint	98.1%	99.4%	98.3%	98.9%	98.3%
Jackson	100%	99.5%	99.1%	99.2%	99%
Muskegon	97.9%	98.5%	97.6%	97.2%	97.1%
Owosso	99%	98.1%	97.5%	96.4%	97.6%
Port Huron	98.3%	99.1%	99.1%	98.1%	98.1%
		-			

This data is included as information only, and is accurate to the best of our knowledge. While the Career Services Office of all the Baker College campuses have enjoyed substantial and consistent success in the employment of available graduates over an extended period of years, it is important to note that Baker College does not guarantee employment upon completion of a program.

E-mail Correspondence

E-mail correspondence is increasingly used for distribution of information to members of the Baker College community. Electronic forms of correspondence are timelier and more efficient than traditional paper correspondence and provide better service to the recipient and potential cost savings to the College.

Since all staff, faculty, and registered students at Baker College have e-mail accounts created by virtue of their association with Baker College, electronic correspondence is one of the authorized means of communication from Baker College to its constituents. Notification by e-mail is equivalent to notification by letter or by phone.

E-mail correspondence shall be made to the "Preferred Email Address" of the member. The "Preferred E-mail Address" is the e-mail address issued by the College (an e-mail address ending in "@baker.edu"). Students have the option to define a different "Preferred E-mail Address" by entering it in the Baker College SOLAR System; however, the College cannot guarantee delivery of these messages to non-Baker addresses.

Internet Account

Any registered student at Baker College automatically receives an Internet Account. This account creates a personal e-mail account, an online classroom account, and gives students access to some restricted areas on Baker College's Web site, including access to many library resources. This account also gives students access to download some software that the College can distribute only to students. Finally, this account allows students to access the Student Online Links to Academic Records (SOLAR) System. The SOLAR System allows students to safely and privately access their own student data found on our administrative computer system. Students can view grades, transcript information, billing information, and register for classes through this system. For further information visit **www.baker.edu** and follow the link for student resources.

Health Services

It is the desire of Baker College to provide a safe, comfortable, and orderly campus environment. As such, the College has established a policy to ensure that the health and safety of students, visitors, staff, and faculty by training Campus Safety Officers and other appropriate staff in the application of First Aid and Automatic External Defibrillator (AED) to be used in emergency situations.

In cases of serious illness or accidents, Baker College staff will assist as possible in contacting public medical emergency response. People who wish to apply first aid do so at their own risk. In cases of illness or accident, whether or not emergency response is required, Baker College personnel will immediately notify an Academic Advisor, Residence Hall staff, Campus Safety, or Buildings and Grounds staff, as applicable.

If an accident or injury occurs on Baker College premises, the College will make every effort to assist the student in receiving immediate medical attention. Baker College will bear the cost of emergency services when necessary.

Students should know their own health care needs far better than anyone else. For this reason the primary responsibility for health care rests with the individual. Students should take special care to thoroughly complete the Emergency Contact Information form. This information will help the staff in providing emergency response action.

Baker College reserves the right to require students who contract a contagious disease to not attend classes until they present a doctor's statement that they are no longer infectious. According to the Michigan Department of Health, all Baker College students should have up-to-date immunizations.

All Category A employees are identified through an internal assessment process. Hepatitis B vaccinations are made available at no cost to Category A employees and are given under the supervision of a licensed healthcare professional. Employees may refuse immunization by signing a vaccination declination. If the employee has not received the HBV vaccination, it can be administered within twenty-four hours of an exposure incident.

Library Services

The Baker College Library mission is to fully support the educational endeavors of students, faculty, and staff of Baker College by providing effective service and instruction, by collecting and organizing curriculum focused resources, and by providing access to new information products and services, thereby, making the library a destination conducive to effective learning and academic success.

Campus Student Services

The Libraries of Baker College provide students with a variety of books, periodicals, computer-based resources, and course-based resources for study, research, and personal growth.

All Baker College Libraries are electronically linked through PALnet, a library automation consortium. The Baker College Book Catalog lists nearly 300,000 books owned by the Baker Library System. Interlibrary loan services provide students and staff access to library books and journal articles statewide, nationally, and globally.

