

BAKER COLLEGE
STUDENT LEARNING OUTCOMES

OTA2010

OTA Clinical Documentation and Health Records
Semester Credit Hours 2.

Student Learning Outcomes

1. The student uses technology to support professional performance by documenting in electronic health records accurately.
2. The student applies pertinent patient data to complete screenings, evaluations, and an occupational profile.
3. The student gathers client performance data based on patient goals according to OTPF
4. The student documents occupational therapy services accurately to meet formal standards and reimbursement requirements.
5. The student demonstrates health literacy to identify strategies to effectively educate clients, caregivers, and others on occupation, health promotion, and safety, using clear communication and common medical terminology.
6. The student recognizes the impact federal and state regulations, such as HIPAA, relevant CPT codes for OT services, World Health Organization classifications, and ICD-10 classifications have on occupational practice.
7. The student identifies quality improvement efforts that enhance care quality.
8. The student identifies the role of leadership skills and professional responsibilities related to liability, ethical practices, documentation, quality assurance, and billing for both OT/OTA roles.

These SLOs are not approved for experiential credit.

Effective: Fall 2025
