

# BAKER COLLEGE STUDENT LEARNING OUTCOMES

## HIM3050 Information Governance 3 Semester Hours

### **Student Learning Outcomes & Enabling Objectives**

- 1. Investigate how smart technology is utilized in departments of a healthcare setting.
  - a. Describe the difference between an Electronic Medical Record (EMR) and an Electronic Health Record (EHR).
  - b. Explain how the role of technology transfers to the source system (EMR).
  - c. Summarize how specific tools can be utilized in patient care (e.g., Smartphones, Digital Cameras, Tablets).
  - d. Explore how telehealth has impacted the provider and patient experience.
  - e. Investigate how the use of Artificial Intelligence (AI) has changed roles, impacted processes, and advanced patient care.
  - f. Discuss how the HIM professional collaborates with other departments for electronic discovery.
- 2. Summarize the role of a HIM professional involved in document oversight and quality assurance.
  - a. Research the document control process.
  - b. Create a policy and form for the document control process.
  - c. Research applicable regulations and standards (e.g. Joint Commission/Centers for Medicaid and Medicare Services).
  - d. Develop an implementation plan and timeline.
  - e. Describe the quality assurance process for forms.

### **Big Ideas and Essential Questions**

#### **Big Ideas**

- Innovative Technologies
- Quality Assurance Procedures

#### **Essential Questions**

- 1. Why would a HIM professional select innovative technology (e.g., AI) for workflow processes?
- 2. What role does quality assurance play in determining data integrity and access control?

These SLOs are not approved for experiential credit.

Effective: Fall 2024