Baker College students may use their Baker ID/library card at all Baker Library locations. The ID card also allows remote access to library resources from home via the Baker Library homepage at **www.baker.edu/library**.

Highlights of services and resources at Baker College Libraries include:

- Professional staff to assist with research.
- Online reference services for each campus library location via the Baker College Library homepage at www.baker.edu/library, then select Questions and Suggestions.
- Almost 700 current magazine, journal, and newspaper subscriptions in paper format.
- Access to the Book Catalog, multiple online, full-text journal databases, and electronic books.
- Career study materials collection.
- Ability to place holds on books within the Baker College collection.
- Baker College libraries take part in the statewide resourcesharing initiative, MeLCat. Participating MeLCat libraries allow their users (MI residents) to request books and audiovisual resources statewide. These resources are delivered to your Baker College Library for pick up.
- Pleasant and comfortable facilities for research, study, reading, video viewing, and meeting.

Online Student Services

Students who are enrolled in online courses have access to all of the traditional library services.

Highlights of online library services and resources include:

- Online reference services during daytime, evenings, and weekends.
- Toll-free phone number for online students: 888-854-1058.
- Technical assistance/troubleshooting for remote services to the online resources.
- Interlibrary loan delivery for books via UPS (in US only); journal articles delivered electronically whenever possible.
- For additional details log into the Bb classroom and go to My eLibrary.

Sexual Harassment Policy

Pursuant to Baker College's policy of equal employment opportunity, the College will maintain a working/educational environment for its employees and students which is free from sexual harassment.

Sexual harassment is illegal and against the policies of this College.

Sexual harassment involves (a) making unwelcome sexual advances or requests for sexual favors or other verbal or physical conduct of a sexual nature a condition of employment/education or (b) making submission to or rejection of such conduct the basis for employment/educational decisions or (c) creating an intimidating, offensive, or hostile working/educational environment by such conduct. The following are examples of sexual harassment:

Verbal: Sexual innuendo, suggestive comments, insults, threats, jokes about gender-specific traits, and sexual propositions;

Nonverbal: Making suggestive or insulting noises, leering, whistling, and making obscene gestures;

Physical: Touching, pinching, brushing the body, coercing sexual intercourse, and assault.

Any employee/student who believes he/she has been the subject of sexual harassment should report the alleged conduct immediately to: Rosemary Zawacki, Vice President for Human Resources, Baker College, 1050 West Bristol Road, Flint, MI 48507, phone: (810) 766-4028. E-mail: rosemary.zawacki@baker.edu.

A confidential investigation of any complaint will be undertaken immediately.

Any employee/student found by the College to have sexually harassed another employee/student will be subject to appropriate disciplinary sanctions ranging from a warning in his/her file up to and including termination/expulsion.

Retaliating or discriminating against an employee/student for complaining about sexual harassment is prohibited.

The College recognizes that the issue of whether sexual harassment has occurred requires a factual determination based on all evidence received. The College also recognizes that false accusations of sexual harassment can have serious effects on innocent men and women. We trust that all employees/students will continue to act in a responsible and professional manner to establish a pleasant working/educational environment free of sexual harassment.

Equal Opportunity Policy Statement

It is the policy of Baker College not to discriminate on the basis of race, color, creed, religion, sex, national origin, age, disability, or other legally protected characteristic in the administration and providing of educational programs, services, activities, and employment, or recruitment. Inquiries regarding this policy can be directed to Rosemary Zawacki, 1050 West Bristol Road, Flint, MI 48507, 810-766-4028, e-mail at rosemary.zawacki@baker.edu.

The College declares and reaffirms a policy of equal employment opportunity, equal educational opportunity, and nondiscrimination, where applicable, in the provision of educational services to the public. The College will make all decisions regarding recruitment without discrimination on grounds of race, color, creed, religion, sex, national origin, age, disability, or other legally protected characteristic which cannot lawfully be the basis for an admissions/employment decision. The College reaffirms its policy of administering all of its educational programs and related supporting services and benefits in a manner which does not discriminate because of a student's or prospective student's race, color, creed, religion, sex, national origin, age, disability, or other legally protected characteristic which cannot be lawfully the basis for the administration of such services.

