

**BAKER COLLEGE
STUDENT LEARNING OUTCOMES**

**MIS 6010 Information Security
3 Semester Hours**

Student Learning Outcomes & Enabling Objectives

1. Demonstrate foundational knowledge of information systems (IS) security concepts as they apply to the management of IS security in a large organizational environment.
2. Describe and identify policy frameworks, legal and ethical concerns, and best practices in information security management.
3. Conduct a security audit of an organization and report on the results with appropriate suggestions for amelioration of problem areas identified.
4. Respond to risk management needs of organizations by identifying, assessing, and controlling risk.
5. Create models for the implementation or update of security systems based on the information systems infrastructure of the organization.
6. Detect the need for, and develop programs to maintain security across systems, across time, and across the enterprise.
7. Be knowledgeable of current IS topics in the news, such as the perceived versus actual threats to security systems.
8. Understand via hands-on exercises, external threats and mitigation strategies

These SLOs are not approved for experiential credit.

Effective: Summer 2018
