

BAKER COLLEGE
STUDENT LEARNING OUTCOMES

NUR6150 Advanced Pathophysiology
3 Semester Hours

Student Learning Outcomes and Enabling Objectives

1. Describe the developmental physiology, normal etiology, pathogenesis, and clinical manifestations of select altered health states.
 2. Evaluate the impact of genetic and genomic advances in healthcare.
 3. Analyze the relationship between normal physiologic and pathological phenomena produced by altered states across the life span.
 4. Analyze physiologic responses to illness and treatment modalities.
 5. Apply current research-based knowledge regarding pathological changes in selected disease states.
 6. Recognize the presence and impact of physiological comorbidities on health conditions.