Baker College commits itself to a program of Affirmative Action/Equal Employment Opportunity, set forth herein, to encourage the application of veterans, minority, disabled and women students, to identify and eliminate the effects of any past discrimination in the provision of educational procedures which will assure equal treatment and equal access to the facilities and educational benefits of the institution to all students, as required by law.

The College reaffirms its policy of nondiscrimination, on the basis of minority status, sex, or other impermissible grounds, in the provision of all services provided to members of the public by facilities under control of the College.

Further, the College takes affirmative action to employ, promote, and otherwise treat qualified individuals with disabilities, disabled veterans, and Vietnam Era veterans without regard to either their disability or status. This policy shall apply in the following areas: admissions, student educational opportunities and services, employment, promotion, demotion or transfer, layoff, termination, compensation, and selection for training programs.

Baker College commits itself to a continuing program to assure that unlawful discrimination does not occur in the services it renders to the public, and that those sectors of the public most affected by this policy be kept informed of its content.

Rehabilitation Act of 1973 and American with Disabilities Act of 1990 (ADA)

Baker College is committed to the implementation of regulations from Section 504 of the Rehabilitation Act of 1973 and the American with Disabilities Act of 1990 as they apply to persons with disabilities in the following ways: all new facilities are barrier free; programs, classes, and activities in existing facilities are made accessible to persons with disabilities; reasonable and appropriate adjustments in academic requirements are made to ensure full educational opportunity for students with disabilities; and auxiliary aids and services, when necessary, are provided in a timely manner to afford an individual with a disability an equal opportunity to effectively participate in, and enjoy the benefits of, a service, program, course, or activity conducted by the College.

A postsecondary student with a disability who is in need of auxiliary aids is obligated to provide notice of the nature of the disabling condition to the College's Academic Counseling/Advising Office and to assist the College in identifying appropriate and effective auxiliary aids. The student must identify the need and give adequate notice of the need. In response to a request for auxiliary aids, the College will require from the student supporting diagnostic test results and professional prescriptions for auxiliary aids.

GRIEVANCE PROCEDURES FOR TITLE VII OF THE CIVIL RIGHTS ACT OF 1964, TITLE IX OF THE EDU-CATION AMENDMENTS OF 1972, SECTION 504 OF THE REHABILITATION ACT OF 1973, OR THE AMERICAN WITH DISABILITIES ACT OF 1990 (ADA)

SECTION I

If any person believes that BAKER COLLEGE has inadequately applied the principles and/or regulations of Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, or the American with Disabilities Act of 1990 (ADA) he/she may bring forward a grievance to the Equal Employment Opportunity/Affirmative Action /ADA Officer, Ms. Rosemary Zawacki, at 1050 West Bristol Road, Flint, MI 48507, 810-766-4028, e-mail at rosemary.zawacki@baker.edu.

SECTION II

The person who believes he/she has a valid basis for grievance shall discuss the grievance informally and on a verbal basis with the campus chief academic officer, who shall function as the designated campus EEO/AA/ADA Officer. The campus chief academic officer shall in turn investigate the complaint and reply with an answer to the complainant. He/she may initiate formal procedures according to the following steps:

STEP 1

A written statement of the grievance signed by the complainant shall be submitted to the campus chief academic officer, within five (5) business days of receipt of a response to the informal complaint. The campus chief academic officer shall further investigate the matters raised in the grievance and reply in writing to the complainant within five (5) business days.

STEP 2

If the complainant wishes to appeal the decision of the campus chief academic officer, he/she may submit a signed statement of appeal to the campus president within five (5) business days after receipt of the campus chief academic officer's response. The campus president shall meet with all parties involved, formulate a conclusion, and respond in writing to the complainant within ten (10) business days.

A grievance or inquiry may be made at any time to the Office for Civil Rights Region V, Department of Education, Room 700C 7th Floor, 401 South State Street, Chicago, IL 60605-1202.

The campus chief academic officer will provide a copy of the College's grievance procedure and investigate all complaints in accordance with this procedure on request.

A copy of each of the acts and regulations on which this notice is based may be found in the campus chief academic officer's office.

