BAKER COLLEGE
STUDENT LEARNING OUTCOMES

MIS 6710 Information Systems Integration Project I
3 Semester Hours

Student Learning Outcomes & Enabling Objectives

1. Appropriately identify and develop scope for an information systems integration or development project
2. Develop a plan for managing the project
3. Effectively communicate with various stakeholders of an information systems development or integration project regarding user needs, system requirements, system functions, interfaces, etc.
4. Determine system requirements
5. Conduct system design
6. Create documentation
7. Adequately adapt to and manage change, an inevitable event in every project
8. Work either individually or in a team on the project following the SDLC model or other system development models
9. Conduct ethical behaviors in an information system development or integration context
