

BAKER COLLEGE
STUDENT LEARNING OUTCOMES

MNP2070 Server III
3 Semester Hours

Student Learning Outcomes & Enabling Objectives

1. Identify the role and basic functions of Azure, and how Azure interact with hardware and software applications.
 - a. Demonstrate understanding of the Microsoft Azure platform.
 - b. Demonstrate how Microsoft Azure can be utilized within or as a replacement for an organizations infrastructure.
 2. Identify and describe basic security issues of Azure.
 - a. Configure applications, templates, and operating systems using Azure.
 - b. Deploy applications, templates, and operating systems using Azure.
 3. Execute skills necessary to perform basic operations involved in system administration of Azure.
 - a. Design and deploy scripts for automation in Azure.
 - b. Implement automation and parallel processing using Azure
 4. Identify the roles and basic functions of an operating system and how operating systems interact with hardware and software applications
 - a. Demonstrate fundamental security principles as applied to an OS
 - b. Identify Access control models and mechanisms related to an OS
-

CAE-CD Foundational: IT Systems Components (ISC)

CAE-CD Technical Core: Operating Systems Concepts (OSC)

These SLOs are approved for experiential credit.

Effective: Spring 2021