Student Activities

Baker College recognizes that student activities are an important part of college life. A variety of extracurricular activities for students of all ages is provided during each school year. Activities include athletic, recreational, and entertainment opportunities for students to gain new friends, develop leadership skills, and make college life more meaningful. Each campus has program-related clubs and organizations that permit students to expand experiences beyond the classroom. Community-sponsored events are also promoted. The Residence Life Staff or Academic/Administrative Office on each campus will have information on available activities. Students are encouraged to use leisure time productively and to participate in diverse activities.

Transferability of Credits

Most colleges and universities will accept Baker College credit. The exact amount of credit accepted depends upon the compatibility of the Baker courses with the requirements for the degree sought. Students should check with the institution to which they intend to transfer for information on that institution's transfer credit policy. Non-traditional credit (e.g. experiential, articulation, etc.) may not be transferable to other colleges.

Michigan Statute Regarding College Transcripts

Michigan has passed a statute criminalizing the alteration of a college or university transcript. MCL 380.1809(4) states

In addition to any other penalty provided by law, a person who uses or attempts to use a college or university transcript or certificate or other credential that he or she knows is fraudulently obtained, altered, or forged...in this state is guilty of a misdemeanor, punishable as follows:

- 1. For the first offense, by imprisonment for not more than 93 days or a fine of not more than \$500.00 or both.
- 2. For a second or subsequent offense, by imprisonment for not less than 93 days or more than six months, or a fine of not less than \$500.00 or more than \$1,000.00 or both.

Accreditation

Baker College has been granted legal authority by the state of Michigan to operate as a nonprofit educational corporation and is empowered to grant certificates, associate's degrees, bachelor's degrees, master's, and doctorate degrees. It is approved for veterans' benefits.

Baker College is recognized as an institution of higher education by the U.S. Secretary of Education, U.S. Department of Education.

Baker College is accredited by the following regional institutional accreditor:

The Higher Learning Commission

Baker College is accredited by The Higher Learning Commission, A Commission of the North Central Association of Colleges and Schools, 30 North LaSalle Street, Suite 2400, Chicago, Illinois 60602-2504; (800) 621-7440; Web address: www.hlcommission.org. Baker College is an Academic Quality Improvement Program (AQIP) participant.

The following certificates and degrees have program accreditation:

Master of Business Administration

This program is accredited by the International Assembly for Collegiate Business Education (IACBE), PO Box 25217, Overland Park, KS 66225; (913) 631-3009.

Master of Occupational Therapy

This program is currently recognized as a fully accredited program by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, PO Box 31220, Bethesda, MD 20824-1220; (301) 652-AOTA (4720).

Bachelor of Science in Legal Studies
 This program is approved by the American Part

This program is approved by the American Bar Association (ABA), 321 North Clark Street, Chicago, IL 60610; (800) 285-2221. (This program is ABA approved on the Auburn Hills campus only.)

- Bachelor of Science in Mechanical Engineering This program is accredited by the Engineering Accreditation Commission of ABET, Inc., 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; (410) 347-7700.
- Bachelor of Health Science, Pre-Occupational Therapy This program is currently recognized as a fully accredited program by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, PO Box 31220, Bethesda, MD 20824-1220; (301) 652-AOTA (4720).

Bachelor of Radiation Therapy

This program is accredited by the Joint Review Committee on Education in Radiologic Technology, 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182; (312) 704-5300.

Certificate and Associate of Applied Science, Automotive Services Technology

This program is certified by the National Automotive Technicians Education Foundation (NATEF), 13505 Dulles Technology Drive, Herndon, VA 20171-3421. (These programs are accredited on the following campuses: Cadillac, Clinton Township, Flint, and Owosso.)

- Certificate and Associate of Applied Science, Dental Assisting This program is accredited by the Commission on Dental Accreditation, 211 East Chicago Avenue, Chicago, IL 60611-2678; (312) 440-2718; Web address: www.ada.org/prof/ed/accred/commission/index.asp.
- Certificate and Associate of Applied Science, Emergency Services Management

This program is approved by The Michigan Department of Community Health, PO Box 30670, 611 W. Ottawa, Lansing, MI 48906; (517) 335-0918. (Approved at levels: EMT Basic, EMT Specialist & Paramedic.)

- Associate of Applied Science, Dental Hygienist This program is accredited by the Commission on Dental Accreditation, 211 East Chicago Avenue, Chicago, IL 60611-2678; (312) 440-2718; Web address: www.ada.org/prof/ed/accred/commission/index.asp.
- Associate of Applied Science, Diagnostic Medical Sonography This program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, FL 33756; phone: (727) 210-2350; fax: (727) 210-2354; Web address: www.caahep.org, on the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography (JRC-DMS); www.jrcdms.org.
- Associate of Applied Science, Echocardiographic Technology This program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, FL 33756; phone: (727) 210-2350; fax: (727) 210-2354; Web address: www.caahep.org, on the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography (JRC-DMS); www.jrcdms.org.
- Associate of Applied Science, Health Information Technology This program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM), 233 North Michigan Avenue, 21st Floor, Chicago, IL 60601-1683; (312) 233-1100.
- Associate of Applied Science, Medical Assistant The Medical Assistant programs are accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, FL 33756; phone: (727) 210-2350; fax: (727) 210-2354; Web address: www.caahep.org, on the recommendation of the Medical Assisting Education Review Board (MAERB), 20 North Wacker Drive, Suite 1575, Chicago, IL 60606-2930; (312) 899-1500.
- Associate of Applied Science, Medical Laboratory Technician This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 8410 West Bryn Mawr Avenue, Suite 670, Chicago, IL 60631-3415; (773) 714-8880.

PURPOSES AND GOALS

It is the belief of Baker College that quality education is the result of a cooperative effort shared between the College and the business community toward the development and implementation of relevant curricula. With this purpose in mind, the following goals have been established for members of the Advisory Boards of Baker College:

- 1. To provide responsible advisement and to make recommendations to the staff of Baker College regarding the development and operation of instructional programs.
- 2. To provide Baker College instructors with timely, professional information on the new methods, techniques, and procedures used in specific fields of business and technology.
- 3. To help Baker College determine community needs and objectives in the areas of curriculum and placement.
- 4. To provide the essential communication link between Baker College and the business community.
- 5. To advise on curriculum content, facilities, and equipment.
- 6. To provide assistance to the College in the areas of externship, co-op, and placement; as guest speakers for selected courses; as field trip sites; and on public relations activities.
- 7. To evaluate the College's progress made toward program outcomes.
- 8. To provide feedback concerning program assessment methods/tools and assessment findings.

Baker College faculty are required to have earned (i.e., not honorary) degrees from regionally-accredited institutions. Faculty with academic degrees from countries outside the United States must have their transcripts evaluated by an independent third party to establish regional accreditation equivalency. The following two companies are able to provide an evaluation of international transcripts:

Educational Credential Evaluators. PO Box 514070, Milwaukee, WI 53203-3470; phone: (414) 289-3400; fax: (414) 289-3411; Web site: http://www.ece.org; e-mail: eval@ece.org.

World Education Services, PO Box 5087, Bowling Green Station, New York, NY 10274-5087; phone: (800) 937-3895; fax: (212) 739-6100; Web site: http://www.wes.org; e-mail: info@wes.org.

The following six regional accreditation commissions are recognized by the U.S. Department of Education and by the Council on Higher Education Accreditation (CHEA) as the regional authorities on the quality of institutions of higher education in the United States:

Middle States Commission on Higher Education (accredits institutions in Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, and the Virgin Islands)

New England Association of Schools and Colleges (accredits institutions in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont)

The Higher Learning Commission of the North Central Association (accredits institutions in Arizona, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, New Mexico, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, West Virginia, Wisconsin, and Wyoming)

The Commission on Colleges and Universities of the Northwest Association of Schools and of Colleges and Universities (accredits institutions in Alaska, Idaho, Montana, Nevada, Oregon, Utah, and Washington)

The Commission on Colleges of the Southern Association of Colleges and Schools (accredits institutions in Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia)

Western Association of Schools and Colleges (accredits institutions in California, Guam, and Hawaii)
